# So real you have to see it to believe it.

## So real you have to see it to believe it.

### So real you have to see it to believe it.

(Hey, is there an echo in here?)

If the Canon BJC-4300 Color Bubble Jet™ printer can generate photo-realistic images this monumentally gorgeous, imagine how grand everything you print will be. Whether you need a brilliant color presentation or a razor-sharp business document, the \$199\* BJC-4300 delivers. Our exclusive Drop Modulation Technology™ puts more detail in the detail and reduces graininess.

\$99\* turns the BJC-4300 into a 360 dpi color sheetfed scanner. Instantly.

Plus, with our optional Photo Ink, you get true photo-quality printing. Pop in the optional Color Image Scanner Cartridge, and you've got a color sheetfed scanner, too. Your key to even more amazing results? Free Canon Creative 3 software.\*\* But don't take our word for it. Come in and see for yourself. Just don't stand too close to the edge. To get more information, give us a call at 1-800-848-4123 or visit our Web site at [www.ccsi.canon.com](http://www.ccsi.canon.com). **See what we mean.™**

# Corel® WordPerfect® Suite 8

## Fully Integrated Web

"If you use the Web a lot, and especially if you depend on a corporate intranet, Netscape Communications' newest offering could be the most important application on your computer."

*Business Week*, June 23, 1997

"Netscape's New Browser Is The Best One Yet."

*Fortune*, May 26, 1997

"The release of Netscape Communicator 4.0 ushers in an exciting new era for corporations, end users, and applications developers alike. Just as the advent of business productivity suites changed the face of the software market, so should Communicator (and soon, IE 4.0) change the way corporations do business both internally and externally."

*PC Magazine*, August 1997

"All in all, Navigator 4.0 is the best Web browser available today."

*Wall Street Journal*, July 10, 1997

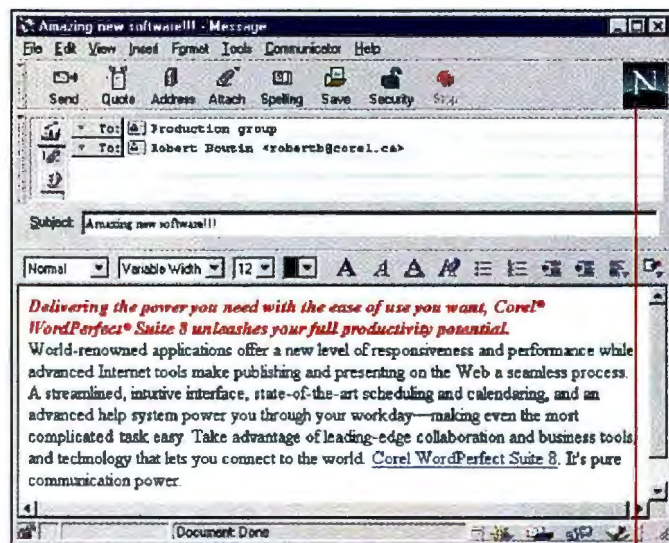

"Unlike Microsoft's Webcaster push technology, Netscape's Netcaster uses existing standards such as HTML, Java and JavaScript."

*InfoWorld*, June 2, 1997

"But there's further cause for celebration. For instance, Communicator 4.01 consumes about 3 MB of RAM less than Navigator 3.0."

*C/Net*, July 10, 1997

Corel® WordPerfect® Suite 8 delivers the best features to stay on top—in business, at home, wherever you want to make an impact. All-new applications like **CorelCENTRAL™ 8†** with fully integrated **Netscape® Communicator**—available in *both* the standard and professional versions—maximize your communication, organization and teamwork capabilities. Corel WordPerfect Suite 8—office suite technology that takes you further.

## COVER STORY

## TOP 100 HARDWARE BUYS: FROM BEST PCs TO MUST-HAVE GEAR

## HARDWARE BUYS

It's the end of 1997, and we've discovered dynamite buys for hard-to-please technophiles, from great gadgets to all-purpose printers to powerful PCs. Our Top 100 Hardware Buys helps you pick great products and avoid overhyped clunkers.

- 154 GADGETS, GIZMOS, AND GEAR  
181 PERSONAL PRINTERS:  
TEXT, GRAPHICS, AND...PHOTOS?  
293 DREAM HOME PCs

## FEATURES

- 154 GADGETS, GIZMOS, AND GEAR

## HARDWARE BUYS

Toss out that Sharper Image catalog! These high-tech gizmos are great for work or play. Store 250MB on tiny cartridges, surf the Web on a cell phone, revel in palm-size, big-sound speakers. To satisfy gizmo lust, start here.

- 181 PERSONAL PRINTERS:  
TEXT, GRAPHICS, AND...PHOTOS?

## HARDWARE BUYS

Personal printers can produce sharp text and vivid color—so now photo quality has become The Next Big Thing. We test 23 printers, from color ink jets to monochrome lasers, and find you can't expect to print photos good enough to frame.

- 206 COMMUNICATOR VS. INTERNET EXPLORER: AND THE WINNER IS...

## REVIEW

Despite unstable installations, innovation wins out in this browser war: desktop integration, easy-to-track browsing, automatic URL entry, powerful e-mail. Our take: For now Internet Explorer has the edge.

243

- 243 AGP GRAPHICS: A BUMPY RIDE

## PREVIEW

Intel's new graphics bus promises enhanced 3D and faster performance on Pentium IIs. But our tests pitting the first AGP cards against PCI cards reveal potholes on the road to rip-roaring 3D. We'll explain how to avoid problems and find an AGP board that'll work for you.

## SPECIAL REPORT

## SMALL OFFICE, HOME OFFICE

- 267 THE DO-IT-YOURSELF NETWORK

Does your small office share files? Applications? Printers? Modems? Of course it does. Take our friendly consultant's advice: Networking your small office doesn't have to be expensive or complicated.

- 279 HOT PICKS FOR THE HOME OFFICE

Quicken for home businesses, a \$999 color copier, Internet e-mail on steroids, and more.

## TOP OF THE NEWS

### 58 NT 5.0: WINDOWS WORTH WAITING FOR?

Adding a slick Win 98 interface to NT's established stability and security, NT 5.0 could be a good alternative for businesses. But be careful—compatibility problems persist.

### 68 "CENTAUR INSIDE" MEANS HIGH PERFORMANCE ON A BUDGET

Centaur's C6 delivers PCs that match Pentium MMX performance on Win 95 apps but cost a third less.

### 74 MOOOVE OVER GATEWAY...

Eleven vendors challenge Gateway by offering custom-built PCs that you can order on the phone or the Web.

### 78 TV-STYLE ADS INVADE THE WEB

Full-blown ads with slick animation and sound may soon interrupt your surfing.

### 80 WINDOWS CE 2.0 ADDS POWER, COLOR

Better performance, larger color LCDs, and better connectivity are improvements that come with Windows CE 2.0 palmtops.

## TOP 100

### 293 DREAM HOME PCs

#### TOP 100

#### HARDWARE BUYS

Why are they dream home PCs? Easy setup, piles of home software, and lots of extras. Our expanded Top 10 Home PCs chart has something for everyone, from HP's speedy but pricey Pentium II-266, to Gateway's \$1499 PMMX-166 that comes with—surprise!—a color printer.

### 296 POWER DESKTOPS

#### TOP 20

Many PCs debuting on the Power chart this month are Pentium II-266s, as are two Best Buys from Dell—the Dimension XPS D266 and the OptiPlex Gx266.

### 312 BUDGET DESKTOPS

#### TOP 20

With PCs averaging a little over \$1500, the Budget chart never looked more tempting. Among the most enticing: Quantex's new \$1949 Pentium MMX-233.

### 324 NOTEBOOKS

#### TOP 10

Gateway's Solo 2300XL claims two records—the fastest portable we've tested and longest battery life.

### 332 HOME PCs

#### TOP 10

Our top pick for power home PC is Dell's PMMX-233 Dimension XPS M233s, packed with a 4.2GB hard drive and an Iomega Zip drive. The top budget home PC is Gateway's Pentium MMX-166, which comes with a color printer for \$1499.

### 337 PERSONAL PRINTERS

#### TOP 10

Minolta's PageWorks 6L is our new monochrome Best Buy, while Canon's BJC-4300 cops the color Best Buy.

### 339 15-INCH MONITORS

#### TOP 10

Four newcomers move onto the chart this month, led by models from Goldstar, MAG, and MaxTech.

### 343 GRAPHICS BOARDS

#### TOP 10

ATI's Xpert@Work debuts with speedy 2D but so-so 3D images.

### 345 MODEMS

#### TOP 10

Global Village's 56-kbps modem is number one with its easy installation and dirt-cheap \$119 price.

## HERE'S HOW

### 370 ANSWER LINE

Pick the default programs for particular file types, open Internet Mail fast, password-protect Win 95.

### 378 WINDOWS TIPS

Get the hang of keystroke and mouse shortcuts, root out print problems.

### 386 SPREADSHEETS

Create charts that resemble Gantt charts in Excel, shrink 1-2-3 97's InfoBox.

### 390 WORD PROCESSING

Make long documents easier to navigate, track revisions in Word 97.

### 396 INTERNET TIPS

Automate e-mail in Internet Explorer 4.0 and Communicator 4.01.

### 404 HARDWARE TIPS

Check out the best ways to keep your PC, mouse, and keyboard clean.

### 412 UPGRADE GUIDE

Install a second EIDE hard drive, step-by-step.

352

412

## @HOME

### 347 @HOME PRODUCTS

Get your photos digitized and distributed, over the Internet or with the latest printer/scanner/copier/fax machine.

### 350 KEEPING UP

Web sites and services for consumers.

### 352 HOME OFFICE

How to improve Windows 95, without Microsoft.

Computer Solutions for business are a complex affair. In the Corporate Arena, demands are high and patience is short. At Unicent we fully understand this. That's why we offer a variety of unique system choices, each designed to be a "perfect fit" to your business needs.

Whether you're a corporate powerhouse or a "one-person show," Unicent's Avanta line will keep you running both effectively and efficiently. Our strong commitment to business solutions has resulted in PCs that are "Wired for Management." Avanta business PCs with Intel LANDesk™ Client Manager Software allow you to manage your PC, diagnose problems and monitor the overall health of your system, whether you're on a small network, large network or no network at all. And with our optional Intel LANDesk™ Workgroup Manager Suite you'll be able to perform maintenance, upgrade software and catalogue system resources of all the PCs across your network, cutting down on lost productivity and reducing your Total Cost of Ownership.

**UNICENT TECHNOLOGIES FEATURES THE LATEST TRENDS AND TECHNOLOGY.** Due to solid partnerships with industry leaders & innovators, **WE ARE THE FIRST** to offer technology as it happens, long before many of our competitors. Unicent Avanta Business PCs feature the **INTEL 440LX AGPset**, creating the ultimate performance for the latest power hungry applications. This chipset provides support for ECC RAM, **ACCELERATED GRAPHICS PORT**, OnNow, SDRAM, and Ultra DMA/33 Hard Drive protocol. The next revolution in graphics technology is here with the **MATROX MILLENNIUM II** Video

## "To COMPETE IN THE CORPORATE ARENA, YOU NEED A POWERFUL ALLY."

Card. This card offers superior graphics performance, utilizing the MGA-2164W processor. This sixth generation of the MGA chip is a completely new design of the industry standard 64-bit graphics processor and is complemented by a fast 250MHz RAM DAC and powerful dual-ported WRAM memory, delivering optimum acceleration in ultra-high resolutions such as 1920 x 1200. Avanta's also feature **TOSHIBA'S 24X MAX CD-ROM DRIVE**, delivering the fastest data transfer rates possible, as well as the industry's fastest access time in less than 10ms! **ULTRA-ATA HARD DRIVES**, a feature of selected Unicent Avantas, handle the new generation of advanced operating systems, realtime video presentations, and multimedia applications. Avantas feature the **INTEL PENTIUM® II PROCESSOR**, the finest processor available for business applications such as spreadsheets, word processing and presentations. With network cards from Intel, you can be assured 100% compatibility across your network. Even though we've listed our most popular business configurations below, if you don't see the exact system you need, **GIVE US A CALL TODAY**. We will be happy to examine your options and come up with the best business workstation for you and your company. As the technology of business computing moves at lightning speed, isn't it nice to know that a company like Unicent is able to stay on the **CUTTING EDGE** without losing its **HUMAN TOUCH**? Experience the Unicent Avanta in your office today!

# ITS MOTHER WAS A TV.

*the television*

*The first practical electronic TV was demonstrated in 1927. By the late 1940's, tiny black and white sets were streaming into American homes. Creative designs and ever-larger screens highlighted The Golden Age of Television. By the mid 1960's, color made its debut, and now digital TV is on our doorstep.*

## THE BIRTH OF ARCADIA

Its heritage is clear, and its impact is astounding. The new Arcadia™ Home Monitor combines television\* at its finest with the exceptional clarity and focus of our monitors. Through this unique convergence, Princeton Graphic Systems has created a distinctly new category of displays, destined to bring home entertainment and personal computing to the next level. Make an investment in your future. Don't let your home entertainment center become obsolete. Arcadia Home Monitor is available in 27" and 31"

# ITS FATHER WAS A MONITOR.

the monitor

Early computer "displays" were simple text displays or printed output. Used with mainframes, the first true monitors were rack-mounted behemoths. In the early 1980's microcomputers displayed alphanumeric and jagged graphics in monochrome. Today, monitor technology has advanced to exquisite high-resolution color and full-motion video.

## The Sky's The Limit On Savings

If you've been waiting to upgrade your notebook, now is the time to buy a WinBook. Save up to \$500 on a notebook computer, including the WinBook XL with the 233 MHz Intel® Pentium® Processor w/MMX™ Technology.

With over 125 awards of excellence WinBook notebook computers are "Critically Proven." Call now.

### WinBook XL- 233 MHz Intel® Pentium® Processor w/MMX™ Technology, Running at 1.8V, for Maximum Battery Life and Unthrottled Mobile Performance

- 12.1" SVGA Active Matrix Color Display
- 32 MB EDO DRAM, expandable to 128MB
- 2.16 GB removable Hard Drive
- 45-Watt/hour Lithium Ion Smart Battery
- 256K Syncburst L2 Cache
- 3.5" Floppy Drive and 20x Variable Speed CD-ROM both built-in, no need to swap drives
- Integrated Dual-Button Pointing Stick and Touchpad, both active simultaneously
- 16-Bit Stereo Audio
- Two Type II or one Type III PCMCIA Slot, CardBus and ZoomVideo supported
- PCI Graphics Accelerator w/2 MB Video DRAM
- Parallel, Serial, PS/2, VGA, 2-way Infrared port, TV out, USB (2)
- Kensington lock support plus retractable tie-down attachment
- One-year extendible warranty
- Microsoft Windows® 95 installed

**\$2999**

**Introducing Adaptec's CardBus to UltraSCSI adapter.** There's a desktop PC inside your notebook, dying to get out. It wants to amaze you with connections to high-performance peripherals like Jaz® drives, CD-ROMs, hard disk drives, and DVD.

Connect with SlimSCSI® 1480 and enjoy performance that allows instant plug-in connections, hot swaps, and true multitasking.

It's even simple to install under Windows® 95. Visit [www.adaptec.com/slimscsi/pcw](http://www.adaptec.com/slimscsi/pcw) or call 1-800-804-8886 x5580 for more information. You'll never underestimate your notebook again.

# Will the Grinch Steal DVD?

IT'S NOW OVER A YEAR since DVD was supposed to be introduced, and six months since it went on sale. You might expect to settle down right now with a long article about hot new Digital Video Disc titles that exploit DVD and 3D graphics to transform PC games and training programs. Sadly, there are few worthy DVD-ROM titles for us to tell you about. Since we've waited years for a superior

successor to the aging CD and CD-ROM, you'd think entertainment and software firms would be racing to issue movies and games on DVD.

True, DVD's initial introduction was delayed while electronics companies fought over potential royalties, and some entertainment firms fretted about copy protection. The royalty disputes were resolved, and the overwhelming majority of relevant industries agreed that the copy protection issue had been adequately addressed. DVD players started shipping early this year. At last, the stage was set for the move to a new and vastly superior standard.

## ENTER DIGITAL VIDEO EXPRESS

AS THE HOLIDAYS approach, Disney has finally announced that it will bring out its titles on DVD, removing another obstacle to the standard. Yet there aren't as many DVD movies as there should be, and even fewer DVD-ROM titles. Why such a delay in exploiting a major technological breakthrough—the best hope for reinvigorating the consumer electronics industry and providing the hottest possible upgrade for tens of millions of PCs? The lag isn't a matter of chance, and it's more than the usual delay in adopting new technology. Villains are at work. Call them collectively the grinch of DVD.

Circuit City, Paramount, and a gaggle of Los Angeles entertainment lawyers have bombed the nascent DVD market with Digital Video Express—or Divx—a competing format apparently designed to suffocate DVD in the cradle. And what better way to kill a new format than to render obsolete all its players? That's one of the “benefits” of Divx: stifling the half-million people who've each already spent \$500 to \$1200 on DVD players and drives.

The Divx cabal claims to be providing other impressive benefits. It says consumers will like paying \$5 or so for one-time use of

One Divx “benefit”:  
stifling the people  
who've already  
spent \$500 to  
\$1200 on DVD  
players and drives.

a disc holding data that becomes inaccessible 48 hours after it's viewed. Since there's no need to return the disc to the video store, Divx is supposed to be more convenient than renting a standard DVD, and less expensive than buying one. But this argument lacks plausibility. From a cost/benefit standpoint, \$5 for a single viewing is a rotten deal compared to \$20 for lifetime use. And while you can supposedly call the Divx store and pay to get the movie reactivated for another viewing, how do you know they'll still be in business? You're much better off owning a disc you can play without calling to ask permission or paying each time you view it.

## NEVER OWN A MOVIE AGAIN

WANT MORE DIVX “benefits”? Your Divx player must be connected to a phone line so the video police can keep tabs on your viewing and grant rentals permission. And don't even think of putting the discs in your PC—there are no plans to make Divx available for them. What a deal!

Who would really benefit from Divx? Most visibly, Circuit City and Paramount. While Circuit City plans to compete with video rental companies like Blockbuster, Paramount would be delighted to see DVD die. It is more concerned about inviolable copy protection than giving consumers vastly superior quality. It has no plans to issue its movies on DVD. If you don't want to buy a Divx player and pay for each use, Paramount wants you restricted to low-resolution VHS movies. You'll be able to buy DVD movies from Warner Bros., New Line Cinema, MGM, Universal, Sony's Columbia Tri-Star, and Disney's Buena Vista (which distributes Disney, Touchstone, Hollywood Pictures, and Miramax releases). But count Paramount out.

The best hope for DVD's success is that Divx will die early, with consumers rejecting both Divx players and discs. Otherwise, plan on a replay of the impasse in the early days of videotape, when the VHS and Betamax formats competed and many, many consumers waited to see which would win. For years, most people bought neither, hardware makers produced neither, and few got pleasure or profit from VCRs and videotapes.

Paramount and Circuit City have tried, grinchlike, to spoil what figured to be the first booming season for DVD. They stand between you and a new generation of video and PC entertainment. Remember this when deciding which movies to watch during the holidays and where to buy electronic gifts. And hope Paramount and Circuit City will remember how the grinch came to his senses after perpetrating his terrible deed.

Re: Anyone there know how to build a Web site?

-----

Forget about all the coding <b>stuff</b>. Whether you're a novice or a pro, our new Microsoft® FrontPage® 98 program makes building a Web site as easy as typing a letter. That's because, as part of the Microsoft Office family, it's filled with familiar, intuitive tools. The new Navigation View helps you plan and organize your site. Drop your ideas into professionally-designed page themes, or use the new table drawing tool that makes designing pages as easy as sketching with a pencil. You can create and edit graphics and animation. As you work, you'll see your Web pages exactly the way they will look on the Web. And all the technologies that make Microsoft FrontPage 98 so powerful—such as Dynamic HTML and push technology—work behind the scenes. So when you're ready to go public, you just click on a single button and your site is on the Web. Check it out at [www.microsoft.com/frontpage/](http://www.microsoft.com/frontpage/). Yes, we built it with FrontPage 98. And yes, it was easy.

**a Web site  
requires programming skills.  
know how to type?**

# The future is here today.

## Thinking outside-the-box.

ViewSonic, The Display Technology Company, has once again delivered the future. This time, with ViewPanel<sup>®</sup>, a line of displays that completely redefine the concept of flexibility. Using up to 90% less desktop space than a standard CRT, they can rotate to display images in both portrait and landscape modes.

## Outstanding design. Standout performance.

Made possible by ViewSonic's new LCD ViewPanel technology, these ergonomically-designed, next generation color displays elevate form and function to a new level. And they're equally capable of elevating the status of those who own them. With eye-opening 1,024 x 768 resolution, ViewPanel displays are an idea as bright and filled with promise as the 21st Century. And they're here today.

## YOUR TAKE ON: Tech support ♦ Internet filters ♦ Rating 3D boards

## THE OTHER SIDE OF SOFTWARE TECH SUPPORT

AS A PERSON who provides telephone technical support for my company's products, I read with interest "Want Good Tech Support? Good Luck..." [October]. A few more points should be addressed:

Call from somewhere in the vicinity of your computer. In many cases, the technician will have you look up information or change settings.

If you can't call when technical support is open, don't complain to the technician about inconvenient support hours. These comments should instead be directed to customer service.

If you are trying to get two or more products to work together, don't be upset if the technician for one product refers you to the support line for the other. If problems persist, ask one of technicians if they'll agree to a conference call with

someone from the other company so they can work together on a solution.

If a technician asks you to do something you don't know how to do, ask for more specific instructions. And don't hesitate to ask that the instructions be repeated more slowly and clearly.

If a technician asks you to do something and a message appears on screen, tell the technician. Unexpected messages can point to the source of a problem.

*Scott A. Begin, Chicago*

I AM A CUSTOMER support technician for one of the companies that you reviewed. I really like my job, but it can also be very frustrating and stressful. We have to put up with far too many callers who are rude, uncooperative, and sometimes downright abusive. This kind of treatment is a big reason we see such a large turnover in my section.

*Name withheld at writer's request*

I USED TO work for a large third-party technical support firm. I left due to the way they were treating the tech staff. Technicians are on the low end of the pay scale. You can imagine the type of technician that policy brings. When I started, most techs were very good. As the company grew, the quality of training for the techs went down drastically. By the end of that year, six months' training had been reduced to, "Answer the phone like this, listen to this tech [shadow them on the phone], and take calls by the end of the day." No exaggeration.

The people getting raises and bonuses were those who could get the customer off the phone quickly and handle the most calls. The support was bad, to say the least. The fast tech would give quickie advice to get a customer off the phone, but other techs knew they would have to spend 30 minutes not just diagnosing the problem but talking an irate customer through ►

## HOT BUTTON

## Windows 98: Caught in the Web?

REGARDING YOUR Windows 98 preview in September's *Top of the News*, who really wants Windows 98 to change your desktop into Internet Explorer 4.0? I haven't found anyone who likes this idea. If we want to use the Web, we will use a browser. The Web isn't some grand heaven, but rather an overhyped procrastination tool. I downloaded Internet Explorer 4.0, and my desktop turned into Internet Explorer Deluxe. Everything is a link—open a window, and it's an Internet Explorer window. What if we don't want to upgrade to this desktop-browser garbage? Is there any alternative to this slow, horrendous combination? The Web is buggy in itself. Do we really want to jump into an entirely new arena of Java applets and HTML code taking over our PCs? I speak for many when I say I am scared of where Microsoft is taking our computers.

*Eric Johnson, Foster City, California*

YOUR SEPTEMBER ISSUE left this user more convinced than ever that Bill Gates is the Michael Jordan of capitalism. For instance, why is it that Windows 98 is included, in nearly its entirety, with Internet Explorer 4.0?

C'mon, guys, you seem to have missed Microsoft's reason for essentially giving away Windows 98 for the price of a download. Gates isn't after another mega-blockbuster like Windows 95, at least not right now. What he is after is Netscape Navigator's turf, and by integrating his own Internet browser with the

Windows desktop itself—and adding some nifty features to that operating system in the process—he has really hurt Netscape.

As an OS/2 fan and a native Chicagoan, I guess I now know what it's like to be on the other side of one of those Jordan three-pointers. Ouch!

*Jon Trott, Chicago*

IN THE SEPTEMBER *Up Front*, Cathryn Baskin states, "Windows 98 may turn out to be one operating system upgrade you really don't need." Her opinion is representative of many in the industry. However, the pundits seem to have missed one important point: The lack of certain stardom for Windows 98 is a profound testament to just how good Windows 95 really is. Gates and company have created a product that has generated (mostly) love and hate for the past two years, but the plain fact is that it has forever changed the way PC users interact with and use their machines.

*Jeff Bellune, Internet*

I WAS NOT optimistic when I heard about Internet Explorer 4.0's desktop integration. But IE4's beta 2 convinced me. Program launching is easier, the desktop Web pages are surprisingly useful, and Outlook Express is my favorite mail client. Best of all: IE4's customizability. I quickly identified the parts of it I didn't like and shut them down.

*Ezra B. Riner, Internet*

© 1997 Hewlett-Packard Company

**One small step for man. One giant leap for the printed page.**

HP LaserJet Toner Cartridges. Low cost per page. Lifetime guarantee. A crisp, sharp landing for each and every letter. Don't compromise your mission with anything less. [www.ljsupplies.com/leap](http://www.ljsupplies.com/leap)

HP LASERJET TONER CARTRIDGES • ALWAYS CLEAR. ALWAYS SHARP

replacing the card, fixing the software settings, or whatever.

Another problem with third-party tech support: The vendors we were supposed to be supporting were not always forthcoming with information about known problems, fixes, updates, and the like.

*Name withheld at writer's request*

### WHERE ARE THE ANSWERS?

HOW DARE YOU print the three questions for the tech support article by Naomi Wise in the October issue ["Want Good Tech Support? Good Luck..."] and then not include the answers! I want to know if I should make my swap file bigger, too.

I think you owe it to your readers (especially the novices) to publish the answers to all the questions.

*Ronald Hirsch, Internet*

**Editor's response:** The questions we posed to vendors were used merely as vehicles to rate the quality of their services. We realize that no one likes an unanswered question, so we did publish both the questions and answers on PC World Online ([www.pcworld.com/oct97/support](http://www.pcworld.com/oct97/support)), and we noted this at the start of the article. —Michael S. Lasky

### THE POWER OF E-MAIL

YOUR ARTICLE ON the power of e-mail ["Don't Get Mad, Get Online," *Consumer Watch*, October] reminded me of a recent incident at a Home Depot store near me.

After purchasing several items from the store, I drove away not realizing I had left a bag in the parking lot. Two days later I inquired about my items. I was told that they had been found but that I was out of luck since they had already been returned to the shelf. My receipt was null and void. I went home in a state of shock.

Determined to get satisfaction, I surfed the Internet to find Home Depot's Web page. I e-mailed my complaint, and with-

in 36 hours I received a call from the store manager saying I could pick up my purchases at my leisure. Truly, no company can withhold service to anyone now that there are corporate Web pages to which anyone can post a message of complaint.

*Jerry Rabo, Internet*

### WEB AUCTIONS: BEWARE

THE ARTICLE ON Web auctions in September's *Internet Tips* was very timely. I tried the online auction site of what I thought was a respectable company. They were selling a popular product's previous version, LapLink 7.0. What they did not tell potential buyers is that it was not the retail version, complete with the needed cables, but a cheap throw-together with a photocopied manual. They called it a new product. A big rip-off—and they do not allow returns on auction products. So your comments about being careful cannot be taken seriously enough. I will not use these auctions again.

*Daniel Emmanuel, Houston*

### NIGHTMARE ON DELL STREET

IN THE SEPTEMBER *PC World* I was featured in "What a Pain! The First Six Months of Owning a PC." A sequel might be "Surviving the Second Six Months."

To be honest, Michael Dell's folks [Dell Computer] have been pretty square with me. But the bottom line is, he's got my \$3000 and I've got a bunch of plastic-coated white boxes in my family room, doubling as dust magnets.

The story: Three weeks ago, a speaker switch breaks. Dell replaces all three speakers—no charge. Then the hard drive goes up in smoke. Dell ships out a new one and sends a technician to my house. When he leaves, I've got my computer again. Or so I think.

I turn on the PC—and all I get is a blank screen. Five hundred dollars in software is up in smoke with my old hard drive.

"That's what backup disks are for," the Dell tech tells me, in a patronizing tone. I've waited 40 minutes, and this is the advice I get.

Mr. Dell Tech walks me through a couple of check-directory moves on my backup disks. His diagnosis? I lack one file ►

**When the end comes,  
send your toner cartridge  
to a better place.**

It lived a long healthy life. It worked hard for you. Now's your chance to bid it a proper farewell. Introducing HP's Planet Partners—an easy, free recycling solution. Returned HP cartridges are converted into raw materials to be used in the manufacturing of everyday products. Packages and postage are provided for any quantity. Call 1-800-340-2445 for details. After all, why trash your old toner cartridges when you can give them eternal life?

**HEWLETT®  
PACKARD**

### CORRECTIONS & CLARIFICATIONS

The Web address we printed in September's *Bugs and Fixes* for Netscape Navigator Gold 3.02 was incorrect. The current version of Navigator Gold is 3.03, and the correct URL is [ftp://ftp5.netscape.com/pub/navigator/3.03/shipping/english/windows/](http://ftp5.netscape.com/pub/navigator/3.03/shipping/english/windows/).

*PC World regrets the error.*

to install all my other stuff: Windows 95 CD-ROM and printer drivers, joystick, Norton Utilities—everything depends on it. “You may purchase the file, if you wish, from Dell,” he says guardedly.

“Get me your supervisor,” say I. Another 5 minutes pass. Finally, Mr. Dell Tech is back, saying that the file will be sent via snail mail. I’m still waiting.

Meanwhile, my oldest daughter is fuming; she can’t write her English report. My second-oldest daughter needs a map off the Internet. My wife is expecting e-mail from her sister in Phoenix, and my youngest daughter wants to play Virtua Fighter.

Mike, read this. End this nightmare on Dell Street.

*David de Felice, Madison, Wisconsin*

### BEYOND INTERNET FILTERS

AN ADDENDUM TO the October *Top of the News* story about Internet filters: While I agree that parents should do what they can to keep kids away from adult material, I also believe that adult-site Webmasters should do their part. Two things come immediately to mind.

First, they should register with the Recreational Software Advisory Council on the Internet so parents can block the site if they wish. (RSAC’s Web site is at [www.rsac.org](http://www.rsac.org).)

Second, adult-site Webmasters should consider using an age-verification service. These work by using a person’s credit card to verify that they are an adult, then assigning them a user name and password to enter the site.

*Todd Willeat  
Maryland Heights, Missouri*

### 3D GRAPHICS BOARDS: DO REVIEWS MISS THE MARK?

I READ WITH intense interest your article “2D and 3D Graphics Boards: You Can’t Always Get What You Want” [October]. I am hooked on flight and racing simulations. Smooth and fast frame rates and eye-popping visuals are what I look

for. Last February I purchased the Matrox Mystique graphics card based on its *PC World* number one ranking [in December 1996] and your “best 3D” rating.

I am now confused when author Brad Grimes says of the Matrox Mystique 220 card, “The Mystique’s [3D images] are some of the ugliest we’ve seen.” The review’s conclusion: “Direct3D games just don’t look good with this graphics board.” How did the Mystique go from “best 3D” for several months running to “the ugliest we’ve seen”?

*Chuck Stewart, Muskegon, Michigan*

AFTER SEEING the STB Nitro 3D graphics board reside at number one in your Top 10 Graphics Boards for three months running, I purchased one based on its “fast 2D and 3D performance” as well as other information in the article. The October issue’s roundup of graphics cards, however, states that the Nitro has below-average 3D. I spent \$149 plus tax based on your review and now have a video card that “just isn’t able to handle 3D games.” Thanks a lot. I guess I should have waited six months after the Top 10 pick to see if you changed your minds.

*Charles Goulding, Internet*

**Editor’s response:** Before the October issue, our 3D tests included games written specifically for the boards we tested. It was true in February and is true now that the Mystique provides some of the best 3D when used with Mystique-specific games. For our October issue, we tested boards with Direct3D games, which are meant to run with all 3D boards on the market. With our Direct3D games, the Mystique gives poor results.

As for the STB Nitro 3D, it continues to provide relatively fast 3D, as shown in our frame rate tests, but its 3D image quality—the way an image looks rather than how fast it is drawn—is below average. Some gamers will sacrifice image quality for fast game play. We look for both when evaluating 3D boards. —JoAnne Robb

I AM A LITTLE DISAPPOINTED that the Monster 3D and Righteous 3D graphics boards aren’t ever listed in your Top 10 Graphics Boards. They completely trash the others in every category. And they now cost about \$150. They’ve been out for a couple of years and are still the best. Everyone I know has one.

I see the Diamond Stealth 3D 3000 board at number two on your list [October]. But 3Dfx boards like the Monster and the Righteous run at least three times what the Diamond could put out, and the games look ten times better.

*Derek Estey, Bristol, Vermont*

**Editor’s response:** We agree. The Monster 3D and Righteous 3D boards deliver better 3D than those in the Top 10. But because they are add-in boards and don’t run regular 2D programs, we can’t consider them along with the other graphics boards. —Brad Grimes

### WEB COMMERCE

ERIC FLORACK [October *Letters*] misses the point of August’s “Web of Deceit” article. He asks, “Is Janice [Norton], or anyone else, really so disappointed that private enterprise has a new tool with which to do its job?” In a word, yes. We are constantly assaulted with advertising, and its quantity and intrusiveness only increase.

It saddens me to see the Internet, a medium so perfectly suited to the exchange of ideas, so thoroughly and quickly reduced to nothing more than a huge electronic shopping mall. And now we have push technology, removing even the illusion of a choice regarding this assault.

My greatest objection, however, is to commercial sites that masquerade as genuine content—the point of your article. We just don’t want to be lied to, but people like Florack seem to think anything is acceptable, so long as it makes money. Ethics? Who needs ‘em? We do, that’s who. Commerce is not evil. Unethical commerce is. We can tell the difference.

*Bill Hanna, Cleveland*

Christian Murphy was non-verbal. He lived with a wall between himself and the world.

**1** THIS IS CHRISTIAN.  
*He can see, hear, feel, touch,  
but he cannot speak. He was born  
with autistic tendencies that cut  
him off from the world around him.*

**2** A TEACHER DISCOVERED that Christian would respond to images from his life. She put visual cues to the story of his new puppy on a special keyboard.

**3** THE MONITOR BECAME HIS VOICE. With it he makes class reports and conversation. With it, Christian, 11, has been in the regular Osterville, MA public school since first grade.

Until he found this window.

**4** WITH THE PICTURES, HE MADE SENTENCES. With the sentences, he made friends. Christian's monitor is the window between his non-verbal world and the speaking world of his friends. Through it, he teaches them many things.

**NEC MultiSync Monitors  
E and A Series**

**T**HE MONITORS THAT ARE BEST FOR CHRISTIAN'S NEEDS can also speak to yours. Introducing the NEC MultiSync® Enterprise and Advanced Series, the monitors for people looking for superior, lifelike images. And the monitors for people who want the kind of flexibility that super high resolutions and refresh rates ensure.

OSM™ (On-Screen Manager) controls make image adjustments easy. Plus, select Enterprise monitors feature CROMACLEAR™ CRT, for unparalleled focus, contrast and intense color saturation. And, of course, the industry-leading NEC warranty includes 3 years parts, labor and CRT.

For more information on the new performance-driven MultiSync Enterprise and value-oriented Advanced Series call 1-800-NEC-INFO or visit [www.nec.com](http://www.nec.com).

We at ProGen Systems have built our success on what we call the partnership of performance and price. It's a way of doing business that works for us. And it works for you, too.

That's because we build-in the latest industry advances, including genuine 233MHz Intel

Pentium® Processors  
with MMX™ technology,  
3D MPEG video graphic  
acceleration, a  
Subwoofer Sound

System and the new 24X CD-ROM drives.

With award-winning Matrox products you're getting the most advanced graphics and video technology in the industry. And offer all of this to you at highly competitive prices.

Backed by the ProGen ProCare® 3-year limited warranty, free tech support and on-site service, our systems offer unsurpassed performance, reliability and value. Whether you're looking for a business professional, corporate or multimedia solution, ProGen has the system for you at a price that works for your budget. So call a ProGen consultant today, or visit our on-line order web site at [www.progen.com](http://www.progen.com), and put ProGen to work for you.

# Saints and Sinners: 1997 in Review

*Some companies do it right. Some do it wrong.  
None of their actions go unnoticed.*

WHAT DO AMERICA ONLINE, Compaq Computer, and Microsoft all have in common? You probably guessed it. But besides being the market leaders in their respective fields, these three companies also have the dubious distinction of committing major blunders in the past 12 months that incurred the wrath of many of their customers. Like many companies before them—and undoubtedly many more to follow—these computing giants let their market share and marketing muscle blind them to the importance of putting customers first.

Rather than letting these transgressions or the year's better proconsumer moves go unnoticed, I've compiled a list of 1997's saints and sinners. Saints are companies that over the past year have demonstrated a sincere commitment to their customers and have contributed to the healthy competition that keeps the PC industry strong. The sinners are—like the trio mentioned earlier—companies whose actions or inaction demonstrate a disregard for the very consumers on whom their livelihood depends.

**SAINTS: Advanced Micro Devices and Cyrix.** In an Intel-dominated computing world, these two companies have managed to keep the competition—and the processor wars—alive. With the K6 and 6x86MX processors, respectively, AMD and Cyrix offer PC makers a viable alternative for Pentium-class performance. Although the alternative chips are still being used primarily by second- and third-tier PC companies, they're providing budget-conscious consumers with a fast-performing, low-price PC alternative. Is Intel feeling the pressure? My guess is yes, judging from the company's recent price drops.

**SINNER: America Online.** No list of sinners for 1997 would be complete without America Online and its chair and CEO, Steve Case. First, there was the fiasco that brought the service to its knees shortly after it switched to its flat-fee plan. It sounded like a great deal for Web fans, but turned into a disaster when AOL's system couldn't handle the phenomenal increase in traffic (so much for advance planning) and customers were met with constant busy signals.irate users filed a class-action suit, and an overwhelmed AOL invested in more equipment and agreed to credit customers who complained with additional time. Not leaving bad enough alone, AOL provoked a new controversy this summer after announcing plans to sell subscriber names and phone numbers to telemarketers. When that trial balloon blew up in its face, AOL backed down from the lucrative scheme, but not without further tarnishing its already damaged reputation.

**SINNER: Compaq Computer.** Yes, the Houston, Texas, powerhouse is one of only two companies to have the dubious distinction of being both saint and sinner this year. The reason: Compaq's free fall in service and support. When *PC World* first began reporting results from ►

its Reliability and Service survey in 1994, Compaq's service was rated above average, and the company enjoyed one of the highest customer satisfaction ratings. But beginning about the time the company initiated its ill-fated pay-for-support plan on its Presario line, its service scores have been taking a nosedive. In our June 1997 report, the company had slid from its Best rating in March 1996 down to a Fair rating for service. Compaq has since decided to drop the fees, but only time will tell if customers will forgive the company.

**SAINT: Compaq Computer.** Though Compaq seems to be blowing it when it comes to providing service, at least the company is no longer charging hard cash to answer each and every one of those hardware and software questions that customers might have. After 18 months of billing Presario customers \$35 every time they called in to Compaq's telephone support line, the company quietly rescinded the draconian fee last May. The elimination of the pay-as-you-go plan coincided with a complete overhaul of the company's service-and-support operation for its consumer line. Although we haven't yet seen the fruits of these efforts in the form of higher service marks, the changes are certainly a step in the right direction.

**SAINTS: Girl Games, Girl Tech, The Learning Company, Mattel, and Purple Moon.** These five companies (as well as a handful of other firms) earn a spot in the Saint category for their commitment to developing fun, high-quality computer games for girls. Although their new titles are as different as the preteen and teenage girl markets they're trying to reach, they're all to be lauded for recognizing that there's more to game playing than John Madden Football and Duke Nukem 3D.

**SINNERS: Hewlett-Packard, Matsushita, NEC, Phillips, and Sony.** In a move that's sure to slow the adoption of rewritable DVD tech-

nology, these five companies have decided not to support the proposed industry standard for the reusable discs. Sony, HP, and Philips were the first to jump ship, claiming to have a superior technology. Days later, NEC followed suit. It's beginning to look like the Betamax-VHS wars all over again.

**SINNER: Iomega.** After enticing customers with a \$50 mail-in rebate on its popular Zip drive, Iomega took months to process many of the coupons and was the subject of more complaints to *PCW Advocate* this year than any other hardware or software company. An Iomega spokesperson attributed the lengthy delays to the overwhelming customer response to the offer. A more cynical person might chalk it up to poor planning.

**SINNER: McAfee Associates.** Throughout the last half of 1996 and early 1997, the Santa Clara, California, developer of VirusScan engaged in public relations warfare against two of its main competitors. In September 1996, McAfee accused rival Symantec of overstating claims on its Norton Antivirus product. A few months later, McAfee unleashed its word processor against Dr. Solomon's Anti-Virus Toolkit, alleging that the British developer had engineered its virus detection software to perform better (that is, catch more viruses) when the program was being evaluated by magazine reviewers. McAfee is no doubt convinced it's making the world a safer place for virus-wary computer users, but the mudslinging sounds like sour grapes to me.

**SAINT: Microsoft.** The company many of us love to hate earns high marks for its \$150 million investment in Apple. Although the gesture is more symbolic than practical, it was an important component of Apple's overall reorganization plan. Certainly, Microsoft stands to gain from the deal: All Macintosh computers will now come bundled with Microsoft's Inter- ▶

The Houston, Texas, powerhouse is one of two firms to have the dubious distinction of being both saint and sinner.

net Explorer rather than Netscape's Communicator, and the software behemoth earns a tidy profit each year on its Macintosh software titles. Still, Bill Gates and company deserve some credit for helping to ensure that consumers have a choice in hardware platforms.

**SINNER: Microsoft.** Like Compaq, the Redmond, Washington, monolith earned a place of distinction in both the saint and sinner camps this year. The company's (biggest) sin: failing to provide Word 97 users with backward compatibility for Word files and making it difficult to locate files because of the .rtf extension instead of the standard .doc extension. Microsoft finally issued a patch in June—months after the initial release of the popular word processor.

**SAINT: Netscape.** Playing David to Microsoft's Goliath, Netscape has managed to hold its own in the browser war. With the release of Netscape Communicator 4 earlier this year, the company continued to raise the bar in browser features and ease of use, providing a real alternative to Microsoft's Internet Explorer. Unfortunately, it takes more than innovation to stay on top, and Microsoft's marketing and distribution prowess make for tough competition indeed.

**SAINT: Quantex.** When this small mail-order computer company first appeared in *PC World's* Reliability and Service report in March 1996, it landed in the Poor category overall. Since then, the company has slowly worked its way up to Fair, earning particularly high marks for problem resolution and customer satisfaction. Also since then, the company's support has been on the rise. In fact, in this month's Top 20 system review, Quantex gets good ratings for both support quality and system reliability.

Lifetime Warranty. Dozens of shapes and sizes, over 75 accessories. Since 1984. Prices from \$299. GSA contract. Available for OEM applications.

Tell your CEO PCs with the

AMD-K6™ MMX™ Enhanced Processor give you  
the power to beat the competition.

Performance enthusiasts and cost controllers, rejoice. No matter how much or how little you want to spend on a Microsoft Windows® compatible PC, you'll get higher performance from a system based on the AMD-K6™ MMX™ Enhanced Processor. Check out the stats: blazing 233 MHz clock speed. Eye popping multimedia capability. And sound quality even an audiophile will love. An AMD-K6 based system is more than an alternative to a Pentium® II based PC. It's the one that gives you more alternatives. Because with the money you save, you can get twice as much memory. A better video card. Better audio. And a faster modem. In short, AMD-K6 based systems give you more performance (CEO will approve) for the same money (CFO will approve). To get the rest of the story, hit our web site (you will approve).

The dark side of e-mail ♦ Watch your wallet ♦ Mail-order runaround

# Spam Can Be a Lethal Weapon

IF YOU HAUNT newsgroups, you may have noticed the messages from Samsung Electronics America explaining a nasty situation the company is embroiled in. Or maybe you, like S. Tirtha of Bayville, New York, got a nasty e-mail that appeared to be from Samsung. The e-mail that Tirtha—and many other people—received looked like a cease-and-desist notice from Samsung's legal counsel. It accused Tirtha of hacking, flaming, and other Net "crimes."

Many alarmed recipients hired lawyers.

The e-mails didn't actually come from anyone at Samsung; rather, they were sent by a disgruntled customer bent on harming the company. He sent an unknown (but huge) number of hostile messages mimicking Samsung's lawyer's e-mail address.

"We were the target of a ruthless terrorist attack," says Andrew Kritzer, senior manager of marketing communications

at Samsung. He estimates the company gets 6000 to 10,000 angry e-mail messages a day about it and says the FBI is on the case. So if you get one of these e-mails, don't panic, lash out at Samsung, or hire a lawyer. You can read about the scam at [www.samsung.com](http://www.samsung.com).

## INTERNET PICKPOCKETS?

A COUPLE of letters alerted us to a site called Insiders Computer World ([www.insiderscompworld.com](http://www.insiderscompworld.com)) that offers great deals and gifts to

people who pay a membership fee of \$84.95. After you pay, you're supposed to get a catalog offering low dealer prices plus a nifty gadget. Both readers said the catalog came but the prizes were not impressive and the prizes never arrived. So buyer beware.

## A TIGER BY THE TAIL

JIM MARTENHOFF OF Port Charlotte, Florida, complained that TigerDirect, a mail-order PC firm, put him through the

wringer and double-charged him. Oh, he got his order (a printer stand) on time, but it was missing one essential part. Tiger told Martenhoff to go to the manufacturer, but the manufacturer refused to help. Back to Tiger. This time Tiger told him to buy a second stand and return the original; they'd send him a new one and reimburse him for the first stand. This he tried to do. But Tiger's warehouse refused the return because it was incomplete, and Tiger refused to reimburse him what he was owed.

We contacted Tiger and spoke to Public Relations Specialist Janean Becker. She told us Martenhoff should have sent the product to Tiger's customer service in Miami. Tiger keeps only complete products on hand, not spare parts. Martenhoff did, however, get his money back. If you're returning a product without all its parts, check to see if it requires special handling.

## DOWN BUT NOT OUT

KIT SANDERS OF Amarillo, Texas, accidentally dropped and broke his HP PhotoSmart digital camera. Expecting to lose his money due to his fumble thumbs, he called HP for a repair. To Sanders's delight, he got a new camera via UPS two days later, free of charge. HP even picked up the return postage on the broken camera.

## TOO BAD: YOU OWN IT

MARK WARD OF Woodbury, Minnesota, purchased a copy of IBM's Simply Speaking software at his local Best Buy store. Ward was unhappy with the product and tried to return it. No go. Best Buy will accept software returns only if you haven't opened the package. Once you open it, you keep it, unless the package is defective. According to Laurie Bauer, a spokesperson for Best Buy, the no-return software policy is necessary because of software piracy and viruses.

Think you've gotten a raw deal—or a great one? PCW Advocate wants to hear the details at [advocate@pcworld.com](mailto:advocate@pcworld.com). We'll investigate complaints and publish items of the broadest interest. Christina Wood is a contributing editor for PC World.

## THE FINE PRINT

### HARDWARE WARRANTIES: NOT ALWAYS TRANSFERABLE

DEEP IN THE LEGALESE of this Micron Electronics warranty is a word that might concern you if you plan to sell or donate your computer a few years down the road.

Even though Micron offers a five-year (as well as a three-year) limited warranty on its systems, that warranty is nontransferable—it does not travel with the computer when you sell it. All Micron's warranties are valid only for the initial purchaser (Micron is reconsidering its policy). Policies vary from company to company, so if you're selling or donating your PC, and transferring the warranty is important to you, be sure to ask.

## Introducing Norton CrashGuard Deluxe.

Extensive testing proves it gives you twice the crash protection of any other software.

Computer problems will always come up. But that doesn't mean that your computer has to come crashing down.

Thanks to new Norton CrashGuard™ Deluxe from Symantec, you and your computer are a lot safer.

Designed for Windows 95, Norton CrashGuard Deluxe gives you automatic problem solving with twice the crash protection of any other software.

Norton CrashGuard Deluxe works behind the scenes to repair problems automatically, eliminating

potential crashes before they happen.

It intercepts application crashes and stabilizes the application in time for you to save your work. It unfreezes 'frozen' applications, even when your mouse appears to be completely disabled. Best of all, it's laboratory proven\* to provide twice the crash protection of any other software. So don't delay.

Try it for yourself. **Point your web browser to [www.symantec.com](http://www.symantec.com) and download your own free trial version of Norton CrashGuard Deluxe today.**

# Networking Your Home Office

*Working at home with PCs was Jim Novack's first step in launching his business. Now his growing company has moved to the next phase: networking at home.*

**THE PROBLEM** Jim Novack, a self-employed Internet consultant and software developer in Larkspur, California, uses four computers to meet the demands of his growing business. Three machines reside in a spare bedroom that Novack converted into a home office; the fourth lives in his main bedroom. But that last PC was an orphan, with no easy way to share files or peripherals with its cousins next door. Novack tried the sneakernet for a while, then hit upon a better idea: Why not install an ethernet network? —Editor

A few months ago my home-based business was putting me in a pinch—literally.

I needed a lot of equipment to support my business. In a spare bedroom that I converted to a home office, I'd set up a desktop PC, a notebook, and a Sun SPARC server (for Web site testing), along with a scanner, a laser printer, a tape backup drive, a modem, a fax machine, and so on. The room is only 100 square feet, so it was a tight squeeze—particularly when my wife needed to use one of the computers.

Because of the cramped conditions, I set up a fourth computer in our main bedroom. That eased the overcrowding but didn't solve my biggest problem: There wasn't any room to attach printers or backup drives to all my PCs, and the cost of buying separate peripherals for each machine was too high. When I needed to print a file located on a PC that didn't have a printer attached, I'd have to do the sneakernet routine. And backing up all my computers was a hassle; frequently I'd just back up whichever machine the tape drive was attached to.

Also, my wife and I keep our schedules and contacts in a personal information manager on the bedroom PC. Going from one room to another to get a phone number was a pain, and I didn't want to copy the PIM database to a second computer and end up with two different versions of the same database.

## THE SOLUTION: INSTALL AN ETHERNET NETWORK

I HAD ONLY TWO OPTIONS: Either live with the situation, or wire the place with a network. The first was almost unbearable, the second merely frightening. Networking all my computers seemed a huge undertaking. Then a friend suggested I check out the affordable networking products designed especially for small and home offices.

Because I work with large graphics files and will probably expand my network to handle video and multimedia apps, I decided to get an eight-port ethernet switch. I settled on Netgear's SW 510, a \$995 ethernet switch with eight 10-megabits-per-second ports and two ports that support speeds of up to 100 mbps. For most home offices, though, an ethernet switch is overkill. If you simply want to share peripherals and standard files between a handful of PCs, all you really need is a low-cost network starter kit, which includes all the network adapters and cables you need. You just have to hook up ►

# PKZIP<sup>®</sup>

## for Windows

**Version 2.50**  
**Compatible with**  
 ♦ Windows 95  
 ♦ Windows NT  
 ♦ Windows 3.1x

### Why use PKZIP for Windows?

- ▶ Save on-line time charges and save disk space.
- ▶ Compress files an average of 50-70%. Many large files compress well over 90%.
- ▶ Open .ZIP archives downloaded from the Internet.
- ▶ Simple point-and-click interface.
- ▶ Combines the best and fastest patented compression technology found in PKZIP 2.04g.

### Other PKWARE Products:

**PKLITE & PKLITE**  
**Professional for Windows**  
 Put your executables on a diet!

### PKWARE Data Compression Library<sup>®</sup>

Put compression in your application.  
 Separate versions available for DOS, DOS32, Windows, Win32, OS/2, UNIX & Macintosh.

## REAL SOLUTIONS

the cables between your computers and the ethernet hub, install the network adapters, and configure your machines to be network-ready. And it's all a lot easier than you might think. [For example, Netgear's SB104 Network Starter Kit includes a four-port ethernet hub, two 10/100-mbps PCI adapter cards, and two ethernet cables for \$179. For more details, see "The Do-It-Yourself Network" in this issue. —Editor]

Before installing my network, I studied the Netgear manual. It was easy to follow and understand, with diagrams showing how to lay the network cabling and connect the devices to the ethernet switch. Next, I drew a diagram of my network configuration and made a shopping list of the equipment I'd need. For the physical wiring strung between the two rooms, I needed 100 feet of category-five, four-twisted-pair cabling. And because this is our home, I didn't want to look at ugly, exposed wiring, so I added to the list white plastic conduits—tubing with a self-adhesive back that disguises the wiring and secures it to the wall. I bought both the cabling and tubing at Home Depot.

I would also need two network adapter cards (the Sun SPARC server has a built-in ethernet port, and my Compaq desktop already had a network card). To complete the wiring, I needed two faceplates to accommodate the wiring's modular jacks, and two surface-mounting boxes—empty plastic containers that secure to the wall. These parts are available at electronics stores like RadioShack. Finally, I needed ethernet cables, which connect at one end to the network adapters and ports in each machine and, at the other end, to the Netgear SW 510 ethernet switch.

Once I had the equipment, I drilled holes in the office and bedroom ceilings and strung the four-pair wiring between the two rooms by way of the attic. (Now I know how Bruce Willis felt in *Die Hard*.) Then I laid the individual wires into the backs of the modular jacks. I snapped the jacks into the faceplates, attached the

faceplates to the mounting boxes, and secured each box to the wall.

Configuring my systems to run on an ethernet network was a snap. My Compaq 386 desktop still runs Windows for

**Networking my PCs**  
 seemed a **huge**  
 undertaking. Then  
 a **friend** suggested  
 I check out products  
 for **small**  
 and **home** offices.

Workgroups, so I had to install Windows for Workgroups' network option, which took just a few minutes. For my PS/2 desktop and ThinkPad notebook, I simply configured the network client in Windows 95's Control Panel. The Netgear manual explained how to do both configurations, but the process was

so simple I never had to refer to the guide.

All told, it took almost a full day to get my network up and running. Installing wiring between rooms is as easy as hooking up a telephone extension jack. And if you've ever installed a memory card, you can handle a network card. You can also buy a PC with a network card already installed. Many Dell systems, for instance, now come with 3Com ethernet cards installed.

The bottom line? If you're running a home-based business that's growing, at some point you'll probably need a network. Installing one between two rooms is not, in the end, a big deal—I wish I'd done it sooner. Being networked has saved me a lot of time and money. My work setup is more comfortable now. And as relatively simple as installing a network is, I may never have to do it again: We're considering moving to a new housing development—one in which the homes will already be wired for networks.

# the art and science of imaging

**OLYMPUS BLENDS  
THE TWO TO CREATE A  
FRESH NEW VISION**

Though you've been *wanting* the many conveniences of digital photography, you've been holding off for one reason or another. Now the waiting is over.

Whether you postponed a purchase because of the high cost of digital cameras and printers, or you required higher image resolution and color accuracy than affordable digital cameras could provide, Olympus has good news for you.

From the economical, feature-rich D-220L and D-320L to the exciting D-500L and D-600L digital cameras, plus the ES-10 film scanner, P-300 Personal Photo Printer and SYS.640 Personal Storage System, Olympus puts a digital darkroom within everyone's reach.

With the addition of the D-500L and D-600L SLR digital cameras to its comprehensive suite of digital imaging equipment, Olympus continues to outdistance its competition. Designed for anyone whose projects demand no-compromise quality, both ergonomic cameras feature 3X zoom lenses, unprecedented resolution (up to 1,280 x 1,024 with the D-600L) and accurate through-the-lens viewing.

The 640 x 480 resolution D-220L and 1,024 x 768 D-320L cameras include an abundance of features, including video-out capabilities that enable family or business groups to view photos on a TV directly from the camera. Images can also be transferred to videotape.

# the art and science of imaging

IF A SNAPSHOT CAN ENHANCE THE  
MOMENT OR THE MESSAGE, OLYMPUS  
HAS THE SOLUTION

D-600L  
HIGH-DEFINITION  
LCD SCREEN

Both the D-220L and D-320L weigh in at a mere 9 ounces, including a large 2-inch, active-matrix LCD viewing screen. For precise image brightness, both cameras can bracket snapshots one full step, and their stop-action mode can take up to nine shots per second in a single frame. A four-mode flash with automatic operation in low light and back light, "red-eye reduction," fill-in flash and flash off modes lets you shoot under almost any condition.

The D-220L and D-320L sell for street prices of \$499 and \$699, respectively. The D-500L sells for \$899 with an 850,000-pixel progressive scan CCD (1,024 x 768 resolution). The D-600L, with its astounding 1.4-million pixel progressive scan CCD sensor, sells for an equally astounding \$1,299.

## *Zoomin' in*

Tired of hovering over your subject for a close up? Zoom lenses, for more than 20 years an essential feature in film cameras, are available in the D-500L and D-600L cameras. The 9.2mm to 28mm zoom provides focal lengths the equivalent (in 35mm format) of 50mm to 150mm on the D-500L and 36mm to 110mm on the D-600L. This means serious photographers who require precise control over an image can take wide-angle shots or telephoto close-ups, just as they would with a conventional zoom lens.

For those whose photo sessions don't require as much flexibility, the 5mm f2.8 lens (equivalent of 36mm) in the D-220L and D-320L will effortlessly meet your needs. Just point and shoot and let the camera do the rest. Full automatic operation – including auto focus – makes it easy.

All cameras use the SmartMedia™ removable flash memory cards. That means you can take as

many images as you want. Each postage stamp-sized 2-, 4- or 8-megabyte card holds an amazing number of images and is reusable, with 16-megabyte cards available soon. Cards slip out of the camera's back and into either a PCMCIA card or a 3.5-inch floppy-sized adapter for uploading to your laptop or desktop.

## *Capture, share and store*

Analysts and customers have plenty to say about Olympus' unique and innovative approach to digital imaging. According to Kristy Holch, principal of InfoTrends Research in Kansas City, Kan.: "With their long experience in optics and imaging technology, the Olympus camera's multi-element aspherical lens delivers excellent image quality at a very affordable price."

No matter what you intend to photograph, there is an Olympus camera that will meet your needs. Do you want to capture and share images during social gatherings, as does youth pastor Rev. Bill Winton of Waxhaw, N.C.?

"We take lots of pictures with our Olympus digital cameras during our events, [then] transfer them to the computer and arrange them in a slide show. The students think it's awesome!"

Or perhaps you have real estate or some other product for sale and want to increase the impact of your ads? Product snapshots for sales presentations or for your Web site could drive up sales by helping

D-320L WITH REMOVABLE SMARTMEDIA CARD

"OLYMPUS...DELIVERS EXCELLENT IMAGE QUALITY AT A VERY AFFORDABLE PRICE."

*Kristy Holch, InfoTrends Research*

customers better visualize your merchandise, as was the case for Joseph Lanza, principal of Sign DeSign and JC Awning in Port Chester, N.Y. Lanza's company superimposes photos of their awnings, for instance, on snapshots of prospective customers' buildings.

"This camera has already paid for itself 50 times over by consistently getting me new projects – thanks to impressive presentations," says Mr. Lanza, "and all while saving my company up to \$1,500 a year in film and developing costs. It has helped produce in-house literature, sales presentation materials and the company Web site."

Perhaps, instead, you want photos of your employees to annotate their personnel records and IDs. Whatever your needs, if you want a snapshot and want it *now*, Olympus has good news for you.

### *No computer? No problem!*

Already the recipient of more than 30 industry awards (just in 1997) – more than any other imaging products company – Olympus continues its innovative record. Imagine a printer that prints directly from the camera (without the need for a computer) at a price of just \$399.

If you're primarily interested in "point, shoot and print," the P-300 Personal Photo Printer makes it happen. Just plug any Olympus digital camera directly into the P-300 and you get a 4 x 5.5-inch, photo-quality, full-color print in as little as 95 seconds.

P-300 PERSONAL PHOTO PRINTER

Weighing only 5.5 pounds, this 300dpi printer packs heavyweight features into a compact 11 x 10-inch footprint. Finding this much capability in a dye sublimation, photo-quality printer selling for \$399 is indeed noteworthy. To get the same smooth blends of consistent

color from an ink-jet printer requires 2,400dpi resolution. You can control the printer directly from any Olympus camera simply by plugging the camera into the P-300.

The P-300 offers three output options: high-gloss photo paper; a peel-and-stick photo label; or 16 per page, miniature self-stick photo labels. You can also generate up to 30 reprints of the same image automatically with the D-220L and D-320L cameras.

"This is a complete photo mini-lab. What one-hour photo labs did for the film industry in the early '80s, the P-300 does for the digital camera industry in 1997," says David Veilleux, director of marketing for digital products at Olympus.

### *Doing more with your image*

And Olympus does not stop there. Its economical ES-10 film scanner converts your existing 35mm slides or negatives into digital images. Priced at \$449, the single-pass scanner has a dynamic range equal to 30-bit scanners. The ES-10's optional adapter lets you drop in Advanced Photo System (APS) film cartridges for scanning into a digital format.

To safeguard your valuable images, you can store them on the new Olympus SYS.640™ Personal Storage System. The external unit connects to a Macintosh® (via SCSI) or to a PC (via its parallel port for easy installation and portability or via a SCSI card for higher speed throughput). Unlike other mass storage products – which use magnetic media and have an average life of five to seven years if not refreshed – the SYS.640 uses optical technology, so your images will stay intact for decades. Cost per megabyte of storage is much more economical on SYS.DISK™ media as well.

### *Software for fun...and profit*

If you're interested in image editing and special effects, you're in luck, because each camera plus the P-300 printer and ES-10 scanner come bundled with photo editing software, slide show presentation software and several utilities for downloading images from the camera to your choice of data storage.

Olympus has combined 78 years of photographic experience and technology development to create a vision of the future of digital imaging. With its new line of integrated products, the company meets the needs of everyone who wants superior quality, innovation and affordability in digital imaging. Whatever your photographic interest, Olympus has good news for you. ■

# Big enough to fit your vision.

## Small enough to fit your budget.

ADI MicroScan

### Introducing the new 19" (18" viewable image) ADI MicroScan 6P.

#### THE NEW MICROSCAN 6P

19" (18" viewable image)

0.22mm horizontal dot pitch

1600 x 1200 @ 75Hz

Horizontal Frequency 30-95KHz

USB hub built-in

Microphone built-in

Attachable speakers option

The MicroScan 6P delivers the eye-opening benefits of a big screen but costs about the same as smaller monitors. Now you can get a 19" screen (18" viewable image) with the sharpest image clarity available, attachable speakers, built-in microphone, and a USB hub, all in an innovative design that fits neatly on your desk. And your budget. The perfect monitor for viewing one window or many, the MicroScan 6P bridges the gap between tomorrow's visions and today's desk space and budgets. With our industry-leading guarantee of quality and reliability, ADI registered users enjoy a free 45-month warranty\*, 25% longer than our competitors. Call 1-800-977-3336 today, or visit us at [www.adiusa.com](http://www.adiusa.com) for the dealer nearest you.

Seeing clearly into the future

K6 controversy ♦ Clunking Caviar drives ♦ PCCrypto cautions

# K6 Bug Plagues Propellerheads Only

IS YOUR NEW Advanced Micro Devices K6 processor buggy? AMD released an errata sheet describing math errors in early versions of the K6 ([www.amd.com/K6/k6docs/pdf/21266e.pdf](http://www.amd.com/K6/k6docs/pdf/21266e.pdf)). But so far, the only real-world problem the error causes is that Linux users can't compile the OS's source code using the gcc compiler on PCs with more than 32MB of RAM. Why, it's enough to melt your shirt-pocket protector.

An AMD source says that the K6 chip itself is not flawed, that errata are normal in microprocessors, and that the problem will be fixed in upcoming versions. AMD will also replace K6 chips for users who encounter errors and call its tech support line (408/749-3060). Still have doubts? Check the page titled "A Weird K6 Bug" at [www.chorus.com/~poulot/k6bug.html](http://www.chorus.com/~poulot/k6bug.html) for independent bug reports and scuttlebutt.

Intel and Cyrix CPUs aren't immune from errors, either. In particular, Pentium Pro and Pentium II owners should check out [www.intel.com/design/news/flag/](http://www.intel.com/design/news/flag/). For the best information on Cyrix processors, see Bryan Davis's encyclopedic Cyrix 6x86MX Upgrade Advice Guide at [www.alternativecpu.com](http://www.alternativecpu.com).

## WESTERN DIGITAL QUIETS CLUNKING DRIVES

**BUG** Does your Western Digital Caviar drive make a clunking sound? The company says several of its drives in the 1.2GB-to-5.1GB size range contain a firmware error that causes the read head to travel too close to the parking magnet when the drive is idle. The resulting noise is irritating but nonlethal (see [www.wdc.com/quality/reduce-noise.html](http://www.wdc.com/quality/reduce-noise.html) for details).

**FIX** Just download a free 121K patch from [www.wdc.com/quality/noise-util.html](http://www.wdc.com/quality/noise-util.html) and read the instructions on that page.

Bugs are inevitable, and it's great when companies provide free fixes in a timely fashion. But companies need to take customers' problems seriously. Caviar owners who had posted queries about the problem on Western Digital's new Web-based discussion forum ([www1.wdc.com/support/wwwboards/eide\\_id/welcome.html](http://www1.wdc.com/support/wwwboards/eide_id/welcome.html)) found their messages deleted, with no response awaiting them. One Caviar owner even received a written threat that unless he stopped posting "negative attacks" on the company, it

## RegClean Out for Repairs

**CAN'T FIND MICROSOFT'S** free RegClean 4.1? That's because the company has temporarily removed the utility, which helps you tidy up the Windows 95 Registry, from its FTP directory ([ftp://ftp.microsoft.com/Softlib/MSLFILES/](http://ftp.microsoft.com/Softlib/MSLFILES/)) to fix a few bugs. See [www.microsoft.com/kb/articles/Q147/7/69.htm](http://www.microsoft.com/kb/articles/Q147/7/69.htm) for the latest scoop on RegClean.

## PartitionMagic 3.04

**VERSION 3.01, 3.02, 3.03**—PowerQuest should go into the browser business. The latest update of its popular disk utility, available at [www.powerquest.com/download/update3.html](http://www.powerquest.com/download/update3.html), incorporates previous bug fixes and adds tools, tweaks, and features, including a new utility for moving applications from one partition to another.

would ask the Internet service provider to cancel his account. A Western Digital source said the company would clarify what it considers an unacceptable posting. Since the episode, the forum appears to be more tolerant of critical posts.

## PCCRYPTO 2.1: NO STRENGTH IN NUMBERS

**WHEN YOU USE** an encryption program to secure your files, you expect the password you enter to be the only one that works to decrypt your sensitive data. That's not always the case, as *Bugs and Fixes* reader Steve Blackwell discovered. After downloading and installing the PCCrypto 2.1 upgrade from McAfee Associates' Web site ([www.mcafee.com/prod/security/pccdatas.asp](http://www.mcafee.com/prod/security/pccdatas.asp)), Blackwell encrypted a file using 56-bit DES encryption and the password '123123123'—not a great password, admittedly. When he went to decrypt the file, he typed the password incorrectly but found that PCCrypto decrypted the file anyway. Further investigation revealed that quite a few variations on the original password worked, including '123123', '123123122', and even '122'.

McAfee says this strange behavior is simply a consequence of using weak passwords that contain a limited number of repeating characters. However, Blackwell reports that PCCrypto 1.0 doesn't exhibit the problem. A company source says the upcoming version 2.2 will prevent you from creating passwords that are too weak to ensure unique decryption. The new version will also fix a bug that overwrites the program's encryption log file. Until a fix appears, McAfee suggests this work-around: Don't click the Close button in the log file window; instead, save the file using the dialog box that appears when you exit PCCrypto.

# INTRODUCING A LINE OF COMPUTERS AS INDIVIDUAL AS YOU ARE.

*American Pro Series Midtower*

## THE NEW, MADE-TO-ORDER COMPUSA PC™.

Every CompUSA PC™ is made to your order, so you can get the precise level of power and performance you need. So no matter what amount of memory, size of monitor or type of modem you choose, a CompUSA PC is always a smart choice.

## CHOOSE THE EXACT OPTIONS AND FEATURES THAT ARE RIGHT FOR YOU.

How fast a processor do you need? How much memory? What size of hard drive would you like? What size monitor? With the new CompUSA PC, you can have your computer your way. Of course, while every CompUSA PC will be different, they'll all have one thing in common: the value and quality you expect from CompUSA®.

## THREE-YEAR COMPUSA QUALITY WARRANTY.

Every CompUSA PC comes with a three-year parts warranty and a one-year on-site labor warranty.

## LIFETIME HARDWARE SUPPORT.

If you ever have any questions, problems or need advice regarding your hardware, you can call our toll-free help line 24 hours a day, seven days a week and speak to a qualified expert.

## COUNT ON QUALITY COMPONENTS.

CompUSA PCs are built around the highest quality motherboards, processors and chassis. All CompUSA PCs come with Intel® Pentium® Processors. So the quality inside is as dependable as the name on the outside.

## UPGRADES AND MAINTENANCE AVAILABLE AT COMPUSA LOCATIONS NATIONWIDE.

With more than 140 CompUSA locations across the country, you can rest easy knowing that any upgrades or maintenance you'll ever need can be done quickly and conveniently.

## SHIPPING WITHIN FIVE BUSINESS DAYS.\*

We'll build and ship your new CompUSA PC within five business days of your order using listed components and options\*.

## EXPERT DELIVERY AND INSTALLATION.

For \$149.97, a knowledgeable CompUSA technician will deliver your CompUSA PC to your door, set it up and get you up and running. Available in most major markets.

## FOUR EASY WAYS TO ORDER.

Not only do we give you just what you want, you can get it however you like! To order, call our toll-free number or shop our Web site; for helpful advice in person, come into a CompUSA; or, if you're a corporate customer, ask your Account Manager for more information.

\*Standard shipping and handling—\$48.00. Delivery time dependent upon customer shipping preference. \*56K Modems are capable of downloads at 56Kbps, but speeds in actual use may vary. # TOP OF THE NEWS

## NT 5.0

### A Windows Worth Waiting For?

EVEN UNDER IDEAL circumstances, deciding whether to upgrade to the next version of Windows involves some nail biting, hand wringing, and risk. But with two new versions on the horizon, the choice could be more nerve-racking than placing your bet at a high-stakes poker game.

As Microsoft puts the finishing touches on Windows 98, it also will push to complete Windows NT Workstation 5.0, the next version of the desktop operating system geared toward corporations and power users.

#### MANY UNKNOWNNS

SO IF YOU'RE contemplating an upgrade, will Windows NT 5.0 be a smarter move than Windows 98? The first NT 5.0

beta, which we evaluated for this article, is in too rough a state for us to make any firm conclusions. Many planned features weren't ready. We couldn't test the beta for such vital issues as performance and stability. And pricing and hardware requirements had not been set.

NT has historically commanded a premium price: Version 4.0 sells for \$319, \$145 for the upgrade, versus \$209 for Windows 95, with a \$109 upgrade.

Here's what we do know. With the Internet Explorer 4.0 interface, the new version looks almost exactly like Windows 98, so opting for NT won't mean sacrificing any Win 98 interface innovations that appeal to you. Because it's NT, the product offers far

more features than Win 98 for protecting data from snooping eyes and unstable applications. NT 5.0 promises to address some of Windows NT 4.0's shortcomings, such as its lack of support for Plug and Play and power management, a necessity for notebooks.

However, NT 5.0 won't be the version that unites all Windows users into one big compatible family. The OS will not support as wide a range of software and hardware—particularly older products—as Windows 98. Assuming your PC is up to the task of running either Windows 98 or NT 5.0, the choice may ultimately depend on which you value more: Win 98's near-universal compatibility or NT 5.0's emphasis on secure, reliable operation.

#### GETTING UP AND RUNNING

WE TESTED BETA 1 of Windows NT Workstation 5.0, a rough draft of the new OS. Though hardware requirements for the finished product were undetermined at press time, users with older PCs will likely need to invest in hardware upgrades or even a whole new PC. We found run- ▶

and Bill Snyder

JUST IN

### Feds to Microsoft: Knock It Off

THE U.S. DEPARTMENT of Justice wants Microsoft to change its Internet Explorer marketing practices—or face fines of up to \$1 million per day. Justice Department officials accused Microsoft of using its Windows monopoly to “undermine consumer choice” by requiring PC vendors to bundle the Web browser with their hardware to get a Windows 95 license. Also, officials want Microsoft to inform consumers that they don’t have to use Internet Explorer as their Web browser—and to provide instructions for removing the IE icon from the Windows 95 desktop. Microsoft spokesperson Mark Murray said the company is operating in an appropriate and lawful manner. At press time Microsoft had 11 days to respond to the Justice Department’s requests, at which time a federal judge was to decide whether or not to move forward with the case.

### CPUs Beyond 300 MHz

HERE’S A SCORECARD for chip offerings in the near future. First, the challengers: By mid-1998, Advanced Micro Devices plans to introduce a K6 3D that runs at speeds from 300 to 350 MHz. Later in the year, you ▶

Microsoft’s **powerhouse OS** will graft the look of Windows 98 to its **stable** and **secure** core. But major hardware and **software compatibility** frustrations linger.

## NT Closes In on Windows 95

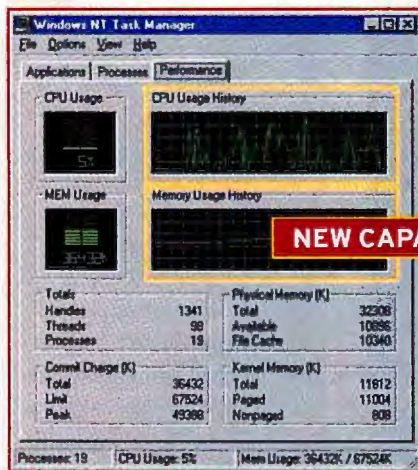

### NICE INTERFACE

Windows NT 5.0 retains many of the Windows 95 interface features introduced in NT

4.0, such as the familiar, easy-to-use Windows 95 Start menu shown here...

...and adds Windows 98's browserlike interface option for viewing system resources, such as drives.

### NEW CAPABILITIES

Windows NT 5.0 will provide new features that likely won't make it into Windows 98. The beefed-up Task Manager now monitors **CPU usage**, **available memory**, and other information of interest to power users.

ning the beta on a 75-MHz Pentium with 32MB of RAM a little on the slow side, though the shipping version of the OS will likely be faster. Still, you'll probably want to run NT 5.0 on at least a high-end Pentium system with 32MB of RAM. Some analysts recommend a considerably beefier machine: You may be dissatisfied with anything less than a Pentium Pro or Pentium II system with

Beyond performance issues, NT 5.0 should be easier to install than its predecessor, NT 4.0. One big improvement was apparent the moment we began to set up the OS: We were able to install NT 5.0 over Windows 95, retaining the existing Start menu setup, desktop settings, and other configuration details. (The best you could do with NT 4.0 was to install it alongside Win

Another addition, a more powerful **Programs Wizard**, is expected to repair software and more thoroughly uninstall it, and replaces the Add/Remove Programs feature found in NT 4.0, Windows 95, and Windows 98.

32MB of RAM, says Dwight Davis, editorial director at the *Windows Watcher* newsletter.

95 and then reinstall all your applications in NT.) Microsoft says that by the time NT 5.0 ships, you'll be able to install it over Windows 3.x, Windows 95, or Windows 98, as well as from scratch on a new system.

### MORE WIZARDRY

ANOTHER NEW addition, the setup wizard, examines your system and warns you of drivers and applications that might not work properly with NT 5.0. When we tried to install the OS on a new Dell Dimension 200-MHz Pentium MMX system, the wizard produced such a lengthy list of

potential problems (including some with the motherboard and sound card), we decided to try another system. We put NT 5.0 on an older Dell Pentium-75 PC, where the wizard reported no major problems.

Like its predecessor, NT 5.0 will come with a lengthy Hardware Compatibility List of systems Microsoft has tested it with successfully; installing it on a PC that's not on the list can be a dicey proposition. According to Microsoft, the problems we encountered trying to install it on the Dell PMMX-200 system may be resolved before the OS ships.

### NT AND 98: SEPARATED AT BIRTH?

THE MOST obvious change in the new NT is its interface. The beta of Windows NT 5.0 looked nearly identical to early versions of Windows 98 we've seen. Like Windows 98, NT 5.0 will come with Internet Explorer 4.0 built-in, and will let you choose between a standard Windows 95 desktop and a Web-like interface that supports single-clicking and browser-style navigation of your hard disk, Control Panel, and other items. It's the same look and feel that Windows 95 users can get today for free by downloading and installing Internet Explorer 4.0.

Like Windows 98, NT 5.0 is expected to support Universal Serial Bus and IEEE 1394 (FireWire) peripherals that have NT 5.0 drivers, as well as the DirectX standards for high-powered games and multimedia titles. Microsoft also plans to add some of the slicker Windows 98 features, such as support for multiple monitors and Broadcast Architecture, a feature for TV tuner-equipped

PCs that will provide detailed television listings in addition to the ability to download data that's embedded in cable TV signals. In the beta version that we examined, none of these features were functioning yet.

Indeed, the goal is to put virtually every Windows 98 feature into Windows NT 5.0—but not vice versa. Like its predecessor, NT 5.0 stresses safety and security in a way that Windows 3.x and 95 never have. Windows 98's password protection remains toothless, but NT 5.0 (like earlier versions of NT) will include User Manager, a utility that lets you set up password-protected profiles for multiple users, giving them varying levels of access to the PC and network. The NT

File System will add even more security-minded features in version 5.0, including the ability to encrypt files and directories. You'll need to convert your hard disk to NTFS 5.0 to get all of NT's features,

which merely pass control to the installation programs in the application you're trying to install. NT 5.0 manages the process and actually copies the new software and configures it. As a result, the OS knows precisely which changes were made to your computer.

This method has several potential benefits, including tidier

uninstalls that remove all detritus, simpler software upgrades, and the ability for the operating system to repair corrupt software installations. Software packages will have to be designed to take advantage of this new approach to software installation, which may also make its way into Windows 98. The design was not fully functional in the Windows NT 5.0 beta that we examined for this story. ►

**A new Programs Wizard in NT 5.0 could simplify upgrades and uninstall software better than its predecessor.**

but the OS will also be able to reside on disks formatted with the FAT and FAT32 file systems used by Win 95 and 98—important if you're planning to dual-boot your PC between multiple versions of Windows, as we did in our tests with the NT 5.0 beta.

The beta also includes a very preliminary version of a revamped Add/Remove Programs Wizard. Unlike the wizards in Windows 95 and 98,

can expect to see AMD's K6 3D+ running from 350 to 400 MHz, as well as a comparable chip from Cyrix that's a successor to its current 6x86MX. By mid-1998, expect Intel to ship a 333-MHz Pentium II CPU, the first PII of a series code-named Deschutes. This Pentium II-333 will run on a 66-MHz system bus. Later versions, possibly running at 350 and 400 MHz, will run on a 100-MHz system bus. Deschutes processors will be the first low-power Pentium IIs that can operate in notebooks as well as in desktops. Later Intel is expected to introduce CPUs with additional MMX instructions. In 1999, Intel should be ready to ship a 600- to 800-MHz chip, code-named Merced, that's aimed at high-end workstations and high-end servers.

### 200MB Floppy Disk

SONY AND FUJI have announced the HiFD drive, which reads and writes to old 3.5-inch floppies as well as to new 200MB disks. The two firms hope to convince PC makers to include the HiFD in new systems next year, says Fuji spokesperson Jeff Ash. The HiFD drives offer higher performance and about twice the storage of two competing high-capacity floppy drives, Iomega's Zip Drive and OR Technology's LS-120, says Jim Hamilton, an analyst with Freeman Associates. Pricing for the HiFD devices was not available. "For this technology to be ubiquitous, they're going to need to get it below \$50," says Hamilton. ►

## Windows Face-Off: NT Versus 95 Versus 98

THE VERSIONS OF Windows present and future have many similarities—and a few key differences. Windows NT Workstation 5.0's precise feature set remains in flux (as does Windows 98's, to a lesser degree). Here's a comparison based on Microsoft's current plans.

PRODUCT COMPARISON				
FEATURES	Windows 95 OSR2 <sup>1</sup>	Windows 98	Windows NT Workstation 4.0	Windows NT Workstation 5.0
<b>The Basics</b>

● = Yes ○ = No

<sup>1</sup> Version shipping on new PCs.

<sup>2</sup> Requires NT 5.0-compatible driver.

<sup>3</sup> Not available for original version of Windows 95.

## Win NT Offers Mixed Blessings

BASED ON MICROSOFT'S current plans and our first look at an early beta version, Windows NT Workstation 5.0 may be a smoother upgrade for current Windows users than version 4.0 was. But many potential pitfalls remain.

### POWER AND ITS TRADE-OFFS

NT'S UNDERLYING architecture, which will not change much with this release, is designed to provide a more stable, less crash-prone environment than that of Windows 98. While Win 98 retains vestiges of DOS and Windows 3.1 under the surface, NT has always been a fully 32-bit operating system from the ground up. Applications are shielded from one another in separate memory chunks and must address the display, disk, and other components through the OS's official procedures rather than doing so directly, as is still possible in Windows 98.

These measures greatly reduce the chances of an errant application or device driver crashing other programs or bringing the system down altogether. Unfortunately, they also reduce NT's software and hardware compatibility. Specifically, NT can't use old 16-bit drivers, as Windows 98 can. Also, programs that try to take direct control of the PC are unlikely to work. Prime offenders include many utilities, games, and old terminate-and-stay-resident DOS programs; the only way to be certain that a given package will function with NT is to check with the vendor or try it yourself. Microsoft has no plans to improve this for NT 5.0.

MIGRATION ISSUES ...	
The good news	The bad news
<ul style="list-style-type: none"> <li>• NT 5.0 can be installed over any previous version of Windows.</li> </ul>	<ul style="list-style-type: none"> <li>• It will still have heavier system requirements than Win 95 (not to mention Win 3.1).</li> <li>• Installing it on a PC that's not on the NT Hardware Compatibility List is a gamble.</li> </ul>
<ul style="list-style-type: none"> <li>• Unlike NT 4.0, NT 5.0 can reside on a disk formatted with Win 95 OSR2's FAT32 file system.</li> </ul>	<ul style="list-style-type: none"> <li>• It may not be compatible with DriveSpace disk compression.</li> <li>• Some features (such as encryption) require you to convert your disk to the new, incompatible NTFS 5.0 file system.</li> </ul>

To be sure, the news about Windows NT 5.0 software compatibility isn't all bad. In our informal tests, every program that was designed to work with Windows NT 4.0 ran with the NT 5.0 beta, and more NT 4.0-compatible programs are becoming available every day. That represents a substantial change from the status a little over

tempt to address some hardware compatibility issues. The vendor claims that Windows NT 5.0 will add support for Plug and Play that's essentially identical to that of Windows

98. But even if Plug and Play identifies a peripheral, that doesn't mean you'll be able to get it up and running. You'll still need a driver that's

turned out to be incompatible with NT 5.0, and the device wouldn't run. In NT 5.0, Microsoft intends to support devices previously supported in NT 4.0, according to Russ Madlener, an NT product manager. However, NT 4.0 support remains spotty for many categories of hardware products (notably scanners and inexpensive printers). Moreover, many peripherals manufacturers may never get around to developing NT 5.0-compatible drivers, especially for older products that are no longer manufactured. On the other hand, vendors may be more diligent about providing Windows NT 5.0 drivers for new products if they think that a sizable percentage of their customers

HARDWARE COMPATIBILITY ...	
The good news	The bad news
<ul style="list-style-type: none"> <li>• NT 5.0 adds power management for notebooks.</li> </ul>	<ul style="list-style-type: none"> <li>• Only new notebooks that support ACPI will be able to take full advantage of power management.</li> </ul>
<ul style="list-style-type: none"> <li>• NT 5.0 supports Plug and Play.</li> </ul>	<ul style="list-style-type: none"> <li>• Plug and Play won't work if a peripheral doesn't have an NT driver.</li> <li>• NT drivers for entire product classes (scanners, low-end printers) are scarce today.</li> </ul>
<ul style="list-style-type: none"> <li>• Win32 Driver Model drivers will work with both Win 98 and Win NT.</li> </ul>	<ul style="list-style-type: none"> <li>• Many peripherals won't have WDM drivers.</li> <li>• WDM won't work at all for video cards or printers.</li> </ul>

**HARDWARE HEADACHES: Visioneer's PaperPort Strobe**, a sheet-fed color scanner, is one of the myriad devices that don't currently support NT.

designed to run under NT.

### MORE BAD NEWS

EVEN SOME existing NT-compatible devices may not work with Windows NT 5.0. When we plugged in a Hewlett-Packard DeskJet 890C printer, Plug and Play noticed it was there and attempted to install the appropriate drivers. But HP's Windows NT 4.0 drivers

will be moving to the new OS. To address the dearth of NT drivers, NT 5.0 and Windows 98 will support Microsoft's new Win32 Driver Model. This architecture will let vendors create drivers for mice, scanners, and other input devices that will work with both operating systems. Some products already include WDM drivers. Again, there are major limitations: Printers

a year ago when we originally tested Windows NT Workstation 4.0. At that time, the current versions of some major business packages such as Lotus SmartSuite and WordPerfect Suite would not even install under it. (The companies fixed this problem after NT 4.0 shipped.)

Likewise, Microsoft will at-

and video cards will still require NT-specific drivers.

The outlook may not be pretty. Users of NT 5.0 could face various compatibility problems affecting existing hardware and software. Clearly NT 5.0 won't be attractive if you have to worry about whether a particular PC, program, or peripheral will work with it.

Microsoft is **positioning NT** as its main OS for business. That means **Windows 98** could be the last of its breed.

### NOTEBOOKS AND NETWORKS

WITH WINDOWS NT 5.0, Microsoft plans to address one of NT 4.0's most notable deficiencies—its lack of power management for portable computers. To eke maximum life out of notebook batteries, NT 5.0 will rely on Advanced Configuration and Power Interface, a sophisticated new technology that will appear first in Windows 98 next year.

The catch is that ACPI is still an emerging standard, not

fully supported even by new notebooks at this time. However, Dean McCarron, a principal at Mercury Research in Scottsdale, Arizona, believes that by the second quarter of next year, new notebooks will be able to take full

advantage of NT 5.0's power management. Current systems that provide only partial support for ACPI may be upgradable through BIOS updates. If you've got an older notebook that supports only ACPI's less robust predecessor, Advanced Power Management, you may be out of luck and out of power. (Microsoft says it hopes to provide these older systems with some limited power management but it makes no promises.)

Like its predecessor, NT 5.0 will support multiprocessor

PCs and will be available in a version for systems based on Digital Equipment Corporation's Alpha processor. These features make the OS a prime candidate for individuals like designers and engineers, who require the fastest computers.

(Windows 95 and 98 will not be equipped with these high-end capabilities).

At the same time that it ships Windows NT Workstation 5.0, Microsoft also

plans to deliver version 5.0 of Windows NT Server, the network operating system version of NT.

### NETWARE CHALLENGER?

PLANNED NEW features include an improved directory system, which is important for IS departments that need to manage large networks. Microsoft claims this capability will rival the directory services that have long distinguished Novell's network operating systems from NT. Other new NT Server features are designed specifically for those who plan to use NT Workstation 5.0, such as IntelliMirror, which will perform a silent ongoing backup of a desktop

computer to the file server. Microsoft also plans to include features in NT Server that will simplify the deployment of standard corporate applications; for example, one capability will download applications to a system automatically as they are needed. ►

### ISP Guarantee Has Fine Print

SPRINT'S FLAT-RATE Internet service is the first to offer a guarantee: If you ever fail to get a Net connection due to a busy signal, you get a week of free service. Sounds good, but you need to work for your freebie. If you get a busy signal from your local dial-up number, you have to call customer service, which will provide an 800 number from a pool of reserve access numbers. If you still can't connect, you have to call customer service again to get a \$5 credit—the equivalent of one week's service. If the problem recurs, Sprint will grant additional credits. Guarantees like this are likely to become more common as major ISPs seek to differentiate themselves to consumers, IDC analyst Ted Julian says.

### 92 kbps Over Standard Phone Lines?

A NEW TECHNOLOGY will let you download data off the Net at speeds of up to 92 kilobits per second over standard phone lines. But you'll need two 56-kbps modems that adhere to the K56flex specification, two phone lines, and an ISP equipped with a special communications device called CommPlete from Multi-Tech Systems. The latest version of the device uses a new technology to split data in half, sending each half over one of the two analog phone lines. For the 92-kbps service, Multi- ►

### SOFTWARE COMPATIBILITY

#### The good news

- A growing number of new software packages run under NT.

#### The bad news

- Many older programs of all types won't run.
- Utilities may not be available in NT versions.
- Games and multimedia applications can present problems.
- DOS TSR programs aren't compatible.

**SOFTWARE INCOMPATIBILITIES:** Many utilities, such as **Helix Software's Nuts & Bolts**, won't run under NT.

## WINDOWS OF THE FUTURE

IN THE NEAR future, expect NT 5.0's ship date to be a moving target—not unusual for a piece of software as complex

as an operating system. At press time Microsoft had not set a date. Microsoft's Russ Madlener says the next beta should be available early in 1998. But *Windows Watcher's*

Dwight Davis doesn't expect Windows NT 5.0 to hit store shelves until late 1998 or early 1999, roughly six months after he expects the oft-delayed Windows 98 to finally appear in the marketplace.

When ship day comes, PC users along with their IS departments will choose between Windows 98 and Windows NT Workstation 5.0. They'll square off on issues such as NT's security and stability versus Windows 98's software and hardware compatibility. But in the long run, the decision may be much simpler: Microsoft is positioning NT Workstation as its main operating system for businesses, says Davis. That means Windows 98 could be the last of its breed.

But when that might happen is still unclear—even when you ask Microsoft. "We'd like to merge the [architectures]," says Microsoft's Madlener, but he acknowledges that many companies still rely on old DOS software that won't work under Windows NT. Still, Bill Gates has said publicly that a "consumer" version of NT could eventually occupy a spot in Microsoft's operating system lineup similar to the positions held by Windows 95 and 98.

Of course, even the mighty Microsoft can't force users to migrate to an operating system until they're good and ready. Just ask any of the millions of folks who have stuck with the most widely used OS in the country, one that's installed on more PCs than Windows 95 and NT combined, according to market research firm Computer Intelligence: good old Windows 3.1.

—Harry McCracken ►

Tech's Paul Kraska says he expects ISPs to charge about twice what they charge for 56-kbps access. At press time it was unclear how many ISPs planned to offer 92-kbps connections. Multi-Tech already has one customer, a small ISP in Minnesota that plans to offer the service, Kraska says.

## \$100 Color Scanner

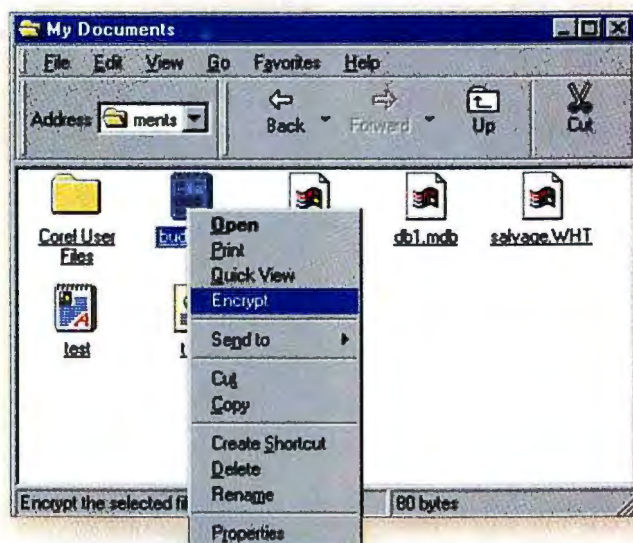

STORM TECHNOLOGY has announced EasyPhoto ImageWave, a 30-bit scanner that handles text, photos, and graphics on paper up to 8.5 by 11.7 inches at a resolution of 600 by 300 dots per inch. The device is expected to sell for about \$150, but Storm will rebate \$50 by mail through the end of January. Less than a year ago, comparable products cost about \$300. The product includes Xerox's TextBridge OCR and Adobe Photo Deluxe 2.0 software. The scanner attaches to a PC via parallel port. *PC World* has not tested the EasyPhoto, but it performed well in a demonstration.

## Ready for Prime Time?

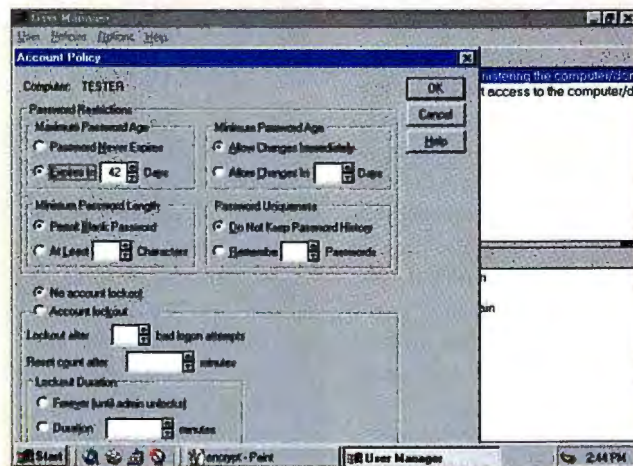

NEW YORK TIMES and *PC World* columnist Stephen Manes is about to hit the TV screen as half of *Digital Duo*, a new PC show. Manes and *Wall Street Journal* columnist Walter Mossberg promise independent, critical, and humorous perspectives, along with snide comments and pointed arguments. Scheduled to air on public television stations nationwide November 9 and 16 at 6 p.m. EST and PST.

## No-Nonsense Security

LIKE ITS PREDECESSOR, NT 5.0 boasts security features that Windows 95, Windows 98, and Windows 3.1 can't match. These features are particularly useful for securing files and data on PCs or notebooks that are shared by more than one person.

**FILE ENCRYPTION:** New in NT 5.0, file encryption appears as an option when you highlight a file and right-click. Encrypted files are password-protected, which means your employees can borrow your notebook without being able to view your confidential data.

**SERIOUS PASSWORD MANAGEMENT:** NT 5.0's User Manager can be set up to ensure that passwords are changed regularly and meet minimum or more stringent security standards.

It makes  
everyone's work  
that much better.

## "Centaur Inside" Means High Performance on a Small Budget

A NO-NAME company designs and builds its own Pentium MMX-class processor that's nearly as fast as its Intel equivalent, but sells it for a fraction of the price. And the company started from scratch less than two years ago. Fiction, right? Wrong. Last month Centaur Technologies arrived on the scene with a streamlined MMX processor. Better yet, a system based on Centaur's IDT WinChip C6 actually matches Intel Pentium MMX performance on Windows 95 business applications but costs 34 percent less.

### COMPROMISES

OKAY. THERE ARE SOME caveats—among them, poor floating-point and MMX performance. And it won't run

NT very well, the designers admit. Even though Centaur's new CPU raises the price/performance bar in the Pentium-compatible market, only one third-tier system vendor has come forward to sell it. But more are expected to appear by the time you read this.

AES Computers, a Texas-based builder of custom systems, provided *PC World* with its \$1184 WinSpeed 200 desktop PC configured with the 200-MHz WinChip C6, 32MB of EDO RAM, a 1.6GB hard drive, a 24X CD-ROM drive, and a 15-inch monitor. We compared it to 53 previously tested 200-MHz Pentium-class systems using our PC WorldBench test suite. The

### THE AES WINSPEED

200: a budget PC, and the first system based on a **Centaur CPU**.

result: an average 3 percent performance difference on business applications between the slowest—Centaur's and Intel's—and the fastest—AMD's and Cyrix's (see the performance chart). So for mainstream Win 95 business apps, all four 200-MHz Pen-

tium-compatible processors are created about equal.

But price/performance is a different story (see "New Centaur C6-Based PC Delivers Great Value"). That Pentium MMX-200 system that gives you the same performance as the C6 costs on average a whopping 50 percent more. In other words, every dollar that you spend for "Intel Inside" costs just 66 cents for "Centaur Instead."

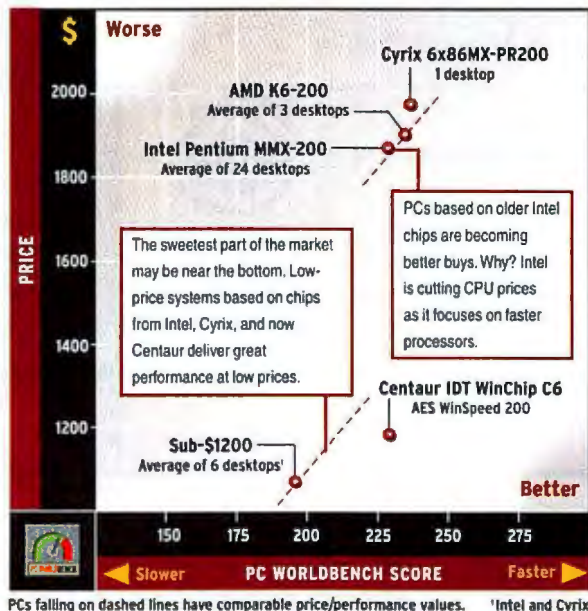

### MULTIMEDIA CRAWL

BUT THE C6 doesn't look nearly as good when you're thinking MMX multimedia. At its best, the C6 fell behind the average Pentium MMX in our Macromedia Director tests by 16 percent, and at its worst crawled through the Adobe Photoshop tests at an even slower rate of 40 percent. Centaur was candid about the processor's deficiencies. According to Jamal Haider, Centaur's director of marketing, "The C6 is not optimized for MMX and floating-point

## New Centaur C6-Based PC Delivers Great Value

COMPETITION IN the CPU marketplace continues to drive prices down and performance up. With the entry of Centaur, there are now three companies fighting to get a share of Intel's business.

All of the systems on this chart are good values, but the best buys are the ones closest to the lower right-hand corner. (Note: This analysis is based on performance of business applications and does not include MMX scores.) The Centaur C6-based AES WinSpeed 200 nearly matches the business performance of AMD, Cyrix, and Intel systems that cost 50 percent more. One caution: Will AES deliver the service you expect?

# SIMPLY BREAKING NEW GROUND.

Samsung announces a breakthrough in monitor technology with its "p" series professional monitors. Building on its award-winning technology, the new space age design of these high-powered monitors features Samsung's unique Display Director™ on-screen control system for advanced screen adjustments. Free Colorific® Color Matching software and a special ARAS UltraClear™ screen coating provide precision color with the sharpest, clearest, brightest images possible. With a 230MHz bandwidth, the 1000p offers superior performance with an ultra-fine 0.25mm dot pitch and completely flicker-free resolutions up

to 1600 x 1200 at 85Hz. TCO '95 compliant, SyncMaster™ "p" series monitors are compatible with all platforms and conform to the latest plug and play standard (DDC 2B+). ## Centaur C6 PC: Strong Performance for Bargain-Seeking Buyers

### C6 PC KEEPS PACE FOR BUSINESS APPS...

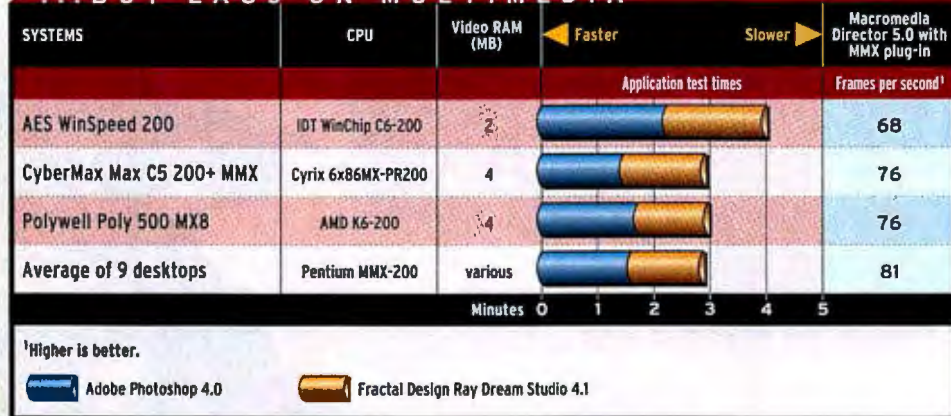

### How We Test

**BUSINESS APPLICATIONS:** We tested all systems with PC WorldBench, PC World's Windows 95 application-based benchmark. Higher scores are better. For a description of PC WorldBench 1.0 tests, see PC World Online ([www.pcworld.com/testing](http://www.pcworld.com/testing)).

**MULTIMEDIA APPLICATIONS:** We tested each system using a series of MMX-enabled applications. In Adobe Photoshop 4.0, we time two image editing operations. In Fractal Design Ray Dream Studio 4.1, we time how long it takes to redraw rendered 3D scenes at two levels of complexity. In Macromedia Director 5.0, we play a graphics-intensive Director executable file.

Data based on testing conducted by the PC World Test Center. All rights reserved.

### ...BUT LAGS ON MULTIMEDIA

And it's small enough to fit in a standard mobile package. Centaur sells the notebook version of the WinChip C6 at the same price as the desktop version—\$160. By contrast, Intel charges \$604 for its notebook chip and \$252 for the desktop version.

Centaur is optimistic about its prospects in a market Intel has scorned: the sub-\$1200 desktop. By our count, the average Pentium MMX-200 system sells for \$1871, and even the least expensive Pentium MMX-200 we've reviewed (the ProGen Atlas X-200) sells for \$1509—more than \$300 above the price of AES's WinSpeed 200. If

instructions." Those enhancements will come with the release of the C6+ processor (at speeds up to 266 MHz) next spring, along with 3D instructions to boost performance of Microsoft's DirectX technology. Accelerated Graphics Port is yet one more wait-till-next-year item. Chip sets that support AGP won't be ready until the spring.

Centaur Technologies is the brainchild of Glenn Henry, a marquee name in the esoteric world of CPU design. His efforts to develop a hybrid

RISC-x86 processor (hence the name Centaur) interested SRAM manufacturer IDT Technologies, which launched Centaur as a subsidiary in 1995. And despite his high-

many sales [to system makers] away from Intel." His targets: AMD and Cyrix. Henry figures his customers will be value-conscious buyers not afraid of a no-name.

A system based on Centaur's IDT **WinChip C6** actually **matches Intel Pentium MMX** performance on **Windows 95** business applications but **costs 34 percent less**.

powered résumé, the one-time IBM fellow has few illusions about his company's potential to take on Intel. "We're not going to set the world on fire," he says. "In fact, I don't expect to take

How will he do it? By making his chips smaller, cheaper, and more versatile. The Centaur chip contains four layers of metal instead of five, and has a die size of 0.88mm, about half that of AMD's K6.

you're a budget-minded buyer and you're not running many AGP-, MMX-, or FPU-intensive apps (such as 3D games or CAD), WinChip C6-based systems could be right for you.

## HP SureStore CD-Writer Plus. The drive to be your best.

**In the pursuit of excellence, most experts will agree, you need to have a solid drive.** Introducing the HP SureStore CD-Writer Plus. A CD-Recordable/ReWritable solution that lets you do things better while making exciting things possible. With ❶ drag-and-drop simplicity and flexible rewritability, it's as easy to use and familiar as a floppy. Only better. ❷ With up to 650 MB capacity it opens up new dimensions in recording audio,

video and big data files. ❶ Store your personal and business records on high-quality, reliable CDs. Unlike any zippy new formats, the CDs you create can be ❷ shared with millions of CD-ROM and ❸ stereo CD players worldwide\*. And the best part is ❹ it's a piece of cake to use. So get the drive. HP SureStore CD-Writer Plus. Visit us at [www.hp.com/go/cdr](http://www.hp.com/go/cdr) or call 1-800-249-4057 Dept. 496 for more.

## ...ve Over Gateway as Sony, NEC, CompUSA...)

It announced plans to offer custom-built systems. At least two companies (CompUSA and Packard Bell NEC) are going head-to-head with Gateway and Dell by taking orders for systems via phone and the Internet.

And more are expected to follow. Sony dipped its toe into the water in September, when it started selling a limited number of configurations by phone. Even Compaq, which said it would never follow suit, has jumped into the fray, selling PCs over the phone and on the Web. "This is the way consumers are saying they want to buy," reports David Goldstein, president of Dallas-based consulting firm Channel Marketing. "A lot of people are buying replacement computers and want specific configurations."

How attractive are the suitors vying for your direct dollar? That depends on your needs, since the new players are targeting somewhat different types of users and have different strengths.

### MEGAMUSCLE

COMPUSA APPEARS to be the most formidable of the new players, thanks to its well-established infrastructure and an annual \$4.6 billion in sales muscle. The Dallas-based company plans to challenge everyone from Compaq to the local screwdriver shop. Al-

though this strategy will put CompUSA in competition with the very manufacturers it depends on to stock its stores, the company says it isn't worried. After all, plenty of vendors would kill to get on a CompUSA shelf. "They are happy to have us sell their systems, and we're happy to be selling ours as well," says Carol Elfstrom, CompUSA spokesperson.

Through CompUSA's chain of 134 retail outlets, customers can kick the tires on the company's build-to-order systems, which carry the American and American Pro names. Who builds them? CompUSA won't tell. But analysts say Acer America and Elite Computer Systems are two of the leading candidates.

CompUSA's machines offer options for the latest technology, such as DVD drives. Customers choose most major components, including the

"This is the way **consumers** are saying they want to buy....[They] want **specific configurations**," says David Goldstein of Channel Marketing.

CPU, sound card, speakers, and hard drive. You can order at in-store kiosks, by phone, on the company Web site, or through corporate field representatives. A business lease option is available, but CompUSA makes no provision for consumer leasing.

The merged Packard Bell NEC operation has a slightly narrower focus for its build-to-order program, launched last summer as NEC Now. The

company says it's aiming at the home office and small office markets and the more experienced consumers.

One problem: Packard Bell's shaky reputation among sophisticated computer buyers, the very customers the NEC division is targeting (see "PC Reliability and Service" in the June issue). Although the two divisions share a manufacturing facility in Sacramento, California, the company says machines bearing the NEC label are not built on the same assembly line as Packard Bell models.

Just like CompUSA, NEC offers the latest technology—the company said it was ready to ship 300-MHz Pentium II machines the day Intel unveiled the chip. It also sells a Hughes satellite dish for Internet access at up to three times the speed of an ISDN line.

But NEC buyers have fewer choices of components than CompUSA customers do. For instance, all the machines in the Direction line include a 24X CD-ROM drive, a Yamaha OP14 sound chip, and an ergonomic keyboard, whether the buyer likes it or not.

In early October NEC was taking orders only by phone but planned to sell build-to-order computers via its Internet site by November.

### CAUTIOUS SONY

SONY'S DIRECT operation is far less ambitious than that of the other new entrants. Its primary target is the home computer user, and that means Sony won't let you order a machine that has NT 4.0 ►

preloaded or pay with a company purchase order.

Dependent on retailers for distribution, Sony is carefully avoiding the appearance of posing a threat to these partners. In fact, even though the company offers complete computer systems, it says it's more interested in selling accessories that might be hard to find in a store. "Our strategy is not to compete with a Gateway or a Dell, but to complement our core distribution strategy," says Patrick Vogt, national sales and marketing manager for Sony's direct sales and marketing division.

Sony was also slower than the competition to offer a Pentium II-300 machine. The company planned to begin

## The ABCs of Armchair Shopping

NOT ALL 800 NUMBERS are created equal. *Build to order*, *configure to order*, *mail order*, and *direct order* are just a few of the buzzwords you hear as vendors rush to snag the armchair PC buyer. Though the differences between these terms may seem minor, they can be significant.

Here's a brief guide to sales methods in the new shopping trend.

**BUILD TO ORDER** Will assemble a computer to your exact specifications (such as Gateway and Dell).

**CONFIGURE TO ORDER** Sells PCs with some standard features, but you dictate the specifics of others, such as hard drive and modem (like NEC).

**MAIL ORDER** Sells PCs in set configurations by mail, phone, or the Internet.

**DIRECT ORDER** Uses sales representatives in the field to call on corporate customers (think of IBM's "blue suits").

shipping PII-300s in late October. Under its Vaio line, it is already selling a limited selection of preconfigured, fully loaded systems aimed at the high end of the market. Buyers' only major option is the monitor. Sony accepts orders by phone only and claims to ship within 24 hours, com-

pared to five business days for its build-to-order competitors.

Seymour Merrin, president of Merrin Information Services in Palo Alto, California, doesn't think that Packard Bell NEC or Sony represents a serious challenge to the Dells and the Gateways. Why? It will be hard for these companies to

build the complex order-taking and fulfillment operation that is needed to move high volume.

However, CompUSA may be a force the others will have to reckon with.

It already has a service-and-support setup in place. It can build to order without having to set up another distribution channel. And just over the horizon, Circuit City, Office Depot, and RadioShack are exploring

build-to-order-type operations, suggests David Goldstein. What does increasing competition mean to buyers? Dell, Gateway, Micron, and others may have to respond with lower prices or better offerings. Sounds like a win for consumers.

—Daniel S. Levine ▶

## WEB BROWSER

## Stats From Web Back Up Your Big Ideas

YOU HAVE THE greatest product idea of your life. At least you think you do. But before you throw a bundle into developing this little gem, you'd

better do some research. Doing your homework about markets and competitors can help you refine your ideas, attract investors, and avoid catastrophe. Where to turn? The Web, of course.

If you're new to this type of research, begin at the Library Research Guide: Marketing for Engineers ([blon.mit.edu/depts/barker/me2009/Index.html](http://blon.mit.edu/depts/barker/me2009/Index.html)), by the Massachusetts Institute of Technology's Barker Engineering Library. Though written for engineers, this clear, concise primer is relevant to anyone doing market research. It points you to resources on and off the Web, and even offers tips for conducting effective Internet searches.

Another worthwhile stop is the site of

American Demographic and Marketing Tools magazines ([www.demographics.com/home.htm](http://www.demographics.com/home.htm)). You can search and retrieve full-text articles from these two magazines at no

charge. The site contains tips on market research and marketing strategies, and links to specific surveys and reports, some of which require a fee. Wondering about an audience for a new kind of putter? Search on 'golf' and the database returns a study of the communities with the highest per capita number of golf holes in the nation.

The biggest collector of the type of information you're likely to need is the U.S. government. But rather than scour the pages of each agency in hopes of finding what you're looking for, try using Fedstats ([www.fedstats.gov](http://www.fedstats.gov)), which allows you to access the sites of more than 70 federal agencies.

Need more government info? Similar to Fedstats is Statistical Resources on the Web ([www.lib.umich.edu/libhome/Documents.center/stats.html](http://www.lib.umich.edu/libhome/Documents.center/stats.html)) from the University of Michigan's Document Center. The two overlap somewhat, but the university site has a broader list of offerings, even if it is littered with

cheesy out-of-the-box graphics.

—Daniel S. Levine

THE UNIVERSITY OF MICHIGAN offers one of the best market research sites on the Web.

**Further::** Microsoft® Internet Explorer 4 is a new breed of browser. ## Where's the Remote? TV-Style Commercials Invade Web

### CONSUMER ALERT

LAST SUMMER ABOUT 1000 subscribers of Internet service provider MindSpring got a sneak peek at what might be the future of online advertising. What they saw were cyber-sales pitches that looked a lot like TV commercials: full-screen animated ads complete with sound tracks.

### IN YOUR FACE

LIKE IT OR NOT, advertisers are leaving no pixel unturned in their quest for consumer attention. The latest wrinkle—*interstitial advertisements*, ads that interrupt ongoing content. MindSpring's test, using technology developed by San Francisco-based Streamix, was only one step in the online industry's march toward more in-your-face advertising. So get ready: It may become increasingly common to have to sit through a few commercials in order to get to the information or entertainment

you came for in the first place.

Unlike you, advertisers are annoyed by the fact that banner ads are easy to ignore. But there's no ignoring Web commercials. In Berkeley Systems' You Don't Know Jack online game show ([www.bezerk.com](http://www.bezerk.com)), when the host says it's time for a commercial, TV-like ads fill the screen. Or check out the Riddler game site ([www.riddler.com](http://www.riddler.com)), where you must scroll through a full-page ad before being able to play the game you selected.

If you think that's annoying, how would you like to see a commercial before every Web page? Would you download a special program to do so? Streamix is betting you will. Its proprietary HyperStitial technology relies on a companion application that runs alongside your browser and enables advertisers to pre-

STREAMIX founder Robert Lee

sent full-screen commercials during the delay as Web pages download. According to Streamix founder Robert Lee, "Our technology doesn't slow communication [between the user and the Web site] at all." The advertisements, he says, are downloaded to your system by the ISP while you're staring at a Web page and your browser isn't sending or receiving data.

was "nonnegative." Translation: They didn't hate it.

However, Streamix acknowledges that some users were irritated by the advertisements, and HyperStitial's companion program will also display non-commercial content along with the ads in categories ranging from photographs and cartoons to factoids and Hollywood gossip. You'll be able to control what kind of nonadvertising material you see, but you won't be able to turn off the ads entirely.

Configuring your computer to display ads seems as ridiculous as requesting commercials from broadcasters, yet MindSpring's testers seemed willing participants. Maybe it's because full-screen, animated ads are a novelty that

consumers will enjoy—until they become common.

Ads on the Web may be the inevitable price that surfers pay. After all, most of us have indicated our unwillingness to pay anything else for content. But if current trends continue, Web commercials will be everywhere—and there's no remote control in sight.

—Jim Heid ►

INTERSTITIAL ACTION: You came to play a cool game. But first you have to check out an ad. Boring? Tough luck. It's the wave of the future.

### FAINT PRAISE

DOES IT WORK? Don't ask us: Streamix declined to let *PC World* test its software independently, saying it was still evaluating the results of the MindSpring test.

But MindSpring special projects manager John Powell says that 70 to 80 percent of the feedback from beta testers

## Windows CE 2.0 Adds Power and Color to Handhelds

**MICROSOFT IS** giving Windows CE a birthday makeover.

**DRIVE** Version 2.0 of the 1-year-old operating system for palmtops, set-top boxes, and other non-PC devices remedies many—but not all—of its predecessor's shortcomings.

The upgrade will make its debut by the holidays in a new generation of \$600 to \$900 handhelds from Casio, NEC, and at least five other vendors. Even if you took a pass the first time around, improvements such as larger color LCD screens, printer support, and improved connectivity might make these new portables worth a second look—if you can live with the undersize keyboards on most of them. Do you already own a CE 1.x device? Several vendors will allow you to add the software improvements via a ROM upgrade.

## BIG-SCREEN CE

THE MOST visible difference you'll notice between most Windows CE 1.x and 2.0 handhelds is the displays. The CE 2.0 handhelds are bigger, and they provide resolutions of up to 640 by 240—the equivalent of a VGA screen cut in half crosswise. With the lone exception of Hewlett-Packard's late-arriving CE 1.1 device, the 320LX, earlier products were limited to 480 by 240 resolution. In addition, CE 2.0 handhelds support up to 256 colors, compared with

**DO YOUR OWN CE THING:** Taking advantage of Windows CE 2.0's flexibility, NEC's MobilePro 700 is the largest handheld with the new operating system. The keyboard rivals those on mininotebooks.

four grays in 1.0 devices.

Most of the new handhelds come with faster processors and support rechargeable batteries (as well as the AA batteries found in the earlier

## PRINTING AND PRESENTATIONS

ON THE SOFTWARE side, you can now send Pocket Word and Pocket Excel documents directly to your printer. You

## What's New in CE 2.0 Handhelds?

- New, faster processors
- More memory
- Larger, sharper displays with up to 256 colors
- Printing support (including support for TrueType fonts)
- Rechargeable battery packs
- Spelling checkers
- Pocket PowerPoint
- More synchronization options
- Pocket Internet Explorer upgrades, including frames support
- ROM upgrades for some CE 1.x devices
- Internal modems, voice recorders, backlighting options

devices). CE 2.0 also supports several hardware features that were introduced in late-arriving CE 1.x devices, including backlighting, voice recorders, and built-in hardware and software modems.

can also send and receive e-mail attachments, and check the spelling of documents created in Pocket Word, the slimmed-down version of Microsoft Word that comes with the OS. You can now

export Microsoft Outlook data from your desktop to four pocket applications—Inbox, Addresses, Calendar, and Tasks. Ethernet support permits direct connection to a network via PC Cards.

You can even take PowerPoint presentations on the road with a pocket version of Microsoft's popular presentation application. You can't create presentations in Pocket PowerPoint, but you can make minor editing changes and annotations. Pocket PowerPoint stores presentations in compressed form, so some fancy formatting can't be ported, and you're limited to 256 colors. But when displayed via a VGA-out card and projector or monitor, slides will shine in full VGA format.

## UPGRADING CE 1.X DEVICES

**OWNERS OF MOST Windows CE 1.x devices from Casio, Hewlett-Packard, NEC, and Philips will be able to enjoy the new software features by taking advantage of a ROM upgrade that will be free to recent buyers, and will cost \$100 to \$129 for those who bought before early September. LG Electronics may let owners of its Phenom Windows CE 1.0 palmtops trade them in for new Phenom IIs for only a small shipping and handling charge.**

To enjoy the hardware benefits, you'll have to invest in a new unit. But you won't see every new hardware feature on every new device, and unlike with the first crop, the handhelds won't all look alike. This time around, Micro- ▶

## Surf Cordless.

**Panasonic introduces the Cordless Data Link.  
A cord-free connection for your modem.**

You can go anywhere in the world on the Internet. As long as you're in front of your computer. Connected to a modem. Connected to a phone cord. That's connected to the wall. Well, now you can disconnect and go up to 100 feet away, with the Cordless Data Link from Panasonic. The portable unit connects to your laptop and transmits a 900 MHz signal to the base unit plugged into your phone jack. Up to v.34 (28.8 kbps). So, now Internet users will finally go someplace they never go. Outside.

soft has given vendors much more freedom to differentiate their products.

As a result, prices vary widely, from \$600 basic monochrome models to \$900 for Sharp's color Mobilon HC 4500 with 8MB of RAM, a 33.6-kilobits-per-second modem, and a voice-memo recorder. Sharp, which makes its Windows CE debut with three Mobilons, plans to ship its color units in December. Other vendors were still seeking better solutions for color's huge power drain (LG estimates the battery life of its upcoming color unit at 10 hours, compared with about 40 hours for a monochrome unit).

Sharp gets the award for most imaginative—not to say oddest—Windows CE accessory: An optional \$349 PC Card with a lens attached lets you use the Mobilon as a digital camera. The screen is your viewfinder, and a button on the device lets you capture

images for storage inside the unit. We would have loved to try this feature, but it was not available at press time.

NEC's MobilePro 700 also deserves

special mention because of its unusual size. While most Windows CE 2.0 palmtops are slightly larger than standard 1.0 devices (to accom-

preproduction units of a few devices. All are still relatively light (the 1.5-pound MobilePro 700 is the heaviest), and the new features make them more like ultraportable, limited-function notebooks than personal digital assistants. But the undersize keyboards on most of these devices still preclude serious use as even a low-end notebook substitute. Even with the MobilePro 700's easy-to-type-on keyboard, you still must use a stylus as a pointing device, which feels awkward.

Microsoft has said all along that Windows CE can be tailored for a variety of hardware, including PDAs, set-top boxes (such as WebTV), and smart phones. The set-top boxes are already out, and vendors say privately that the first palmtop versions should appear early next year. Phones should follow by the end of 1998. If these devices live up to expectations, Windows CE may yet be a winner.

—Yardena Arar ■

**UPSIZING CE:** The Cassiopeia A-20 (right) has a larger screen than the original but is only slightly bigger. One way Casio was able to save space was by moving the speaker from the lid to just above the keyboard.

moderate the slightly bigger screen), the MobilePro 700 is significantly larger than any other 2.0 device, with a roomier keyboard than you'll see on mininotebooks like Toshiba's Libretto.

Microsoft was still tweaking the code for Windows CE 2.0 at this writing, so we saw only

Right On Schedule!

 GATEWAY 2000  
EXPRESS

welve years ago, in a place far from the Silicon Valley, Gateway 2000 was born with a dream of giving the people a rare combination of price, quality, service and technology for the finest value in the computer kingdom. Today Gateway is a tradition. Year after year, people continue to turn to us for the best overall computer value. That's why we weren't surprised when an IDC/ACNielsen survey of computer owners showed Gateway had the highest brand loyalty of *any* computer maker in the U.S. home market.\* You're invited to join our family too, or return for a reunion, this magical season.

# Gateway More

The Gateway Holiday Express is here, and it's loaded with all the latest technology — quality tested and ready to be your digital locomotive! Whether you're looking for increased productivity or a complete entertainment center, Gateway has it. All the cool features are on board, and we're making them more affordable than ever before.

Get on track for the best computer packages ever. Call Gateway today!

*Based on percentage of computer owners planning to buy another computer of the same brand as they currently own between 11/1/96 and 7/31/97.*

# Delivers Holiday Magic.

"You've got a friend in the business."®

8 0 0 - 2 7 0 - 5 7 3 4

# Get Your Ticket Today!

**A**ll aboard! Gateway is your ticket to the ideal computer system. We know the computer industry *and* we understand your needs. So we made shopping for a system easy by giving you several computer categories to choose from.

If visions of powerful performance and mobility dance through your head, hop on the **GATEWAY™ Solo™** portable PC train. Keep group computing on track with our **Destination® Digital Media Computer** and its huge 31-inch or 36-inch (35.5-inch viewable) screen. Or find business solutions with our **GP-Series** systems and **NS-Series** servers. Gateway 2000 Major Accounts, Inc. has reliable **E-Series** desktops, workstations and servers for corporate customers. And your family will discover their wishes have all come true with a value-packed **G-Series** multimedia PC under the tree. Gateway lets you do your home and business computer shopping at one place — at prices that won't break your budget. Plus we have several affordable financing options.

It truly is the perfect time to buy the system you've been dreaming about all year! Call us today and live happily ever after.

## We'll Heat Up Your Holidays

They may be predicting record lows on the prairie this winter, but Gateway 2000 is stoking the fire with hot new technology and even better service for our customers. Close, long-term relationships with suppliers like Western Digital, U.S. Robotics and Intel help us see where the industry is headed. That's why we deliver the power of Intel's next-generation **Pentium® II** processor to both the home *and* office. We've also teamed up with software developer, Microsoft, and entertainment trend-setter, DreamWorks Interactive, to give you a choice of top-selling software. Call to find out about all this hot stuff.

## GATEWAY™ NS-Series Servers

Take your business network off the back burner and get connected with Gateway's affordable NS-Series server line. Together with ALR, an established leader in the server industry, Gateway is delivering reliable, scalable and manageable server technology at unprecedented prices.

## Microsoft Choice

Gateway gives you the freedom to choose. We custom build every system after you order it, *and* we let you pick from the hottest Microsoft® and DreamWorks Interactive™ software around. Education CDs, productivity programs, games — it's all here.

## GATEWAY BUSINESS DIRECT

Gateway's knowledgeable and friendly sales reps have taken their expertise to the next level. We formed a team of dedicated sales folks and gave them advanced training on servers, networking, GP-Series desktops and financing to better handle business customers' needs. Our Gateway Business Direct team is fired up to take your calls!

## Boston Acoustics® MediaTheater™ Multimedia Sound System with Virtual Dolby® Surround

Ignite your senses with our new Boston Acoustics speakers. This quality sound system takes music and education CDs, computer games, even multimedia presentations to audio extremes. This compact, three-piece system has Dolby ProLogic® decoding and a digital Virtual Dolby Surround processor to recreate full five-speaker surround sound with just two speakers.

## Financing For The Holidays And Always

Gateway makes owning your Gateway PC more affordable than ever before. Not only do we give you hot deals on systems, we also give you more options to finance those PCs. Low, fixed monthly payments, 90 days same as cash, your very own Gateway 2000 Moola MasterCard® or customized leasing — tell us what we can do to meet your needs.

## Warm Up With Our New Web Site

Our Web site, [www.gateway.com](http://www.gateway.com), is the place to be on-line. It's new and improved, simple to navigate, and full of answers to your questions. You can even buy your new holiday PC on-line. Sled to our Web site today!

8 0 0 - 2 7 0 - 5 7 3 4

[www.gateway.com](http://www.gateway.com)

## Take Gateway On Your Next Adventure

Whether you're traveling around the globe or across the hall, the GATEWAY™ Solo portable line has just the system to meet your needs. Gateway's tradition of packing in the features and delivering the performance goods continues with these mobile PCs.

The Gateway Solo 9100 portable is our top-of-the-line answer to your desktop needs in a "carry on." The August 4, 1997, edition of *Fortune* magazine calls the Gateway Solo 9100 "the Rolls-Royce of laptops, for folks who won't compromise on performance."

Our classic Gateway Solo 2300 notebook is just right for budget-conscious holiday shoppers. It's a perfect complement to a desktop PC.

We personalize the technology by letting you decide what goes in your portable. Every Gateway mobile and desktop PC is built fresh after the order. And common modularity is every IS manager's holiday wish! Many Gateway Solo components, including docking stations, batteries, memory and more, are designed to easily swap between our different models.

No other computer company gives you more computing, more places *and* more choices. Why not order your Gateway Solo right now? Stop by our Web site or give us a call.

## Gather 'Round The Future Of Digital Media

The powerful computer features and digital television capabilities of our new **Destination Digital Media Computers (DMC)** have fanned the flames of the digital future.

Entertainment and information will never be the same.

The DMC, descendant of the Destination Big Screen PC/TV, is a big hit with digital pioneers. Enormous 31-inch or 36-inch (35.5-inch viewable) SVGA monitors give the whole gang a great view. Imagine sitting 10 feet away and still being able to read text on the screen! Amazing digitally enhanced television is displayed at resolutions up to 640 x 480. And the clarity of this monster monitor is unbelievable — 3-D practically jumps off the screen thanks to the Apocalypse 3Dx graphics accelerator.

Digital Versatile Disc (DVD) cranks up your experience with improved quality and more storage: seven times as much as a CD. Plus it supports two surround-sound standards: Dolby® Digital and Dolby Pro Logic®. The precision of our harman/kardon speaker system takes Dolby Pro Logic to extremes!

Our Destination systems give you independence that goes far beyond the cordless keyboard and Field Mouse remote. Don't be left out in the cold. Get yours today.

Gateway Destination D6-300XL  
Digital Media Computer

Get in the holiday spirit at [www.destination.com/fireplace](http://www.destination.com/fireplace)

## Cordless Keyboard and Field Mouse® Remote

Multidirectional, 4-Channel Radio Frequency

• 25' range • Control Buttons: Power, Volume, Channel, Mute and Recall • TV/PC control

• **Keyboard Specifics:** 4 AA Batteries (included), 87 Alpha-numeric keys and Microsoft Windows 95 key, EZ Pad touch pad, PS/2® Mouse Port

• **Remote Specifics:** 4 AAA Batteries (included), Left and Right Mouse Buttons, Easy-Access Mouse Button on Back, Integrated Trackball, Numeric Keypad

## 31-inch SVGA Monitor

Data Grade CRT: 33" Diagonal (31.5" viewable)

• Invar Shadow Mask • Resolution: 640 x 480 @ 60-72Hz, 800 x 600 @ 60Hz • Unlimited Display Colors • Scanning Frequency: Horizontal, 31 to 38kHz; Vertical, 50Hz to 72Hz

## 36-inch SVGA Monitor

Data Grade CRT: 38" Diagonal (35.5" viewable)

• Invar Shadow Mask • Resolution: 800 x 600 @ 60Hz • Unlimited Display Colors • Scanning Frequency: Horizontal, 31 to 37kHz; Vertical, 59Hz to 75Hz • Autoswitching PC/TV Mode

## Digital TV Capabilities

Digital Line Doubling, Progressive Scan • Digital Comb Filter • Two-tap Vertical Line Interpolation • Five-tap Horizontal Line Interpolation • Brooktree 2164 Graphics Chip • 829a Video Decoder • 181-Channel, Cable-Ready TV/Tuner

## harman/kardon® Home Theater Surround Sound System

AVR-10 Audio/Video Receiver w/ Remote

• Frequency Response: 0.5Hz-100kHz @ 1W (+0/-3dB) • Signal-to-Noise Ratio: CD - 93dB; Video - 83dB • Four 3.5" Paper-Cone Satellite Speakers • Center Channel w/ 3.5" Paper-Cone Woofers (2) and .5" Polycarbonate-Dome Tweeter w/ Acoustic Lens in D'Appolito configuration, and 50W specially designed 6.5" Paper-Cone Subwoofer

The crisp, clear images of DVD on the Destination Digital Media Computer make analog video as unpopular as coal. (Television horizontal resolution calculated assuming a composite video signal.)

## Make Your Network Connection At Gateway

Gateway's servers and network-ready PCs have arrived. We have all the right products, systems and people in place to take business to the next level. And you're the conductor, because we're here to meet your needs. The addition of Gateway Business Direct, NS-Series servers and GP5-166E desktops means now our business customers can count on the personalized service, fresh technology and outstanding value that made Gateway what it is today: a leading direct-marketer of professional PCs.

Businesses have always turned to Gateway for the best overall value, and with the introduction of the GATEWAY™ NS-Series server line, we can do even more for your business.

Our reliable NS-Series servers are based on proven technologies from ALR, a Gateway subsidiary. Trademarked ALR technology, like the InforManager subsystem with ActiveCPR, make our servers easier to manage. Plus they offer the scalability necessary to grow with your business.

The featured NS-7000 entry-level server is a great print and file server as well as a reliable network hub for workgroups, classrooms and small departments. Couple this savvy server with Gateway's low-cost, network-ready GP5-166E systems and our affordable financing options, and that network you've been considering becomes a reality.

Check out our Web site and get price quotes. Then call our Gateway Business Direct team so we can help you find the right systems and financing solution. Either way, Gateway has your network ticket.

## PCs Made Especially For You

We're whipping up delectable multimedia performance and value. No one else comes close to having all Gateway's multimedia goodies.

We start off right by giving you a choice of software. Not just *any* software, it's all from Microsoft and DreamWorks Interactive. We joined forces with these creative, cutting-edge software and entertainment companies to create "Microsoft Choice" — four exceptional packages of top-selling software. You tell us which best meets your needs and we'll install it for you.\*

Of course we have the hardware to make all this amazing software really cook too. We've even found a way to deliver Intel's next-generation processor technology, the **Pentium® II** processor, for less than \$2,000! That's only \$70 a month, and you own the system the moment it arrives. Now the question isn't whether you can afford it, it's how could you possibly let this amazing opportunity pass by? Because the processor isn't the only cool thing on this system. It's loaded with all the frosting and sprinkles for amazing value. We've blended feature-packed systems, award-winning service and support, and great prices to make Gateway G-Series multimedia systems both irresistible and affordable. And each is unique because we make them after you order. Treat yourself today!

CPUmark<sub>32</sub> is a 32-bit test that reflects the processor usage of 32-bit applications and focuses solely on a PC's CPU, RAM, cache and cache controller.

For more information on how these benchmark scores were achieved, please call the Gateway FaxBack® service and request document #2471. Benchmark information is also available on our Web site, [www.gateway.com](http://www.gateway.com).

The EV900 increases your viewing area and has a smaller footprint than other 19-inch monitors. That means one less roll of wrapping paper this holiday season.

\*\*On-site service is available to most locations in the continental United States, Alaska, Hawaii, Puerto Rico and Canada after you and your Gateway technician determine an on-site visit is necessary. On-site service is provided by PC Technology Services, Inc. On-site is not available for any monitor, mouse, keyboard, or portable system. Write or call for a free copy of the on-site service agreement.

800-270-5734

[www.gateway.com](http://www.gateway.com)

Through a special arrangement with premier software developer, Microsoft, we've put together a trainload of top-of-the-line software — including titles from entertainment giant DreamWorks Interactive. You choose your standard software from four options, but we don't stop there. You can easily and affordably add more software to your PC as an upgrade. And, when you order extra software at the same time you order your system, we'll even load it for you.

## Microsoft® Home Essentials

Microsoft Home Essentials comes standard on our special G5-166 and G6-233 Best Buy packages. All the essential tools for home computing are there, including: Word, Works, Encarta® Encyclopedia, Greetings Workshop and Arcade. Plus it's easy to add another specialty pack from our software upgrades. You won't find a better deal anywhere.

## Microsoft Choice Options

Gateway G-Series PCs (except the G5-166 and G6-233 Best Buy), and all GP-Series PCs and Destination systems, let you continue to personalize your PC with Microsoft Choice. Look over the following packages and tell us which one best meets your needs. Microsoft Office 97, Small Business Edition does not include Microsoft Home Essentials, while the other three suites do.

### ■ Microsoft Office 97, Small Business Edition

Get organized and get connected with the office suite that integrates intelligent, productivity-enhancing applications with the power of the Internet. Includes Microsoft Excel, Word, Publisher, Bookshelf®, Small Business Financial Manager and Outlook™.

### ■ Microsoft Professional Resource Suite Plus Microsoft Home Essentials

Increase your productivity and efficiency with volumes of information at your fingertips. Award-winning content and interactive environments are combined in these easy-to-use applications. Includes Publisher, Bookshelf, Encarta Virtual Globe, Expedia™ Streets and Expedia Trip Planner.

### ■ Microsoft Action Titles Plus Microsoft Home Essentials

Experience incredibly realistic graphics, explore new worlds and tackle tough challenges with these action-packed games. Includes Close Combat™; Flight Simulator; Age of Empires™; Monster Truck Madness™; DreamWorks Interactive™: DILBERT'S™ Desktop Games; and DreamWorks Interactive: The Neverhood™.

### ■ Microsoft Child Adventure Suite Plus Microsoft Home Essentials

Kids love these educational and entertaining software titles designed to encourage adventure and exploration. You'll appreciate the parental control and PC security features. Includes Microsoft Plus! For Kids; DreamWorks Interactive: Chaos Island: The Lost World™; DreamWorks Interactive: Goosebumps™: Attack of the Mutant™ 98; Scholastic's The Magic School Bus™ Explores in the Rain Forest; MS 3-D Movie Maker; Scholastic's The Magic School Bus Explores in the Age Of Dinosaurs and Creative Writer 2.

## Microsoft Developer's Tools

Now you can get Developer's Tools from Microsoft. That's exciting! Because we wanted to make sure we were putting together the best package of development software available, we weren't quite ready with the details at press time. Please call your sales rep or check out our Web site for all the specifics.

# Add All The Trimmings!

Whether you've been part of the Gateway family for years, or you're just joining us today, we have great deals on extras to make your holidays merrier and help you make the most of your GATEWAY™ PC.

## Software Upgrades

Keep personalizing your Gateway PC and add software for all your interests. It's all been tested with Gateway PCs, so there are no hassles. Why limit yourself? Have it all!

### Microsoft Software Upgrades

- Microsoft Action Titles Upgrade \$99
- Microsoft Professional Resource Suite Upgrade \$99
- Microsoft Child Adventure Suite Upgrade \$99

### GATEWAY SELECT

Our Gateway Select program lets you know you're getting software that meets or exceeds our standards for quality, value and ease of use.

### Gateway Software

- **Gamer's Pack** Includes DeadLock™; Jack Nicklaus™ 4; Super Bubsy™; Sega Rally™ Championship; Mixman 3-Mix™ and PC ProPad gaming device. \$99
- **Finance Pack II (U.S. Shipment Only)** Includes Quicken® Deluxe 6; Quicken Financial Planner™ 2; Quicken Family Lawyer™ 7 and Quicken Parents' Guide to Money.™ \$69

# Now You Can!

More and more holiday shoppers are getting the GATEWAY™ PCs on their wish list. And, whether for home or office, so can you! The "I think I can, I think I can" attitude has given way to a new phrase. Our affordable financing options make it easy to say, "Now I can. Now I can!"

## Good Financing Tidings for the Home

### Gateway Easy Pay

The perfect solution for gift givers or anyone on a budget. There's low fixed monthly payments you help determine, and no additional fees. Plus, it's better than leasing. After the final payment you own the PC.

### 90 Days Same As Cash

Put your Gateway PC to work — or play — now, and don't pay a thing for 90 days! Ask your sales rep for details.

### Gateway Moola MasterCard® Credit Card

It's a credit card and rebate card in one neat package! You pay no annual fee, save with a competitive interest rate, and then watch the Moola points add up. Apply today — it's even easier on-line.

## The Gift Of Affordable Technology for the Office

Businesses can ring in the new year with even better productivity and a budget that's in the black thanks to Gateway's great financing options.

### Gateway GoldValue Lease Program

Free up your capital for other investments *and* get the latest and greatest computer technology today. Ask your Gateway Business Direct sales person how we tailor the lease to meet all your technology needs — including wiring, service and more.

Other payment options include cashiers checks, company checks and purchase orders. Qualified commercial customers can choose net 30-day credit terms. Gateway 2000 also accepts most major credit cards and C.O.D. terms.

It's our goal to make your holidays merry. So, if you aren't completely satisfied, you can return your PC within 30 days of the original delivery date for a refund of the purchase price (shipping charges to and from the customer are not refundable). Plus we have a great limited warranty to take care of you — just call or write for details.

Get on board for great holiday savings! Call us today, or check out our Web site, to find out how *you* can get a Gateway PC with our convenient financing options.

That isn't a computer you're putting in

Every time you put a computer on someone's desk you have two options. You can either make that person happy, or unhappy. We suggest you choose the former.

Introducing the new Compaq Deskpro from the company that sells more computers than anyone else in the world. The Deskpro series is a line of desktops that will satisfy everyone's changing needs.

Inside you'll find the latest innovations. Like Intel Pentium® II processors, so your end users can do more, faster.<sup>1</sup> A 24X MAX CD-ROM<sup>2</sup> for increased performance. Ultra ATA hard drives for ultra-fast transfer rates. Remote wakeup so your system can be updated during off hours. Up to 512KB cache for added memory and speed. Prefailure warranties<sup>3</sup> so you can catch component problems before they happen. You can even expand the memory of most Deskpro models up to 384MB.

And to make it all more manageable, we're offering enhanced Intelligent Manageability. Now you can wake, boot, support and shut down your PC network all from a single location—invisibly and without disrupting your end users.

For more information about the Deskpro series, contact your local reseller or visit us at [www.compaq.com/products/desktops/](http://www.compaq.com/products/desktops/).

# NEW PRODUCTS

## Broadcast News: Boca's Video Communications Suite

**TAKE A MEETING:** Install Boca's new Video Communications Suite, and you can hold a conference with anyone who has a Web browser.

**COMMUNICATIONS**  
IN THE MARKET for a new modem for your home office? Take a peek at Boca Research's new **Video Communications Suite**. This \$239 kit bundles everything you need to start Internet broadcasting from your PC, including a combination 56-kilobits-per-second modem and video capture card, a digital camera, a microphone, and a host of communications software. It lets you

host a one-to-many Web show, and handles videoconferencing, faxing, and basic video capture tasks. Considering that you could pay \$150 just for a 56-kbps modem, Boca's suite is priced quite affordably.

When you're at home, you can use the suite to pitch to clients or collaborate with your boss. It won't let you broadcast a whole group sitting around a conference table, though. The kit's Rockwell-made cam-

era, which sits atop your monitor, shows only one or two people at a time.

The most innovative part of the kit is Cast-a-Vision, software that lets you do a live Webcast for an audience of up to four people. All they'll need is a Web browser and a sound card. In my work with a pre-production version, Boca's kit was simple to use.

To conduct a broadcast, you launch your Web browser and

the Cast-a-Vision software, then visit Boca's broadcast site ([www.bocaplace.com](http://www.bocaplace.com)). When you view the site, Cast-a-Vision starts broadcasting your signal. With the camera sitting on your monitor, you're ready to switch back and forth from the camera view to a live shot of your PC's desktop, which can be shown through a very small window. It's useful for displaying a small graph, but not a full-page spreadsheet.

Your audience browses the Boca site and clicks on your name from the list of active broadcasters. Audience members with Java-capable browsers will automatically hear your audio; others will need an audio plug-in program (available at the site). The site also supports two-way text chat. Since the audience can see and hear you but you can't see or hear them, you may want to talk by phone as well. For security, you can password-protect the session.

Remember, today's 56-kbps modems do not provide true

### Video Communications Suite

**PRO:** Easy to install, great broadcast software.

**CON:** For best performance, requires an ISP that supports K56flex spec.

**VALUE:** Great price for the features.

**Boca Research**

561/241-8088

[www.bocaresearch.com](http://www.bocaresearch.com)

Street price: \$239

READER SERVICE NO. 785

56-kbps speeds for uploads; actual broadcast speeds will vary from 28.8 kbps to 33.6 kbps, depending on your Internet service provider connection. It's only on the receiving end that the modems come close to 56 kbps. When I received a test broadcast at about 33.6 kbps, the frame rate seemed fast enough. But when the broadcast was sent at only 28.8 kbps, the session felt like a slow slide show.

Boca's modem uses Rockwell-Lucent's K56flex technology (which competes with 3Com/U.S. Robotics' x2 spec). Before you can harness the higher speeds, your ISP must support the protocol. Fortunately, Boca guarantees a free flash ROM upgrade once a 56-kbps standard becomes final.

**BOCA'S BUNDLE:** You get a modem/video card combo, camera, and mike.

The other software is generally useful. It includes VocalTec Internet Phone 4.0 for videoconferencing with full-duplex audio; Smith Micro's MessageCenter, for basic faxing; and VideoLink 324, for point-to-point conferencing (if the other person has the same software). Stefra's Video Control handles basic video cap-

ture and editing. There's also Microsoft's NetMeeting.

Thanks to Windows 95's Plug and Play, installing the kit was easy and took only 15 or 20 minutes. You'll need a Win 95 system with one open ISA card slot for the combo modem and video capture card. Once it's in place, you attach the microphone, camera, and speaker cables to the back of the card and install the software. An optional Y connector lets you pass audio through your sound card.

At such an affordable price, Boca's Video Communications Suite is a good choice if you're considering a new 56-kbps modem and would also like basic video capture and conferencing capabilities.

—Dean Andrews

## Clever PCs for Small Business: HP's Brio Line

### DESKTOP

IMITATION IS flattery in the case of Hewlett-Packard's new PCs for small businesses. The Brio systems, which replace the Vectra 500 models, give you stylish cases, easy-access interiors, and lots of on-screen help—all good features borrowed from HP's Vectra line of corporate PCs and consumer-oriented Pavilion systems.

PC World tested a shipping version of the top-of-the-line Brio 8178, a Pentium MMX-233 minitower with 32MB of RAM, a 12X-24X CD-ROM drive, and a 6.5GB hard disk. Street priced at \$2388, it has a crisp 15-inch monitor, a sound card, a microphone, an internal 56-kbps x2 modem by

3Com/U.S. Robotics, a Matrox Millennium II graphics card with 4MB of VRAM, and a set of good-quality Labtec headphones. With a PC World-Bench score of 239, the Brio 8178 is not the fastest PMMX-233 we've tested, but it runs at above-average speed on business apps. However, the Brios are not exactly bargains: Comparable Dell Dimension and Gateway 2000 models can be had for at least a couple of hundred dollars less.

The Brio we tested was easy to set up, with a large, printed installation map and labeled cables. The Brios include valuable extra helpers for businesses that are too small to employ a full-time PC support staff. Extensive on-screen help, for example, not only explains how to do backups and

how to network PCs, but also tells you *why*. The help features are great for novices yet are not intrusive. On the other hand, the printed documentation is thin.

As with the Pavilion systems, the Brio's keyboard has a set of extra keys for common tasks; I liked the volume and mute controls. Bundled software includes Microsoft Word 97 (but not Office), McAfee VirusScan, fax and phone util-

ities, and system diagnostics.

The Brio's design makes the PC easy to upgrade and service. Two latches on the sides of the case let you remove the top without tools. A neat interior gives easy access to all components (a refreshing change from many Pavilion models). HP has also given the Brio a pop-out motherboard—a time-saver if you need to replace the board. Overall, these are solid small-business systems.

—Tracey Capen ►

### Brio 8178

**PRO:** Excellent help features, smart design.

**CON:** Not for bargain hunters.

**VALUE:** A solid product.

## Color for Any Budget: NEC's Ink Jet Printers

### PRINTER

NEC'S NEW INK JET printers give you good color for very little green. The **SuperScript 750C** delivers vivid, near-photo-realistic output for only \$199. It's a good choice for home, small-business, or workgroup use and compares favorably with printers that cost \$100 more, such as Hewlett-Packard's DeskJet 694C. NEC's other new printer, the \$119 **SuperScript 150C**, is the lowest-price color ink jet you'll find and is best suited to kids and students. I tested shipping versions of both.

The SuperScript 750C and 150C include well-designed printer drivers, as well as Brøderbund's excellent Print Shop software (for making cards, calendars, and the like) and Creative Wonders' Sesame Street Art Workshop, a nice CD-ROM title for children that provides coloring

**SUPERIOR TEXT, SHARP PHOTOS:** The \$199 NEC SuperScript 750C stacks up well.

and art projects (and is sure to keep the color ink cartridges selling at a brisk clip).

The SuperScript 750C holds a color and black ink cartridge at once and provides 600-dots-per-inch resolution. It prints two flavors of black: one for graphics, one for text and solid-black areas. This scheme yields crisp, coal-black text and line art that's of noticeably better quality than what you get from the single-cartridge SuperScript 150C and most other low-end ink jets. It's the 750C's biggest advantage.

For best photo quality, the SuperScript 750C accepts an optional \$45 photo ink cartridge that prints stunning images when used with NEC's ultraglossy photo paper (\$13 for ten sheets). The 750C's input tray holds 120 sheets of paper or 25 envelopes—slightly more than Canon's \$199 BJC-4300, HP's \$299 DeskJet 694C, or Epson's \$299 Stylus Color 600. Draft printing is swift, at speeds up to 6 pages per minute. The SuperScript 750C is rated to print color pages at

up to 2 ppm, but photo-quality images can take several minutes per page to print.

On the downside, the SuperScript 750C can't print banners, unlike the competing DeskJet 694C and BJC-4300. And at 18

inches wide and 18 inches deep, the NEC is noticeably bigger than its peers. But overall, it's a winner for the price.

The 600-by-300-dpi SuperScript 150C—at \$119 the lowest-cost color ink jet to date—is designed for families and students on the tightest budgets. This compact (14 inches wide by 7 inches deep) printer ships with a color cartridge; an optional black-only cartridge costs \$23. To switch between color and black inks, you must swap the cartridges in and out by hand.

The SuperScript 150C's text speed, rated at up to 3 ppm in draft mode, is acceptable if

**SPARE PARTS:** You can buy a color printer for \$119, but the 150C is best as a spare for kids.

you use the black-only cartridge. (Printing black text with the color cartridge is slow and a waste of ink, since the cartridge has to make multiple passes to create black.) The

### 3D Logo Tricks

"COOL" MAY BE the most overused adjective in the computer world, but Ulead's **Cool 3D** really deserves its moniker. It's tough to imagine a more fool-proof 3D logo package than this \$49.95 utility. Without consulting the program's manual, you can create a slick animated logo in minutes: Just type the desired text; dress it up with ready-made colors, textures, and motion effects; and you're done. You select these items by dragging and dropping them from a palette that shows thumbnail previews, so there's never any guesswork about effects. Creations can be saved as bit-mapped still images or as GIF or AVI animations, ready for use in presentations, Web pages, and other documents. The only catch is that Cool 3D handles only text, not free-form graphical objects. Ulead Systems; 310/523-9393; [www.ulead.com](http://www.ulead.com).

READER SERVICE NO. 788

—Harry McCracken

150C takes at least 3 minutes to print a color page. It doesn't support a photo cartridge, and color images appear grainy.

The SuperScript 150C's main appeal is its price: It's \$20 cheaper than its closest competitor, the \$139 Lexmark 1000 Color Jetprinter. The Lexmark lacks software but gives you better speed, 600 by 600 resolution, and the ability to print banners.

Given its modest feature set, the SuperScript 150C makes the most sense perhaps as a spare unit for kids. If you're buying one printer for the house, the 750C is vastly preferable if you can shell out the additional \$80.

—Jim Heid ►

### SuperScript 750C

**PRO:** Superb photo output, easy to use.

**CON:** A bit bulky, doesn't make banners.

**VALUE:** A great price/performance choice.

Street price: \$199 (after \$30 rebate, through 1/4/98)

### SuperScript 150C

**PRO:** Basic color printing at a rock-bottom price.

**CON:** Slow, must swap cartridges.

**VALUE:** A budget choice for kids or as an extra printer.

Street price: \$119 (after \$20 rebate, through 1/4/98)

## Smart Storage: HP's CD-Writer Plus 7110

### CD-REWRITABLE

DRIVES THAT can both read and write to CD-ROMs used to be finicky and expensive, but that's all changing. Hewlett-Packard's **SureStore CD-Writer Plus 7110** is a case in point: This CD-Rewritable drive, which reads at 6X and writes at 2X, pulls away from the competition by integrating

**DO A REWRITE:** HP's versatile SureStore CD-Writer Plus 7110 handles CD-ROMs and rewritable discs and plugs into a parallel port.

### SureStore CD-Writer Plus 7110

**PRO:** Easy installation, versatile software.

**CON:** CD-RW discs aren't compatible with all CD-ROM drives.

**VALUE:** Expensive but extremely useful.

Hewlett-Packard Co.

800/826-4111, 970/635-1500

[www.hp.com/go/cdr](http://www.hp.com/go/cdr)

List price: Internal \$499, external \$610

READER SERVICE NO. 789

some new technologies.

The 7110 plays standard CD-ROMs and audio CDs, writes to audio or data CD-Recordable media, and works with fast rewritable discs that hold up to 640MB and work just like floppy disks. At about \$30 per disc (compared to about \$5 for CD-R media), CD-RW may seem expensive, but on a per-megabyte basis it's the lowest-cost media around. (One drawback: Not every CD-ROM drive can read CD-RW media,

so if you plan to swap the discs with other people, check out their drive specifications.)

As with any CD recorder, you can use the 7110 to create a standard CD-ROM by filling the whole disc at one time. But the bundled Adaptec Direct-CD "packet-writing" software offers an intriguing alternative. You can drag and drop data to a CD-R disc, one file or folder at a time. When everything you want is on the CD-R, a wizard pops up and

quickly converts it to a standard disc that any CD-ROM drive can read. It's a great way to keep a running backup archive of your essential data.

The frosting on the cake: The \$610 external version of the 7110 plugs into a PC's parallel port, so there's no need for the SCSI interface that other CD recorders use. (The \$499 internal version has an EIDE interface.) I was skeptical of the rated performance, but the early prototype of the external 7110 I tested—which was helped along by a sizable 750K memory buffer that kept the data flowing—had no problems creating discs.

The 7110 ships with all the components and software you need, including DirectCD, Live Pix (a photo-collage package), and one CD-RW disc. The 7110 makes a standard CD-ROM drive seem like ancient technology.

—Stan Miastkowski

## Creative Labs' DVD Kit: Second Time's a Charm

### DVD-ROM

CREATIVE LABS' second-generation DVD-ROM drive kit offers better performance than its predecessor and is street priced at a palatable \$380. The new **PC-DVD Encore Dxr2** kit features superb video and audio—the main reason you'll want to play with the new multimedia technology.

The first DVD-ROM drives had lousy CD-ROM performance, often equivalent to 4X speed. Creative Labs' first \$499 PC-DVD drive suffered from mediocre video quality as well, and you couldn't connect it to a television set.

But the new Encore kit fixes almost all the older kit's inadequacies. I used a shipping version. Testing with CD-Tach benchmarks, I found that the Encore drive (made by Matsushita/Panasonic) has double the data transfer rate of the older model—equivalent to an 8X–20X CD-ROM drive. Its 110-millisecond access time is much faster and nearly on a par with that of a high-end 12X–24X CD-ROM drive.

The Encore Dxr2 isn't perfect, though: I noticed an occasional hiccup (for example, a game would slow down) as the drive worked with the data

residing on outside tracks. But it can read all disc formats, including CD-Recordable and CD-Rewritable.

New technology incorporated into the Encore kit's PCI MPEG card means you'll see dramatically improved video quality. The card has both S-Video and composite video outlets, so you can connect to your television to watch DVD-Video movies.

Installing the Encore is not a task for the squeamish. One headache you'll likely experience is trying to find the right audio cables for your drives. The kit comes with two of

them—one to connect the DVD-ROM drive and MPEG card, and the other to connect the MPEG card to your sound card. But the plugs on these cables may not work with your sound card, since there are many plug/cable combinations. You may need to take both cards to a computer store to find the right combination.

—Jeff Sengstack

### PC-DVD Encore-Dxr2

**PRO:** Excellent video and sound.

**CON:** Audio connections are tricky.

**VALUE:** Competitively priced.

The Computer Inside.™

## PowerTrip: Brawny Notebooks, Slim Prices

### NOTEBOOK

POWER COMPUTING, known until recently for its Macintosh clones, is moving into the mobile PC market with a line of Pentium MMX notebooks. And the company's first Intel-based products are priced to kill: The high-end PowerTrip notebooks cost considerably less than Toshiba's Tecra and IBM's ThinkPad portables. If performance and features are more important to you than traveling weight, the PowerTrip notebooks are an affordable choice for a desktop replacement system. The only sticking point is that Power Computing has an uncharted track record for notebook reliability and service.

I tested a shipping version of the **PowerTrip 233/13.3**, which uses the mobile Pentium MMX-233 processor. The \$4599 notebook stands up well in a point-by-point features comparison to Toshiba's \$6449 Tecra 750CTD, the \$5459 IBM ThinkPad 770, and Gateway 2000's \$4899 Solo 9100. All four notebooks come standard with 32MB of RAM, a 13.3-inch active-matrix screen, a 3GB-plus hard disk, and a 12X-20X CD-ROM

**ON A POWERTRIP:** Power Computing's high-end notebooks deliver lots of features and performance for the price and have great displays.

drive. The PowerTrip and Tecra both come with built-in 56-kbps modems, which leaves your PC Card slots free. (The ThinkPad 770's modem isn't built-in.)

As for speed, the PowerTrip achieved a PC WorldBench score of 236—second only to

that of the Gateway Solo 9100, the fastest notebook we've ever tested, with a score of 242. The PowerTrip's score is nearly identical to the average for PMMX-233 desktops.

This 10-pound luggable comes standard with both internal floppy and 12X-20X

CD-ROM drives; the weight is a trade-off against the inconvenience of toting (and sometimes forgetting) external drives. The PowerTrip also has comfy 4-inch wrist rests on either side of the touchpad. The vibrant active-matrix screen, which displays up to 65,536 colors at 1024 by 768 resolution, will appeal to people doing graphics work—the crowd that knows Power Computing's products best.

However, the one-year warranty on parts and labor is not generous; IBM, Toshiba, and many other companies provide a three-year warranty. Power Computing offers tech support 11 hours per weekday and 6 hours a day on weekends. If the PowerTrip stumbles during the first year, you can ship it back for free to Power Computing, shipping and handling included.

—Susan Silvius

## InnerBay Zip Drive Fits in a Notebook

### ZIP DRIVE

10MEGA ZIP disks, which aren't much bigger than regular floppies and hold 100MB of data, just became more useful: Owners of some popular notebook PCs can now buy modular Zip drives made for those machines. CNF's \$299 InnerBay Zip Drive fits into the notebook bay that's made for removable CD-ROM and/or floppy drives (and in some cases, docking stations).

Since modular bays vary in size, you need a drive that fits your notebook. At first, CNF plans to ship versions for certain Compaq, IBM ThinkPad, and Toshiba Satellite and

Tecra portables. Other models should be out by the end of this year, the company says.

I was up and running quickly with the preproduction drive I tried out with a Toshiba Tecra 720CDT notebook. I just took out the Tecra's CD-ROM drive, slid in the InnerBay unit, and ran a program that installed all necessary drivers and Iomega's Zip Tools utilities (which allow copying of files and backups). The drive is fast enough to run all but the most demanding multimedia apps from Zip disks.

The InnerBay costs about twice as much as a conventional Zip drive. But if you

already use a Zip drive and have a compatible notebook, the InnerBay is a good value. For others, it's an easy way to add storage space or to back up notebook data.

—Yardena Arar ►

## We're giving you more control over your clients and servers.

In a world of rapid change, control can mean the difference between a business thriving and merely surviving. The more control a company has over its desktops, the more agility it has to move fast, solve problems creatively, and quickly explore new ways of doing business.

Networked computing environments based on the Intel architecture play a critical role in business agility. However, the very traits that make those environments so powerful—the breadth of hardware and software choices, the growth in desktop capabilities, the explosion of the Internet—also make them more challenging to manage and control.

CONTROL CAN MEAN THE  
DIFFERENCE BETWEEN A  
BUSINESS THRIVING AND  
MERELY SURVIVING.

As the leading supplier of new technologies for the computer industry, Intel is committed to delivering solutions.

To start with, we design manageability right into our processors, baseboards, platforms—even our newest EtherExpress™

PRO/100 network adapters. Our Pentium® II processor contains self-test and monitoring circuitry that minimize downtime and provide valuable data to

management software. Along with instrumentation throughout the platform, Pentium II processors help simplify system management.

Through our **Wired for Management (WfM)** initiative, we're working with other PC

# Intel Tech BUZZ

intel®

## What's the Buzz?

"When deployed in combination with manageable HP Vectra and Net Vectra PCs, and leading desktop management tools, we anticipate that the WfM specification will enable organizations to significantly reduce PC ownership costs."

John Gannon, GM  
Commercial Desktop Div.,  
Hewlett-Packard Company

"Highly manageable, WfM-enabled PC platforms, combined with system software solutions and good technology management practices, should help customers significantly lower their cost of ownership."

Eric Harstem, Sr VP  
Products & Tech. Strategy,  
Dell Computer Corporation

"Through our IBM/Intel Advanced Manageability Alliance, we are working to define industry standards, and are already shipping robust WfM-enabled IBM PCs with IBM Wake on LAN technology. This helps our customers to lower the cost of managing their networks."

Anne Gardner, VP  
Commercial Desktop  
Systems, IBM

"The features, services, and partnerships associated with Compaq's Intelligent Manageability, along with the baseline WfM capabilities, continue to lead the industry in the delivery of standards-based, manageable PCs that reduce the total cost of ownership."

Tim Harris, VP  
Desktop PC Division,  
Compaq

industry leaders to ensure that Intel architecture environments offer not only the most powerful array of business capabilities, but the most manageable. We've spearheaded an industry-wide effort to develop guidelines for a new generation of platforms—designed from the ground up for manageability—to be centrally managed over the network. Now, systems based on those guidelines are coming to market, and they deliver a rich set of capabilities for managing and controlling the computing environment.

With our **LANDesk® Management Suite**, we offer a comprehensive set of software tools that can automate tasks ranging from software distribution and virus protection to inventory control and asset management. LANDesk family products also provide remote management

features that help IT reduce total cost of ownership (TCO) and increase agility by automating and centralizing management functions.

Manageability rests on more than just products—but products are a good start. By deploying PCs, Net PCs, and servers based on the Pentium II processor and the Wired for Management baseline, companies are better positioned to increase manageability. Add industry-leading management software such as the LANDesk

family, and companies are further able to reduce their total cost of ownership, enhance business agility, and thrive in a world of ongoing change.

Manageability is just one element of business agility. Watch for future *Tech Buzz* issues to bring you up-to-date information on other ways to make your business more agile.

## Wired for more control.

**Wired for Management-**capable PCs and Net PCs can help your IT organization increase service levels, reduce support costs, and boost the ability to deploy new capabilities quickly. They do this by enabling down-the-wire remote management that delivers benefits in four key areas:

**Asset management.** Built-in instrumentation lets systems identify themselves to management software, and provides a wealth of data for inventory control and asset management.

**Off-hours and remote maintenance.** Remote boot and remote control capabilities can "wake up" a PC and install or upgrade software, without disrupting the user and without a technician's involvement.

### Initial system configuration.

A service boot feature allows unattended installation of new systems, including installing the OS and user software.

### Remote problem resolution.

Support techs can take over a system remotely, increasing first-call resolution rates and minimizing the need for "house calls." Hardware monitoring and alerting heads off many problems.

The net effect? Network uptime, user satisfaction and business agility go up. Support costs and TCO go down.

[www.intel.com/techbuzz](http://www.intel.com/techbuzz)

This is just a glimpse of the technologies behind increased manageability. For more detailed information, visit our Web site.

Street price: \$899

READER SERVICE NO. 793

**KODAK'S VERSATILE DC210 ZOOM:** High-quality images and a very useful LCD screen make this camera worth its high \$899 price.

above-average digital photos.

The DC210 features a 2X (29–58mm) zoom lens, automatic flash, and a 1.8-inch LCD screen that provides the best viewing features of any digital camera I've used. Among the LCD's slick tricks are colorful icons depicting a trash basket, a magnifying glass, and file folders. The LCD also displays a scrollable "film strip" of all pictures stored in the camera; you can zoom in on any image. The

LCD controls for changing resolution and quality mode are easy to read in the field.

The DC210 shoots high-resolution images in three compression modes—good, better, and best—and uses removable memory for storage (it comes with a 4MB CompactFlash memory card, and also supports 2MB and 10MB cards).

Depending on the compression mode, the DC210 can store from 12 to 31 shots at 1152 by 864 resolution, or 24

to 59 shots at 640 by 480 resolution. It's also the first digital camera I've seen that stores images in either JPEG or FlashPix format.

You can download the DC210's images to your PC using a standard serial or infrared connection. Or use its video output connector to view shots on a television set—especially handy for presentations. My preproduction unit performed without a hitch, producing strikingly handsome images on screen and in print. My only complaint: You must use the LCD when shooting close-ups, which shortens battery life.

The software bundle includes Adobe's PhotoDeluxe 2.0 and PageMill 2.0, Kodak's Picture Easy 2.0 and Picture Postcard 1.0 (for creating e-mail "postcards"), and TWAIN drivers.

The DC210 is costly, but it's a good investment for those who can afford it.

—Richard Jantz

## A Lower-Cost Option: Yashica's KC 600 Camera

### DIGITAL CAMERA

STREET PRICED AT \$549, Yashica's **KC 600** digital camera is neither the least expensive nor the most sophisticated of its lot. This compact, dependable device looks a lot like today's point-and-shoot cameras and seems best suited for beginners and families.

The 9.9-ounce Yashica KC 600 is very easy to use. I tested a shipping unit. This digital camera has a fixed-focus 6.5mm lens and a 1.8-inch LCD screen for shooting and

viewing photos. There's also a self-timer and a built-in flash with red-eye reduction.

The Yashica's image quality was similar to that of the \$399 Epson PhotoPC and \$599 Olympus D-200L digital cameras. The KC 600 comes with a 2MB CompactFlash memory card (like the Olympus and unlike the Epson, which has a 1MB card). The Yashica camera weighs about 17 ounces less than the Epson unit.

My only complaints: As with some other digital cameras in

this price range, some photos taken indoors or in low light can appear slightly dark even with the flash. (You can touch them up with the bundled PhotoSuite SE photo editing software by MGI.) Also, you can't attach accessories such as filters or a wide-angle lens.

The KC 600 runs on four AA batteries. Its 2MB CompactFlash memory card stores 37 standard photos at 640 by 480 resolution, or up to 80 photos at lower resolution.

Downloading photos to my

PC was no problem using the supplied serial cable. The camera also comes with a video cable for viewing photos on a TV set, as well as a PC Card adapter for notebook PCs.

—Grace Aquino

#### KC 600

**PRO:** Compact and easy to use.

**CON:** Some indoor and low-light pictures look dark.

**VALUE:** A good choice for novice digital photographers.

## eRoom: Easy Workgroup Web Collaboration

### GROUPWARE

"GO TO YOUR ROOM" used to mean you were in trouble. But Instinctive Technology's **eRoom**, a promising new application, could keep you and your workgroup out of trouble. I tested a preproduction version of this affordable Web-based package, which allows colleagues connected to the Internet or a company intranet to work jointly on documents, hold discussions, and collect and organize any type of electronic information. This groupware program uses a metaphor that everyone instantly understands: compartments, or "rooms."

Give each room a name to correspond with a project or an information category; you can then use the appropriate room to house the pertinent files, discussions, announcements, and Internet links. A version-control applet allows colleagues to retrieve and update documents. You can drag and drop files between your browser and your desktop. A clever polling applet lets you put an issue to a vote, so your team can make and document decisions electronically.

#### eRoom

**PRO:** Easy group collaboration on the Web.

**CON:** Requires Web browser with ActiveX support.

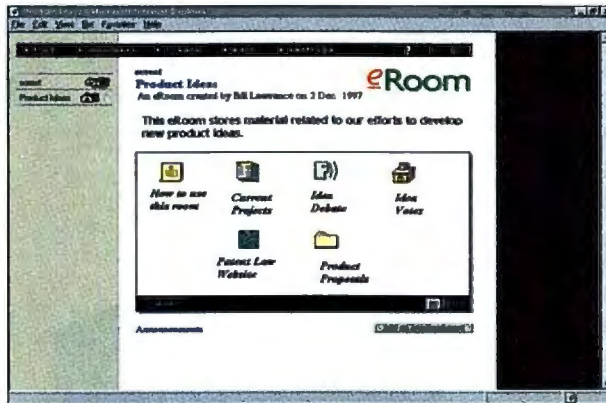

**VALUE:** Affordable and effective. Instinctive Technology Inc.

617/497-6300

www.instinctive.com

Street price: \$129 per user; group discounts are available through 12/15/97

READER SERVICE NO. 795

**INSIDE AN EROOM:** Instinctive's Web-based eRoom lets your team organize work into "rooms" to store discussions, links, and files.

Be aware that eRoom makes heavy use of ActiveX, the Microsoft technology that runs applets with the company's Internet Explorer browser

(eRoom isn't yet compatible with the new IE 4.0, but an update is planned by December). Because Netscape Navigator doesn't support ActiveX native-

ly, Instinctive provides a third-party plug-in for use with that browser. One other drawback: You have to download and install about 5MB of software, so you can't walk up to any PC and go to your room instantly.

The eRoom software costs \$129 per user license; Instinctive Technology is also offering promotional group discounts through December 15, 1997: 25 users for \$2995, or 50 users for \$4995.

Without enterprise-oriented features like e-mail, replication, and customizable applications and forms, eRoom isn't in the same league with Lotus Notes. But if you want easy, effective collaboration on the Web, think about stepping into eRoom.

—Bill Lawrence

## A New Intranet Option: Microsoft's Free Kit

### GROUPWARE

**YOUR WORKGROUP** needs to share information online with a basic intranet. Microsoft's new **60-Minute Intranet Kit** has one big advantage: It's free if you're using a combination of Microsoft Office 97, Microsoft FrontPage 98, and a Web server running the FrontPage 98 Server Extensions. This kit provides a set of templates, along with detailed instructions on how to set up an intranet, all downloadable from [www.microsoft.com/office/intranet/](http://www.microsoft.com/office/intranet/). The catch is, you must have those *particular versions* of the Microsoft products for the templates to work. I downloaded and used the shipping version of the kit.

To start setting up your intranet, look at Microsoft's 12

predesigned modules. Though they won't help everyone, they could help with some common demands, such as sharing project information among groups, delivering product information to a field sales force, or simplifying document revisions and approvals. They're all organized by task.

You can also mix and match templates. A simple intranet might have a few linked Web pages and a search feature. A more complex site could include links to a database for managing information. One interesting option, the News Module, allows workgroup members to send out news using Internet Explorer 4.0 and a push channel.

It's understandable that you need Microsoft software to use

this free kit, but you may not be willing to upgrade to the necessary versions. For example, the required FrontPage 98 was in beta form at press time, with a planned ship date of mid-November. (Microsoft still offers an older version of the intranet kit that works with FrontPage 97, but it doesn't include the same templates.)

—Paul Heltzel ►

#### 60-Minute Intranet Kit

**PRO:** The price is right.

**CON:** Requires latest versions of Office and FrontPage.

**VALUE:** Worth checking out if you already use Office 97.

## NEW PRODUCTS

### Ditto Max Grows With You

#### BACKUP DRIVE

CHOOSING THE right backup drive can seem as tough as picking lottery numbers. With hard drive capacities jumping from an average of 2GB a year ago to 4GB today—and perhaps to 8GB next year—it's hard to choose an affordable backup unit that won't soon be

you don't waste money: As your hard drive fills up, you can then buy larger tapes.

Iomega also bundles a new version of Ditto Tools 1-Step, a backup program that sets up a 125MB fast direct-access area at the start of each tape, to archive frequently used files. Iomega says the internal mod-

THIS BACKUP DRIVE WON'T SOON BE OUTDATED: Iomega's tray-feed Ditto Max drive accepts 3GB, 5GB, and 7GB cartridges.

outdated. You could buy for the future with a fast 8GB Travan-4 tape drive, but you'll pay about \$400 for the drive and another \$35 per tape—too much if you're backing up only 2GB or 3GB now. Iomega has a novel solution with its new \$199 Ditto Max and \$299 Ditto Max Professional drives.

The Ditto Max's unique tray feed handles cartridges that hold up to 3GB, 5GB, or 7GB of compressed files; the Ditto Max Professional also accepts 10GB cartridges. The drives, which were not ready for testing at press time, come in identically priced parallel port or internal floppy-connect models. A 3GB cartridge for the Ditto Max drives costs \$20; you'll pay \$26 for a 5GB tape, \$30 for 7GB, and \$35 for 10GB. This flexibility means

els can transfer up to 36MB per minute when used with its \$49 Ditto Dash card; parallel port drives back up at 19MB per minute. Of course, neither model can match the 60MB-per-minute transfer rate of an EIDE or SCSI Travan-4 drive.

—Rex Farrance ►

#### Ditto Max, Ditto Max Professional

**PRO:** Inexpensive, accepts multiple tape capacities.

**CON:** Not as fast as 8GB Travan-4 EIDE or SCSI tape drives.

**VALUE:** A smart, flexible choice for tape backup.

## Create & Share Pack: Conferencing and More

### VIDEOCONFERENCING

INTEL HAS cooked up a video-conferencing package with valuable image and video editing software. The three flavors

of its **Create & Share Camera Pack**, though a little pricey, should please beginners.

Each pack provides a small video camera and a software bundle. The \$199 version is for use with a Pentium MMX system equipped with a Universal Serial Bus port. I tested a prerelease version of the \$299 package, for a Pentium-90 or better machine with a free PCI card slot. For \$399, Intel adds a 56-kbps modem. You will also need a sound card and a microphone.

With the included In-

tel Video Phone software, I could communicate with any software that meets the H.323 videoconferencing standard. While the images look fine, quality ultimately depends on Internet traffic and your connect speed. With dial-up connections, motion was jerky—okay for family use but not great for business. An ISDN line worked better.

The \$299 version's video capture card can't grab full-screen, full-motion video, but it delivered solid, 15-frames-per-second captures at a movie size of 320 by 240 pixels—ideal for Web site movies.

The excellent software in-

cludes MetaCreations' Kai's Power Goo, for morphing; PictureWorks' PhotoEnhancer, for retouching; NetCard, for e-mailing images; and Intel Scene Recorder, for making Video for Windows movies.

—Jim Heid

**SCENE RECORDER:** Intel's Create & Share Camera Pack has great software.

### Create & Share Camera Pack

**PRO:** Easy to set up, good software bundle.

**CON:** As always, image quality depends on Internet connection.

**VALUE:** Not the least expensive choice, but well done.

## SmartWheel: IntelliMouse Gets Out of Its Trap

## UTILITY

I'VE HAD A love/hate relationship with the Microsoft IntelliMouse, the input device bundled with Office 97 that features a built-in scroll wheel. I love the IntelliMouse's verti-

cal and horizontal scrolling capability because I can navigate quickly through long documents and take the stretch out of multiple-screen spreadsheets, simply by turning the wheel. With its pan-scrolling feature, I can zoom down long Web pages without having to click and hold side-screen scroll bars.

But love at first sight quickly turned to frustration when I realized that the IntelliMouse works with Microsoft's Office 97 and Internet Explorer—and little else. Fortunately, Insight Software Solutions' **SmartWheel** gets the IntelliMouse out of its trap. This

small add-on program, which I tested in shipping form, enables the device to work with most 16- and 32-bit Windows 95 and NT 4.0 applications. So now my IntelliMouse works with Netscape Navigator as well as with Internet Explorer. I can examine every sector of a graphic whose full size is larger than one computer screen. The \$15 SmartWheel package also adds pan-scrolling ability to the middle button of a conventional three-button mouse.

I have just one question: Is a SmartWheel salesperson called a "wheeler dealer"?

—Michael S. Lasky ►

## SmartWheel

**PRO:** IntelliMouse is no longer restricted to Microsoft apps.

**CON:** No real problems.

**VALUE:** A small price to pay for a useful product.

## Workstation 4.0

## Logitech FreeScan: Good Idea but Not Perfect

### SCANNER

LOGITECH'S FreeScan wants to be two scanners in one. This \$299 sheetfed unit has a detachable motorized head for scanning cardboard, books, and materials normally requiring a flatbed scanner. It's a great concept but is practical only for occasional use. I reviewed a preproduction version.

Installation with a parallel port cable is simple. (A pass-through port accommodates your printer.) With regular paper, the FreeScan works well. Quality lived up to the specs: 600-dots-per-

inch optical resolution (4800-dpi enhanced) and 30-bit color. The large 25-page document feeder frees you up as

**COMBO SCANNER:** The sheetfed FreeScan also handles books, but results vary.

you scan long documents.

If you're scanning a book or other material that can't be sheetfed, the FreeScan does

the job, but not as well as a flatbed model. Here's how it works: You detach the scanner head from the base and position it at the top or side of the book. This head has two roller sets on the bottom that lie on the document. You press a button to start scanning, and the rollers move the head along the page. You must press the button again to stop the scan.

When I tried to scan pages from a couple of books, the head missed the first few lines. When I called the company for help, I learned how to avoid this problem by giving the head a moment to warm up after I pressed the button.

Generally, scanning a bound book took multiple tries.

Logitech bundles an attachment for use with small or delicate items, plus Adobe PhotoDeluxe 1.0, Xerox TextBridge, and the DocuMagix PaperMaster software.

—Yardena Arar

### FreeScan

**PRO:** Small footprint, 25-page document feeder, offers some flatbed capabilities.

**CON:** Book scans can be frustrating.

**VALUE:** This versatile sheetfed scanner is no flatbed replacement.

## CREATE ALL YOU WANT. YOU'VE GOT THE CAPACITY.

The "Condor." The world's largest cargo plane.

# Madison: PCs Can Talk, but You May Not Like It

## UTILITY

THANKS TO NEW natural-speech dictation software that lets you speak without pauses, more people are talking to their PCs. Now one company that specializes in speech software thinks computers should start talking back. With **Madison**, the first program from Kurzweil Applied Intelligence since its merger with Lernout & Hauspie, your PC can read on-screen text to you in synthesized speech (at press time, the company advised us that the product's name could change). Unfortunately, the gee-whiz factor is more impressive than the utility itself.

A number of other programs can read text to you, the most notable being the \$49 Monologue 97 from First Byte. But Madison, which is street-priced at \$40, goes further by integrating itself with Outlook, Microsoft's personal information manager.

When you launch Madison, a taskbar appears across the top of your screen. To have text read to you, you select it on screen and drag and drop it onto the program's taskbar. (Alternatively, you can copy text to the Windows Clipboard and click a button on the Madison taskbar.) Madison dictates in any of seven lan-

guages. If you use Outlook, Madison gives status reports on your e-mail and appointments. For example, you can configure the program to tell you every 15 minutes how many unread messages you have in your in-box.

Madison is easy to install and use, but I found the pre-production version I reviewed a bit redundant. If you use Dial-Up Networking in Win 95, you already know when you have new mail whenever you make a connection to your mail server. And I've never had a complaint with Outlook's audio alerts for appointment reminders. Finally, while Madi-

son's synthetic speech sounds as good as its competition, that's faint praise. The sound is mechanical and sometimes hard to understand.

The program would help sight-impaired (but not blind) users. Otherwise, it's far from a must-have for most users.

—John P. Mello Jr. ►

### Madison

**PRO:** Easy to use.

**CON:** Speech sounds mechanical, sometimes hard to understand.

**VALUE:** Of little utility for most people.

## FreeSpace: Compression Utility Gives You Control

### UTILITY

YOU NEED IT. You want it. You must have it. Yep, I'm talking about hard disk space.

Compression is the quick way to fit more on a hard drive, but it can slow down your system and increase the odds of a data disaster. Mijenix's new FreeSpace, a \$50 program for

To compress, you right-click a file or folder in Windows' Explorer and select the option. Or use one of two wizards to select folders and files. For instance, you can shrink all of your .bmp files (I compressed mine up to 84 percent).

Explorer shows compressed file names in blue. You can

**ADD HARD DRIVE SPACE:** FreeSpace lets you choose specific files and folders to compress; here it clearly shows the space to be gained.

Windows 95 and NT 4.0, won't totally solve these problems, but it gives you impressive control over compression.

Like WinZip and similar utilities, it compresses only the files you specify. But for Win 95's purposes, FreeSpace keeps files in the original place on your hard drive, and like Windows 95's DriveSpace, it decompresses them on the fly.

### FreeSpace

**PRO:** Affordable and flexible for compressing files.

**CON:** Slows performance a bit.

**VALUE:** A smart approach and a good choice.

Mijenix

800/645-3649, 608/277-1981

www.mijenix.com

Street price: \$50

READER SERVICE NO. 803

still launch a program or copy a file to a floppy while FreeSpace quietly decompresses.

FreeSpace is a good idea, and it works. It's not fast, but it's probably safe. In my spot tests of a shipping version, loading a 1.55MB worksheet into Excel 97 took about 30 percent longer with both Office and the file compressed. With just the file compressed, it took almost 20 percent longer. With only Office compressed, the file took 13 to 15 percent longer to load. Some people may not want to compress everyday applications for this reason.

As for safety, FreeSpace lets you be prudent: I wouldn't compress vital data I didn't back up often. Overall, FreeSpace is a reasonable choice.

—Lincoln Spector ►

# Street Fight: Expedia Streets vs. StreetFinder

## MAPPING

I REALLY NEED A mapping package. My sense of direction is so consistently wrong that I often let my intuition point me in one direction, then deliberately head the opposite way. Mapping programs such as Microsoft's **Expedia Streets 98** and Rand McNally's **StreetFinder 98** help put an end to my guesswork.

Which program works best? Based on my tests of shipping versions, you should consider the \$50 **Expedia Streets** if you want a slick interface and online features. If you value address-to-address driving directions, you'll want the \$25 **StreetFinder**.

**Expedia Streets** and **StreetFinder** both give you impressively detailed maps (down to street level) of major American cities, with customizable filters for points of interest. Icons represent area restaurants, hotels, banks, public transportation, and so on; click an icon for more details and contact information. If you punch in the name or address of a particular place—your hotel, perhaps—you can print out a customized area map with selected icons.

**TAKING IT TO THE STREETS:** **Expedia Streets 98** is intuitive and includes maps that give drill-down details about an area.

For my money, **Expedia Streets 98**'s interface has the edge. Navigation is so intuitive that I never once had to consult the manual, and the supplementary online and travel itinerary features are never more than a click away.

For online material, **Expedia Streets** takes you to Microsoft's **Expedia Web** site, which provides travel information and services such as airline, hotel, and car rental reservations. **StreetFinder**'s online link connects you to the Rand McNally home page, which offers similar but much less extensive services.

However, **StreetFinder** provides one highly valuable online feature that **Expedia Streets** doesn't: address-to-address driving directions anywhere in the United States. Type in the origin and destination street addresses, and **StreetFinder** generates detailed driving directions, including distances. In my spot tests, it gave accurate directions around San Francisco.

Both companies also sell "deluxe" versions of their programs, but I'd skip the \$70 **Expedia Streets Deluxe** and the \$45 **StreetFinder Deluxe**. The added content (business listings, expanded travel information, and the like) can be found on the Web for free.

If you don't want to spend much, or if you want the more comprehensive driving directions, Rand McNally's **StreetFinder 98** is a solid choice. Microsoft's **Expedia Streets 98** has more-expansive online features and a nicer interface—for a higher price.

—Glenn McDonald ▶

## Label Intensive

I'M THE CHIEF COOK and bottle washer for my home office. That means I get to do fun things like create the lunchroom menu. It also means I'm stuck with the job of printing labels for my PC user group newsletter. That's now easier, thanks to **Avery Label-Pro**. This \$39.99 program supports plenty of varieties of labels and includes many sample designs. For mailings, you can either use its database or import from existing ones. The best feature is "shrink to fit": The program automatically resizes text or graphics to fit the label. A trial version is available online. **Avery Dennison**; 800/862-2227; [www.avery.com/prod\\_catalog/software](http://www.avery.com/prod_catalog/software).

READER SERVICE NO. 806

—Steve Bass

## Organize Graphics Files

WHAT A PARADOX: I've got several thousand photos and clip art images on my hard drive, yet I can never find the right one for a newsletter or presentation. **Extensis's Portfolio 3.0** gets me organized. It automatically creates browsable catalogs, with thumbnail previews, of images stored on hard disk, CD-ROM, or other media. Add keywords to the images, and you can do sophisticated searches. This \$99.95 dual-platform package also lets Windows and Macintosh users share catalogs on a server. But beware of a few rough spots. When I enlarged the thumbnails, they displayed in a crude fashion. And a few of the several dozen supported file formats are out-of-date; for example, it's two versions behind on PowerPoint. **Extensis**; 503/274-2020; [www.extensis.com](http://www.extensis.com).

## Matrox's Complete Video Upgrade for PCs

### MULTIMEDIA

FOR ITS \$379 Video, Graphics, and TV Kit, Matrox Graphics combines three products—its 4MB Mystique 220 graphics card, the Rainbow Runner Studio video capture daughterboard, and the Rainbow Runner TV tuner card—into one package. If you'd like to completely revamp the video capabilities of your PC, Ma-

**MATROX'S VIDEO, GRAPHICS, AND TV KIT: A multimedia makeover for your PC.**

### Matrox Video, Graphics, and TV Kit

**PRO:** Plenty of graphics and video power.

**CON:** Installation takes some time.

**VALUE:** An affordable, complete video upgrade.

Matrox Graphics Inc.

800/361-1408

www.matrox.com

Street price: \$379

READER SERVICE NO. 808

trox's kit provides a solid solution that's priced \$50 less than the components would cost separately.

Based on my work with a shipping version, you'll need about an hour to install the kit. It requires an open PCI slot (for the graphics card) with enough clearance on one side to attach the Studio daughter-

board. You'll also need an open ISA slot for the TV tuner card. And finally, you'll have to attach the

cables both internally (between the TV tuner and graphics cards) and externally (to your sound card, audiovisual equipment, and TV antenna or cable service).

The Mystique 220 graphics card offers 1600 by 1200 resolution at 65,536 colors, and the Rainbow Runner Studio

daughterboard provides hardware MPEG-1 playback. The supplied software is noteworthy: You can do video editing tasks with Ulead's MediaStudio, videoconferencing with VDOnet's VDOPhone, use PC-to-TV output for presentations or gaming, and of course watch broadcast or cable TV from your PC.

You can also "monitor" television broadcasts using keywords. You set the kit's PC-VCR software (from Matrox) to search a TV channel's closed-caption section for keywords. Upon finding the keywords, the software records the program to disk, opens a video window on your desktop, or saves the closed-caption text to a file.

If you plan a complete video upgrade of your PC, the Matrox kit is a good buy.

—Dean Andrews

## Matrox m3D Affordably Improves 3D Games

### GRAPHICS

MATROX'S MYSTIQUE 220 and Millennium II graphics boards make quick work of 2D applications, but they don't have all the goodies that gaming fans want. In particular, they lack hardware filtering, a feature that smooths 3D images so they don't look blocky and pixelated. If you love your existing graphics board but crave better 3D performance, Matrox has a quick fix: the new m3D board, expected to sell for a reasonable \$99.

The m3D will work not just with boards from Matrox, but with any PCI graphics card that has at least 2MB of RAM,

the company says. Based on NEC's PowerVR PCX2 chip, the m3D comes with 4MB of SDRAM. Installation requires an open PCI slot.

Will this card pump better 3D images onto your screen? We tested a shipping m3D card with two PCs. One was equipped with the Mystique 220 card, the other with STB's Velocity 3D (an S3 Virge/VX-based card that produces only average 3D images). The results with both were the same: Two of our three test games, Eidos's Terracide and Fox Interactive's Independence Day, looked far better with the m3D card than without it.

Game play and images were smooth; instead of the bunches of unattractive pixels we're used to, surfaces were blended and realistic looking.

But this card won't help with every game. Our third test game, Microsoft's Monster Truck Madness, was practically unplayable. It ran slowly, and the alpha-transparency feature (which places a texture map on top of a game scene) didn't work. When the trucks kicked up dust, the dust clouds were surrounded by ugly black background boxes that should not have shown. This is most likely a driver issue that Matrox could correct.

The bottom line: The m3D is a good, affordable solution. But if you want the best 3D quality and are willing to pay, consider the new \$200-range graphics cards based on chips like nVidia's Riva 128. They offer good 2D and 3D capabilities on one board.

—JoAnne Robb

### m3D

**PRO:** Improves 3D ability of existing graphics boards.

**CON:** Doesn't equal the quality of some combo 2D/3D boards.

**VALUE:** Affordable route to better 3D game playing.

## Plan Write: Expert Help for Business Plans

### BUSINESS PLANNING

**BUSINESS RESOURCE** Software's **Plan Write Expert Edition** supplies you with professional advice on how to create a via-

ble business plan, even if you're a beginner. What makes this \$230 product different from others in the category is its knowledge base—a collec-

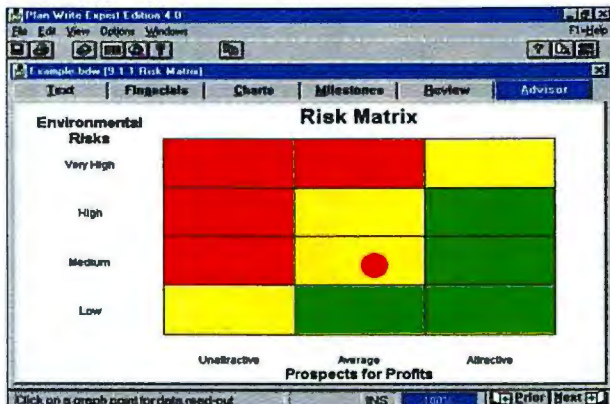

tion of information you use to test assumptions about your business. You can then adjust your plan accordingly.

You enter facts about your product or service, target market, financial situation, competition, pricing strategy, and so forth. The program then makes specific recommendations and warns of any weak spots. I tested a shipping copy.

I was impressed with the information in the shipping version I reviewed. The knowledge base uses some of the same business-strategy research found in the company's other well-regarded program, *Business Insight*.

Of course, *Plan Write* gives you the tools to create your plan, including financials. An outline view explains exactly what should be in each section. The only con to this approach: It may be too confining for creative types.

—John P. Mello ▶

**SEE YOUR STRENGTHS:** *Plan Write Expert Edition* uses information about your business to evaluate strategy and make recommendations.

### Plan Write Expert Edition

**PRO:** Expert advice, a real confidence builder.

**CON:** Approach may be too structured for creative types.

**VALUE:** Worth the time and money to help you write a business plan.

## Crystal 3D Impact: Easy Graphic Effects

### GRAPHICS

YOU NO LONGER have to be Picasso, or a programmer, to create 3D art and animations for Web pages and presentations. Among a growing number of point-and-click-style programs, CrystalGraphics' **Crystal 3D Impact** is a well-rounded choice for only \$49.

Between its toolbars and right-click menus, you'll find quick access to the tasks you use most often. To begin, you can import an existing image or choose from a series of objects at the bottom of the screen—simple shapes such as cones, cubes, and spheres, as well as familiar items like

stars, mailboxes, and trophies.

Drag the objects to the workspace for editing and resizing. Right-click, and you can rotate the image or make it look like it's made of metal, wood, or another material. You can assign motion—say, spin the object from left to right, slide it across the screen, or arc it from one corner to another. You can turn the image into a movie, then save it as an .avi file, an animated GIF, or a series of bit maps (among other options).

However, after using the shipping version of 3D Impact, I have two criticisms. First, it's a memory hog. The

software requires 16MB of RAM, but with 32MB on my system, I often lacked enough free memory to run 3D Impact and open a simple Word document at the same time. Also, the program lacks multiple undo, so you must save often (and under different file names) to retrieve that look you had three steps back.

By comparison, Micrografix's Simply 3D version 2 gives you some sophisticated effects and more objects than 3D Impact, but it costs \$40 more. Ulead's Cool 3D, also reviewed in this month's *New Products*, costs about the same as 3D Impact but handles only text for

logos—not graphics. You can download a free trial version of Crystal 3D Impact to try out.

—Paul Heltzel

For more information about a product, contact the manufacturer or circle the number on the reader service card.

### Crystal 3D Impact

**PRO:** Point and click to create 3D graphics.

**CON:** Hogs memory, lacks multiple undo.

**VALUE:** Affordable choice for presentations and Web pages.

Special Introductory Offer from VIDEO PROFESSOR® — The Best Computer Instructor in the World!

## Computer Learning CD-ROM

# FREE!

**Video on CD that plays right on your computer!**

Don't spend a dime on books, seminars, classes and other expensive no-name lessons until you've tried one of our amazing computer training CD-ROMs FREE! Why? Because...

**It's FAST!** You'll be up and running in an hour! Don't waste time sifting through manuals, commuting to classes or seminars. Just pop in the CD-ROM and you're learning!

**It's EASY!** It's as simple as 1-2-3! Video Professor's straight forward "What-You-See-Is-What-You-Do" approach makes learning as easy as watching TV!

**It's CONVENIENT!** We're ready to teach you day and night! With your busy schedule, you don't have time to waste at classes or seminars. Don't fumble through boring manuals. Whatever your schedule, we're ready when you are!

**It's COMPLETE!** From A to Z! Our lessons take you from installing the software to the most advanced skills. And they're not just for beginners! We'll surprise you with the knowledge you'll gain!

Choose One FREE From Our 9 Most Popular Titles:

Windows® 95 • The Internet • DOS • Word • WordPerfect • Excel • Lotus 1-2-3 • Works • Quicken

**Call Now! Supplies Are Limited! Operators are Standing By!**

# 1-800-762-9999 ext.008

Now on Video & Video on CD-ROM!  
(plays right on your computer)

If line is busy, please call us at 1-800-654-2050. Visit our Online Learning Center at [www.video-professor.com](http://www.video-professor.com)  
**Businesses Welcome! Call 1-800-323-8990, ext.347 for Retail or Corporate Orders.**

Due to the overwhelming demand, please be prepared to give the operator your first choice and two alternative selections.

In recognition to purchase — You only pay a non-refundable \$4.95 shipping and handling fee, conveniently billed to your MasterCard, VISA, Discover or AMEX. When you call, you will be given the option to receive a second lesson to review with no obligation to purchase. BM & compatibles only. Limit one free title per household. Running time approximately 60 minutes. Some restrictions may apply.

Same Great Video Lesson Now On CD-ROM!  
**Makes A Great Gift!**

**It's So Easy, You Can't Help But Learn!**

Using our exceptional "What-You-See-Is-What-You-Do" learning method, you'll complete each lesson in step-by-step fashion.

A complete video lesson on CD-ROM that plays on your computer screen!

**Why Are We Making This Incredible Offer?**

We're so confident that once you try our exceptional "What-You-See-Is-What-You-Do" learning method, you'll turn to us for all of your computer learning needs.

**Fast Delivery!**

# TAKE YOUR ORGANIZATION WITH YOU.

## AVIGO

With the new Avigo intelligent organizer, you control the agenda. Need those spreadsheets from your PC in the meeting? Done. Need to keep tabs on multiple staff schedules? You're up to speed. Want to leave the business calculator at the office? Do it. Trouble seeing organizer displays in low light? Not anymore. Tired of dumping your old memory when you need to upgrade? Don't. With the new personal, portable, pocket-size Avigo, you're in charge. Go with it.

Backlit screen works horizontally or vertically. • Comes complete with Lotus Organizer 97 and synchronizes with other leading software. • Enter information: from your PC, on Avigo's virtual keyboard or with its unique T9 text input system. • Sketch function lets you sketch and take quick notes. • Upgradeable memory. • One-touch data synchronization. • Expense Manager. • Protective cover.

 **TEXAS  
INSTRUMENTS**

“It constantly  
**amazes** me

how Dan, my account manager at **CDW**,  
seems to know what's coming in **new**  
**technology**,

new business trends, new products, and next week's

”

episode of The Simpsons.

It pays to be tuned in to a lot of different channels all at the same time. In fact, there's someone at our place who can tune you in to the latest in almost everything that affects computers for business. Including the latest in saving money.

He's your CDW account manager. And once he gets to know you, your company's purchase history, and your system, he can do some pretty amazing, proactive things to help you use technology to put your company on top of the productivity curve. Keep you current. And save you a bunch of time and aggravation in the process.

**Get more than just a great price.**

For example, he can turn you on to new product options and technologies that are more efficient or economical for your company. Solve the toughest compatibility questions before they become problems. Even get you the **free tech support** you need before you need it. And, of course, line up the right price for you.

So give us a call. We'll set you up with your own technological guru. A highly-trained business

computer specialist who'll be on the same wavelength you are day after day.

That way, your company will have access to a huge selection of brand-name products and the newest technologies. In fact, **CDW is the leading seller of IBM®, Compaq®, Hewlett-Packard®, Toshiba® and Microsoft® in the direct marketing channel**, and we have their products at the right prices, in stock, ready for overnight delivery, and easy credit. You'll also get someone who can help you make the most of it all. And give you some honest, friendly, professional advice that will save you more than money.

**Call today and get a sneak preview, some free advice, and a free CDW catalog.**

Check out some of our products and prices in the back of the magazine. Then give us a call. We'll send you our latest catalog. Or check us out at [www.cdw.com](http://www.cdw.com). In fact, send us any kind of signal. With people like Dan around, we'll be sure to receive it.

## HARDWARE BUYS

Everybody loves gadgets. True, many are “contrivances” that

aren't worth their weight in plastic. But you won't find any of the 30 devices and PC accessories we've gathered here hawked on those oily late-night infomercials. These cool tools have been designed to make your life much easier—whether you're in the office, on the road, or at home. Their prices run the gamut from as little as \$10 to a hefty \$3000. (All prices given here are street prices.)

Now is a better time than ever to satisfy your gadget lust. One reason: recent strides in miniaturization, particularly with PC Cards. For example, the Lilliputian REX, a business card-size personal digital assistant, handles a whopping 2500 entries. Reason number two? The explosion in wireless communication services. To sate your cordless wanderlust, check out Nokia's 9000 Communicator, which cleverly packs a full-featured pocket PC into a digital cell phone.

Ultimately, these are gifts that would be perfect if they came in pairs: one to give away and one for yourself. ►

## Hard Disk-Size Floppies

### Imation SuperDisk Drive

The size of an average file is growing faster than Tiger Woods' bank account. If you're finding it harder to fit your files on reliable old floppy disks, it's time to call on SuperDisk. Imation's convenient SuperDisk Drive easily plugs into your PC's parallel port and reads and writes to 120MB LS-120 disks—which hold about 20MB more data than a Zip disk—as well as to regular 1.44MB floppies. The \$199 SuperDisk Drive comes with one disk and costs about \$50 more than an external Zip drive. Extra 120MB disks cost about \$19 apiece. Maybe Tiger needs the SuperDisk Drive. After all, he's gotta have a way to store those big endorsement contracts.

—Laurianne McLaughlin

Imation, \$199, 888/466-3456, [www.imation.com](http://www.imation.com)

## This Pen Clicks

### iPen.

A.T. Cross is probably best known for its now-classic thin gold ballpoint pen—you know, the one your parents got you for graduation. Now the company enters the digital age with its mouse killer, the iPen,

an electronic pen-and-tablet combination. Just tap a spot on the pearl-gray writing surface of the tablet with the elegant black lacquer pen, and the cursor moves to a corresponding spot on screen. The pen tip retracts as you click, reducing the amount of pressure needed to maneuver. But this mouse replacement does more than any mouse ever did: The iPen lets you take notes in your own handwriting or add your John Hancock to faxes and other electronic documents.

—JoAnne Robb

## Flat Screen, Fat Color

### Sceptre FT15 LCD Monitor

Finally, I have extra room on my desk; I can retrieve those pens that slip behind my monitor without becoming a contortionist; and I can view programs in bright, crisp colors without risking sunburn. That's because Sceptre's new flat-screen 15-inch LCD monitor is compact and lightweight and emits zero magnetic radiation (it also consumes little power). The screen real estate is almost identical to that of most traditional 17-inch monitors, without the corresponding bulk. The only

Imation SuperDisk Drive

drawback is the prodigious price. At nearly \$3000, the Sceptre costs about five times as much as an ordinary CRT monitor. This one has pure technolust splurge written all over it. So pull out the gold card and be dazzled. —Brad Grimes

## Back in Good Form

### Executive BackChair

Executive chairs are designed to impress. They are really seats of power. And virtually everyone who steps into my humble office at PC World exclaims "Wow" when

Executive BackChair

ILLUSTRATION: GLENN MITSUI

A.T. Cross iPen

they see me in this richly upholstered, streamlined leather chair. I personally don't care if my chair impresses people: I want it to be comfortable, and yes, to save my back. And the Executive BackChair certainly does that every which way but loose: Its forward tilt feature is great when I'm pounding the computer keys, and the adjustable lumbar support and anatomically contoured seat relieve strategic pressure points all the time. Well, maybe impressing people is good, too.

## Call Control

### Yo-Yo

The phone rings. Is it an important client, or some jerk selling tombstones? Big Island's Yo-Yo cuts out the guesswork, using the phone company's Caller ID and call forwarding services so you can tell who's on the line. Just plug the phone cord into the device (which actually looks like the toy it's named for), then connect the Yo-Yo to your Windows 95 PC via a serial port. A small program lets you block calls from unidentified callers, set do-not-disturb hours, and assign sounds to specific people, so that a call from your boss

announces itself with a bullwhip crack. If you're out, Yo-Yo can page or e-mail you about a call or forward the call to another number. Select features continue to work when the PC is off. —Lincoln Spector

## Put Faxes on Hold

### PC/Fax Store

Once you give out your fax number, get ready to receive faxes 24 hours a day, seven days a week. Taking faxes through your modem means keeping your computer on and your fax software loaded—unless you buy Panasonic's PC/Fax Store. This simple gizmo sits between your modem and your phone line, accepting and saving any faxes that come your way—up to 40 or 80 pages, depending on the model. When it's convenient, you ►

## LEFT TO MY DEVICES

**M**any gadgets are like congressional tax plans; they look great when they're announced but benefit only a select few. As a gadget maven who has reviewed mountains of devices, I've experienced the many unexpected technological—as well as predictable—pitfalls. Accordingly, here are some rules to heed when shopping for a gadget.

**Try before you buy.** Small keyboard-based devices are just that: small. See if you can type on them with any efficiency; most likely the process will be hunt and peck, but see if you can do that without lots of typos.

If there's a stylus, try it out first to see if you'll *click* with it. Do a once-over inspection of any device and its documentation. I once returned a removable storage unit because I thought it was D.O.A.; it wasn't—I just hadn't noticed the recessed on/off switch camouflaged on the side.

**You gotta have the ports.** Check first to see that the necessary PC serial or parallel ports—or PC Card slots—are available on your system. It's crushing to get excited about a new gadget only to discover there's no space for it on the PC.

**Look at future expenses.** It's like buying a new car. You wrangle a great deal and then learn that the expenses of upkeep negate any savings. So check on the main-

tenance expenses beforehand: consumables such as batteries; cost of "optional" but ultimately necessary add-ons like an AC adapter or service and subscription fees; and any other secondary costs.

**Have power, will travel.** If you can get an AC adapter for the device, do so. Don't always rely on battery power or the promises of long battery life.

**Don't get seduced and abandoned.** It's easy to be seduced by a cool design, then discover the gadget doesn't really deliver. Buy from a retailer or mail-order firm with a no-questions return policy. Also, be clear about warranties and service and support. Check for service phone numbers on the box or in product info before you buy. —M. S. L.

# Don't Be a Cool-Tool Fool

boot your computer, load your fax software, press a button on the PC/Fax, and view your faxes. Best of all, there's no special software involved—the PC/Fax Store works with any fax program. —L. S. Panasonic, KX-FB40 \$149, KX-FB80 \$199, [www.panasonic.com/alive](http://www.panasonic.com/alive)

## DVD/DVD-ROM

# No Ware to Run

**Y**ou'd think a DVD player or DVD-ROM drive would be the ultimate holiday gadget. The technology promises laserdisc-quality sound and video for movies, PC games, and multimedia apps. But months after DVD players hit store shelves, the new format still offers more promises than it does software.

Sure, you'll find an odd assortment of DVD movies from major Hollywood studios such as Warner Bros. and MGM, with a handful more from latecomers like Universal/MCA and Disney.

But the few DVD-ROM titles you can find are reminiscent of early CD-ROMs.

In a word: shovelware. Some publishers have merely taken titles that exist on multiple CD-ROMs, like The Daedalus Encounter or Phantasmagoria II, and mastered them onto one DVD. To date, about a dozen previously released games and some 20 multimedia and ref-

A DVD original—Tex Murphy: Overseer.

erence titles are offered on DVD-ROM. A few original DVD titles are promised for delivery by the time you read this, including Access Software's Overseer, the third installment of the Tex Murphy graphic adventure series.

A bucketful of new titles and a shelf's worth of shovelware are not particularly compelling reasons to invest \$400 or more for a DVD machine. True, DVD-ROM drives will read CD-ROMs, so you can use them while you wait for DVD titles. But for now DVD is like Gertrude Stein's description of Oakland: There's no ware there. —M. S. L.

# Going Up?

## Get off at the top with ATI's All-in-Wonder Pro.

Just install one board – the ATI All-in-Wonder Pro and take your PC to new multimedia heights. All-in-Wonder Pro – the newest and fastest member of the All-in-Wonder family.

Watch TV on your computer. Monitor your favourite channel in the background while using other applications. Display games and presentations out to a big screen TV. Accelerate 3D graphics to make your computer games explode and your design projects sizzle. Capture video from your TV, VCR, or camcorder and display high quality video, including MPEG, at full screen or in a window.

If you've wanted to upgrade your PC but didn't know which way to go – buy ATI's All-in-Wonder Pro and get all of these upgrades for one price in one box.

## Web Walkman

### Listen Up Player

Just when you thought it was safe to leave your PC, here comes the Internet-to-Go. The Listen Up Player, a pager-size 4-ounce device, will record voice memos, but its main function is to play a wide array of free programming—up-to-date news and finance reports, self-help lessons, audio books, music, and more—all downloaded from Audio Highway's Web site. The unit stores up to an hour of content you can listen to from its internal speaker, via headphones, or through car speakers, using an included adapter. After downloading from the Web to your PC, transfer to the device takes a few minutes with an included docking station. —M. S. L.

## The Murphy's Law Bag

### BusinessPlus Rollaboard

Orvis's BusinessPlus Rollaboard bag can conquer just about all of Murphy's Laws of Travel. *Law 1:* Your flight will always leave from the farthest gate. Solution: This overnight bag sports built-in wheels and a pullout handlebar so you can roll it with ease—no matter how heavy the load or how long the hike. *Law 2:* Increasingly crowded flights force you to check your bag. Solution: The Rollerboard's unique padded computer case fits cleverly into

BusinessPlus Rollaboard

Listen Up Player

Nokia 9000i Communicator

the bag's top lid and can be quickly removed via either of two zippered pockets, so you can easily retrieve your notebook computer if you have to check the big bag.

*Law 3:* You are assigned a middle seat for that 5-hour flight (sorry, the bag won't help you here). —M. S. L.

## A Removable Feast

### Zip Unleashed

lomega's Zip Drive revolutionized the way we save data. With 70 times more storage than a regular 1.44MB floppy, 100MB Zip disks have proven indispensably convenient. But with Zip Unleashed, Zip drives are no longer shackled to the desktop. Little larger than a deck of cards, this battery pack for any Zip drive provides about 3.5 hours of juice per charge. Recharging is literally a snap: A recessed plug snaps out to fit in any electrical outlet. No matter where you roam, Zip Unleashed can put the zip back in your drive. —M. S. L.

## The Amazing Cell Phone PC

### Nokia 9000i Communicator

Wouldn't it be great if one gadget housed a digital phone, a fax machine, and a Web-ready handheld computer? Finnish cellular phone giant Nokia turns fantasy into reality with the Communicator. Using the

new GSM 1900 cellular network, the unit looks like most other cell phones; open up the clamshell, and you'll find an 8MB PDA powered by an Intel 386 chip that uses the GEOS 3.0 O/S. While the keyboard is for hunt and peck only, the 640-by-200 LCD screen offers crisp resolution, and the built-in apps launch easily via dedicated buttons. Find a name in the contact list, click-dial, and the phone snaps into operation. Browse the Web and get text and graphics. With the Nokia 9000i you could go on the road and never have to come back. —M. S. L.

## Shark Bytes

### Shark 250

Is your hard drive crammed to the gills? Instead of upgrading to a larger drive, consider Avatar Peripherals' Shark 250. The sleek device weighs 10 ounces, delivers data about as fast as most hard drives (a video clip I ran from the Shark played fluidly without missing a frame), and plugs into a notebook or desktop PC via parallel port or PC Card. Best of all, it stores a whopping 250MB on removable Shark cartridges (or is that cartilage?) that cost about \$39 each, or 16 cents per ►

**HEWLETT®  
PACKARD**

# ONE GIANT LEAP FOR E-MAIL.

Imagine, e-mail that goes where no e-mail has gone before.

Using the Internet as its launching pad, e-mail that can circle the planet to make workgroups work.

Expanded e-mail that makes users six times more productive than users of competitive products.\*

With the freedom, flexibility, and friendliness of an out-of-the-box solution—  
that can still be easily optimized to your needs.

And can leverage your existing network investment for maximum impact at minimum cost.

[ **Novell. GroupWise 5.2 makes it possible.** ]

GroupWise® 5.2 technology is as easy to use as ordinary e-mail,  
but offers a rich array of expanded capabilities—such as calendaring and scheduling, document management, workflow, imaging,  
threaded discussions and status tracking—that takes ordinary e-mail out of this world.

And puts a whole new world of productive tools within reach of any user, any browser, any platform,  
any server (yes, even NT). It's also Java®-enabled, easy to learn and easy to administer.

It's no wonder nearly three out of four people who try GroupWise, buy it.

So try it—FREE. Get a free three-user CD version of the full product by calling 1-800-778-1850 or download it from our Web site.

It's a small step for you—but a giant leap for your business.

## Pager on Steroids Inter@ctive Pager

Pagers aren't for wimps anymore. No ordinary snug-on-your-belt device, this 3.9-by-3-by-1.4-inch unit weighs about half a pound. That's because it opens up clamshell style to reveal a 30-character-by-5-line LCD screen and a tiny but easy-to-use keyboard. Relying on an Intel x86-

Psion Series 5

## PC Star Maker Connectix Color QuickCam 2

My Labrador, Samantha, loves to be in pictures. With Connectix's \$199 Color QuickCam 2, I made her a movie star in minutes. This round camera, smaller than a tennis ball, sits on your desk or PC monitor. Plug the camera into your PC's keyboard port, plug the keyboard into an adapter, connect a second plug to the parallel port, and you're set. Still pictures and videos both look good. But Connectix doesn't supply a printer pass-through, so you'll have to unplug the camera when you need to print. And the video files are huge: A 2-minute movie took 7.5MB. Fortunately, you can compress the files (my short film compressed to 2MB), though

ILLUSTRATION: GLENN MITSUI

## Print With Flying Colors Canon BJC-80

Talk about printing on the fly: Canon's portable color ink jet printer weighs 3 pounds and prints decent colors, and with its 200-pages-per-charge battery pack, you really *can* print while on a plane. Snap in a \$99 scanning cartridge to turn the ink jet into a portable color copier. Resolution is 720 by 360 dots per inch, the same as

on some of Canon's heavy-duty Bubble Jet desktop printers. Monochrome prints at 4 pages per minute, color at 2 ppm. An infrared port allows wireless printing with similarly equipped notebooks. —M. S. L.

Connectix Color QuickCam 2

# The ultimate weapon for the road warrior.

Imagine making a PC-based presentation without a PC!

Although the PT-L555U is fully "plug and play" compatible with your PC, the PT-L555U's built-in PCMCIA memory card system lets you make "PC-less" presentations using the projector alone!

Small enough to fit in a briefcase and light enough to carry anywhere (just 11lbs), the Panasonic PT-L555U provides an ultra bright, uniform picture (450 ANSI lumens)

and outperforms bulkier, more costly projectors. (This outstanding performance is backed by a 3-year warranty\*)

The PT-L555U's supplied remote mouse control comes complete with built-in presentation tools and is designed for the utmost ease-of-use.

Whether you're a travelling salesman or a board director; if business is war, the PT-L555U is the *ultimate weapon*.

## Luke, Feel the Force!

### Sidewinder Force Feedback Joystick

You've almost got radar lock. You gently pull back your joystick, get tone, call Fox Two, then turn that MIG 29 on your tail into digital shrapnel. But the thrill of the kill seems so two-dimensional. Not so with Microsoft's Sidewinder Force Feedback Joystick. This slick piece of game gear uses digital-optical technology that actually lets you *feel* the ups, downs, and explosions on your screen.

With nausea-inducing efficiency, Sidewinder's on-board processor translates high-speed turns, turbulent weather, machine-gun recoil, and more into back pressure and vibration on the joystick. Microsoft's Flight Simulator

Sidewinder Force Feedback Joystick

tem to accept incoming faxes, and it provides surge protection for itself and two peripherals. —S. B.

# Technology and the best prices, it's great to know

The competition can't measure up to our award-winning systems.

Recently, our multimedia systems were awarded some of the industry's highest honors by *PC World* (11/97). Our QP5/200 SM-1 won praise as a "Best Buy", and was bestowed the number three spot in the Budget Desktop category. And, in the the Power Desktop category, our featured system, the QP6/266 SM-4x, achieved an honorable number six ranking. No surprise - it combines the biggest picture (19" Digital Monitor), the fastest CPU (300MHz Pentium® II processor), the largest hard drive (8.4GB EIDE), and the most stunning graphics available (128-bit Riva 128 3D AGP Card), all for less than you'd ever thought possible.

## (Comforting thought, isn't it?)

Quantex has always built its machines to last, and backed them up with award winning tech support, second to none. Now, working hand in hand with Intel and utilizing their LANDesk® Client Manager Technology (LDCM), we've taken "support" to new heights. LDCM, a technology designed to monitor your PC's health and provide early warnings of potential PC problems, was originally developed for large businesses. Quantex now makes this technology available in a user-friendly format for individual and small business users.

LDCM automatically loads each time your PC is turned on, and runs in the background while you work. It continuously checks on the condition of your computer, and sends you a visual warning upon recognizing potential problems. A simple click of the mouse will inform you of a number

of possible solutions to consider. If additional assistance is required, a system analysis print out can be sent to a Quantex technician to facilitate a quick resolution.

By catching a problem before it becomes a problem, there's no costly downtime. No lost productivity. And no worries. Which is the way it usually is with Quantex PC's. Only now, even more so.

## We're always behind you.

Quantex provides toll-free technical assistance, anytime day or night, seven days a week. Live human beings, not recordings, provide fast, friendly help. A recent survey of "Great Tech Support" gave us a rating of "Excellent" in our ability to handle any kind of technical problem quickly and inexpensively. See for yourself!

# Quantex is always one step ahead

At Quantex, we're in touch with the needs of small businesses (after all, we were one once!). As a company with years of experience manufacturing high quality, award-winning system solutions, we've become pretty savvy about delivering the perfect solutions to the most discriminating buyers.

Our powerful business workstations provide high levels of reliability and performance, and are enhanced by Microsoft's preferred operating system for businesses of all sizes, Windows NT. This "crashproof" operating system offers increased system security and the benefit of the same familiar look and ease of use of Windows 95. It allows you to keep your most important files private, and runs your 32-bit applications up to 24% faster.

Like all Quantex products, these business workstations offer further reliability with name brand components from some of the most respected manufacturers in the industry. Give us a call, and let our system consultants work with you in making sure you select systems perfectly suited to your business' needs.

Purchasing PC's for your small business is an important investment, so choose wisely - choose Quantex as your "small business partner."

# Text, Graphics, and... Photos?

Photo-quality printers for \$199?

**Get real**—this year's top personal printers can **crank out** sharp text and dazzling color, but **don't ditch** your local Fotomat yet.

BY DAN LITTMAN

## HARDWARE BUYS

NEED A NEW print for your living room wall? Want to add a photo of your new office to the quarterly report? Easy, say all the personal printer companies. Just fire up your PC and print it out on your \$300 ink jet.

That's the talk. But can the new color ink jets walk the walk when it comes to producing photo-quality images? No doubt about it, all the images that printer companies show in their ads look terrific—they're as smooth, colorful, and detailed as a 35mm snapshot. But based on our tests of 14 color ink jets, photo-realism is a ►

PHOTOGRAPHS BY ROBERT CARDIN

### This Month's Best Buys

The tiny Minolta PageWorks 6L (top) is a good general-purpose monochrome laser. The Canon BJC-4300 (center) produces close-to-realistic photos for a remarkably low price. And the NEC SuperScript 860 (bottom) is the fastest printer here.

little, uh, unrealistic. You can get close: We got striking prints using glossy paper, vendor-suggested settings, and, often, special ink. But photo-realism comes at a price—you have to buy costly paper, tweak settings, and start with very high-quality images. The HP DeskJet 694C and Canon BJC-4300 did best with a photo digitized on a 1200-dpi drum scanner, which few people have lying around. But even those images didn't quite match photos.

As alluringly cool as photo-quality printing is, the typical personal printer tackles more mundane chores: text documents, spreadsheets, simple presentations, and fun stuff like fancy cards. But picking one is tough—especially a color ink jet printer—because of the vast array of choices. We tested five color ink jets from Hewlett-Packard alone. Of the others, Canon's BJC-4300 is a Best Buy for a second month. It produces nice color documents, including photos; is easy to use and nicely designed; and costs only \$199. (It looks like this low price won't dazzle us for long—NEC's SuperScript 150C will run you an amazingly low \$119, though it comes too late for this issue.)

According to our reader surveys, people buy fewer monochrome personal printers than color, but mono is still important—especially for business use. We tested nine models and picked Minolta's new PageWorks 6L and the NEC SuperScript 860 as the best values. The PageWorks 6L did not excel in any one

area, but was above average in all and costs \$299—pretty low for a personal laser printer. The \$399 NEC SuperScript 860 costs \$100 more, but it prints text at a swift 7 pages per minute, faster than any other personal laser we've tested.

### PHOTO FINISH

AS WE BEGAN OUR research for this review, several leading ink jet printer vendors came by to show their new "photo-quality" printers. Their output samples were stunning. To see if we could match them, we added three

new image files to our test prints: a picture of a mural, taken with a 75-dpi digital camera; a 600-dpi Corel Photo CD image of a beach; and a picture of a woman's face, digitized on a scanner.

The old adage "garbage in, garbage out" applies to photo-quality printing. The ink

## Photo Printers

THE WAY PRINTER ADS use phrases such as "photo quality" and "photo-realism," nearly every color printer should produce photos that are indistinguishable from a real snapshot. But even prints from the best general-purpose models, such as Canon's BJC-4300, are obviously computer-generated. Colors are made up of tiny dots, and outlines look a bit jagged.

Aztech's Desktop Photo Developer DPD-200

### GETTING THE BEST PRINTS

IF YOU CRAVE quality that's closer to true photo-realism, consider a model designed for the purpose. You have to be serious to justify the cost: Photo printers run from \$299 to \$499, and a single image can cost up to \$2.50 to produce, including ink and photographic-style paper. You'll probably still need a general-purpose printer; of the models here, only Epson's Stylus Photo also does plain-paper text documents.

At best, photo printers produce output that

jets managed colorful and fairly detailed prints of the mural, but they were nowhere near as sharp as a 35mm photo. The higher-dpi beach scene was better, but also lost details and seemed slightly out of focus.

The best images came from our drum-scanned head shot. Most printers did more than a serviceable job here. The

<sup>1</sup>Hewlett-Packard does not release color resolution for this model.

<sup>2</sup>Manual-feed slot for envelopes only.

# Super Quality, Steep Prices

does look like photographs, but they need high-quality image files (24-bit color and at least 300-dpi resolution). If you start out with a low-res, highly compressed image, such as those produced by inexpensive digital cameras, a photo printer may *accentuate* a picture's deficiencies.

Among the newest and least expensive photo printers are Aztech's Desktop Photo Developer DPD-200 and Elger Labs' ElgerMedia Photo Lab, nearly identical models that sell for \$299. Each is about shoe box size and includes a pass-through connector so it can share a parallel port with your main printer. Oddly, these printers don't use ink; instead, they expose dyes embedded in 4-by-5-inch sheets of glossy paper, which cost 50 cents apiece. The process worked well with high-resolution image files, but low-res files tended to be jaggy-looking. Maximum print size is 3 by 5 inches—very small if you want to reproduce a prized photo for framing.

## BEYOND BIG

UNLIKE THE Aztech and Elger models, Hewlett-Packard's \$499 PhotoSmart Photo Printer can print on 8.5-by-11-inch paper that looks and feels like real photo-finishing stock. (A full-page photo costs around \$2.50.) The PhotoSmart's re-

production quality is the best here; colors look rich, and subtle details are sharp. However, this printer is huge—bigger than many desktop PCs—and loading paper into its cavernous innards is like sliding a pizza into a brick oven. Photos can take 15 minutes to dry.

Epson's \$499 Stylus Photo doesn't equal the PhotoSmart's quality—skin tones look less realistic, for example—but it's easier to live with. Small as a typical color ink jet, it's the one photo printer here that also produces black text on plain paper (albeit slowly). Photos look best on Epson's glossy paper (an 8.5-by-11-inch image

costs about \$2), but the Stylus can also handle many other media, including cheap ink jet paper and banner-size sheets.

—Harry McCracken

**Hewlett-Packard's  
PhotoSmart  
Photo Printer**

READER SERVICE NO. 735

## Fresh Photos, Fine Details

TRUE TO advertising claims, photo-realistic printers produce fabulous results—but the per-print costs are steep.

### HP PHOTOSMART

The \$499 PhotoSmart, our favorite among the photo printers, offers crisp details.

### CANON BJC-7000

The \$449 general-purpose BJC-7000 did pretty well, but photos lose detail and look a bit gritty.

Canon BJC-4300 and HP DeskJet 694C prints looked the best, with smooth (if pale) colors, even transitions from bright to shadow, and sharp texture detail. The Epson Stylus Color 800 also did well except for banding in solid colors. Only the HP DeskJet 722C and the BJC-250, Canon's least expensive ink jet (which

missed the chart), produced noticeably poorer images.

The gotchas? The paper you need costs a lot more than 5-cent ink jet paper—up to \$1 a sheet. These photo papers are heavy and stiff; they're better for documents to frame or tack up.

Some printers, like Canon's BJC-4300, also use special inks, adding to the cost. And with the high-quality electronic images needed to get the best prints, ►

## PRINTING COSTS

Envelope capacity	Manual-feed slot	Estimated cost per plain-text page	List price of black cartridge	Estimated black cartridge life (pages)	Estimated cost per color page	List price of color cartridge	Estimated color cartridge life (pages)	Warranty (years)	Toll-free phone support	Weekday support (hours)	Weekend support
15	●	\$0.04	\$7.40	200	\$0.14	\$28.40	200	1	●	24	●
10	○	\$0.03	\$27.26	900	\$0.09	\$27.26	300	2	●	12	○
15	●	\$0.04	\$37.50	900	\$0.03	\$20	640	1	●	24	●
15	●	\$0.03	\$32.95	840	\$0.09	\$39.95	422	1	○	16	●
20	● <sup>2</sup>	\$0.04	\$32.95	650	\$0.10	\$34.95	313	1	○	16	●

you'll have *huge* files—10MB to 20MB each, based on the size, resolution, and color depth of the image. Here, 36 shots is not a roll of film, it's 300MB or more of disk space. For more on photo-quality printing, see "Photo Printers: Super Quality, Steep Prices."

**MONOCHROME HANGS ON**  
IN THE EVOLUTIONARY TREE of printers, personal lasers may not be headed for extinction, but they're out on a dying limb. Though their text speed has increased over 10 percent and graphics almost 50 compared to a year ago, their print quality

hasn't changed much. Where color ink jets have the life span of fruit flies, some mono lasers we've seen have been around for over a year; we first tested the Panasonic KX-P6500 in February 1996.

What keeps personal lasers alive despite stiff competition from color ink jets? ►

## Good Prints for Nice Prices From Canon, Epson, and HP

### COLOR PRINTERS: Photos

**1** Canon BJC-4300 The BJC-4300 offers clear edges and smooth transitions, but its photo colors are washed out.

**2** Epson Stylus Color 800 We found the 800's colors to be fairly accurate, but banding was a problem.

**3** Canon BJC-7000 Though its photos are a bit dark, the BJC-7000 produces stronger color than its fellow Canon.

**4** HP DeskJet 722C Dark colors and overall fuzziness leave us unimpressed with the 722C's photo capabilities.

**5** HP DeskJet 694C The 694C prints a vivid photographic image with crisp edges, fine detail, and lifelike colors.

### COLOR PRINTERS: The Real Thing

At left is the original image from our photo test. We expected our color printers to reproduce the photograph's sharp detail, lifelike flesh tones, and smooth color gradations. As you can see from the results above, a few printers came close, but none hit the mark exactly.

### COLOR PRINTERS: Text

**BEST**  
**50th Anniversary**  
months, the Printers  
will celebrate its 150

**4** HP DeskJet 722C The 722C offers clean text edges, even weights, and a dark black.

**WORST**  
**50th Anniversary**  
months, the Printers  
will celebrate its 150

**2** Epson Stylus Color 800 Fuzzy text with jagged edges is the 800's unfortunate hallmark.

### MONOCHROME PRINTERS: Gray Scale and Text

**50th Anniversary**  
months, the Printer  
will celebrate its 150

**1** Minolta PageWorks 6L While its gray scale is pretty good—a bit dark and fuzzy, but acceptable—the Minolta's text is admirable, with jag-free edges.

**BEST**  
**50th Anniversary**  
months, the Printer  
will celebrate its 150

**2** NEC SuperScript 860 The NEC's text is as sharp as the Minolta's but with finer letters, and its gray scale shows good transitions but is spotty.

**50th Anniversary**  
months, the Printer  
will celebrate its 150

**3** HP LaserJet 6Lse Solid text and fairly smooth (if slightly weak) grays make the LaserJet 6Lse a fine choice for overall print quality.

**WORST**  
**50th Anniversary**  
months, the Printer  
will celebrate its 150

**4** NEC SuperScript 660plus Though the 660plus does well on text, its gray scales, even darker than the Minolta's, are barely acceptable.

**50th Anniversary**  
months, the Printer  
will celebrate its 150

**5** Panasonic KX-P6500 This tiny printer produces clean, sharp text but awful gray scales. That high-contrast look is particularly unappealing.

IBM ScrollPoint™

# Overcome one of the Internet's most annoying problems

Whatever PC you use, IBM's new **ScrollPoint™ Mouse** can make browsing the Web a whole lot easier. ScrollPoint is a full-function mouse that gives you the breakthrough advantage of fingertip scrolling. So when you nudge that little blue scrollpoint, you can buzz around a Web page in whatever direction you choose. Actually get to the good parts without ever having to touch the scroll bars. (Now if you could just get your files to download faster, your life would really be complete.)

The ScrollPoint Mouse works with a multitude of Windows® 95 applications, and even speeds you through spreadsheets and other really long documents. To get yours, visit your nearest retailer. Or drop by [www.us.pc.ibm.com/ibmhome](http://www.us.pc.ibm.com/ibmhome) for more information.

# THE HITACHI VISIONBOOK PRO. NOW RUNNING AT SPEEDS UP TO 233MHZ.

Once there were very good reasons to have one kind of computer for running your business and another kind for running around. But, with the introduction of the Hitachi VisionBook Pro, those reasons abruptly disappear. Because of our unique technology, the gap between desktop PCs and notebook PCs is, in practical terms, totally obliterated. By every measure—screen clarity and viewing area, concurrent use of floppy and CD ROM drives,\* the performance of Intel's Pentium® processor with MMX™ technology—you compromise nothing.

And the new Hitachi VisionBook Pro delivers integrated communications features previously known only to desktops. With Fax/Modem and LAN, you're ready to

influence events from wherever you do business. The Hitachi VisionBook Pro.

It will give you  
your desk back.

While eliminating  
your need for one.

I'll be working out of the office today.

## SIGNIFICANT FEATURES

- U.S. Robotics® 56.6K™ x2™ modem.
- Integrated Ethernet LAN port.
- Hitachi super large 13.3" TFT display.
- XGA (1024 x 768) resolution.
- 233MHz Intel Pentium® processor with MMX™ technology.
- 512K L2 cache—twice standard size.
- Card Bus-compliant Type II/III PC card slots supporting Zoom Video.
- 32MB EDO RAM—upgradeable to 144MB.
- Removable hard drive—starting at 3.2GB.
- Smart Lithium-Ion battery, swaps with 3.5" floppy drive.
- 20x CD ROM drive, swaps with second battery.
- Optional advanced port replicator.
- Full-size keyboard, USB port.
- Other configurations also available.

Lower prices. In the last six months, the average laser price has sunk over \$100—from \$449 to \$341. The KX-P6500 went from \$449 to \$349. None of this month's lasers is over \$400; the Mita DP-560 (which missed the chart) is only \$199. At that price, you can almost afford to buy both a laser and a color ink jet printer.

Lasers still do some things better than ink jets. They're faster, they print on different papers (like textured sheets), and over the long run their consumables cost about half. But most people buy a laser to give documents a more businesslike look—the impression to convey when you're making proposals or negotiating with the IRS.

### NEED SPEED? GET A LASER

**LASERS HOLD AN EDGE** in raw print speed. Printing monochrome text pages, our lasers averaged twice the ink jets' speed—5.3 pages per minute versus 2.7. The fastest was NEC's SuperScript 860 at a quick 7 ppm. If you need color but mostly print text, our fastest ink jets were the

Apple Stylewriter 6500 and the HP 890Cse; both hit nearly 5 ppm, but neither made the chart due to relatively high costs and middling features and support. Which was slowest? Epson's Stylus Color 400, also a chart misser, at just 1.1 ppm.

The lasers were faster with graphics, but it's not a fair comparison. Color printers deliver up to four inks to the lasers' one for each dot on a page. Among most of the lasers, there was minimal difference in graphics speed—3.2 ppm to 3.6 ppm. The HP LaserJet 6Lse hit only 2 ppm.

If you need to print business graphics in color, the Epson Stylus Color 800 and Stylus Color 600 (which missed the chart) are the fastest. The Stylus Color 800 is rated at twice the color speed of competing ink jets (7 ppm versus next-fastest 3.5 ppm) and it shows; it was first to print Excel charts, an HTML page, and a five-page presentation. It finished our CorelDraw color photo in 44 seconds, 27 seconds faster than the Stylus Color 600. This is especially impressive given that

our other ink jets took over 2.5 minutes. (A high-quality photo can take over 15 minutes to print—if you're using the best-quality settings.)

### PRINTERS FOR SPECIAL NEEDS

**MOST PRINTERS** we tested are for general personal and small-office business use. They're fairly comparable in size, weight, and paper size capacity. But a couple don't fit the standard mold. The HP DeskJet 1000Cse, for example, is the best choice for printing really big documents. It's similar to the HP DeskJet 820Cse (now replaced by the DeskJet 722C), which can take paper up to 13 by 19 inches. With that size paper, you can print your own color posters. At \$499, it's only \$50 more than the 890Cse, which didn't make the chart.

If you travel and want to take a color ink jet printer with you, we recommend the \$149 Canon BJC-250. Although not specifically designed for portability, it's small and light—only 6.8 by 8.5 inches in size and 5.5 pounds.

## TOP 10 PERSONAL PRINTERS

## TEST REPORT

**Ten-page text** **Two-page newsletter** **Downloaded Web page** **Gray-scale photo**  
**Five-page spreadsheet** **Two-page spreadsheet and pie chart** **Five-page presentation** **Color photo**

**HOW WE TEST** All printers are tested in default mode under Windows 95 using a Gateway 2000 PMMX-166 with 32MB of RAM. Tests are timed from the point when the print command is issued until the last sheet is out of the printer. Test documents include ten pages of plain text and a two-page newsletter created using Word 7.0 for Windows 95; a five-page plain spreadsheet and a two-page spreadsheet with a color pie chart created using Excel 7.0 for Windows 95; the contents of an HTML page from a Web site; a five-page color presentation created in Freelance 7.0; and a color photograph with colored text created in CorelDraw 7.0. Data based on tests designed and conducted by the PC World Test Center. All rights reserved.

# Mountains of work?

PaperPort<sup>™</sup> mx grayscale scanner, 6 ppm

PaperPort<sup>™</sup> Strobe color scanner, up to 15 ppm

## Dynamite.

A PaperPort Strobe or PaperPort mx scanner easily turns shovelfuls of paper on your desk into organized files on your desktop. Scan anything, then fax, file, edit, copy, and e-mail all from one easy-to-use screen. OCR massive text files with just a point and click. Drag and drop scanned documents and images to instantly create working files in over 185 popular applications. Make this your new in-box, and blow away your paperwork.

Create working files instantly in over 185 applications—words into Microsoft<sup>®</sup> Word, contacts into Symantec<sup>®</sup> Act!<sup>™</sup>, and much more.

Scan anything from business cards to photographs to receipts.

Zero waiting—the Autolaunch feature “wakes up” the system the moment you feed it paper.

For more information please call us toll free at **800.787.7007**, or visit our web site at **[www.visioneer.com](http://www.visioneer.com)**.

## Canon BJC-4300

1

**STREET PRICE:** \$199**PRINT QUALITY:** Good color  
(although not the best),

adequate text and gray scale, poor line art

**EASE OF USE:** Good**TESTED PRINT SPEED:** 2 ppm text,

0.3 ppm graphics

Despite the arrival of numerous color printers since the BJC-4300 first topped our chart in October, it still leads the pack, in large part due to its astoundingly low price and easy operation. Predefined driver settings and good documentation make this printer especially easy to use. Performance is weak: Though a tenth of a page faster than in previous tests, it's still twice as slow with text as some ink jets. (Graphics speed is average.)

At a mere \$199, the Canon BJC-4300 is the least expensive printer on our Top 10 chart—color or monochrome. It also comes with helpful software features that might improve output. Settings for photos, graphics, and other document types are predefined. If you modify these settings, a setup analyzer validates your new arrangement. If you've chosen invalid settings, it displays a dialog box showing what's wrong and allowing you to correct settings or override. You can also customize and save configurations.

Though the BJC-4300 didn't offer the best photo-realistic output (that honor goes to the HP DeskJet 694C, in fifth place), it came close. It printed our photo with a slightly washed-out look, but the image's edges were clear and its colors smooth. In our other tests, the printer's gray scale was fairly subtle. Text appeared somewhat fuzzy, but shadow- and spatter-free. As with many ink jets, lines are its Achilles' heel—they varied greatly in weight.

We liked the BJC-4300's bundled software: Canon Creative 3 for photo editing and greeting cards, and Web Solutions. A topflight manual explains how to get the best results from the driver and a variety of media, such as fabric, T-shirt transfers, glossy photo paper, banners, and specialty inks. One other perk:

2 Epson Stylus Color 800

3 Canon BJC-7000

4 HP DeskJet 722C

5 HP DeskJet 694C

With the easily installed IS-22 part (\$99 extra), you can turn this printer into a 24-bit color scanner. Canon Computer Systems; 800/848-4123; [www.ccsi.canon.com](http://www.ccsi.canon.com)

READER SERVICE NO. 728

## Epson Stylus Color 800

2

**STREET PRICE:** \$399**PRINT QUALITY:** Good color,  
adequate text and line art, poor

gray scale

**EASE OF USE:** Adequate**TESTED PRINT SPEED:** 3.8 ppm text,

1.1 ppm graphics

Now \$50 cheaper since its last appearance on our chart (in June), Epson's Stylus Color 800 rose to second place this month. Though still the second most expensive model here, it's a fine printer to share with others.

Unlike most personal printers, the 800 is workgroup-friendly: It supports an ethernet card (\$399) and PostScript (\$99 more) for heavy graphics use. It also has a Mac serial port, allowing work with both platforms.

The 800 produces vivid, attractive color, even on plain paper. We also liked it in our photo test, though banding spoiled one otherwise nice image. The 800's text can be fuzzy on plain paper, and gray scale is harsh compared to that of the other color printers on our chart.

Though a slow workgroup printer, it's very fast for a one-person machine. On text, it's over half again as fast as any other but HP's new DeskJet 722C, our number four. At graphics, it's over three times as fast as any other color printer, save Epson's Stylus Color 600. However, with no manual-feed slot, you must empty the tray to print envelopes.

The Stylus Color 800 comes with an extraordinary two-year warranty. Though its support hours are the shortest (only 12 on weekdays), Epson offers phone support for five years after the product has been discontinued—unlike HP, for example, which offers only 90 days. Epson America; 800/463-7766; [www.epson.com](http://www.epson.com)

# Paper.

# Scissors.

# Rock!

**Scan virtually anything.**

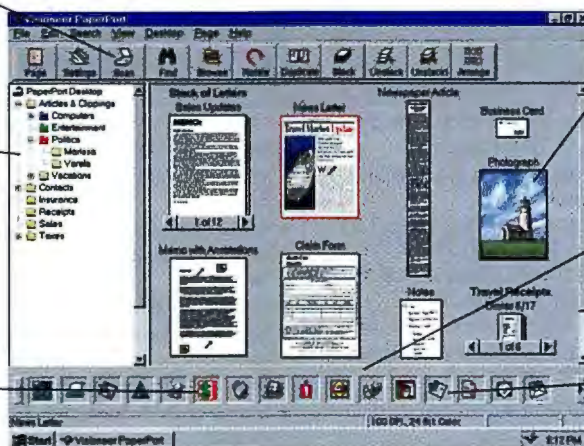

Capable of handling all kinds and sizes of documents, from business cards to photographs to newspaper columns.

**"Find File" firepower.**

Manage scans in folders up to five levels deep...with one click. To find files, you can simply use keywords—SimpleSearch™ automatically "reads" entire documents, so you never need to create or remember file names.

**Organize your expenses.**

Scan receipts, drag them to Quicken® ExpensAble™ SE (included), and fill out your expense report.

PC Magazine Editor's Choice Award, November 4, 1997.

**Scan images and**

**photographs in vivid color.**

Instantly adjust the brightness, contrast, and color of your scans with a click of the mouse.

**Feed more than 185 popular applications.**

Instantly transform scans into working files by dragging and dropping to the application of your choice—contacts to Symantec® Act!™, words to Microsoft® Word, pictures to Adobe Photoshop®, you name it.

**Let your PC type for you.**

Xerox TextBridge™ OCR (included) turns documents into editable text at the click of a button.

PaperPort Deluxe™ software turns your scanner into a productivity powerhouse. Scanned documents and photographs are just a click away from being working files in over 185 popular applications. Quickly organize and share all your scanned information on one easy-to-use screen. Fax, file, copy, edit, e-mail. And find any file with an intelligent keyword search. Now you're rockin'.

## Canon BJC-7000

3

STREET PRICE: \$449

PRINT QUALITY: Good color, text, and gray scale;

adequate line art

EASE OF USE: Very good

TESTED PRINT SPEED: 2.3 ppm text,

0.3 ppm graphics

Despite being \$50 more than the next most expensive printer on the chart, this top-of-the-line personal ink jet makes its Top 10 debut this month thanks to fine output and top-notch documentation.

As Canon's high-end personal printer, the BJC-7000 comes with some extra features its siblings, the BJC-250 and BJC-4300, don't. It's capable of a higher maximum resolution (1200 by 600 dpi). It also includes a case for the resting ink cartridge, which attaches handily to the back of the printer. Besides having preconfigured settings for photos, graphics, and transparencies like the other Canon printers', the BJC-7000's driver gives users control over cyan, magenta, yellow, and black settings, plus brightness and intensity. We liked the flexibility but found the labyrinthine interface—full of tabs, buttons, and more tabs—confusing.

An intriguing difference is the 7000's black-cartridge design. Intended to produce coated-paper results on plain paper, the cartridge has an extra tank full of a clear sealant that preps the paper before the ink sprays. This potential selling point—most ink jets do poorly on plain paper—is not quite successful. The BJC-7000's black text on plain paper looks better than most ink jets', but color and gray scales show little improvement over normal ink jets—they're still a bit faded and blurry. On coated ink jet paper, however, the BJC-7000 renders flesh tones, earth tones, and other difficult colors with subtlety. It even does okay with narrow lines, while other printers improve little on ink jet paper.

The BJC-7000 includes the same nice CD-ROM bundle as other Canons. Its manual offers strong troubleshooting. But changing ink cartridges can be tricky, and the unit is loud, even when idle. Also, its output tray is a floppy plastic plate that needs to rest on a desk. Canon Computer Systems; 800/848-4123; [www.ccsi.canon.com](http://www.ccsi.canon.com)

READER SERVICE NO. 729

# Highlights BEST AND WORST

AN UNEXPECTEDLY HANDY feature can add real value to a printer purchase, while one bad component can take the shine off an otherwise good product. Here's a selection of our most-loved and least-liked features culled from our hands-on testing.

## GREEN CONSUMABLES

The toner for most laser printers comes in a large, enclosed case of heavy plastic—when the toner's gone, the cartridge goes in the trash. With Panasonic's KX-P6500, you can cut down on plastic waste by refilling the toner cartridge from a lightweight plastic bottle.

## SMART PAPER HANDLING

The triple-decker paper tray on HP's midrange printers, including the DeskJet 890Cse and DeskJet 694C, holds hefty stacks of fresh paper and finished prints. It's easy to set up, doesn't cover much desk space, and has a drying rack that separates freshly completed prints from the pile so that pages don't smear or stick together.

## BACK IN (COMPOSITE) BLACK

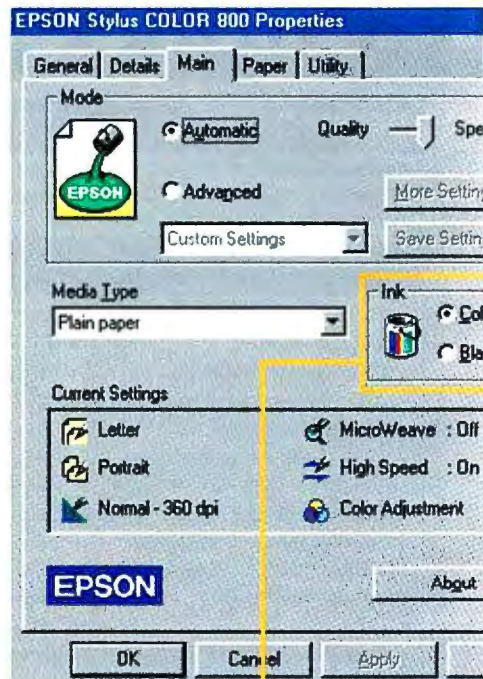

A few months ago we thought we'd seen the last of printers that fake black by mixing other colors. Now they're back: The Canon BJC-250, Lexmark 1000 Color Jetprinter, and HP DeskJet 400L (not reviewed here) are all cheapies that can't hold black and color cartridges at the same time.

## FLOOR SAMPLES

To save money, Lexmark eliminated the output tray on its 1000 model. Let's hope you've cleaned your floor recently, because that's where your output will land.

## BLACK ON DEMAND

If you use the default settings on the Epson Stylus Color 800, the printer will automatically deliver composite black, even with two cartridges installed. To get true black, you must choose the black setting manually in the driver before you print, an extra step.

# "THE ALR REVOLUTION 6X6 is a **FIRST-RATE** server THAT OFFERS more SCALABILITY AND fault TOLERANCE THAN MOST"

InfoWORLD

With dual 300-MHz Pentium II processor support, server management and autorecovery technology built in, the ALR Revolution 2X offers big server features at a small price. We even offer an optional rack-mount kit!

starting at \$2,295

Boasting redundant power supplies, 13 drive bays, and support for dual Pentium® Pro or Pentium® II processors, the ALR Revolution 2XL redefines mid-range servers.

starting at \$3,495

With the power of up to six Pentium® Pro chips and room for over 108-GB of storage, the ALR Revolution 6X6 is arguably the most advanced business server in the world. Redundant power supplies and ActiveCPR autorecovery technology make this an ideal platform for 7/24 environments.

starting at \$7,995

Featuring Pentium® II or Pentium processors with MMX™ technology, three different form factors and numerous available options, the new ALR Evolution series serves the entire range of business desktop users.

starting at \$1,019

ALR rack-mountable server and storage technology helps large corporations centralize network resources in a single convenient location.

starting at \$8,995

The ALR Evolution LT series packs the power of our Evolution desktops into a portable package. Fast processors, advanced multimedia features and a full range of options make these systems ideal for a wide range of mobile users.

starting at \$2,267

If our Revolution 6X6 alone has *InfoWorld* magazine gushing with praise, imagine what they'll say when they catch a look at the rest of ALR's new product line. From the world's only SMP servers to support both Pentium® Pro and Pentium II processor technology, to corporate class desktops, to feature-packed notebooks, these new systems will help free your business from the bounds of mediocre computing.

Since 1986, when we introduced the world's first i386™-based PC, ALR systems have set the high mark for business computer performance. And this next generation is no

exception. They've got all the performance you'd expect from the first company to break the 10,000 tpmC TPC-C™ barrier. They've got all of the reliability you'd expect from the company that won both *UnixReview's* and *InfoWorld's* "1996 Server Product of the Year" awards. And as for price, well... let's just say that you're in for a pleasant surprise.

How pleasant? You'll have to contact your ALR reseller to find out the answer to that question. For the one nearest you, call our toll free number today.

## HP DeskJet 722C

**STREET PRICE:** \$349

**PRINT QUALITY:** Good color, text, and line art; very good

gray scale

**EASE OF USE:** Very good

**TESTED PRINT SPEED:** 4.1 ppm text, 0.3 ppm graphics

The only brand-new printer to make our color chart this month, the HP DeskJet 722C is a good choice if time is of the essence: It spits out text-only pages almost as fast as a monochrome laser. There's a lot more to like about this ink jet. The DeskJet 722C's output is among the best we've seen. Text is free of jagged edges and looks almost as good on plain paper as on ink jet paper—not a boast many ink jets can make. Lines don't bulge or have bright spots, and graphics look smooth, with realistic colors and subtle details, despite a bit of HP's hallmark graininess. Gray-scale graphics are equally attractive. Photo prints are not exceptional, however—you could easily drop \$14.99 on a 20-sheet package of HP's Deluxe Photo paper and you might still get mediocre photo prints. The DeskJet 722C's bundled CD-ROM is tempting; it includes Corel Print & Photo House Select and Streetwise Software's By Design, accompanied by a 32-page crash course on graphic design.

If you live and work in close quarters,

this printer has one other plus: Instead of the typical ink jet clatter, it makes only a quiet whooshing noise that won't interfere with business on the phone. It's also very sophisticated-looking: a calm, two-tone gray with a few smoky teal highlights.

Unfortunately, the DeskJet 722C's manual doesn't meet the high standards of most recent HP printer documentation. It's somewhat disorganized, and its illustrations lack the crystal clarity that we're used to. It covers the territory, but you may have to search for what you need. And with a midlevel price and mediocre support policies (no toll-free technical support, no Web e-mail support), the DeskJet 722C didn't earn a higher spot on our chart. *Hewlett-Packard*; 800/752-0900; [www.hp.com](http://www.hp.com)

READER SERVICE NO. 730

## HP DeskJet 694C

**STREET PRICE:** \$299

**PRINT QUALITY:** Adequate color, line art, and gray scale

**EASE OF USE:** Very good

**TESTED PRINT SPEED:** 2.2 ppm text, 0.3 ppm graphics

HP's DeskJet 694C is a repackaged version of the venerable DeskJet 693C, one of the first printers to tout photo-quality printing; this model comes with HP's photo-ink kit, a \$35 value that includes a whole assembly of ink, cartridges, and

printheads. At \$299, the 694C is the second-cheapest model on our chart, beaten only by the bargain-price \$199 Canon BJC-4300, which is a smidgen slower. Only adequate print quality across the board keeps it in fifth place, but the DeskJet 694C's 2.2-ppm text-printing speed and 0.3-ppm graphics-printing speed nearly match those of our most expensive printer, the Canon BJC-7000. As for quality, the 694C does a middling job, with acceptable though grainy colors, straight but shadowy lines, and text that's just a bit fuzzy.

The DeskJet 694C's design includes some nice touches. For example, a manual-feed slot enables you to print an envelope without having to remove the paper stack from the main input tray—one of those conveniences that you don't appreciate until the first time you need it. On-screen help is easily accessible, and that's important because beyond the printed setup guide, all the documentation is on the CD-ROM.

The DeskJet 694C's software bundle includes Storm Technology's Easy Photo image editing software, which comes with a vast collection of photos, and Corel's Print House Select, a layout program with an extensive collection of Corel clip art, fonts, and stock photos. *Hewlett-Packard*; 800/752-0900; [www.hp.com](http://www.hp.com)

READER SERVICE NO. 731

## MONOCHROME PERSONAL PRINTERS

### Minolta PageWorks 6L

**STREET PRICE:** \$299

**PRINT QUALITY:** Good text, adequate gray scale and line art

**EASE OF USE:** Good

**TESTED PRINT SPEED:** 5.2 ppm text, 3.2 ppm graphics

After years of supplying laser printer components to other printer vendors such as Lexmark, Minolta has stepped out with its own line of personal monochrome machines. Its new PageWorks 6L, a low-cost laser, is a winner: It zooms to our top spot this month. The NEC SuperScript 660plus in fourth place is as cheap, but the PageWorks produces nicer output and has a better design.

The PageWorks 6L's text looks good

overall. The printer also handles thin lines pretty well. Its gray-scale graphics are not bad for an inexpensive printer—a little dark and fuzzy, but pleasing enough.

Having only 256K of memory in your printer can cause problems with big print jobs, even for printers that rely on the host computer for processing, as the PageWorks 6L does. However, in our testing we encountered no hangs. The PageWorks is reasonably fast for a host-based printer, too.

The PageWorks 6L is fairly small, even for today's personal printers—with paper trays closed it can almost fit into a shoe box. Yet it's very sturdy, with a rugged case and substantial paper-handling trays. The paper input tray also includes a separate manual feed, which allows you to insert letterhead, envelopes, or other pieces of

media without emptying the main paper supply. And if you need more capacity than the standard 150 sheets, Minolta sells a 250-sheet add-on tray for \$169 that sits snugly under the printer. *Minolta*; 888/264-6658; [www.minoltaprinters.com](http://www.minoltaprinters.com)

860 ties with the number three HP LaserJet 6Lse for highest price on the chart. But you get speed, sharp prints, and flexibility in return. The 860 is the fastest plain-text personal printer we've tested, over one page per minute quicker than the others. The 860 also produces terrific black text, similar to the Minolta PageWorks 6L's but cleaner and finer, crisp if somewhat uneven lines, and gray-scale graphics better than most personal monochrome printers'.

We found the 860 easy to use. Cartridges install well, and the printer's design is easy to figure out. We liked the many printing options, such as the ability to optimize prints for copying. The 860's manual is thorough, well indexed, and well illustrated. NEC offers toll-free phone support during the entire long two-year warranty (one year is average).

Our only gripes are with installation and page delivery. Installing the 860's driver software can be confusing: On one of our test beds, the executable file didn't know where on the CD-ROM to look for the installer, then had to disable drivers for other printers, and finally grilled us with multiple setup questions that Plug and Play should take care of automatically. Also, unlike most printers, the SuperScript 860 delivers pages face up, in reverse order. The software bundle isn't outstanding: Acrobat Reader, clip art, and Internet software. NEC; 800/632-4636; [www.nec.com](http://www.nec.com)

READER SERVICE NO. 724

## HP LaserJet 6Lse

**STREET PRICE:** \$399

**PRINT QUALITY:** Excellent

text, good gray scale and line art

**EASE OF USE:** Excellent

**TESTED PRINT SPEED:** 5.1 ppm text,  
2 ppm graphics

The LaserJet 6Lse is the most expensive laser on our monochrome chart (tied with the number two NEC SuperScript 860) and the slowest, but it's a wise purchase if you need the best laser output possible for under \$400. Its good-looking prints offer quality just a shade better than the NEC SuperScript 860's: clean, evenly weighted text with no jagged edges in sight; crisp, even lines; and distinctive shades of gray scale.

Despite its odd form—a squat, planar shape reminiscent of a neo-Bauhaus fountain—the 6Lse is a pleasure to use. If you need to change toner cartridges or clear paper jams, for example, its entire front half flops forward, offering wide-open access to the interior.

The printer's superb manual features a thorough index; clear, informative illustrations; and visual explanations of how to diagnose and fix print-quality problems and errors that pop up on the control panel, among other difficulties.

Other than its middling speed, the LaserJet 6Lse's only disappointment is its bundled software: It's all free or promotional stuff from Microsoft, with a net value of zero. Hewlett-Packard; 800/752-0900; [www.hp.com](http://www.hp.com)

## NEC SuperScript 660plus

**STREET PRICE:** \$299

**PRINT QUALITY:** Good text,  
poor gray scale, adequate

line art

**EASE OF USE:** Adequate

**TESTED PRINT SPEED:** 5.2 ppm text,  
3.3 ppm graphics

It appears that NEC tried to design the SuperScript 660plus to appeal to the same shoppers who would like Minolta's PageWorks 6L—people looking for a good all-around (if not perfect) laser at a low, low price. The two models cost the same and print at almost exactly the same overall speeds. But there the similarities end—the 660plus just isn't as good a deal. Most important, it falls down in print quality. Its text is all right, but the gray scale is very dark, and lines are somewhat indistinct.

We didn't care for the separate toner cartridge and imaging drum (most personal printers combine them). To install them we had to shove and jiggle them a lot, a common problem with two-part mechanisms. Even when the cartridge is installed properly, its handle might get trapped in the door if you're not careful. On the plus side, the imaging drum is designed to last as long as six or seven toner cartridges, unlike with most printers, where you have to throw out still-usable drums when cartridges run out. The printer's paper input tray holds 150 sheets, with an optional add-on 250-sheet tray for \$169. The 660plus also deserves credit for catching prints facedown in an output tray—unlike NEC's SuperScript 860—so they're sorted correctly.

O N L I N E

## Beyond the TOP10

We also evaluated these personal printers, but they didn't score high enough to reach the Top 10. For write-ups, see PC World Online ([www.pcworld.com/t10](http://www.pcworld.com/t10) printers).

### MONOCHROME

- Brother HL-730 Plus
- Brother HL-760 Plus
- Minolta PageWorks 6e
- Mita DP-560

### COLOR

- Apple Stylewriter 6500
- Canon BJC-250
- Epson Stylus Color 400
- Epson Stylus Color 600
- HP 890Cse
- HP DeskJet 672C
- HP DeskJet 1000Cse
- Lexmark 1000 Color Jetprinter
- Lexmark 7000 Color Jetprinter

The 660plus has additional problems, though. Except for its useful troubleshooting section, the printer's documentation is downright mediocre—it's badly indexed, confusingly illustrated, and awkwardly worded. Envelopes sent through the manual-feed guides came out looking so wrinkled, we wouldn't use them for anything but paying bills.

The SuperScript 660plus is very affordable and is fine as a text-only printer. But if a budget laser is what you're after, you'd be better off with the Minolta PageWorks. NEC; 800/632-4636; [www.nec.com](http://www.nec.com)

READER SERVICE NO. 726

## Panasonic KX-P6500

**STREET PRICE:** \$349

**PRINT QUALITY:** Excellent  
text, poor gray scale,

adequate line art

**EASE OF USE:** Adequate

**TESTED PRINT SPEED:** 5.7 ppm text,  
3.6 ppm graphics

The first thing you'll notice about the KX-P6500 is its narrow tower shape—only 5 inches wide and 11 inches high, excluding its paper trays. The small footprint makes this laser perfect for squeezing onto cluttered desktops or into small offices. It's fairly fast, too. An old-timer among lasers—it first hit our monochrome chart in February 1996—it still prints graphics faster than any other personal printer we've tested, and with text it's second only to NEC's SuperScript 860.

Print quality is mostly what keeps this moderately expensive laser at the bottom of our monochrome chart. Though its text is crisp, the KX-P6500 makes a mess of graphics. Gray-scale images have a posterized look, as if someone cranked up the contrast so high only a few shades survived. Lines come out uneven. The printer could be easier to use, too. The on-screen status monitor displays a row of buttons with indecipherable icons—you'll need to keep the manual at hand to make sense of them. On the printer itself, the on/off button is located in an awkward place below a paper tray. As is becoming more common for monochrome personal printers, the KX-P6500 comes with not a whit of bundled software.

Fortunately, the KX-P6500's manual is strong; it covers the status monitor and everything else you'll want to know about using the printer. All Panasonic needs to do is update it—replace the Windows 3.1 screen shots with Windows 95 screens and redesign the whole thing for a less busy, crowded feel. Panasonic; 800/742-8086; [www.panasonic.com](http://www.panasonic.com)

# The object is to get the best of the Internet, not let the Internet get the best of you.

The *Pathfinder.com* Web site is one of the best places on the Internet to find valuable information. But if you want to get it as fast and as easily as possible, you'll need the right tool – like a U.S. Robotics® 56K<sup>1</sup> modem with x2™ technology.

The fastest modem we've ever created for use over regular phone lines, x2 technology lets you get the most out of the Internet – quickly. More than 1,000 Internet providers worldwide, including IBM Global Services and NETCOM, offer live x2 service right now, so you can start using it today.<sup>2</sup> We'll even guarantee a free upgrade to ensure your modem meets the international 56K standard when it's established (expected in 1998).<sup>3</sup>

For more information, call 1-800-525-USR1 or visit [www.3com.com/x2power](http://www.3com.com/x2power) to find a provider near you that offers live x2 service today. Even better, if you buy a U.S. Robotics 56K modem right now, you'll get \$50 cash back by mail.<sup>4</sup>

Unlock the true power of the Internet with the #1 selling 56K modem in the world. And give yourself a powerful advantage.

**U.S. Robotics® 56K**  
*unlock the  
power*

# Communicator vs. Internet Explorer

## and the

# WINNER IS...

### When you first meet them,

identical twins are impossible to tell apart. You know that one of them has a wart, but which one? When you get to know them better, you wonder how you ever confused them.

It's the same with the long-awaited shipping versions of Netscape's and Microsoft's latest browser suites, Communicator 4.03 and Internet Explorer 4.0. Both are so alike, it's hard to tell them apart at first. They let you browse the Web, read your e-mail, and get news flashes in surprisingly similar ways. But when you look more closely, one browser is just a little better. Which is it? Based on features alone—and don't think I enjoy saying this—Internet Explorer is the prettier twin, warts and all. It pulls ahead of

Communicator in two main areas: e-mail, the most popular function of the Net after browsing; and desktop integration, an IE feature that people seem to either love or hate. (See "Browser Backlash" for results from our online survey.) Unfortunately, I can't truly *recommend* IE—and not because Microsoft is in legal trouble again (see "Feds to Microsoft: Knock It Off," *Top of the News*). Why not? To be blunt, the product isn't finished yet. It appears that in the race to dominate the desktop, the two browser superpowers have launched a couple of incredibly flimsy rockets, and they're exploding in *our* faces.

I reviewed the Standard Edition of Netscape Communicator 4.03 for Windows 95/NT and the Full Installation of Internet Explorer 4.0 ►

I L L U S T R A T I O N S   B Y   J O H N   B L E C K

BY Yael Li-Ron

## Reasons to Get It

MICROSOFT Internet Explorer 4.0 and Netscape Communicator include nearly every conceivable Internet utility—and a barrel full of features.

### Microsoft Internet Explorer 4.0

- \* **Webified desktop.** IE offers True Web Integration for Windows 95 systems, plus enhancements like the Quick Launch bar.
- \* **E-mail bliss.** Outlook Express is a terrific e-mail client and newsreader.
- \* **OS enhancements.** The Explorer bar offers quick and easy access to Favorites, History, Channels, and Web search engines.
- \* **Speedier browsing.** It's faster than previous versions.
- \* **The price is right.** IE 4.0 is free.

### Netscape Communicator 4.03

- \* **Cross-platform.** Communicator is available for many operating systems, making it ideal for mixed environments and non-Windows 95 users.
- \* **Small installation.** The stand-alone Navigator browser takes up only 8MB of hard disk space. If you don't want the whole suite.
- \* **Noninvasive.** It doesn't integrate with your operating system, minimizing the threat of system crashes.
- \* **Speedy performance.** It's faster than previous versions.
- \* **Gates-free.** It's not from Microsoft.

and found both to be infuriatingly shaky. Communicator sucked up my system resources and choked on Java applets, even on Netscape's own site. IE often died when I ran older programs or froze for no apparent reason, sometimes taking Windows 95 down with it.

And both suites—especially Internet Explorer—are still crawling with bugs, ranging from address boxes that don't quite work to incompatibilities with other software. IE has stung so many people with the nasty side effects of its installation that even some editors I work with won't touch it (see "Internet Explorer: The Uninstallation Trap"). So here are two products that, even after months of some of the best free beta testing a vendor could hope for, are not yet ready for the big time. The companies' reactions? Netscape releases updates as soon as it fixes a bug, but Microsoft has no patches planned.

## CONFUSING DOWNLOADS

OVER THE LAST YEAR, both IE and Communicator have become increasingly unwieldy and bloated with programs that many people don't often use. In this review I focus only on both suites' Web browsers, e-mail functions, and channels, and on IE's integration with Windows 95. For my review of other components, see the online version of this article at [www.pcworld.com/dec97/browsers](http://www.pcworld.com/dec97/browsers).

Microsoft and Netscape waste no time getting off on the wrong foot. It's almost impossible to figure out what to install from their sites. It's such a hassle that you may be better off paying \$10 more for a shrink-wrapped Communicator package or \$5 for a CD-ROM of IE 4.0. (If you download Communicator, Netscape asks that you send \$59 after the trial period; IE is free.)

I can't imagine how a novice PC user could survive either installation. The various combinations of components are confusing, and no matter what you choose, you're forced to download huge files you may never use; you can't pick them cafeteria-style. Even worse, neither site warns you how big the files

are, so you have no idea how much hard drive space you're going to lose. Netscape offers four choices on its site: the Navigator browser by itself, a Base Install, a Complete Install With Additional Components, and a Professional Edition. It took me two attempts to get what I wanted, which turned out to be the Complete Install—an 18MB download that consists of Navigator, the Messenger e-mail program, the Collabra newsreader, and a number of other components. Once I had that figured out, it installed painlessly, if not quickly: It took my 33.6-kbps modem almost an hour to download the software.

Microsoft's approach is a bit different. First, you download a small Setup Wizard program, which collects the rest of IE from one of Microsoft's FTP sites. The wizard asks whether you want to install as you download or save the files locally and install them later. It's risky to download a 24MB file while your system is being updated, so don't take chances—install it later. The wizard then asks what to download. You can pick the stand-alone browser; the Standard configuration, which adds some multimedia features (it doesn't say which) and Outlook Express for e-mail; or the Full installation, which includes a few more programs. I chose the latter; it took over 90 minutes to download and ate up a sobering 64MB of hard disk space.

## I Recommend...

MICROSOFT'S INTERNET Explorer 4.0 for Windows 95—once its bugs are worked out—gets my nod. It's the better suite for two reasons: Its True Web Integration gives the Windows 95 desktop a welcome face-lift, and its Outlook Express e-mail program is far superior to Communicator's Messenger.

But before I can wholeheartedly award Internet Explorer 4.0 a Best Buy, Microsoft needs to address the suite's incompatibility issues and invasive installation procedure. I didn't experience all of these problems myself, but IE can cause severe system crashes, conflicts with other Microsoft products, and unexplained loss of hard drive space, according to our readers (and even some of the editors at PC World).

PHOTOGRAPH: KEN SMITH

# The Webified Desktop

**ADVANTAGE: IE** The biggest difference between Communicator and Internet Explorer is the way IE can integrate with Windows 95, dramatically changing the entire user interface. Dubbed "True Web Integration" by Microsoft, it's probably the single most polarizing feature for users trying to choose between the two browsers.

People who like True Web Integration usually praise the homogenized interface. Others, who perhaps aren't as willing to retrain themselves, find it a confusing if not downright hostile new environment.

**BROWSING YOUR HARD DRIVE:** Love it or hate it, IE's True Web Integration will completely change your desktop.

Me? I like it. In my book, a unified look and feel for Windows 95 and a Web browser is nothing short of miraculous. The new interface, called Active Desktop, is one of the best aspects of IE. Then again, if you're not online as much as I am, you may not appreciate this overhaul as much as I do. No problem. Just click *No* when the Installation Wizard asks if you want TWI, and Windows 95 will still look and act the way it always has.

TWI changes your desktop in three main ways. First, you get a new set of Windows Taskbar icons, called the Quick Launch bar, located to the right of the Start button. With a single click on a program's icon in the Launch bar, you can start that program. Second, you gain the ability to embed Web pages or push content in the desktop. Third, you get a special Channel Bar, which lets you choose push programming. In TWI mode you

never need to launch Internet Explorer to find out, say, the weather in Cleveland. It's all part of your desktop, all the time. Conversely, you can also "browse" your hard drive as if it were a Web page: Just type the path of a local folder or file into the browser, and you switch to a folder view. The Start menu also inherits new abilities. With TWI installed, you can search the Internet from the Find command, and your Internet Explorer Favorites are added to the Start menu, in their own folder.

TWI also scales down the manual labor involved in simply looking at content. For instance, just moving your mouse cursor over an icon selects it. If you've set the folder to Web View, you'll see a thumbnail view of the file's contents, too. This ability isn't limited to just graphics—you can see what's inside HTML files, Microsoft Office documents, and files saved in many other formats. No more guessing what's behind cryptic file names.

Despite the name, TWI doesn't mean you're truly integrated with the Web. If I could drag and drop files between Internet sites and my desktop, that would be true Web integration. Also, when you open at a folder on your hard drive (instead of browsing a Web page), the toolbar modifies itself so that Web-related buttons are unavailable; I'd like to see the History and Favorites buttons everywhere I go.

But I recommend giving TWI a shot. Let the Setup Wizard add it to your configuration, and then use it for a few days. If you hate it, it's easy to disable from the Add/Remove Programs applet in Windows 95's Control Panel. Here's how: First, close all your applications. Then click *Start* and select *Settings*•*Control Panel*. Open the *Add/Remove Programs* applet, and scroll down its list of installed programs until you see 'Internet Explorer 4'. Select that line, then click the *Add/Remove* button. The next dialog box will ask if you want to remove IE or just disable True Web Integration. Make your selection, and after a system reboot you will be back to normal. You can also ►

## Reasons Not to Get It

NETSCAPE Communicator 4.03 and Microsoft Internet Explorer 4.0 are both remarkably unstable. Use either, and you may wish you'd never heard of the Web.

### Microsoft Internet Explorer 4.0

- \* **Hard drive hog.** Unless you've got 39MB to 60MB to spare on your hard drive, you'll feel the storage pinch.
- \* **Too integrated.** When the browser goes down, your operating system can go down with it.
- \* **Big, bad beta.** It's a potentially disastrous upgrade if you're now using the beta (see "Internet Explorer: The Uninstallation Trap").
- \* **Truly weird interface.** A lot of users really don't like the changes that TWI makes to the Windows 95 desktop.

- \* **Waiting for patches.** It's still buggy.

### Netscape Communicator 4.03

- \* **Mixed-up menus.** The interface is inconsistent between modules.
- \* **Not fully implemented.** It doesn't always act like a fully-functional Windows 95 application (for example, its right-click functionality is sporadic).
- \* **E-mail challenged.** The e-mail client can't retrieve mail from multiple accounts all at once.
- \* **I have to pay good money for this?** Communicator isn't free.
- \* **User-unfriendly.** It's still buggy.

**.WORK THE WEB™**

# AN AFFORDABLE INTRANET THAT **GROWS** IN THE DIRECTION OF YOUR BUSINESS ► NO MATTER HOW OFTEN YOU CHANGE COURSE

**INTRODUCING THE LOTUS DOMINO INTRANET STARTER PACK™** Admit it. An Internet connection is no longer a luxury. It's the biggest necessity your business has today. But once you're connected, how can you make the Internet work for your business?

An intranet brings the power of the Internet in-house to speed communication, boost efficiency and streamline your business. Now it's quick and easy to set up a customized intranet in your company. In a couple of days, you can roll out a comprehensive business solution that enables your people to really work together over the Web. Questions get answered, decisions get made, and your products or services actually get sold.

**DESIGNED SPECIFICALLY FOR SMALL AND MIDSIZED EMPIRES.** Domino Intranet Starter Pack is designed for companies that don't have a staff of programmers. Or an endless IT budget. Select from twelve business applications to create an intranet tailored to the needs of your business. The E-mail and Calendaring & Scheduling features are great places to start. Then add Contact Management, Document Library and Company Forms. Domino Intranet Starter Pack is based on the award-winning Domino™ server, so you'll be able to customize and add to your intranet as your company evolves. Intranets are the new course of business. And Lotus can help you pave the way. To find out more about Domino Intranet Starter Pack, ask your VAR for details. Or call 1 800 872-3387, ext. D459, or visit our website at [www.lotus.com/worktheweb](http://www.lotus.com/worktheweb)

disable other options, such as the ability to open a program or document with a single click, if you find them frustrating.

It's unclear what Microsoft has in store for the Windows 98 user interface. The current beta features IE as the default interface, but if enough users complain in the next few months, I'm sure Windows 98 will let you make that choice.

And Netscape? Communicator scratches the surface of TWI's OS integration with Webtop, which are either Web pages

or channels that float on the Windows desktop—just like IE's Active Components. Still absent in Communicator's current version is file management, but at the time we went to press, Netscape announced its upcoming Aurora technology, which should fill the Web/OS integration gap between IE 4.0 and Netscape Communicator 4.03.

Aurora is Netscape's planned desktop shell—an integrated operating system and browser—that was demonstrated for

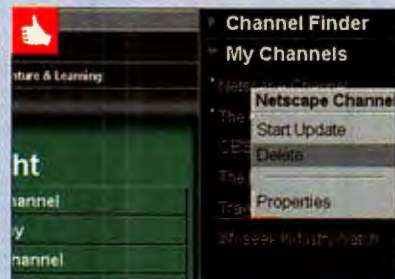

the first time last September. The Aurora software is similar in appearance to a program called Constellation that the company first demonstrated in November 1996; it was released in modified form as Communicator's push client, Netcaster.

Netscape says Aurora should ship in mid-1998, about the same time that Windows 98 is due out. Aurora looks very promising, and its cross-platform angle may be just what Netscape needs to win the next browser battle. Internet Explorer's True Web Integration is, after all, a Windows-only feature.

## Component Comparison: Six Common Tasks

AS SIMILAR AS THEY ARE, Microsoft's Internet Explorer and Netscape's Communicator handle some tasks, such as collecting e-mail, very differently. We compared the browsers head-to-head in six areas and picked the better implementation (if there was one).

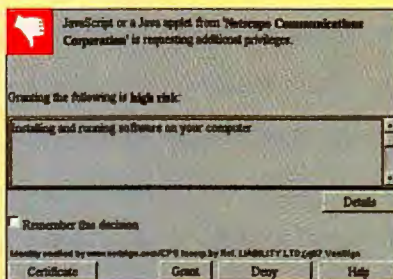

### Using Channels

**TOP:** Internet Explorer's Channel Bar interface makes it difficult to figure out how to see which channels you've subscribed to and how to unsubscribe from them. You can see all your subscriptions in Manage Subscriptions, under the Favorites menu. To unsubscribe from a channel, you have to choose *Properties* from the right-click menu.

**N BOTTOM:** What you see is what you get. The My Channels list in Communicator's Netcaster is what it seems: a listing of the channels you've subscribed to. Once you delete them from the My Channels menu, you're unsubscribed.

### Setting Security Options

**TOP:** Both browsers come with a wealth of security options. But the interfaces are so full of confusing jargon it's tempting to give up and choose the highest settings. If you do, you'll puzzle over warnings like this one in Internet Explorer, which cautions against accepting an ActiveX control from Microsoft's own Web page.

**N BOTTOM:** Navigator makes use of Site Certificates to ensure that any Java applets that you download from certified Web sites are safe for your machine. Unfortunately, even Java applets from Netscape's own Web site can be presented by Navigator as "high-risk" downloads.

### Browsing When Offline

**TOP:** Both browsers let you download and browse offline Web pages, e-mail messages, and newsgroup postings. Internet Explorer also lets you subscribe to sites. This tells the browser to check sites at a specified interval for changes, notify you of any of those changes, and (if you prefer) download Web pages for viewing when you're not connected to the Internet.

**N BOTTOM:** In Communicator, you can conveniently use only one dialog box to set up all your Web page, e-mail, and newsgroup downloads simultaneously. In IE you have to go to both the browser and Outlook Express to set up downloads.

# The Browsing Experience

**ADVANTAGE: IE** Although both browsers display pages in a similar way, they get there in very different ways. IE's features outdo Communicator's clunky interface.

Afraid you'll pick the wrong browser for viewing the coolest Web sites? Don't be. Both IE and Communicator's Navigator browser display most pages identically. Most differences you see are a result of the way they each implement Dynamic HTML, an extension of HTML that adds an extra level of interactivity and multime-

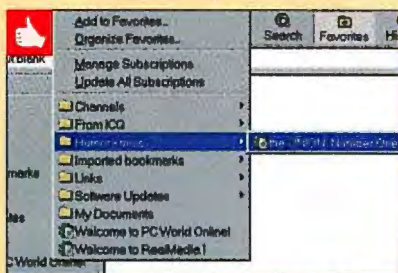

dia capability. Even so, no sane Webmaster, no matter how fond of either browser, would lock out a huge segment of Web surfers by designing for one product and not the other. The name of the game here is traffic. About the only places you'll see a noticeable difference in how either browser displays a page are Netscape's and Microsoft's own Web sites, which are, naturally, programmed with the company's own flavor of DHTML—and even there the only things you'll miss by using the opposing browser are some animations, which may be reduced to static elements. So relax, and don't let the myth of "optimized for browser x" affect your decision.

Navigator and IE differ a lot more in how they take you to Web sites. At their

most basic level—the Back and Forward buttons—they're the same. Right-clicking on either button brings up a menu of all the pages you've visited in the current session. But what if you want to find a site you visited several days, weeks, or even months ago? Once again, IE gains the edge over Navigator.

For instance, both browsers offer an ergonomic boon called AutoComplete, which fills in the URL of a previously visited site once you've typed a few characters into the address box. But IE's implementation is slightly better, because you need to type only part of an address and then press the up or down key to cycle through similarly spelled URLs. This speeds up finding addresses that are

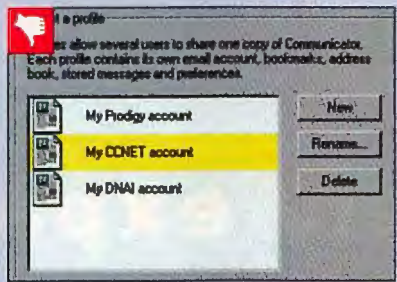

## Bookmarks/Favorites

**TOP:** Organizing the Web sites you've chosen as Favorites in Internet Explorer is easy: Just go to *Organize Favorites*, located at the top of the Favorites menu. It lets you create folders and subfolders, categorize your Favorites, and generally set them up the way you like.

**N BOTTOM:** In Navigator, you can now embed a row of Bookmarks right into the main interface, beneath the address window. Unfortunately, to get to this feature (called the Personal Toolbar) you have to go to *Edit Bookmarks* under the Communicator menu—a counterintuitive step we had to figure out ourselves. Confusing? Yes!

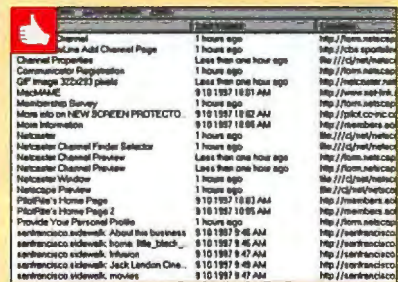

## Managing E-Mail

**TOP:** Got more than one e-mail account? Not a problem with Internet Explorer's Outlook Express. It keeps separate settings for multiple accounts, while allowing you to download all your e-mail in one fell swoop.

**N BOTTOM:** Communicator's Profile Manager handles multiple e-mail accounts as if they were owned by different users. This makes individual accounts secure when many people use the same computer to check mail. However, if you're the only user, you'll have to quit and then restart Communicator every time you want to get mail from a different account.

## Web Site History

**TOP:** Internet Explorer's History feature conveniently pops up in the left window pane, but it organizes previously visited sites only by date. To locate a site by name, you'll have to search for it in Windows 95's Explorer.

**N BOTTOM:** Navigator's History enables you to sort sites by date, address, or even the number of times you've visited, all in a single window. The downside to this approach? The sites are not displayed in a pane within the browser window: You have to open a separate window—and switch between it and the browser—to use Navigator's History.

Envision an enterprise that's

**totally expandable,**

**infinitely scalable, completely compatible,**

**easily manageable, and entirely mobile.**

*AcerAltos servers have manageability built-in.*

identical except for the last few characters.

A similar feature allows you to type in just the URL's domain: For instance, enter 'ibm' and both browsers will go to www.ibm.com. But IE takes this time-saver a step further by checking other possible domain-name suffixes besides .com. If, for example, you type 'berkeley' into Navigator, you'll be told that www.berkeley.com doesn't exist. But IE will go to www.berkeley.edu. And if IE can't find an address, it'll take you to a page of possible matches from Yahoo.

Both browsers offer a couple of other ways to help you keep track of where you've been. Internet Explorer's Favorites and Navigator's Bookmarks, those ever-popular links you can create for sites you visit frequently, are still around. To see the contents of your Favorites folder, go to IE's Explorer bar, a left pane you can open by clicking a button. Navigator displays its Bookmarks as a drop-down menu. (See "Component Comparison: Six Common Tasks" for more about Bookmarks and Favorites.)

Trying to remember which site you visited last Tuesday, the one about vacationing in Costa Rica? Look it up in either browser's History list, which keeps a blow-by-blow audit trail of your Web travels. IE's is easier to get to, but Navigator's is more easily searched.

In IE 4.0, a chronological list of every page you've visited in the previous 1 to 999 days pops up in the left-pane Explorer bar when you click a button. Another nice touch: Pages visited in the last two weeks are labeled Monday, Tuesday, and so on, instead of with dates, which makes it even easier to immediately grasp the day. (Navigator doesn't do this.) To go to a site, just click on it, and it opens in the right pane. Navigator's history opens up in a separate window, which isn't as convenient, but you can sort sites by name, address, or the date of the last visit—something IE can't do within the right-pane of the browser.

## Messages and Posts

**ADVANTAGE: IE** Outlook Express, IE's e-mail and newsreader program, has more useful features than the Communicator equivalent, Messenger.

Most people tend to think of the IE and Communicator suites as a couple of browsers with a lot of other stuff thrown in. One of those other applications just happens to be e-mail, that great unsung hero of the Internet that keeps us all burning up the digital lines. If you need a versatile Internet e-mail package or like participating in newsgroups, listen up, because there are big differences between IE's Outlook Express and Communicator's Messenger e-mail programs.

First, the similarities: Netscape and Microsoft both brag about their e-mail programs' support for a long list of acronyms such as SSL and IMAP4. It just

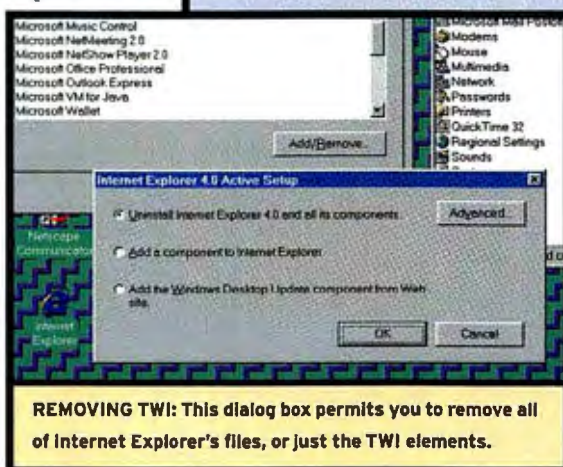

means that they both let you create, send, and receive e-mail either as plain text or as HTML-based "rich text" with fonts, colors, and graphics. Both also let you send and receive digital files and organize messages in folders, and both support industry standards for security and encryption.

Outlook Express has a few extra features that Messenger doesn't, but mainly it just doesn't irritate me as much. For instance, Outlook Express can remember your password from session to session, if you set it to do so; Messenger makes you type in your password every time you open it. And from the Department of Redundancy Department: Outlook Express lets you click either a Reply or Reply to All button. After you select Messenger's Reply menu, you then have to choose between Reply and Reply to All—an extra step.

Outlook Express deserves a slap on the wrist for hiding its mail filters in the cryptic Inbox Assistant option, which lurks under the Tools menu. However, it redeems itself with the ability to generate canned responses to e-mail mes- ▶

## Internet Explorer: The Uninstallation Trap

IF YOU'RE ONE OF THE MANY users who installed Internet Explorer 4.0's beta release when it was made available earlier this year, you may end up with some serious headaches when it comes time to install the final version. It's a case of catch-22: You can't install IE 4.0 unless you've completely uninstalled the beta—and you can't completely uninstall the beta. I've seen this happen on dozens of machines, some of them my very own.

I thought the whole beta was removed from my system when I uninstalled it. I realized later that only a quarter of the program (about 12MB) was gone. Upon closer examination, I found many IE 4.0 files and folders still intact. Some I removed, but others I was afraid to delete because they looked dangerously like system files that could possibly affect Windows 95. The Windows Registry also had some leftover entries that I ended up removing manually. (Warning: Don't do this yourself, unless you know what you're doing.) When I installed the new version, the inevitable errors starting popping up: missing files, corrupted data, and the most annoying of all—"Java not installed".

My system became unstable to the point of meltdown. Following a second uninstall—with some handholding from Microsoft's tech support—I removed the files.

PC World Online has prepared a step-by-step uninstall guide for users of the beta (located at [www.pcworld.com/dec97/browsers](http://www.pcworld.com/dec97/browsers)). Print it out and put it next to your system before you install the latest version of Internet Explorer 4.0. Otherwise, you may live to regret it.

THIS IS THE ONLY PIPELINE  
THAT SHOULD CONCERN YOU...

...NOT THE INFORMATION PIPELINE  
IN YOUR SERVER

RELIABILITY.

*In today's market, reliability is increasingly the single greatest factor in determining a server purchase. As more and more mission critical applications are brought online, more emphasis is placed upon hardware. Our Everex StepServer™2 line of single- and dual-Pentium II processor-based servers has that reliability down pat. Each unit must pass our stringent quality checkpoints at each phase of manufacturing, followed by an extended burn-in period in our elevated temperature facility.*

*Quality manufacturing is what reproduces reliability time after time. We don't, of course, feel that performance should be neglected either. The StepServer™2, using Intel Pentium®II processors, boasts a high capacity hard drive capability, RAID option, up to 1GB of memory, and a multitude of graphics, sound, and media options. All of which must pass our barrage of testing. With redundant power supplies, heat monitoring functions, and an array of cooling fans and devices, Everex is rapidly approaching the worry-free ideal of technological supremacy that is our goal. AND we are VERY competitively priced.*

*So if you are in charge of keeping an MIS department running, or just want the security of knowing you have the best, there's only one thing to say... "EVEREX."*

**GO AHEAD... TAKE THE WEEKEND OFF... IT'S O.K. YOUR SERVER WON'T MAKE WAVES.**

sages—something Messenger can't do.

My biggest beef about Messenger, though, is the way it handles multiple e-mail accounts. You have to use something called the Profile Manager to set up each one separately. To check your e-mail, you must log in, get your mail from one account, close Messenger, then log back in under another account "profile," ad nauseam. Outlook Express, by contrast, checks all your accounts in one fell swoop.

Messenger's sole e-mail-checking advantage is its handy Mail Notifier applet, which keeps an eye on your e-mail (again, for only one account) when the program isn't running. When new mail has arrived, a red flag pops up in the System Tray to remind you to open your in-box.

Are you a newsgroup fanatic? A version ago, both IE and Communicator added newsgroup-reading abilities to their e-mail programs, so now you don't have to use a separate application to post or read Usenet messages. In this realm, neither Messenger nor Outlook Express has any unique advantage over the other.

## Customize This!

**ADVANTAGE: NEITHER** Communicator and Internet Explorer are "totally customizable," claim both Netscape and Microsoft. That's totally one big piece of hype.

Sure, you can choose the suites' default colors and fonts—big deal. What if you want to do something a little more creative, like change the toolbars? If you're expecting something along the lines of the truly totally customizable Microsoft Office 97 suite, forget it. With Office, you can drag buttons on or off the toolbars, change and even create images on these buttons, and create additional toolbars if you like. The closest you get to that in Internet Explorer is the Links bar (a collection of editable shortcuts) and the Quick Launch bar (available only if you've installed IE's True Web Integration feature). If you right-click any icon on either of these toolbars, you can rename, delete, and move it around at will.

Netscape promised right-click configuration menus for Communicator's Personal Toolbar (the counterpart to Internet

Explorer's Links bar), but you won't find them in this version. Limited to a few canned Netscape icons, the Personal Toolbar is even less configurable than IE's bars, and you'll have to go several levels deep into the Bookmarks menu to find your options.

To reposition any of the toolbars in either product, you need only one thing: luck. All you can do with Communicator's toolbars is minimize them. IE lets you move toolbars around, but just try to undo what you've done. Ready for a fun game of digital Rubik's Cube? You can shuffle IE's toolbars up and down, right and left, and still never get quite the combination and alignment you want.

## Crossing the Channels

**ADVANTAGE: BOTH** In my opinion, channels are bandwidth-hogging glorified spams. Which is why I subscribe to only 47 channels in Internet Explorer and 65 in Communicator's Netcaster component.

Okay, so channels have their place. And these two browsers give you access to more channels than an 8-foot satellite dish. Besides the channels that come bundled—everything from ABC News to CNN and Disney—you can add any ►

## Browser Features: How They Stack Up

When you compare the two suites, Internet Explorer surpasses Communicator in key areas.

FEATURES	Communicator 4.03	Internet Explorer 4.0
<b>Navigation/browser</b>		
AutoComplete	very good	excellent
History	very good	very good
Bookmarks (Communicator)/Favorites (IE)	very good	excellent
Configurable toolbars <sup>1</sup>	good	excellent
Customization	satisfactory	good
Support for Java and JavaScript	very good	very good
Support for ActiveX	none	very good
<b>OS integration</b>		
Consistent interface between OS and browser	none	very good
File management	none	very good
Availability of channels on desktop	very good	very good
<b>E-mail and news features</b>		
Signatures	satisfactory	very good
Multiple accounts	satisfactory	excellent
Filters	excellent	excellent
Rules (autoreplies)	none	very good
Integration of newsreader into in-box	excellent	excellent
<b>Security features</b>		
Ease of disabling Java, JavaScript, and cookies	very good	very good
<b>Channels</b>		
Ease of subscribing	very good	very good
Ease of unsubscribing	good	poor
Display options <sup>2</sup>	good	very good
Number of channels included at installation	20	32
<b>Minimum system requirements</b>		
Size of installed suite on hard drive	18MB	64MB
Minimum RAM required	16MB	16MB

Both browser suites provide encryption and support POP3/SMTP, HTML-based rich text, Secure Sockets Layer, and signed and certified applets and/or controls.

<sup>1</sup>Personal Toolbar in Communicator, Quick Launch bar in IE.

<sup>2</sup>Channels may appear on the desktop, within the browser, or as screen savers.

*Xerox Network Laser Printers. A different line of thinking.*

THE DOCUMENT COMPANY

**XEROX**

Circle 257 on reader service card

Web site that provides channel programming for your browser. Hundreds of sites provide content for channels (just look for the Netscape Netcaster or Internet Explorer Active Channels button on the site), so there's no shortage of choices.

Subscribing is easy: Just click a featured channel, then click *Subscribe* in Netcaster or click *Add Active Channel* in Active Channels, and you're there.

Netcaster features the channels you've subscribed to in a bar called My Channels. To unsubscribe to a channel, just right-click on the appropriate item in the My Channels menu. You can also click the *Options* button located at the bottom of the bar. When I tried it, a dialog box featuring all of my subscribed channels popped up, allowing me to remove the ones I wanted.

But alas, Internet Explorer's Active Channels bar wasn't as accommodating. First of all, I couldn't even find a list of channels I'd subscribed to. I went back to the Microsoft Channel Guide, thinking that any of my subscribed channels would surely be marked "already subscribed" or some such wording. I remembered that I subscribed to CNN, so I checked it first. No such luck—there was no indication that I'd subscribed.

Could I unsubscribe from the Microsoft Channel Guide? I right-clicked one of the channels, and hurrah: There was a pop-up menu with lots of options, including *Update Now*—but no *Unsubscribe*. It took two calls to technical support to figure it all out. The only place you can find a list of your channel subscriptions is in the Windows\Subscriptions directory. You can go there in Windows Explorer, or you can choose *Manage Subscriptions* (which is located under the Favorites menu, of all places).

How do you unsubscribe from Internet Explorer? You can either delete channels manually in the Subscriptions directory—my preference—or select the *Subscriptions* tab in the Properties dialog box and click on *Unsubscribe*.

Now wasn't that easy?

## Browser Backlash

WE ASKED 2000 PC WORLD Online subscribers which of the two browsers they prefer. Many picked Netscape Navigator—often an old version. Some people don't like how IE's True Web Integration dominates their desktop. Others just don't like Microsoft.

Here's a sampling from both sides of the browser-wars fence:

### Microsoft Internet Explorer 4.0

"I have both on my computer, but I find that Internet Explorer's interface more closely matches the other Microsoft programs I use, like Office 97. It makes more sense to me, and I work better in it, but 'channels' don't make any sense at all."

ROBERT HOCKENBERGER, IT TRAINER

"A lot of people have had trouble with IE 4.0, but I'm not one of them. The installation, usability, and navigation have been flawless! I also like the Channels buttons; Communicator fares poorly when you compare the two push clients side by side."

CLYDE E. NEDD, CIS STUDENT

"I switched to IE 4.0 because of its True Web Integration, but I would use Netscape's product if they could do what Microsoft has done. Netscape may have lost the race this time."

ROBERT PURDY, IT MANAGER

"I just hated Internet Explorer 4.0. It totally took over my desktop, and when I uninstalled it, it left files that I still can't delete. I've been having problems ever since. I'll continue to use Netscape Communicator."

MARGARET GRIFFITHS, TAX PREPARER

### Netscape Communicator 4.03

"I switched back to Navigator 3.03 because it is small, fast, and does everything I want it to. IE 4.0 hogs as much hard drive space as you can spare—or don't want to spare. I can set the cache without a problem in Navigator. Internet Explorer hogged everything on my hard drive except what Windows 95 hogged for its cache. Microsoft can eat my shorts."

COREY AASEN, VALUE-ADDED RESELLER

"Netscape's new Bookmarks layout is a major improvement. I like the look and feel of Communicator better, and I don't get the feeling that it's trying to take over the rest of my desktop. Netscape should alphabetize the Bookmarks automatically, or at least give you the option to do it."

DAVID ADAMISIN, SOFTWARE DEVELOPER

"Until the IE enhancements are integrated into Windows 98, I'm staying with Netscape Navigator Gold 3.03. It's small and does the job right. The others take up a lot

of hard drive space, and I never use half the programs I had to download."

GARY MEYER,  
NETWORK SPECIALIST

"IE 4.0 implements the latest HTML more cleanly, and Java applets run faster. It's hard to resist a better product."

KARSTEN SCHULZ, GRAPHIC DESIGNER

# Power up with a 300MHz Pentium® II processor workstation and exceed the speed limit.

- Ultra DMA supported

# The World's Most Powerful Digital Video Adapters for Camcorders

or Other Video Sources

## Record, Edit & Transmit Full Screen Video, CD Audio & Snapshots!

LA Vision has developed two extraordinary products, *Dazzle* (an external plug-in adapter—that does not require you to open your PC) and *Snazzi* (an internal 1/2 slot PCI add-in card for the power user). These adapters capture high quality audio & video footage by converting analog signals into clean digital 1's and 0's (just like the new digital camcorders but at a fraction of the cost) so that your computer can manipulate video like text. We use the latest MPEG technology adopted by biggies such as Microsoft, Sony, & IBM (it's also used in the latest DVD players). This technology compresses video by 200 times, making video recordings & full screen playback practical—10 mins. on a 100MB ZIP disk (72 mins. on CD) or 1 1/4 hrs. of CD audio on a ZIP (8 hrs. on CD). What's more, MPEG-1 video can be played back on any Windows 95 PC without special hardware—unlike video recordings from MJPEG products such as Miro or Iomega's Buz.

## Incredible Software Bundle!

Our free software alone is worth buying our adapters: Kai's Power Goo (create outlandish caricatures & cartoons), Gryphon Morph (morph your friend), Adobe PhotoDeluxe V2.0 (enhance/edit images), Ulead Media Studio 2.5 (nonlinear professional editor), Cinax Video Editor (linear home editor), InterActual VideoSaver (create video screen savers, includes Star Trek & other video clips), Video Control (send photo or video e-mail), VDO Phone (Video conferencing), CeQuadrat WINONCD 3.0 (create video & DVD CD's), Astound Studio M (create multimedia presentations).

## Dazzle - \$299

- External Adapter (Printer Port)
- NTSC PAL, SECAM, Compatible
- MPEG-1 Realtime Hardware Encoder
- High Res. (1600x1200) Snapshots
- Full Screen Video, Color Preview
- 5 Button Amigo Software Control Panel
- Video Editing, S & Composite Video
- Pass Thru Connector for Printer
- 8 Software Applications

## Snazzi - \$399

- Internal PCI Add-in Card
- NTSC PAL, SECAM, Compatible
- MPEG-1 Realtime Hardware Encoder
- High Res. (1600x1200) Snapshots
- Full Screen Video, Color Preview
- 5 Button Amigo Software Control Panel
- S & Composite Video In/Out
- Video Out (to TV, VCR, Camcorder)
- Professional & Home Video Editor
- CD Audio Synchronization
- 10 Software Applications

*Amigo, our easy to use 5 button software control panel*

*With a single click the side panel opens for easy control of various set-up and control options.*

# Security and Privacy

**ADVANTAGE: BOTH** While neither browser is 100 percent safe, both provide plenty of options for protecting yourself against the dangers of the Web.

The most popular pastime among academics these days seems to be "Find the browser security hole." Both Netscape and Microsoft are regularly humiliated by front-page news about vulnerabilities in their products, ranging from "features" that let people steal passwords to vicious Java applets and ActiveX controls that can wipe your hard disk clean. Some of this "news" is nothing more than rumors spread by people who, not coincidentally, have developed utilities for plugging the holes. Other announcements have merit. In each case, both companies have reacted swiftly by posting patches on their sites that address the weakness.

Are the current IE and Communicator versions safe? It's doubtful they're 100 percent airtight, and I'm sure more holes will be discovered in the future. But should you worry? I'd say no, because both companies are committed to fixing the problems. You can take steps, however, to minimize the danger of security breaches. Disable Java and JavaScript in either browser, and disable ActiveX in IE. Doing so will affect nothing but the most high-end features of a particular Web site, and you can switch them back on. Both packages also offer encryption within their e-mail clients, and both let you choose to accept or decline cookies automatically or on a case-by-case basis.

Both products also support "signed" downloads—applets that have been certified by third parties such as VeriSign. When you download an applet whose source is unknown or whose certification has expired, you're warned and asked whether you want to proceed anyway.

Both products could do a better job of making their security options easier to figure out. IE, for instance, offers an extra level of safety called Security Zones. This menu-based feature lets you specify that some sites—for example, your corporate

intranet—are safer than others, so all applets from those sites are deemed welcome. The three default zone definitions are Low, Medium, and High. The browser accepts all downloads from Low security zones, warns you before accepting them in Medium (or Internet) zones, and rejects them all in High security zones. You can customize zones with any combination of security options you want.

Nice idea, but it's too much of a hassle. I doubt that anybody will use it, with the possible exception of corporate IS departments. I played with Security Zones a bit when I first installed IE, but then I set all sites to High (except PC World Online, of course). Every once in a while I get a warning that I can't proceed browsing a certain page, because certain applets or controls haven't run; I just override the settings.

## Who Will Win

IF YOU VISIT WEB SITES only occasionally, rarely if ever send e-mail, and don't care about channels, then you probably won't see much difference between the browsers. For basic Web surfing, either suite will work fine. But if you need a good Internet e-mail program or are ready for a nifty new way to manage your desktop, go with IE 4.0—after Microsoft fixes it.

Both products are still very unstable. Communicator, whose first version was released a full four months before IE, still crashes too often. Some readers report that IE 4.0's most striking feature—True Web Integration—crashed their systems so severely that they had to reinstall Windows 95. That never happened to me. Both programs bogged down my machine and caused minor problems, but nothing on the scale of some users' experiences.

So even with its bugs, I find IE's integration with Windows 95—along with its e-mail functions and its ability to browse Web sites offline—irresistible. And once the bugs are gone? In this latest browser battle, Internet Explorer 4.0 stands a very good chance of coming out on top.

For an expanded version of this article, visit [www.pcworld.com/dec97/browsers](http://www.pcworld.com/dec97/browsers). Yael Li-Ron is executive editor, features, for PC World Online.

## Web Browser Wish List

**NO PRODUCT IS PERFECT.** What would I change in Microsoft's Internet Explorer and Netscape's Communicator if I could? These are a few of my least favorite things:

### Microsoft Internet Explorer 4.0

\* **Rewriting History.** Trying to find a specific URL in IE's chronological History menus is a pain. I'd love to be able to search for character strings.

\* **What's with the blue spheres?** At first glance, the four Quick Launch Icons look round, bluish, and abstract. How about letting us customize them?

\* **I want my FTP!** True Web Integration won't be complete until Microsoft adds drag-and-drop FTP capability between Internet sites and the desktop.

### Netscape Communicator 4.03

\* **E-mail blues.** Netscape needs to get with the times and simplify Messenger's process of checking multiple e-mail accounts.

\* **Remember me?** Communicator does not remember your passwords from one browsing session to the next. You'll be asked to type in your user ID and password each time you go to a password-protected site. IE types it in for you and asks you to confirm by clicking OK, which is a little better.

\* **Bookmarks growing on trees.** Managing Bookmarks is a frustrating feat. You have to rely on a hierarchical menu and dialog boxes that are awkward and inconsistent with the rest of the Communicator suite.

Sept. '97

### Take a closer look at a great new look.

When we set out to design new cases for our computers, we kept our customers in mind. Not only are we sporting an exciting new look, these cases were engineered to be functional and easy to use.

### Get it all from the dedicated people of Micron.

And what about the faces behind the cases? Micron is proud of our many employees who bring even more to our product lines. Our dedication hasn't gone unnoticed. The Gartner Group gave us a Tier 1/Tier 2 consolidated rating for our quality, performance and support, among other things. And *Home PC* magazine ranked us number one in reliability and technical support. We've earned it — it's time you take a look at Micron and the faces behind these great products!

TransPort  
Xtreme 166  
Aug. '97

Configured For Your Life™

# You Want Fast, Award

*... we give you the Micron™ TransPort™ XKE!*

*When you need more portable power, the Micron TransPort product team charges ahead with (clockwise from bottom left): Julia, Drew, Bill, Jeff, Jeff, Andrew and Kim.*

# -Winning Portables

## The speediest portable line-up.

Imagine one of the world's fastest portable computers just got faster. That's what happened when Micron took the award-winning TransPort XKE 166MHz portable and gave it a big boost with Intel's 200MHz or 233MHz Pentium® processor. Now the XKE 166 has topped itself. And you'll notice the difference.

## The first speech recognition portables!

Micron is the only place you'll find portables standard with a voice recognition system — included on all TransPort XKE models. Now you can create documents and look up words by talking to your computer. Just speak naturally and watch as sentences appear on your screen. And you can upgrade our TransPort V1X model to include voice recognition.

## Incomparable features and performance.

You'll be in awe of the brilliant image on the TransPort's active-matrix screen display, enhanced by a high-performance graphics accelerator. Other great features include a swappable floppy drive and CD-ROM drive. You also have a choice of the Microsoft® Windows® 95 or Windows NT® Workstation operating system pre-installed.

Our TransPort team has a notebook for everyone. Call today and ask about our XKE model or the value-packed TransPort V1X starting at just \$2,249.

*Call now to order.*

Configured For Your Life™

# You Need A Feature-

*... and the Micron™ Millennia® brings it all home.*

# Packed Performer

## Introducing new and exciting features.

The Micron Millennium desktops tout the industry's highest awards for screaming performance and feature-packed configurations, making them the envy of our competitors.

Choose the Millennium XkU and you'll get an Intel Pentium® II processor with MMX™ technology. Not to mention an AGP-powered graphics for top-notch 3D performance, along with MPEG and 24X EIDE CD-ROM drive.

## Your choice of incredible software packs!

Now when you buy a Micron Millennium, you can pick one of four software packs to be included with your system. Choose from the Quicken Financial Pak, the EdVenture Pak, Arcade Pak, or the Home Productivity Pak. Pay only \$69 for each additional pack you choose.

## Included Zip drives.

The entire Millennium family comes standard with a 100MB Iomega Zip drive — giving you virtually unlimited storage! And you can easily transport files from home to work, saving and using multimedia files and applications. A Zip drive also gives you a built-in backup system for your computer.

## Giving it a boost with Fusion 3D™.

Upgrade your Millennium system with Fusion 3D and you'll get a DVD drive, incredible 3D graphics, AWE 64 ISA sound card, a two-speaker satellite with a subwoofer, an exciting game bundle and a Microsoft® SideWinder joystick. You won't believe how your games and multimedia applications spring to life like never before!

*How did the Millennium get so good? With the help of Micron's Consumer Products team left to right: Bob, Jon, Lori, Jeff, Tina, Christy, Rich, and Casey.*

Configured For Your Life™

# You Ask For Serious

*... we introduce Micron™ NetFRAME® servers  
and the ClientPro® MRE!*

# Business Solutions

*Our Server and ClientPro Product groups mean big business. They are (clockwise from bottom): Amber, Jody, Tracey, Rex, Rob, Amanda and Todd.*

## The new Micron NetFRAME servers.

With the introduction of Micron NetFRAME servers, you'll get the latest server technology, custom-built for thousands less than you'd expect.

## Building on a solid reputation.

NetFRAME Systems has designed enterprise-class servers since 1987, delivering an unprecedented ability for businesses to use their networks for maximum advantages. So when Micron acquired the company this year, we were ready to build on NetFRAME's reputation and proven experience.

The Micron NetFRAME MV5000 server gives you enterprise-level features at a mid-range price point, and you'll get the security and high availability of fault-tolerant components including hot-swappable and redundant hard drives and power supplies. Our Micron NetFRAME LV2000 server delivers integration and stability at a low price. And our Micron NetFRAME 9008 and 9016 series offer excellence in enterprise servers.

## ClientPro — there to take the challenge.

Micron's dependable ClientPro systems are network-ready and can handle all your business computing tasks. ClientPro systems are built on a stable platform, and with Intel Pentium or Pentium II processors, they pack the power to run the latest technologies — so you'll have a reliable business PC that reduces the risk of downtime and lowers your total cost of ownership. The new ClientPro MRE includes all the latest management tools like DMI 2.0, LANdesk 3.1 and Wake On LAN adapters for enhanced remote management, and chassis intrusion alert for security protection.

Micron's server and client product teams always bring you complete networking solutions. And you'll get Micron's award-winning customer service, 24-hour technical support, and a limited warranty that's hard to beat.

Configured For Your Life™

# You Want A Workstation To Beat All Others

*... we present the Powerdigm™ XSU with Micron-engineered technology!*

*Making it  
the workstation to beat  
are Powerdigm team members,  
left to right, Stephanie, Terry  
and John.*

## Micron innovation at its best.

Revolutionizing workstation performance, Micron introduces our exclusive Samurai™ chip set on the Powerdigm XSU workstation. A powerful, Intel processor-based workstation, the Powerdigm XSU will execute your most demanding business and technical tasks — and it's flexible enough to run the most popular PC programs.

Engineered and developed by Micron, the Samurai chip set is the first to offer a 64-bit PCI bus, in a system based on the Intel architecture. The Samurai chip set enables greater bandwidth for engineers, graphic designers and technical professionals who demand maximum throughput from their workstations and integrated peripherals.

Micron's workstation team makes sure your needs are covered. So the Powerdigm workstation supports dual monitors, dual Pentium II processors, multiple ultra-wide SCSI-3 hard drives and 10/100 network adapters. The Fire GL video cards offers no-compromise 3D performance and Jaz drives are standard on both the XSU and XLI Powerdigm models.

It's also hard to beat the industry-leading Micron Power limited warranty and our award-winning customer service and support. Call today and find out more about the Powerdigm XSU and XLI workstations.

## NetFRAME® LV2000

Intel 233MHz Pentium II processor  
ECC Level 2 cache on processor  
32MB ECC SDRAM  
2GB Ultra-Wide SCSI-3 hard drive  
Microsoft® Windows NT® Server 4.0 (10-user license)  
Intel LANDesk® Server Manager 2.8  
NOS Support (3 incident resolutions/1st year), 7x24

### STANDARD FEATURES

Single or dual Intel Pentium® II processors  
512KB integrated cache in SEC package  
ECC SDRAM option (4 DIMM slots)  
5 expansion slots: 4 PCI, 1 ISA  
Integrated Adaptec PCI Ultra Wide SCSI-3 controller  
Integrated Intel EtherExpress™ Pro 100 controller  
12X SCSI-2 CD-ROM drive  
10 drive bays: 4 external 5.25"/1 external 3.5"  
2 internal 5.25"/3 internal 3.5"  
Dedicated server technical support, 7x24  
5-year/3-year Micron Power<sup>SM</sup> limited warranty  
1-year next-business-day on-site service\*\*\*

**\$3,499**

Bus. Lease \$119/mo.

## NetFRAME MV5000

Intel 300MHz Pentium II processor  
ECC Level 2 cache on processor  
64MB ECC SDRAM  
4GB Ultra-Wide SCSI-3 hard drive  
Microsoft Windows NT Server 4.0 (10-user license)  
NOS Support (3 incident resolutions/1st year), 7x24

### STANDARD FEATURES

Single or dual Intel Pentium II processors  
512KB integrated cache in SEC package  
Memory: ECC EDO or ECC SDRAM option  
9 expansion slots: 6 PCI, 2 ISA, 1 shared ISA/PCI  
Dual integrated Symbios Ultra-Wide SCSI-3 controller  
Integrated Symbios Narrow SCSI controllers  
Embedded RAID Upgrade option  
120 ready via embedded Intel i960-RD  
5 Internal, hot-pluggable, hard drive array bays (Upgradable to 10)  
1 (one) 360 watt hot-pluggable power supply standard  
(Upgradable to 3 for added redundancy)  
Rack Adapter Option  
Intel LANDesk Server Manager 2.8  
Dedicated server technical support, 7x24  
5-year/3-year Micron Power limited warranty  
1-year next-business-day on-site service\*\*\*

**\$6,199**

Bus. Lease \$195/mo.

## ClientPro® VXE

Intel 166MHz Pentium processor with MMX™ technology  
32MB EDO RAM, support for SDRAM  
1.2GB SMART EIDE hard drive  
15" Micron 500Lx, .28dp (13.7" display)

512KB pipeline burst cache, flash BIOS, DMI 2.0  
3Com 3C509 ISA Ethernet T-P NIC  
16X EIDE variable speed CD-ROM drive  
S3 ViRGE graphics accelerator, 2MB EDO RAM

Configured For Your Life™

**Fasten your seat belts.** Intel's new graphics bus may promise faster performance and realistic 3D, but our tests of the first AGP graphics cards reveal that the trip could be anything but smooth.

# a bumpy ride

## AGP GRAPHICS

FIRST IT WAS 56K modems, then it was DVD, and now it's Intel's Accelerated Graphics Port. The list of half-finished new technologies being inflicted on computer buyers seems to be at an all-time high. Nearly four years after PCI became the bus of choice in desktop PCs, Intel introduced a new, graphics-only bus that's touted as making quick work of even the most demanding 3D, video, and 2D graphics. The AGP bus—along with a new, dedicated card slot—moves PC graphics off the busy PCI bus and gives the graphics ►

**By David English and Michael Desmond**

ILLUSTRATION BY NICK FAIN

data its own fast lane to the processor. There's just one problem: The new bus may do a better job of confusing buyers than it does of speeding up 2D and 3D graphics operations.

Why did Intel go to the trouble of crafting a new connection? In a word, 3D. AGP can provide a significant benefit to 3D games, titles, and applications that have been designed to exploit its features, letting them deliver greater realism by providing access to fuller scene graphics. The new bus also promises to shortcut increasing demands on the existing PCI bus, now that everything from network adapters to sound boards are beginning to share bandwidth with graphics cards.

### NOT FOR EVERY PC

BUT DON'T RUSH OUT and buy an AGP graphics card just yet. To take advantage of the new technology, your system must be equipped with an AGP bus slot—something that began appearing in Pentium II systems sold only since September—or it must have AGP graphics integrated on the motherboard. The secret ingredients: Intel's new 440LX chip set and Microsoft's Windows 95 OEM Service Release 2.1. The 440LX not only adds AGP, it also introduces fast SDRAM memory to Pentium II PCs, providing a boost over the EDO DRAM found in 440FX-based Pentium II systems. All new Pentium II PCs shipped with Windows 95 should have the OSR 2.1 version of the operating system. Be sure to check that OSR 2.1 also came with the USB supplement, which includes a 32-bit device driver that adds AGP support to the operating system (not all Pentium IIs include the supplement).

Because the hardware requirements severely limit the number of PCs that can be upgraded to AGP, graphics board vendors have little incentive to ship retail AGP cards immediately. So you can expect to wait another four to six months before finding a wide selection in stores.

To see if this new graphics bus could really deliver faster performance and more realistic 3D graphics, we tested five of the first shipping AGP boards. Our findings: Although AGP cards can improve the visual detail of software that's optimized for it, we saw little, if any, impact on today's popular software. Graphics-intensive 2D applications like PowerPoint, as well as demanding video-playback operations, do not get a noticeable performance boost on the new bus,

## AGP à la Carte

NOT ALL CARDS take advantage of AGP's features like AGP texturing and pipelining. That leads to big differences in the quality of game scenes when running AGP-optimized software. Here are four features to look for.

**Feature 1** AGP 2X mode: The 2X mode can move data at 528MBps—twice as fast as the

original 264MBps 1X mode—by performing two operations for each tick of the AGP bus.

**How AGP works** AGP promotes your graphics card in the PC's data food chain. It creates a new connection between the graphics card and system memory,

so graphics data no longer travels on the busy PCI bus. The 66-MHz bus—twice the speed of the PCI's—provides fast access to RAM for displaying realistic 3D graphics.

and even AGP-enhanced games run at about the same speed.

More important, we found that not all AGP graphics cards provide the same features. It turns out that some boards lack the key texturing feature that lets AGP improve the performance and visual detail of AGP-enhanced 3D software. The reason: Intel's definition of AGP does not require board vendors to support most of its features.

Right now, AGP-enhanced software is as scarce as cheap housing in San Francisco. Hopefully, by the second half of 1998 heavy-duty graphics users will find lots of games and a few 3D design applications—including Caligari's TrueSpace and Virtus's

### RECOMMENDED

NOT ALL AGP boards are created equal, as we found out in our tests with AGP-optimized software. Though all five boards performed ably in a variety of 2D, video, and non-AGP-optimized 3D tasks, we found that two boards could not display AGP-enhanced scenes in our Psygnosis G-Police game tests.

The best of the bunch is the ATI Xpert@Work, the only AGP 2X board in our roundup. It excelled in our PC WorldBench tests and provided consistently high frame rates running G-Police. The Diamond Viper also performed very well but was not as fast as the ATI in our PC WorldBench test.

Frankly, we were surprised to find key AGP features missing from some of the boards

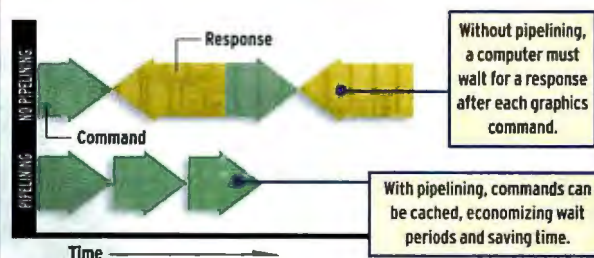

we reviewed, so the burden clearly falls on the buyer to make sure the expected features are present in a product. If you want AGP for its 3D potential, for example, ask specifically about AGP texturing support in the graphics card. You may even want to wait until mid-1998, when the first truly AGP-optimized graphics chip sets are expected to roll out.

**Feature 2** **Sideband addressing:** Cards with this feature provide a separate path for sending and receiving command data, freeing up the data path to achieve top throughput.

**Feature 3** **Pipelining:** Get a card with pipelining. It reduces downtime by letting the graphics card issue many commands without the AGP card first waiting for a response.

ConceptCAD—that take advantage of AGP's unique talents.

The five boards we tested all boast 3D-capable graphics chips and represent some of the latest graphics technology. We looked at OEM versions of the ATI Xpert@Work, Diamond Viper V330, Matrox Millennium II AGP, Number Nine Revolution 3D, and STB Velocity 128 AGP boards. To compare the performance of these AGP products, we also tested the PCI versions of the same cards. Because the AGP boards are currently available only as part of a new PC, we were unable to select a Best Buy but do recommend one board: the ATI Xpert@Work.

### IS AGP REALLY FASTER THAN PCI?

IF YOU WANT TO REPLACE your PCI graphics adapter with an AGP board just to speed up your everyday work, it won't happen—at least, not with the typical Windows business applications that are available today. We tested the five cards on an AGP-equipped Dell Dimension XPS D266 Pentium II computer. We put both the AGP and PCI boards through a battery of business- and multimedia-application tests, including 2D graphics, video playback, and 3D games. The result? Performance that was virtually indistinguishable between the PCI and the AGP versions of these products. For example, the PC WorldBench scores delivered by the AGP and PCI versions of four cards were within a single point of one another—an insignificant difference.

Our video test, which plays back a high-resolution MPEG-2 video clip, failed to show any speed advantage for AGP. The one

**Feature 4** **AGP texturing:** Also called Direct Memory Execute mode, AGP texturing provides much greater realism by letting AGP graphics cards use large amounts of your computer's system memory to build 3D graphics.

exception: The STB Velocity 128 AGP eked out 3 more frames per second than its PCI sibling, which was already pushing out a very nice 30 fps. Even our test of a non-AGP version of the Psygnosis game G-Police showed no difference for most cards.

So what's going on here? Peter Glaskowsky, senior analyst at *Microprocessor Report*, says AGP has nothing to offer current non-AGP-enhanced 3D software. "The kinds of polygon counts [a measure of 3D quality] that we're dealing with today are within what PCI can generally transfer." In other words, there isn't a problem AGP needs to solve. Most graphics and video operations don't use up the ample bandwidth provided by today's PCI cards. The effect is similar to that of adding lanes to an underused freeway. The extra lanes won't get drivers to their destinations any faster, because they are already able to drive as fast as they please.

That said, some PCs may benefit from the new bus, Glaskowsky adds. The traffic created by PCI peripherals such as SCSI hard disk adapters and PCI audio cards can limit the bandwidth available to graphics on these systems.

Another reason for the parity of AGP and PCI is that vendors use the same graphics chip for both the PCI and the AGP versions of their cards. In fact, we saw much greater differences among product lines in our tests than we did between different bus versions of the same product.

## AGP 3D: IT'S NOT THE SPEED, IT'S THE LOOK

OKAY, SO AGP may not speed up your existing software. What about games and applications that use AGP-enhanced 3D graphics? In most cases, AGP lets you run heavily textured games with realistic 3D scenes that bring PCI to its knees.

To confirm this point, we tested the AGP and PCI versions of the same five cards using a synthetic benchmark called Final Reality, which was developed by VNU Labs based on a game engine from Remedy Entertainment. The test used 16MB of textures to create complex 3D scenes, large enough to force all our graphics cards to use the PC's main memory to store texture data. The result? The PCI board—and the AGP cards that do not support texturing—ground down to about 1 scene per second. The AGP cards that do support texturing had high scene rates, averaging more than 66 sps.

Running our AGP-enhanced version of G-Police, frame rates were nearly identical between the AGP and PCI boards. Like any

well-designed AGP game, G-Police automatically switches from heavy texturing for AGP boards to lighter texturing for PCI boards. So no change in speed—just a change in scene quality.

In fact, AGP promises to rid the world of ugly, oversimplified 3D scenes in PC software. Running the same game—one AGP enhanced, the other not—we saw some impressive improvements in visual detail. In hands-on tests using an AGP-enhanced version of G-Police, we noticed that explosions lost the distracting blockiness around the edges that we saw in the PCI version, and static billboards turned into flashy signs with full-motion video. Behind the improvement: the AGP bus's ability to feed 3D object data to the graphics card's processor several times faster than the PCI bus can.

Better scenes, however, do not always mean smooth game play. The STP Velocity board we tested had the fastest frame rates when running the AGP version of G-Police—except when it displayed heavily textured scenes. Each time one of these scenes launched on screen, there would be an annoying ►

## TEST REPORT

# AGP Has Little to Offer Today's Apps

BASED ON OUR EARLY TESTS, AGP is not going to speed up your current programs. When we ran PC WorldBench (which uses common business apps), an MPEG-2 video clip, and a non-AGP version of the 3D game Psygnosis G-Police, we found almost no speed differences between PCI and AGP cards. With

the exception of the ATI Xpert@Work (the only 2X AGP board we reviewed), our tests on an AGP version of G-Police produced the same results. But in heavily textured scenes, G-Police looked significantly better with the boards that support AGP texturing (ATI, Diamond, and STB).

<sup>1</sup>We ran PC WorldBench at three resolutions but report only 800 by 600, which showed the greatest differences. Higher scores are better. <sup>2</sup>Could not complete test.

**HOW WE TEST** All tests were performed under Windows 95 on a Dell Dimension XPS D266 Pentium II PC with 64MB of SDRAM. We ran PC WorldBench 1.0 at 800 by 600, 1024 by 768, and 1280 by 1024 resolutions. For our non-AGP multimedia tests, we used the Mediomatics MPEG-2 player software to run a 30MB MPEG-2 video screen saver from Interact Technologies called Star Trek: First Contact. We unsynched the audio so that the system would play as many frames per second as possible. Our 3D test was an automated scene in Psygnosis G-Police, which has a built-in frame counter to gauge frame rates. (For those applications that use DirectX, we used the version provided with the board.) The AGP-enhanced version of G-Police automatically switches from heavy texturing for AGP graphics boards to lighter texturing for PCI boards, so that the game will run with PCI at acceptable frame rates.

# Small business lives or dies by the numbers.

## Don't trust *your* numbers to anyone but Peachtree.

### Introducing Peachtree Complete Accounting Plus Time & Billing!

After more than 20 years experience producing accounting software, Peachtree is the most trusted name in the industry.

Just look at our track record. We produced the first accounting software for DOS, Windows<sup>®</sup>, Macintosh<sup>®</sup>; and gave you the first multiuser solution at no additional cost.

Now, we introduce the first full-featured, off-the-shelf multiuser accounting solution with the power and flexibility to manage your accounting, *plus* track and bill your time and expenses!

It has it all, in-depth Inventory, comprehensive Job Costing, and intelligent Business Management tools. Plus, with great new features like the flexibility of multiple billing rates, and the ability to track expenses as they occur, it overpowers anything else on the market today.

### Switch Now & Get \$100. **\$100 REBATE**

With a suggested street price of only \$249, and a \$100 rebate offer going on NOW for previous users of Peachtree<sup>®</sup>, Quicken<sup>®</sup>, Quickbooks<sup>®</sup>, Quickbooks Pro<sup>®</sup> or any other business accounting software, it's the best value around.

So take advantage of this unbelievable offer, and take control of your business today with Peachtree Complete Accounting Plus Time & Billing<sup>®</sup>.

Circle 175 on reader service card

delay while the game loaded the textures into the scene.

Surprisingly, two of the AGP boards we tested—the Number Nine Revolution 3D and the Matrox Millennium II AGP—fared just as poorly as the PCI boards, both visually with the AGP-enhanced G-Police test and in performance with the Final Reality benchmark test. Both boards displayed the same light texturing the PCI boards did when running G-Police. The Millennium displayed just 1 sps in the Final Reality benchmark, while the Revolution 3D choked out 1.6 sps. In both cases, the scene rates were essentially unchanged from those of their PCI counterparts.

We discovered that both the Revolution 3D and the Millennium II boards lack support for AGP texturing, which the other three cards possess. So while these two boards are running on a 66-MHz bus, they perform like PCI graphics cards on a 33-MHz bus. When our benchmark test called on the cards to pull texture data directly from system memory, the data first had to be copied to the graphics frame buffer in a time-consuming two-stage operation.

Both Matrox and Number Nine point out that their AGP graphics cards are designed for a business audience using 2D applications, not those interested in heavy-duty game play and 3D ani-

**BOTH STB's Velocity and Diamond's Viper have AGP texturing.**

mation. But the bigger question is, How can cards that legitimately claim to be AGP compliant lack its most critical feature?

Ask Intel. Explains Jim Nucci, Intel AGP marketing manager: "Any graphics card that plugs into the AGP connector is considered AGP whether it's the 1X mode, 2X mode, still using the PCI protocol, or having the high-performance features designed in. From

### TEXTURES AND TROUBLE

Intel's perspective, it's all AGP." In other words, when Intel developed AGP, it did not make AGP texturing a requirement for AGP graphics cards.

IT TURNS OUT that four different AGP features can be left out of a card, and it can still be called "compliant." The most visible feature is the AGP 1X versus AGP 2X specification. Where 1X runs at 66 MHz and provides 264 megabytes per second of band-

## Proceed With Caution

WHEN IT COMES to buying PC hardware and software, conventional wisdom says never to buy version 1 of anything. Of course, we never follow that advice. Here are some tips on how to protect yourself if you are buying a new AGP graphics card.

**Making the right choice.** First, make sure you know what you are buying. If a system or graphics-board vendor says it provides AGP graphics for enhanced 3D perfor-

mance, don't assume that the graphics card actually supports the most important new features, like AGP texturing and sideband addressing. If you want to take advantage of AGP's advanced 3D-handling capabilities, AGP texturing is by far the most important feature. But be careful: Not all system and board companies use the same terminology to discuss the texturing features of their products. You can look for a few key phrases, however. If a board vendor says that it supports AGP texturing, Direct Memory Execution, or execute mode, you can feel relatively assured that the product will be able to enhance AGP-optimized games and software.

If you want to get the most performance out of your AGP hardware, make sure the board you buy supports AGP's data streamlining tweaks. Look for mentions of sideband addressing and pipelining—both features can really help speed texture data between system memory and your graphics board. Also, look for an AGP board that supports 2X mode. Our tests on an AGP version of Psyg-

nosis G-Police showed a slight performance advantage for the one AGP 2X board we evaluated—ATI Xpert@Work. The 2X's faster data rate could provide an advantage down the road, when games provide 32MB or more of texture data for scenes.

**AGP PCs.** When buying an AGP-capable desktop system, avoid products that put the AGP graphics chip directly on the motherboard. Some of these systems may not be able to accept future upgrades to AGP cards with improved graphics chip sets. How will you know? Before you purchase a system, ask the sales representative if AGP graphics is provided as an add-in card or in the motherboard, and then get the model names of the board and chip used in the graphics subsystem.

Keep in mind that AGP is a new and confusing technology, and that sales representatives may not be able to provide all the answers you need. If you get precise information about the graphics hardware, you can double-check with the graphics hardware company itself.

Netfinity<sup>7000</sup>

It's time for a new relationship.

Because the way you use a network has changed. Today, the server is your network. It's a partner. And its capabilities are your potential. It's the promise of infinite possibilities in every area of your business, from application serving for productivity gains to integrating the power of the Internet with your enterprise.

Introducing IBM Netfinity. A new breed of server designed to reinvent the role of industry-standard servers. It's smarter inside and out. So it gives you the confidence to run business-critical applications on Windows NT<sup>®</sup> or any other major network operating system. The power and scalability of the Netfinity

7000 are unsurpassed. And it's more than up to the task of running your most demanding enterprise-level applications: IBM DB2<sup>®</sup>, Microsoft<sup>®</sup> SQL Server<sup>™</sup>, SAP<sup>™</sup> R/3<sup>®</sup> and Lotus<sup>®</sup> Domino<sup>™</sup>. In addition, Netfinity provides a single point of control for your network that is integrated with comprehensive management tools. Allowing you to manage your network proactively. Netfinity 7000 also comes with technology-based services, including Remote Connect, MoSTConnect and Update Connector. All to help maximize availability. Which means you'll be able to spend more time on business, and less time managing technology.

To find out more, visit the Netfinity Web site at [www.us.pc.ibm.com/netfinity](http://www.us.pc.ibm.com/netfinity). Or call 1 800 IBM-7255, ext. 4965. It's just the kind of connection you've been looking for. Because it's **just better business.**

Up to 4-way 200 MHz/

Circle 111 on reader service card

“Most users are potentially going to be disappointed by what they get out of first-generation **cards, motherboards,** and software.

**PETER GLASKOWSKY** senior analyst, *Microprocessor Report*

width, 2X cards are able to double that bandwidth, providing a data path that carries 528MBps. The 2X cards can push more data over the 66-MHz connection by executing two operations for each tick of the AGP clock.

It sounds good, and it may be in the future. Our tests with the AGP-enhanced version of G-Police showed only a small increase in frame rates. The ATI Xpert@Work was the lone AGP 2X board in our group. Unlike results for the four 1X boards, G-Police ran slightly faster on the AGP board than it did on PCI. All of the 1X boards showed little or no change in frame rates between AGP and PCI.

A more important feature, at least for AGP-enhanced 3D games and software, is AGP *texturing*, also called Direct Memory Execute mode by Intel. This is the feature that lets AGP graphics cards pull 3D texture data straight from system RAM, allowing 3D scenes in future games to incorporate megabytes of data to achieve enhanced realism. As mentioned above, two of the five AGP cards lacked this critical feature and, when running the AGP-enhanced version of G-Police, showed the same lightly textured scenes as the PCI boards.

Two other features round out the AGP shell game. *Sideband addressing* speeds up AGP data transfers by taking the address and command instructions off the data pipe and sending them instead along a sideband to the system chip set. This data frontage road on the AGP freeway makes additional AGP bandwidth available for moving graphics data.

Likewise, *pipelining* squeezes more efficiency out of AGP command traffic. Normally, the graphics card issues a command and then waits until it receives an answer before issuing the next command—in effect, the board spends a lot of time waiting at red lights. AGP's pipelining feature lets the board issue multiple commands in rapid succession without waiting for a response—

the lights are timed to let AGP commands run uninterrupted.

The challenge for buyers is that any one of these four features may or may not be present in the AGP graphics card they get with their systems. One graphics card may be 1X compliant and still offer AGP texturing, sideband addressing, and pipelining, while the 2X card in the system next to it may lack the other three features. And as far as Intel is concerned, it doesn't matter—all are considered AGP.

Why did Intel allow such a confusing variety of features? To ensure there would be products for the new bus slots. “They were worried that most vendors wouldn't be able to provide 2X graphics chips, and they were correct,” says Glaskowsky. “The pipelining, the sideband addressing—those are difficult things to do.”

There's more. Next year, Intel expects to release an AGP 4X mode, which will boost available bandwidth to 1 gigabyte per second or greater. While Intel won't discuss details, Glaskowsky says that the AGP 4X clock will run at 133 MHz, double the current rate, while the graphics cards will perform two operations for each clock tick. Don't count on upgrading your current AGP sys-

● Yes ○ No

tem with a 4X card, though—it probably won't be possible.

"Because the signal levels will be different, 4X will not work with anything you buy in the previous AGP implementations," says John Latta, an industry analyst with the *Wave Report*.

Unless you shop very carefully, you could end up with a graphics card that fails to provide a meaningful improvement over current PCI graphics, even when it is running AGP-optimized software. "Most users are potentially going to be disappointed by what they get out of first-generation cards, motherboards, and software," says Glaskowsky.

## SHOW ME THE SOFTWARE!

OF COURSE, AGP's new features aren't worth much without software that takes advantage of them. "There's one problem with AGP, and that is, where are the applications?" asks Amid Rahmat, senior analyst at PC graphics research firm Jon Peddie Associates. "At the end of the day, it is all based on where the applications are and where the operating system is."

Microsoft is scheduled to build AGP support directly into the Windows 98 operating system; however, that upgrade has been delayed until April or May. In the meantime, AGP graphics cards must have the 32-bit device driver installed before Windows 95 will recognize them. (As we mentioned earlier, you need to make sure the driver comes with the OSR 2.1 version of Windows 95.) Users will also have to install version 5 of Microsoft's DirectX—a suite of multimedia operating system components and device drivers—to enable AGP's 3D features.

Many graphics board vendors will struggle for a while with incorporating support for AGP in their products. "You have to bear in mind that the chip vendors have their own time lines," says Jon Peddie's Rahmat. "It's going to settle down, but it won't settle down until next year. It'll take the chip vendors and the board vendors another three to six months to start figuring out the chip issues and the driver issues."

On the software side, you can expect a lot of programs to add partial support for AGP texturing in the near future—or at least those features that are easy to implement, such as adding AGP texturing to individual objects rather than to entire scenes. Some game developers say that adding support for AGP texturing is not difficult, and many expect to provide downloadable patches on their Web sites that will add limited AGP support to some existing applications.

Still, like the Pentium MMX chip introduced in January 1997, AGP requires developers to add specific support in order to fully realize the performance advantage of the new technology. With software development cycles taking 6 to 12 months, it could be a year or more before a large number of AGP-enhanced titles show up on store shelves.

## AGP TEXTURING: THE SECRET SAUCE

IN ORDER TO DISPLAY a realistic 3D environment, programs apply graphics images, called *textures*, onto the surfaces of the polygons that make up 3D shapes. Done properly, these textures are stitched together to form ▶

ture-mapped 3D objects look realistic from different angles.

**3D filtering.** Also called bilinear or trilinear filtering, 3D filtering eliminates blockiness in 3D images and textures by averaging the color data among adjacent pixels.

**Fogging.** Fogging blends a 3D object with a fixed color so it appears to fade away as it moves further from the viewer.

**MIP mapping.** Another ubiquitous feature, MIP mapping, stores several sizes of a texture-mapped image to best fit the bit map onto objects as they vary in size. MIP maps avoid blockiness when zooming in on texture-mapped images, and reduce the annoying sparkle caused when the graphics chip stretches or condenses a texture-mapped image to fit an object.

**Alpha blending.** This feature combines two overlapping texture maps to create the illusion of transparency, such as when looking through water.

## 3D FEATURES

## 3D SPEAK

The 3D graphics market is buried in obscure jargon, much of which is used to describe critical display features found in 3D graphics chips. Some examples follow.

**Perspective correction.** All five boards support perspective correction, which makes tex-

"There's one problem with AGP, and that is, where are the **applications?**"

**AMID RAHMAT** senior analyst, Jon Peddie Associates

video card? Well, you could, but it would be expensive—particularly when you consider that the extra video memory would be used by only a small number of 3D applications.

For those graphics cards that support AGP texturing, game programmers can use system memory as if it were dedicated texture memory located directly on the card. Games get instant access to 8MB, 16MB, or even more texture memory, depending on the amount of available system RAM. The only drawback, say some developers, is that it takes longer for data to move from main memory to the graphics card than it does from the card's onboard RAM, so some AGP-enhanced software may run slower.

Nevertheless, game makers are hot on this new technology because of the potential for fancier scenes. Access Software, maker of the Pandora Directive game, is developing its upcoming *Tex Murphy: Overseer* title with AGP in mind. The game places live-action digital video inside 3D-rendered rooms. On an AGP system, Access says, frame rates could double over those of PCI systems, from about 10 fps to 20 fps.

The AGP-optimized version of *Tex Murphy: Overseer* uses as much as 16MB of textures at a time. When played on a system with a PCI card, the program uses its own software to process texture data from system memory, through the CPU, and ►

the illusion of real-world objects. The problem: Many megabytes of texture data are required to create great-looking scenes.

With most graphics cards packing 2MB, 4MB, or at most 8MB of graphics RAM, there is not much room for displaying texture data. On a 4MB PCI graphics card, for example, software developers can count on being able to use only about 2MB for texture data. And that figure goes down as your screen resolution goes up, since that 4MB on board is shared by both display graphics and stored 3D textures. So why not just put more memory on the

## The 100-MHz PC

SO YOU'VE DECIDED to buy a new AGP-equipped Pentium II system. Don't jump too soon. Come spring, Intel plans to significantly improve the performance of Pentium II PCs by speeding up the motherboard from the typical 66 MHz to 100 MHz. The 50 percent boost is the first speed increase for Intel-based PC motherboards since the introduction of the 60-MHz and 66-MHz Pentium CPU in 1993, when the motherboard bus was boosted from 33 MHz. Unlike AGP, which mainly improves performance of 3D operations, the faster motherboard will enhance performance across all applications. You can expect to see Intel match its upcoming Deschutes processor (the slimmed down, .25-micron version of Pentium II running at 333 MHz and beyond) with the faster motherboards.

**The payoff.** So what do you get with a 100-MHz bus? Quicker CPU access to main memory, which will benefit virtually every

application. Over the past several years, as Intel CPU speeds ramped up from the initial 60 MHz to a blistering 300 MHz, the rate at which data moved along the memory bus barely changed—it's still limited to a maximum of 66 MHz. To counteract the growing speed mismatch, vendors placed fast cache memory both inside and next to the CPU. The Pentium II, for instance, has 64K of superfast internal, primary cache, and another 512K of external, secondary cache that runs at half the processor's speed. But when the two levels of cache can't give the CPU the data it needs, it must call data from main memory along the 66-MHz bus.

**Worth the wait?** It may be, particularly if you use a lot of multimedia titles, DVD software, large database files—or any application in which the CPU must resort to quick cache memory. In fact, software-based playback of DVD video and audio really needs the faster access to work well, says Peter

Glaskowsky, senior analyst at *Microprocessor Report*. "If you want to put a DVD player in your PC, I wouldn't get a current machine," warns Glaskowsky. He also notes that the AGP bus, which must compete with the CPU for access to main memory, will get a boost with the new motherboards since data can be accessed from memory at a higher rate.

What comes after 100 MHz? Nathan Brookwood, processor analyst for the research firm Dataquest, says that 100 MHz may be the limit for motherboard bus speeds. At higher frequencies, electromagnetic interference becomes difficult to manage—the motherboard, in effect, starts to act like a transmitter.

"I think we'll probably see solutions that go more to intrachip connections—the 'system on a chip' that everyone is talking about," says Brookwood. "If you can get rid of most of the interconnections between chips by moving everything onto one big piece of silicon, you have solved a lot of problems." —M. D.

When we designed our  
**new high capacity drive, common sense dictated it  
should also work with standard diskettes.**

"Over 300 percent faster than  
the [competitor's] drive." 10/97

**The fact that we make the best selling brand of standard diskette  
had nothing to do with it.**

Okay, so maybe it had a little bit to do with it. But the big news here is that with our new SuperDisk™ Drive, you can access 120MB of storage, up to five times as fast as standard floppies. And here's the kicker, it still works with 1.44MB diskettes. Just plug it into your PC's parallel port. Or look for SuperDisk LS-120 drives built into new PCs. To make more room, call 1.800.888.1889, ext. 3001 or surf [www.imation.com](http://www.imation.com).

SuperDisk, compatibility symbol, Imation and the Imation logo are trademarks of Imation Corp. © Imation 1997.

to the graphics board. The work-around allows Access to provide high levels of realism on existing PCI machines—but at a terrible cost in frame rates. Says Bruce Ward, an Access producer, “Now [with AGP] we can have Z-buffering, fast hardware transforms, and various other hardware functions that improve both the look and the speed of the rooms.”

The enhanced version of Psygnosis' G-Police title is another example of how AGP helps games. On AGP systems with 32MB of memory, the game uses 8MB of texture data to create scenes. But on AGP systems with 64MB of system memory, the texture data bumps up to as high as 16MB. In other words, the more system memory you have, the better off you are. Other 3D games that will support AGP texturing include Acclaim's Forsaken, Rage Software's Incoming, Game Fx's Out of the Void, and Microsoft Baseball 3D.

Games are not the only applications that will benefit from AGP's texture-handling talents; many vendors of 3D design applications plan to add AGP capability next year. An updated version of MetaCreations' Bryce landscape creation software should feature a full-size preview of rendered 3D scenes. Currently, the preview window is limited to a wire frame (augmented by a postage-stamp-size rendering). The company also says it will beef up the 3D user interface in some of its programs as AGP systems

**BE SURE** to check that your graphics card has 3D filtering. The feature reduced blockiness and smoothed lines in the image at top, especially in its background.

much to the price of a new PC. By the time you read this, both Dell and Gateway 2000 expect to be selling Pentium II-233s with AGP graphics cards for \$1999. Notebooks with AGP cards should start turning up in the second quarter of next year, following the introduction of mobile Pentium II processors.

So should you move to AGP graphics now? If you don't need to upgrade your PC immediately, there is no compelling reason to rush out and buy an AGP-capable system and graphics board. In fact, if you can wait until the release of Windows 98—expected in several months—you will probably enjoy a smoother transition to AGP than you might otherwise. What's more, the graphics boards available in six months will be much more likely to support AGP's most useful features.

If you just can't wait to buy a Pentium II PC, and are running mostly business applications, you might be able to save yourself a bit of money. Assuming that the graphics board in your old PC is a PCI card and that it's working fine, try ordering your new PC without the graphics card and put your current PCI card in it instead. You can then pick up a better AGP card later if and when you need it.

Are you into games, or do you want to be the first on your block with the latest graphics? Make sure you purchase a board like the ATI Xpert@Work or the Diamond Viper V330, both of which support the AGP texturing feature. On the other

hand, if you simply happen to be running 2D applications on an AGP-capable system, any of the boards reviewed here perform like their PCI counterparts.

There are many questions surrounding AGP, and buyers should be asking them. “Ultimately, they are the people paying the money,” says Glaskowsky, “and they need to make sure they know what they're getting.”

*David English is a freelance writer based in Greensboro, North Carolina. Michael Desmond is a senior associate editor at PC World. Mike Salayko, performance analyst at the PC World Test Center, produced all AGP performance tests.*

*“Now [with AGP] we can have...fast hardware*

*transforms and other...functions that improve the look and speed of the [game's 3D-rendered] rooms.”*

**BRUCE WARD** game producer, Access

become more commonplace. Caligari's TrueSpace will offer improved AGP support, and Virtus's ConceptCAD will add it, which should give both applications faster and smoother rendering of high-resolution 3D scenes.

#### INVESTMENT PROTECTION

IF AGP DOES SO LITTLE aside from enhanced 3D, why consider buying an AGP-equipped PC and graphics card at all? For one thing, Intel, Advanced Micro Devices, and Cyrix are all arranging for their chip sets to support the new bus, and system ven-

ILLUSTRATIONS BY DANIEL ADEL  
PHOTOGRAPHS BY BARRY MUNIZ

**NED**

**Ned knows he's on a flight  
to L.A. this afternoon.**

**AL**

**Al also knows he's on a flight to L.A. today.**

**Flight #133, a Boeing 767 departing  
New York Kennedy at 4 p.m. out of  
Gate 46, scheduled to arrive into LAX at  
7:11 p.m., Gate 45, Baggage Carousel 3.  
For his seating assignment, he's upgraded  
himself from 21A to 3A. And is looking  
forward to watching "Batman & Robin"™  
on video, which his wife refuses to see,  
even if it does have George Clooney.  
Al knows he'll earn 2,475 AAdvantage®  
travel awards program miles, leaving him  
just 530 shy of earning his next set of  
upgrade stickers, which he should  
pick up later this month. Attaboy, Al.**

Pop quiz: Why does Al know so much more than Ned? A) He's a genius B) He's a swami or C) He uses AAccess® - the American Airlines Interactive Travel Network®, available on the web or with Personal AAccess® travel planning software.

C - Al uses AAccess. Which means he can get all sorts of flight information. Book and purchase tickets, including Net Saver Fares™, and receive an e-mail confirming his booking. He can also arrange upgrades and get up-to-the-minute information

on his AAdvantage account, including activity since his last statement. All from his computer.

And right now, Al can earn up to 1,000 bonus AAdvantage miles for every round trip on American and American Eagle® he books using AAccess and completes by the end of the year.

And you can, too. Just visit AAccess via the Web® on the Internet. Or, for a Windows®-based link to American Airlines, call for our Personal AAccess travel planning software.

**American Airlines®**

For Internet users, AAccess via the Web is located at [www.americanair.com](http://www.americanair.com) To order Personal AAccess for your PC, call 1-800-AACCESS (222-2377).

American Airlines, AAdvantage, AAccess, American Airlines Interactive Travel Network and American Eagle are registered trademarks, and Net Saver Fares, AAccess via the Web and Personal AAccess are trademarks, of American Airlines, Inc. American Eagle is American's regional airline associate. American Airlines reserves the right to change AAdvantage program rules, regulations, travel awards and special offers at any time without notice, and to end the AAdvantage program with six months notice. "Batman & Robin," trademark and ©1997 Warner Bros. Batman, Robin and all related characters and indicia are trademarks of D.C. Comics ©1997. # The Do-It-Yourself Network

Does the idea of setting up a **small office network** give you the willies?

Let our **friendly consultant** show you the easy way to connect it all.  
**by Mark Gibbs**

**Pop quiz:** Do you need to share more than a few small documents? Do you need to share a database? How about printers and modems? Would you like to exchange e-mail? Want a simple way to back up all your PCs at once?

If you answered yes to at least one of these questions, then you, my friend, need a network. Welcome to Networks "R" Us. We aim to solve your problems, fix your catastrophes, and ensure that when we part you from your money, you're happy. ►

**WE MAKE SURE 99.999% OF THE PIXELS IN OUR  
SCREENS ARE IN PERFECT WORKING ORDER.**

***It's that last .001%*  
THAT KEEP US UP AT NIGHT.**

You wouldn't think a few wayward pixels would be anything to lose sleep over. After all, every LifeBook™ screen contains more than half-a-million of the tiny liquid crystals.

But then, you haven't met the folks in Fujitsu's Quality Control Center.

They don't rest until every square millimeter of our active matrix and DSTN screens have been tested and scrutinized. Brightness, clarity, quality—our team analyzes six different parameters. Then, just to be sure, they run through the testing procedure all over again.

The result? Text is easier to read. Graphics are richer, and images more lifelike. A LifeBook screen is sharper, clearer, brighter—and it stays just as vivid for years to come. Working on your notebook becomes less of an eye strain. And more of a pleasure.

Our fanatical drive for quality and reliability doesn't stop with the screen, either. We're just as tenacious when it comes to hard drives, keyboards, motherboards, and all the other components that go into our notebooks. With all that, it's surprising that we ever get to sleep at all. But when we do, you can bet we dream in high-resolution color.

**FUJITSU**

FUJITSU PC CORPORATION

## Instant Networks

A NUMBER OF VENDORS now offer so-called network-in-a-box solutions. These kits are great if you want to get up and running fast, since they contain all the hardware, software, and documentation you need for a complete small network. I recommend these kits if you intend to do it yourself. It's hard to go wrong with them, and they're cheap—around \$200 to \$300 for an eight-port hub, three cards, and unshielded, twisted-pair (UTP) cables.

For example, 3Com offers the OfficeConnect Networking Kit (\$299), and Dayna Communications has the Small Office Starter Kit (\$166). Both include three ethernet cards, an eight-port hub, and associated UTP cables. NetGear's SB104 Net-

work Starter Kit (\$179) includes one four-port ethernet hub, two cards, and two cables.

If you want to set up Internet access and your network at the same time, check out Compaq's latest offering: Microcom 808 Integrated Access Device (\$899). It's designed not just to set up an eight-person LAN, but also to connect your office to the Internet using high-speed ISDN lines instead of phone lines. Of course, you'll still have to shell out for the ISDN line and for the account with your Internet service provider. Sound complicated? Better call your consultant.

—Mark Gibbs and Angela Freeman

READER SERVICE NO. 758

Almost every small business can benefit from being networked, but it's hard to know where to start. Read on—I'll share some basic tips and tricks that you can use to set up a network of your own.

### WHAT KIND OF NETWORK SHOULD WE GET?

LET'S SEE...how many people in your office? Five? Well, you're in an interesting position: Your organization is just large enough to need a network but too small to warrant using a complex network operating system like Novell's NetWare or Microsoft's Windows NT. These products are almost mandatory for networks of 20 or more PCs, but they are complicated to install and maintain and, for your requirements, far too expensive.

What you need is a small-scale local area network (LAN). Our key objective: simplicity. For a small business like yours, where you or your office manager is the IS department, our goal is to do all the things you need without getting in over your head, technologically or financially.

What kind of computers do you use? Ah, three PCs running Windows 95 and

two Macintoshes? Good. If you had Windows 3.1 or Windows for Workgroups, I'd suggest upgrading to Windows 95—it makes networking a lot easier.

One of the great things about both Windows 95 and the Macintosh is that they come with built-in, easy-to-install, "peer-to-peer" networking, which is exactly what you need. That means that each networked computer can share its resources (hard drives, printers, applications) with all the other connected computers.

If you think your business might grow beyond a handful of people, it may be

worth your while to install a client-server networking system. This is the province of the high-end network operating systems, such as Novell's NetWare and Microsoft's Windows NT. Client-server systems require one computer to act as the network server—typically, it's a separate machine with lots of RAM, fast disk drives, and so on. These server systems are powerful, but they require a lot of knowledge to implement and maintain.

### WHAT EQUIPMENT DO WE NEED?

OKAY. WE HAVE our network operating system; now we need the hardware: network interface cards (NICs) and cables. Here the question becomes, Which networking technology do you want to use?

You might be tempted to buy an older NIC technology like ARCNET. Don't. These cards are cheap, but they're also slow and rapidly becoming obsolete. I prefer to stick with tried-and-true, up-to-date products because (1) they're known to be reliable, (2) it's easy to get support and/or replacement parts, and (3) they're usually the cheapest option.

The two primary network hardware technologies are token ring and ethernet. I can't recommend token ring for small network installations, though, because of its bulky hardware; thick, cumbersome cables; and higher price.

That leaves ethernet. Ethernet uses several cable types, but the two you need to think about are thin ethernet coaxial cable and unshielded, twisted-pair (UTP) cable—which looks a lot like telephone cable. Both are cheap and easy to install.

How you want to set up your net- ►

## When to Call an Expert

SURE, IT'S A LOT CHEAPER to set up a LAN yourself, and it can be relatively painless. However, bringing in expert help (such as me, your friendly network consultant) is a wise idea when:

**You don't have time to learn the technology.** A sloppy installation wastes time and could damage your business. (Imagine what would happen if your computers stopped working for a day.)

**You have 25 employees or more.** Your network is at a size that demands serious planning and careful implementation, not to mention a lot more hardware.

**You want to share applications as well as storage and printers.** Configuring software for network environments can get complicated, especially when it comes to setting access privileges.

**Security is important.** Creating a safe, secure network environment is tricky—there are more "gotchas" here than in a cheap insurance policy. —M. G.

## NET ESSENTIALS TWISTED PAIR

MOST ALL-IN-ONE products, like the OfficeConnect Networking Kit, include the hardware for a three-person UTP network; for five people, you'll need to purchase the rest separately. The network will look like a star, with interface cards wired to the central hub.

### HARDWARE SHOPPING LIST

- 1 OfficeConnect Networking Kit (one OfficeConnect hub, one power adapter, three EtherLink NICs, three UTP cables): one kit at \$299 ..... **\$299**
- 2 Ethernet network interface cards for Macintosh (UTP compatible): two at \$80 each ..... **\$160**
- 3 UTP cabling: two 50-foot cables at \$15 each ... **\$30**
- TOTAL ..... \$489**

work will determine which of the cable types you'll choose. A LAN with thin ethernet cabling is essentially a chain of connections—computer A connects to computer B, which connects to computer C—while a UTP-wired network looks like a star, with one cable from each computer connected to a *hub*. A hub is a box that acts as a communications backbone, and it costs around \$100. I recommend a UTP-based network—the flexible cable allows quick installation, and with the hub wired to each NIC, diagnosing problems is easier to accomplish.

There are a lot of cheap ethernet NICs on the market. My advice? Spend a little more on a name brand like 3Com or Eagle

(usually the difference is only about \$10). For your PCs, choose cards that are compatible with Windows 95's Plug and Play architecture. This standard lets Windows 95 detect the card model and set up the driver for you—one more thing that can make life simpler.

You can get NICs, cables, and hubs from just about any computer shop or catalog, either in the real world or on the Web. If you prefer one-stop shopping (and a single source for tech support), try one

of the new network-in-a-box products. These kits contain all the equipment you need to get three or four PCs networked (see the sidebar, "Instant Networks").

### HOW DO WE SET UP THE NETWORK?

WHETHER YOU USE a kit or buy the cards and cables yourself, here's what to do to get your network up and running. If you follow these and the manufacturer's instructions carefully, it will be very easy to do it yourself. If you don't, well, I'd be only too happy to do it all for you, for a wholly reasonable fee. (For a first-person account of setting up a home-office network, see *Real Solutions* on page 47.)

Start by switching off your computers. Then open each case and install the card in an available slot. Close each case, connect the cables, and restart the computers.

Windows 95 will detect the NIC and lead you through the process of installing the drivers, which should come with the NIC or be included with the operating system. On the Mac, you install the drivers, then select the NIC in the Network or

AppleTalk control panel, depending on the version of your system software.

You'll have to tell your computer what protocols to use to communicate with the other computers. For Macs, the setup is minimal—give your machine a name using the Sharing Setup control panel, then select the protocol in the Network or AppleTalk control panel.

With Windows 95, you'll

have to use the Control Panel's Network dialog box to name the machine and to select which protocols to use—typically, you'll choose NETBEUI and the Microsoft Network Client.

To make your hard drives and printers sharable, click File and Print Sharing in the Network dialog box. Then select the Identification icon, and type a name for both your PC and your workgroup. If you're using a Mac, turn File Sharing on in the Sharing Setup control panel. ►

## Canon

\*All software available on CD-ROM only and designed for use only with Windows® 95. Output shown printed using Photo Kit, sold separately. ©1997 Canon Computer Systems, Inc. Canon is a registered trademark and MultiPASS, WebRecord, PhotoRealism and "See what we mean" are trademarks of Canon Inc. In Canada, call 1-800-263-1121.

When you're done on either system, restart your computer and select your new network, from the Chooser on the Mac or from Windows Explorer on the PC.

Getting the PCs to talk to the PCs and the Macs to talk to the Macs is easy; that's all built into each operating system. But to get the Macs talking to the PCs and vice versa, you'll need special software. The best-known products for this task are PC MacIn and CopsTalk, both of which let Macs and Windows 3.1/95 systems share each other's files and printers.

Now you have a basic network: Users can share files, use disk space on other machines, and access networked printers. Next, you may want to add a print, fax, or CD-ROM server. These devices are often of the plug-in, turn-on variety, with little

### HARDWARE SHOPPING LIST

- |   |              |
|---|--------------|
| 1 Network interface cards (thin ethernet compatible): five at \$80 each ..... | \$400        |
| 2 Thin ethernet cabling: four 50-foot cables at \$15 each.....                | \$60         |

| 4 Terminators: two at \$10 each .....   | \$20         |
| <b>TOTAL .....</b>  | <b>\$520</b> |

or no configuration required. You just connect them to a networked computer, install a driver, and you're ready to go.

What's not so simple is sharing Internet access. For this, you'll have to add TCP/IP (Transmission Control Protocol/Internet Protocol) to all of your computers and configure your modem to connect to an Internet service provider.

### OKAY, WHAT NEXT?

WAIT, YOU'RE NOT OUT of the woods yet. Once your network is running, you need to consider security: Which resources are accessible by whom, and at what level? With a five-person network you're unlikely to be concerned with hackers, but you also don't want people snooping around in, say, the personnel files.

For starters, limit access to just those subdirectories that people need to do their jobs. You can set access privileges using Windows Explorer or the Macintosh Finder menu on the desktop.

## NET ESSENTIALS THIN ETHERNET

THE HARDWARE FOR a five-person thin ethernet network is pictured below. This type of cable is bulkier than twisted-pair cabling, and since the computers are linked together in a chain, diagnosing network problems can be difficult.

### CONNECTING THE PCs

the only issue is whether the target machine has enough available disk space. You might consider dedicating a machine with a 2GB or larger hard drive to the task—and there's no reason why it shouldn't be the same one that hosts the shared printer. Another alternative is to buy a

Also, be careful which computer you connect to the shared printer. If the person using that computer spends all day accessing a database, then heavy printer use will slow them (and the printer) down. Everybody loses. Ideally, a shared printer should be attached to a fast computer—a Pentium 166 or better—and not one that belongs to a power user. If your staff does a lot of printing, dedicating a machine for that purpose might be a better idea.

What about doing backups on another computer? Unless the amount of data to be backed up is huge (more than 150MB),

tape drive—an external 3.2GB Iomega Ditto Easy costs about \$249. That way you can keep multiple sets of backups, and store at least one off-site.

You can share databases and other applications on the network, but read the vendor's documentation and license agreements carefully. It can be difficult to install the software correctly in a network environment. Databases work fine over a network but can be tricky to configure properly. For example, Microsoft Access must be opened in shared mode to support multiple users, and you'll need to

# Working Without a Net

## ALTERNATIVES TO INSTALLING A LAN

So the thought of installing a network terrifies you? Not to worry. You can still accomplish some of the same tasks without setting up a LAN, but you may spend more and get less.

### SHARING DEVICES

If your office has only one printer, you need a tool that allows all your computers to share it. You can buy an A/B switch box (starting at around \$10 to \$15) that uses standard cabling to link two or more computers to a printer, but you can print only one job at a time. If you want more functionality, check out PrintPoint, a hub that connects to your PC's serial port and lets multiple users send data to the printer simultaneously. A five-user setup runs \$375.

• Excellink, 800/923-5465, [www.excellink.com](http://www.excellink.com)

READER SERVICE NO. 759

Want to share just a modem? The \$95 TD-2 lets two computers use the same external modem. This gadget acts as a splitter, transmitting data from the modem to both PCs.

• Computer Peripherals Systems, 800/888-0051, [www.cpscom.com](http://www.cpscom.com)

READER SERVICE NO. 760

### SHARING DATA

You can always share data the old-fashioned way—save it on a floppy and walk the disk over to a colleague. But before long, you'll be up to your ears in floppies, with multiple versions of files floating around—a recipe for data disaster.

If the files are too large to fit on a floppy disk, a crude yet effective alternative is remote access software like LapLink for Windows 95 (\$150). You can link the machines and transfer files via a serial cable. It's a somewhat awkward fix, and transfers will be slow, but it's a relatively inexpensive way to share a few files without a LAN.

• Travelling Software, 800/343-8080, [www.travsoft.com](http://www.travsoft.com)

READER SERVICE NO. 761

### EXCHANGING E-MAIL

If you're already paying for Internet access, let your Internet service provider be your network. At \$19.95 a month (in most cases), it's a cheap way to

stay connected. If everyone has access to a modem, you can use e-mail to communicate with colleagues and access each other's data. Best of all, when the network goes down, you won't have to fix it yourself.

### BACKING UP

You can back up the data on all your systems without a network, but it won't be pretty. You could buy an external tape drive, like Iomega's 3.2MB Ditto Easy (\$249), and back up each computer individually. You install the software on each machine, then plug the drive into the parallel port to back up data. Elegant? No, but it will do the trick.

• Iomega, 800/697-8833, [www.iomega.com](http://www.iomega.com)

READER SERVICE NO. 762

Another option is to back up your data and store it online. Several companies offer Web-based backup, and prices range from \$15 to \$30 a month. Your data is compressed, encrypted, then uploaded and stored online. Careful, though—depending on how much data you store, charges can rack up quickly. —A. F.

run the User-Level Security Wizard to restrict user access.

Finally, don't forget that a network of any size needs to be supported and managed. You will have to make sure that shared disk space doesn't fill up with

obsolete files, that printers are available, and that you understand how to fix things when they break.

But whether your network is simple or complex, whether you use it just to share a few files and a printer or for a shared

database and Internet access, you'll be amazed at just how useful a LAN can be. Within a few weeks, you'll wonder how you ever lived without a network.

Now, speaking as your consultant, I have only one more question: Where should I send the bill?

# Hot Picks for the Home Office

These are a **few** of our **favorite** things.

BY STEVE BASS

## QUICKEN MEANS BUSINESS

IT SLICES, IT DICES, and now it does business. It's Intuit's Quicken Home & Business 98, a new version that helps small businesses make better sense of their affairs. With this new version, Quicken finally offers receivables: You can create invoices and examine the status of all your clients' transactions, so you can see who owes you money and when you'll receive payment. If you collect state sales tax, Quicken will calculate the amount and maintain the details in a separate account. There's also relief for your client-related business expenses. Just flag each one as a reimbursable out-of-pocket expense and apply it to the invoice. When it's time to pay your income taxes (you do,

too. Quicken Home & Business 98 \$89.95 list, \$20 rebate for upgrade; Intuit; 800/446-8848; [www.intuit.com](http://www.intuit.com)

## COOL COLOR COPIES

WHEN I HEARD about it, I didn't believe it: a copier that does black-and-white *and* color documents for under \$1000? Skepticism is part of my job, so I got my hands on Hewlett-Packard's HP Color Copier 210 and tried it myself. I placed a small color snapshot under the copier's tray, clicked the button, and in 30 seconds had an amazingly good color copy. It took only a minute to enlarge the photo to almost 8.5 by 11 inches, a 213 percent increase. And the 210 made traditional black-and-white copies in 13 seconds. The copier

uses ink jet technology, which is found in many color printers, and HP claims the cost per copy is 2 cents for mono-chrome and 10 cents for color. The \$700 HP Color Copier 110 churns out seven black-and-white and three color copies per minute. I have to admit: The HP Color Copier made a be-

liever out of me. **HP Color Copier** 100 series \$699 list, 200 series \$999 list; Hewlett-Packard; 800/752-0900; [www.hp.com:80/go/copiers](http://www.hp.com:80/go/copiers)

BEFORE YOU ASK WHAT  
KIND OF KNUCKLEHEAD WOULD BROADCAST HIS  
CONFIDENTIAL BUSINESS, MAY WE ASK IF YOU'VE GOT AN  
ANTI-EAVESDROPPING PHONE?

Trying to keep business calls private without our new Q phone is about as smart as making this guy head honcho of security. The secret is QUALCOMM's CDMA digital technology. It's the only technology that assigns each of your calls one of 4.4 trillion possible codes that continually scramble as you talk. The net result is private, secure calls. CDMA also protects you from phone number theft. Naturally, this phone is essential for those calls where confidentiality is important. You know, like gossiping about your boss and co-workers. For a closer look, contact us at [www.qualcomm.com/cdma](http://www.qualcomm.com/cdma) or 1-800-349-4188 or 1-619-651-4029 (outside USA).

#### Concero Switchboard

of rough drafts—up to 16 full pages' worth—on just one letter-size sheet. It really comes in handy when browsing the Web. When I find pages that interest me, I print a hard copy, using PrintCache to transform the pages into a neat little booklet, collated and perfectly formatted. But wait, there's more: The program also uses its own buffers to speed up printing, a feature Windows 3.x users will appreciate. The bottom line: Power PrintCache is a cool utility with clever ways to make my print chores painless. **Power PrintCache** \$50 street; LaserTools; 510/420-1319; [www.lasertoolscorp.com](http://www.lasertoolscorp.com)

#### SMOOTH OPERATOR

COULD YOUR HOME OFFICE use someone to answer and manage calls while you're out? Mine, too. Instead of hiring someone, you might try Centrepont Technologies' Concero Switchboard. When you plug your phone into it, the device acts like a PBX, using two standard incoming lines to give you six extensions, three-way conference calls, call transferring, Distinctive Ring detection, and even remote call forwarding. If you have more than one office at the same location, the Concero can connect six additional phones and transfer calls to other extensions. The Concero also automatically routes faxes to your fax machine or your computer's fax software. The Call Forwarding feature is neat: Callers are prompted to announce their name, which the Concero forwards to your current location. If you want to talk, you can then accept the call; if not, you can route it back to your answering machine. Connect the Concero to a PC or use it alone. Installing

the system took less than 30 minutes, but fully understanding its myriad features took a few hours. **Concero Switchboard** \$495 list; Centrepont Technologies; 613/725-2980; [www.ctrpoint.com](http://www.ctrpoint.com)

#### BLACK AND WHITE AND READ ALL OVER

DO YOU EVER need to track your inventory? How about recording attendance at a meeting? Ever thought of using bar codes to do it? Don't laugh. I've used Zebra

Technologies' Barcode Anything System to track members of my user group. First I designed bar-code labels using data imported from member accounts in Intuit's QuickBooks (you can also import data from Peachtree Complete and most popular databases and spreadsheets). I printed the bar codes on ordinary laser labels and stuck them to the backs of user group membership cards. Scanning each member's bar code made tracking attendance a snap (though I did feel a little like a supermarket checkout clerk). Plus, I now know immediately if a membership has lapsed. Barcode Anything comes with scanning and labeling software, a run-time Microsoft Access database, and a 32-bit scanning wand that attaches to a serial port. It works with Windows 3.x/95 and DOS. Next time you attend a user group meeting, don't forget your membership card. **Barcode Anything System 3.0** \$299 ▶

You're cordially invited to try the

Avery® Clear Labels (Laser 5660/Ink Jet 8660)

Sorry if we sound snobbish. But if you want sophisticated labels that make a great impression, you've found them. Avery® clear labels virtually disappear on any envelope and work with laser or ink jet printers. And since preset layouts already exist in Microsoft® Word, WordPerfect® and LabelPro®, you'll avoid ugly formatting problems. Oh, we almost forgot. Pick a stamp that doesn't clash.

### REACH OUT AND PAGE SOMEONE

REMEMBER DICK TRACY'S two-way wrist radio? I have something cooler: AccessLink two-way pager from SkyTel. When I'm paged while out of the office, instead of racing to a phone, I can

reply—right from my pager. The AccessLink pager looks pretty ordinary, but you can send, receive, and reply to messages

using an integrated (though rudimentary) keyboard. But that's not all: My clients can send 80-character e-mail messages directly to my pager or call my toll-free pager number to verify that I've received the page—and to

hear my reply. I even tried exchanging messages with my intrepid assistant (my AccessLink-equipped mom), and it worked perfectly: Dinner? Okay, Mom, see you Friday night. **AccessLink pager \$15 per month**, plus \$24.95 per month for 100, 80-character messages; SkyTel; 800/759-8355; [www.skytel.com/products/st2way.html](http://www.skytel.com/products/st2way.html)

## A decade of experience. A decade of awards.

Every UmaxPC comes loaded with a decade of accomplishment. UMAX has achieved global success with its scanners, digital cameras, and Apple Macintosh OS computers. Now it is applying this decade of experience to a whole new line of PCs—the UmaxStation and the UmaxPC series. Each high-end UmaxStation PC features a Pentium® II processor at speeds up to 300MHz and comes bundled with Adobe's latest graphics software. They combine powerful performance and powerful applications. Each value-priced UmaxPC shares many of these same high-end

features, like 56K modems, but has a price tag only an experienced manufacturer can offer. UmaxPCs give you a better value and better performance, all because experience takes you farther.

# BEFORE YOU BUY ANY 19" MONITOR, READ THE FINE PRINT.

*SuperScan Elite™ 751  
19" CRT (18" viewable image size)  
PrecisionFocus™ technology*

Other manufacturers would like you to believe their knock-offs of our award-winning 19" Elite 751 are every bit as good — for less money.

But when you compare monitors side by side, you'll see why ours costs a little more. The difference in screen clarity is big.

Cadastyl Magazine explains it like this: "Hitachi's best move was to avoid compromises after deciding on the smaller

tube size." Instead of beefing up 17" video electronics to handle a 19" tube, Hitachi took a 21" chassis with its best 21" digital control electronics and put a 19" tube in it. The result is performance every bit as good as the best 21" — far better than the performance of a souped up 17.

Other critics agree. Imaging Magazine judged the new Hitachi "BEST" of the recent AIIIM show — over other 19" monitors at the show. And CRN's Test Center recommends the Hitachi.

See for yourself. The more time you spend staring at a computer screen, the more you'll appreciate the difference the Hitachi can make.

## DREAM Home PCs

EDITED BY GRACE AQUINO AND JOANNE ROBB

**STYLE LEADER:** The dapper two-tone HP Pavilion 8180 debuts on our Top 10 Home PCs.

### HARDWARE BUYS

IS A NEW PC on your holiday wish list this year? If so, chances are you're looking for a good all-around machine to use at home, for play as well as for work. You're not completely sure what you want, but you've probably decided on some must-haves: solid performance, a 17-inch monitor, speakers, a good modem, and a worry-free vendor support package. You don't want to wipe out your savings account, ►

but you're also willing to spring for some perks, like a multigigabyte hard drive, AGP graphics, or a built-in Zip drive.

According to *PC World* surveys, you're not alone. Nearly 55 percent of readers who responded to a recent poll said the home PC they planned to buy would serve personal and business needs. Forty percent said they would buy a home system purely for personal reasons. No novices, a third of these users already own two or more home PCs.

Home systems are becoming such a hot ticket, we've decided they deserve more coverage. So we've expanded our Top 5 Home PCs review to a list of the Top 10—5 power and 5 budget. We've also moved the review from the @Home section to the Top 100 reviews. Our first Best Buys under the new format: Dell's Dimension XPS M233s and Gateway 2000's G5-166.

### HOME, SWEET HOME PC

WHAT MAKES a good home system? For our Top 10 Home PCs, we look for the same things we look for in our business systems: good performance, a reasonable price, and top-notch reliability and service. But what sets a home PC apart is easy setup, home software, and extra-cool gadgets.

Many PCs marketed as home machines, including both Home Best Buys, come with color-coded cables or simple setup instructions to help less-experienced users through the first steps. Monorail's 7366e-PR166 system, in fifth place on our Home PCs budget chart, is one example:

**COLOR ME CABLES:** With color-coding, PCs are easier to assemble.

Other than keyboard and mouse hookup, it requires no setup.

Well-rounded home PCs also include software that will appeal to the whole family. For example, the two new Pavilions that appear in this month's Home PCs power section, the 8180 and the 8140, come equipped with everything from Quicken SE for the family financier to Reader Rabbit 2 for the very youngest PC enthusiast. Want to

treat yourself to a fun extra? The Home PCs budget Best Buy—Gateway's \$1499 G5-166—comes with a Canon BJC 250 color bubble jet printer.

But not all PCs marketed as home machines come with traditional home PC features. Companies like Dell are muddying the waters by touting some machines as home office systems. For example, this month's power Best Buy—Dell's Dimension XPS M233s—has no kiddie software and no games, just color-coded cables and conservative applications like Microsoft Office Small Business Edition.

### CLEANING HOUSE

TO MAKE ROOM for our extra home PC coverage, we had to cut back elsewhere. According to our surveys, *PC World* readers buy fewer notebooks than any other type of system. Therefore, we've trimmed our Top 20 Notebook PCs chart to a Top 10 list—5 power and 5 budget portables.

Only one new portable made the chart: Gateway 2000's Solo 2300XL, our new power Best Buy. The Solo 2300XL claims the title of fastest portable we've ever tested; it's a touch speedier than last month's second-place power Best Buy, another PMMX-233 from Gateway—the Solo 9100XL. The new Solo is not as luxurious as the 9100XL; it has only a 12.1-inch screen and a 10X CD-ROM drive, compared to the 9100XL's 13.3-inch screen and 12X-20X CD-ROM drive, but at \$4049, it's \$850 cheaper.

### PII-266 TAKES THE CHART

OF THE SIX NEW systems on the Power Desktops chart this month, only one earns a Best Buy. The Quantex QP6/300SM-3x is almost as speedy as the fastest desktop we've tested, the Gateway 2000 G6-300XL. And with a low \$2999 price, it ranks ahead of the Gateway. Like the Gateway, the Quantex QP6/300SM-3x is based on a Pentium II-300 chip and supports the Accelerated Graphics Port.

The remaining new systems on the Power chart are PII-266 PCs. The Gateway 2000 E-3100 PII-266 is fast and relatively inexpensive, but without a modem or sound card, it can claim only eighth place. None of the four other new power systems are stellar performers for their CPU class, but their assets gain them places on the chart. For example, the \$2899 Acma and the \$3099 Amax both come with a Zip drive and a 56-kilobits-per-second modem.

**SPEED DEMON:** Power Best Buy Quantex is one of the fastest PCs we've tested.

Only two new systems appear on the Budget Desktops chart. The \$1949 Quantex QP5/233 M-3 is a number three Best Buy, and the \$1349 Micro Express MicroFlex-F210A, an AMD K6-200 machine, claims sixth place.

## SETTING HIGHER STANDARDS

PC PRICES keep dropping, so this month we lowered the price cutoff between Power and Budget systems from \$2500 to \$2250. Now systems that cost over \$2250 compete for Power-chart status, while those costing \$2250 or less go in the Budget category. As a result, more lower-price PCs, such as Netis's \$2390 Starburst 266, are eligible to compete for positions on our Power chart.

Every few months we also adjust our overall scoring system to keep up with PC advances. This month we cranked up the criteria for price, performance, and features to reflect the faster, cheaper, better-equipped systems we're seeing. For exam-

ple, Budget Best Buy Dell Dimension M200a, a very good performer in its heyday, is now rated only good compared to today's faster PCs.

## PRINTER PICTURES

IF YOU BELIEVE all the ads, just about any of today's inexpensive color ink jets can give you photo-quality printing. But can a sub-\$300 printer really take the place of the corner Fotomat? This month's roundup of personal printers reveals that

**LARGER THAN LIFE:**  
HP DeskJet 1000Cse  
prints oversize images.

some color ink jets—like the Canon BJC-4300—come close to 35mm-quality, but only with special papers and inks, which can be costly.

One of the most interesting color printers that didn't make our Top 10 Printers chart is HP's DeskJet 1000Cse. Able to print on paper up to 13 by 19 inches, the \$499 1000Cse could be good for oversize printouts.

*Grace Aquino is an assistant editor and JoAnne Robb an associate editor for PC World. Editorial Researcher Julie Campagna, Editorial Assistant Mick Lockey, Associate Editor Karen Silver, Senior Associate Editors Rex Farrance and Bryan Hastings, and freelance writers Allyson Bates, Eric Hellweg, Dan Littman, and Susan Silvius contributed to the Top 100. Testing for the Top 100 completed by Ulrike Diehlmann, Robert James, Elliott Kirschling, Jeffrey Kuta, and Mike Salayko. See page 14 for contact information.*

# YOUR GUIDE TO THE TOP 100

**QUESTIONS ABOUT OUR CHARTS?** The following section should answer most of them. If not, ask us; see page 14 for contact information.

**How do the charts work?** The Top 20 and Top 10 charts are evolving lists of the best PCs, monitors, modems, printers, and graphics boards we've tested. The Top 20 charts are divided by price. Power desktops cost \$2250 or more; power notebooks cost \$2750 or more. Every month we test the latest products in each category and compare them to the pool of items we've already reviewed. As new products earn places on the charts, those at the bottom drop off. Price cuts also cause chart changes.

**Where do you get your prices?** We estimate street prices based on vendor information and our own research, including surveys of retail outlets. We recheck all prices every month.

**What does the overall rating mean?** It's the sum of all our tests—both hands-on evaluations and automated speed tests. The scale is 1 to 100, so a product that scores in the 90s is generally considered exceptional, one in the 80s is among the best, one in the 70s is above average, and one that scores lower usually doesn't place.

**What does the PC WorldBench score mean?** It's a measure of how fast a PC is in relation to our baseline machine, a Dell P75t configured with 8MB of RAM, a 540MB hard drive, and no secondary cache. A PC that scores 200, for instance, is twice as fast as the baseline unit.

**Where do the scores for reliability, support quality, and support policies come from?** Reliability and support quality scores come

from readers responding to Reliability and Service surveys. The poll scores are based on vendor support policies (such as length of warranty for parts and labor, weekday toll-free support hours, and weekend and online support availability).

**What do all those word scores mean?** Word scores for performance and price are based on a product's rating in relation to other products in its category. For example, a budget PC that is rated "expensive" is high priced only in relation to other budget PCs. Likewise, a power notebook rated "good" for performance is good only in relation to other power notebooks. Word scores for other categories, such as features, are relative to all desktops or all notebooks.

**Where can I find the online version of the Top 100?** Go to PC World Online ([www.pcworld.com](http://www.pcworld.com)). There you'll find not only the current issue of *PC World* and reviews from back issues, but some extra features, including reviews not available in print. You can read full reviews of Top 10 products, for instance, by going directly to the URL provided in each Top 100 section.

**Have you ever wished you could build your own chart based on your buying criteria?** You can, with Buyer's Guide, our Web site's unique chart customizer. Buyer's Guide combines your criteria with *PC World*'s current data and test results to generate customized Top 20s and Top 10s. For instance, if you want your chart to rank notebooks that have 120-MHz processors and 1.6GB hard drives, the guide's Personal Adviser will find and rank all the machines that fit your specifications.

# TOP 20 POWER DESKTOPS

	SYSTEMS	Last month	Month tested	Street price (9/15/97)	CPU	Comments
1	 <b>Dell Dimension XPS D266</b> 800/388-8542 <a href="http://www.dell.com">www.dell.com</a>	1	Nov 97	\$3079	Pentium II-266	\$20 price drop on fast system with AGP graphics; 233 also good.
2	 <b>Dell OptiPlex Gxa266</b> 800/388-8542 <a href="http://www.dell.com">www.dell.com</a>	3	Nov 97	\$2888	Pentium II-266	Quick, integrated ethernet and AGP, terrific reliability and support ratings.

4	 <b>Quantex QP6/300SM-3x</b> 800/896-4898 <a href="http://www.quantex.com">www.quantex.com</a>	—	(NEW)	\$2999	Pentium II-300	Most affordable PII-300 we've tested, AGP graphics, excellent support policies.
5	 <b>Gateway 2000 G6-300XL</b> 800/338-0169 <a href="http://www.gateway.com">www.gateway.com</a>	5	Nov 97	\$3799	Pentium II-300	Fastest-ever performance, AGP graphics, great 19-inch monitor, terrific sound.
6	<b>Quantex QP6/266 WS-3x</b> 800/896-4898 <a href="http://www.quantex.com">www.quantex.com</a>	—	Oct 97	\$2499	Pentium II-266	Average performance for a PII-266, ethernet card, speakers; no modem.
7	<b>Micron Millennia XKU 300</b> 800/634-8799 <a href="http://www.micronpc.com">www.micronpc.com</a>	12	Nov 97	\$4087	Pentium II-300	\$100 off top-flight performer, great 19-inch monitor, super sound system, AGP.
8	<b>Gateway 2000 E-3100 PII-266</b> 800/338-0169 <a href="http://www.gateway.com">www.gateway.com</a>	—	(NEW)	\$2889	Pentium II-266	Fast system comes with AGP support but is missing sound card and modem.
9	<b>Sys Technology Performance 233K6</b> 800/613-9963 <a href="http://www.systechology.com">www.systechology.com</a>	10	Nov 97	\$2721	AMD K6-233	Well-designed machine with business apps; support policies could be better.
10	<b>DTK Quin-57M/PM233</b> 800/289-2385 <a href="http://www.dtkcomputer.com">www.dtkcomputer.com</a>	—	Oct 97	\$2453	Pentium MMX-233	Good performance, 56-kbps modem; support policies need improvement.
11	<b>NMC Expert Pro II</b> 800/800-4662 <a href="http://www.natmicro.com">www.natmicro.com</a>	13	Sept 97	\$2595	Pentium II-266	Well-priced system with good graphics card; not many extras.
12	<b>Sys Technology Performance Pro 266A</b> 800/613-9963 <a href="http://www.systechology.com">www.systechology.com</a>	14	Oct 97	\$3121	Pentium II-266	\$128 off fast PC with big hard drive, great multimedia; policies could improve.
13	<b>Acma EXP Pro PII 266</b> 800/786-6888 <a href="http://www.acma.com">www.acma.com</a>	—	(NEW)	\$2899	Pentium II-266	Comes with Zip drive, 56-kbps modem; no extra software, limited support.
14	<b>Netis Starburst 266</b> 800/577-7526 <a href="http://www.netistech.com">www.netistech.com</a>	—	(NEW)	\$2390	Pentium II-266	Very inexpensive; no bells and whistles, but it covers all the basics.
15	<b>Premio FX2 Shadowhawk 266</b> 800/677-6477 <a href="http://www.premlopc.com">www.premlopc.com</a>	17	Oct 97	\$2750	Pentium II-266	Fast, 64MB of RAM, good sound; lacks a modem.
16	<b>Digital Celebris GL-2 6200</b> 800/722-9332 <a href="http://www.digital.com">www.digital.com</a>	—	Mar 97	\$3224	Pentium Pro-200	\$213 price drop, good support and system reliability ratings.
17	<b>Amax GFX Pro 266</b> 800/800-6328	—	(NEW)	\$3099	Pentium II-266	Comes with Zip drive, 56-kbps modem; support policies could be better.
18	<b>Everex StepStation2</b> 800/383-7391 <a href="http://www.everex.com">www.everex.com</a>	—	(NEW)	\$3075	Pentium II-266	Fast machine, best support policies; could be cheaper for what you get.
19	<b>Digitron PS4000</b> 888/708-2800 <a href="http://www.digitronpc.com">www.digitronpc.com</a>	18	Oct 97	\$3845	Pentium II-266	\$150 price drop on speedy minitower, great multimedia and expandability.
20	<b>Nova PII-266</b> 800/461-5535 <a href="http://www.novacominc.com">www.novacominc.com</a>	16	Nov 97	\$2975	Pentium II-266	Fast, well built, expandable, good Roland speakers; \$301 price increase.

Best Buy

See features chart, page 298; test report, page 304.

\* Insufficient data to give a rating.

WHICH OF THESE SYSTEMS IS NOT LIKE THE OTHERS? Of the six new systems on this month's Power Desktops chart, only one—the Quantex QP6/300SM-3x—is a Pentium II-300. All the rest are based on Pentium II-266 processors. In fact, the PII-266 chip still dominates the Power chart. Two PII-266s from Dell top our list—the Dimension XPS D266 and the OptiPlex Gxa266. However, not every Pentium II-266 we tested claimed a spot. The DTK Apri-74M/K233, for example, didn't have the overall quality needed to take a position on our Top 20. To read about the DTK and other runners-up, visit PC World Online ([www.pcworld.com/t20pcs](http://www.pcworld.com/t20pcs)).

## This Month's Best Buys

### 1 DELL DIMENSION XPS D266

**PRO:** Fast, fine design, huge hard drive, best reliability and support ratings

**CON:** Awkward monitor controls

This well-equipped, cutting-edge Pentium II-266 combines superb performance with the outstanding

reliability and support that consistently keep Dell PCs near the top of our charts.

The \$3079 Dimension XPS D266 uses Intel's new, more advanced 440LX chip set and provides Accelerated Graphics Port support. AGP promises to speed video processing using a dedicated graphics bus that can move data twice as fast as PCI. This sounds great, but we haven't seen much benefit so far. The AGP sys-

tems we've tested, which include the Gateway and Micron Pentium II-300 systems on this month's Power chart, are indeed superb performers, but in our tests they do not run business apps substantially faster than the similarly configured systems that use PCI graphics.

You can buy the XPS D models in 233- and 300-MHz versions, too. The Pentium II-300 machine produced a PC WorldBench score of 270—outstanding, but only about 2 percent faster than the Pentium II-266. At \$200 less, the D266 is a better value—unless you need bragging rights to the fastest CPU.

For the most part, the D266 is top-drawer: You get 64MB of SDRAM—enough for the system to handle several programs running multimegabyte files. The fast Ultra DMA IBM hard drive has room for 8.4GB of programs and data, and it's paired with a bus-master IDE controller for superefficient disk access. The NEC CD-ROM drive reads at speeds from 12X to 24X, and the internal 3Com/U.S. Robotics Sportster modem downloads at close to 56 kilobits per second. Even the Sound Blaster AWE64 board is top of the line. In spite of all these peripherals, the minitower offers four empty drive bays and four free expansion slots. To top it all off, the system comes with Microsoft Office 97 Small Business Edition.

We were less impressed with Dell's economy-class 1000LS 17-inch monitor, built around a Philips tube—although it's a big improvement over the previous LS model. The image quality is good for a basic model, but the controls could be better. Push one of the four buttons, and a menu appears on screen; if you hesitate a moment while trying to figure out how to adjust the image, the menu vanishes, and you have to start over.

The Altec Lansing ACS 290 sub-woofer-equipped speakers sounded bass-heavy to our ears, no matter how we tweaked them. True sound aficionados should spend \$49 more and get Dell's top speaker offering, the ACS 490.

Dell Dimension XPS D266

	SYSTEMS	CPU	RAM (MB)	Secondary cache (K)	Hard drive (GB)	Graphics adapter	Video RAM (MB/type)	Monitor tube/viewable diagonal (inches)	Screen pitch (mm)	CD-ROM drive speed

## 2 DELL OPTIPLEX GX266

**PRO:** Great design, fine Trinitron monitor, built-in ethernet, best reliability and support ratings

**CON:** No modem, skimpy software bundle

With changes to our charts this month, the Dell Dimension XPS M233s—our second-place Best Buy last month—now competes only on the Top 10 Home PCs charts. Therefore, the OptiPlex GX266 moves up a notch and takes second place.

Dell's OptiPlex systems are aimed at networked corporate environments—especially offices where sensible design and reasonable price matter more than the very latest in technology. The new OptiPlex

Dell OptiPlex GX266

GX266 holds to that course, varying only to include an integrated 2MB AGP graphics controller. The good news is, the GX266 doesn't make you give up much performance for its button-down stability: With a PC WorldBench score of 259, it's within 2 percent of the speed of a comparably equipped Dimension XPS D266. In addition, Dell says it puts all new OptiPlex models through an exhaustive round of network compatibility tests before it releases them for sale.

What do you get for the \$2888 you'll spend on the OptiPlex GX266? Good performance, from a Pentium II-266 CPU; a roomy minitower case; a crisp 17-inch Dell Trinitron monitor;

and a comfortable keyboard. Our system also came with a 3.2GB hard drive, an NEC 12X-24X CD-ROM drive, an integrated ethernet adapter, and 16-bit sound. The GX266 adds an Altec Lansing ACS 290 speaker set with a subwoofer that yields somewhat muddy bass notes, but the system isn't priced with a modem.

The coolest thing about the GX266 is its clever design. Seven slots are free, and getting to them couldn't be simpler. Once you remove the case, just lift a lever, and the entire circuit board holding the expansion slots slides right out of the machine. Reinstalling it after you add or remove cards is equally easy. And the entire power supply swivels up and out of the way to give you easy access to memory and the CPU.

<sup>1</sup> Six years on CPU and main RAM, one to five years on other parts.

### 3 GATEWAY 2000 G6-233

**PRO:** Excellent documentation, nice design

**CON:** Drive bays can be tough to access

With a price drop of more than \$100, the \$2735 Gateway 2000 G6-233 steps up a spot on our chart and becomes an even better value for the performance-minded buyer than it was last month. Posting a PC WorldBench score of 251, this Pentium II-233 minitower provides good performance, within about 4 percent of the speed of the average Pentium II-266.

The G6-233 comes well appointed with 64MB of EDO DRAM and 512K of secondary cache. Our test unit included a 16-bit Ensoniq Audio PCI Wavetable sound card and Altec Lansing ACS 410 speakers with a subwoofer. The Altec Lansings

sound good, but the Boston Acoustics speakers we tested with the Gateway 2000 G6-300XL in spot five are better—especially if you use your computer to play music and games.

You also get a 3.2MB Ultra DMA hard drive and a 56-kbps x2 modem, as well as a nice selection of software, including Microsoft Office 97 Small Business Edition, Microsoft Encarta 97, and a number of games. Gateway recently replaced the PCI graphics card in this PC with an AGP system. In our tests, AGP performs similarly to PCI with standard business applications. Look for our retest of the updated G6-233 next month.

The G6-233 offers plenty of expansion

space. Large thumbscrews make getting inside the case easy, and we like the color-coded I/O ports. Drawbacks are minor: We had to undo thumbscrews on the case's right side panel to remove the drive cages, and the hard disk occupies the most accessible of the internal bays.

Gateway 2000 G6-233

Gateway clearly did its homework in putting the documentation together. The manuals are thorough, clearly written, wonderfully illustrated, and printed on glossy paper. Our readers rank Gateway's system reliability as only fair, but support receives top scores; you get a three-year warranty on parts and labor, plus round-the-clock, toll-free technical help.

PanaSync™ **S21**

PanaSync™ **S15**

PanaFlat™ **LC40**

## what **WORKS** for you?

### PERFORMANCE. RELIABILITY. VALUE.

Panasonic PanaSync™ monitors give you exactly what you need to get the job done. Our monitors have been designed with today's business environment in mind. If you're looking for a solid, feature rich monitor, try our S15, S70 or S21— ready for virtually any application. If you're looking for a space saving

Liquid Crystal Display, take a look at our LC40, it's an amazing achievement. With a full screen display measuring less than 3" deep, it features a sharp, brilliant picture. And when it comes to performance and affordability we've set a new industry standard.

Model	S15	S70	S21	LC40
Dot Pitch (mm)	0.27	0.27	0.27	0.2775
Max. Res. M (H x V)	1280 X 1024	1280 X 1024	1600 X 1280	1024 X 768
H-Scan (kHz)	30 - 67	30 - 70	30 - 95	30 - 61
Viewable Area	13.7"	16.0"	20.0"	14.0"

And if you're concerned about customer support, take a look at our program—it's the most extensive warranty and customer support program in the

industry. Our 3-Year Limited Warranty on parts, labor and the CRT, 1-Year On-Site Exchange Program, and 24-Hour, 7-Day Customer Support Hotline, all at no additional cost, adds value you won't get from the competition.

So take a look at the PanaSync™ Series designed for today's business and put one to work for you today.

# Practice. Practice. Practice.

At Transmonde Technologies, we work hard to create the best products and deliver the best service possible for our customers. Which is why, for the past seven months, our notebooks have consistently been awarded a place on PC World's Top 20 list of notebook PCs. (To be truthful, we've always been ranked in their top 10).

It didn't happen by accident. It's achieved through excellent engineering, thoughtful design and attention to our customers - things we practice everyday.

We've developed a product line with a broad range of features and prices to suit any budget. However, we also realize that not all our customers compute the same way. That's why we practice personal service, customizing any system to meet your specific needs. To help you, we've set up a custom configurator on our web site.

Once you're up and running, Transmonde won't let you down. We back every system for a year promising to have you up and running within 48 hours. No additional costs for shipping.

So, give us a call at 1-888-988-2883 to see if we really practice what we preach.

**\$100  
Instant  
Rebate!**

Now for a limited time, receive a \$100 Instant Rebate on selected models. From \$2199 with 133MMX, 12.1" TFT, Display, 32MB RAM, 1.4GB HDD to \$3899 with 166MMX, 13.3" TFT Display, 64MB RAM, 3.1GB HDD, 56K modem and anywhere in between. Another practice in value through December 31, 1997.

Powerful Software to Build Your Business

# Powerful Business Tools

"BusinessBasics keeps SOHO businesses on the right track"

—Computer Shopper, November 1997

## Proven Tools Take the Guesswork Out of Running A Business

Launching a new product or service? Need vendor contracts or employment applications? Want to put together a cashflow statement or an operating budget? Now there's no need to start from scratch anymore. With JIAN BusinessBasics, all documents can be used "as is" or can be quickly and easily customized for *any* business. Yet the cost of the entire collection is less than you might charge for an hour of your time.

### Expert Resources at Your Fingertips

We asked business owners what they needed most, and they said professional business expertise and proven tools they can easily use to accomplish day-to-day operations.

### 100 Tools Add Structure and Efficiency

Whether you're about to start a new business or you've been building one for several years, JIAN BusinessBasics delivers 100 of our most popular letters, documents, agreements, spreadsheets, checklists, forms, and templates all carefully prepared to make your business run smoother. You even get a handy desktop directory with brief descriptions of all the documents and where to find them.

Plus JIAN BusinessBasics works with all popular word processor and spreadsheet software, so there are no new programs to learn. You already know how to do it.

### Ideal for Your Kind of Business

JIAN BusinessBasics can improve your business processes the day you open it, no matter what kind of business you are in or how you do business. Even if you've always done just fine, you'll save more time and money with JIAN BusinessBasics.

### Part of a Complete Suite

JIAN BusinessBasics is just one product in a complete line of award-winning software tools for business. In fact, our flagship product—BizPlanBuilder® (\$99) just won the PCWorld Best Buy award for business planning software.

### Add Horsepower and Value to Your Business Today

If you're running a business, now you can lead negotiations, document your processes, and increase the value of your business. *All for just \$39.* So stop by your nearest software or business retailer and pick up a copy. *If you're not completely satisfied in 60 days, return it to JIAN for a full refund.* And if there's no retailer near you, call JIAN directly at 1-800-346-5426 (or find us online at [www.jianusa.com](http://www.jianusa.com)). Just make sure you get these powerful tools for your business soon.

Take control of your business quickly and cost-effectively with JIAN BusinessBasics™

## 4 QUANTEX QP6/300SM-3X

**PRO:** Affordable, generous feature set, best support policies rating

**CON:** Generic documentation

A combination of top-notch performance, a cheap \$2999 price, and a generous feature set earns the Quantex QP6-300SM3x a Best Buy position on this month's Power chart. This minitower sports a Pentium II-300 CPU and extras like a 56-kbps modem at

a price that's almost \$1100 less than similarly configured systems. In addition, the QP6/300SM-3x scores a PC WorldBench rating of 269, just one point short of the average score for a Pentium II-300 system.

This PC offers high-end components that rival the best. It's rare to find a sub-\$3000 system with a 6.4GB hard drive, 64MB of RAM,

and a 56-kbps modem. Like all Pentium II-300 computers, the QP6/300SM-3x includes an AGP graphics system. The 17-inch MAG InnoVision monitor that came

with our test machine has a good display and very intuitive tools for adjusting color and contrast. The system also includes Microsoft Office 97 Small Business Edition. ▶

WordPerfect 6.1 for Windows

Excel 7.0 for Windows 95

Paradox 5.0 for Windows

1-2-3 release 5 for Windows

**HOW WE TEST** All systems are tested with PC WorldBench, PC World's application-based benchmark. A higher PC WorldBench score is better. All PCs have Windows 95, and video resolution is set to 800 by 600 in 256 colors. We run automated scripts on six popular business applications, performing common tasks such as spelling checks, scrolls, saves, sorts, and recalculations. The PC WorldBench score is a sum of the weighted result of each script: Word (25 percent), Excel (20 percent), Picture Publisher (15 percent), Paradox (15 percent), WordPerfect (15 percent), and 1-2-3 (10 percent). For more details on our benchmark and how we run it, see PC World Online ([www.pcworld.com/testing](http://www.pcworld.com/testing)).

Quantex's documentation boasts serviceable illustrations but provides only generic PC information. However, the company's support policies are among the best in the business: They include a three-year warranty for parts and a one-year labor warranty, which are now the industry standard, plus 24-hour toll-free technical help. In our fax-back survey, *PC World* readers say the quality of Quantex support and the reliability of its systems are both good.

Gateway 2000 G6-300XL

## 5 GATEWAY 2000 G6-300XL

**PRO:** Blazingly fast, high-quality 19-inch monitor, great sound, very expandable

**CON:** Expensive, fair reliability rating

If you're looking for the fastest PC you can buy, you're gonna love the Gateway 2000 G6-300XL. From its Pentium II-300 CPU, which kicked it along to a record-setting PC WorldBench score of 272, to a big 19-inch monitor and AGP graphics, this system is state-of-the-art. And you pay for the privilege—\$3799, one of the highest prices on our chart.

The first thing we noticed about the G6-300XL was the crisp, impressive EV900 display that Gateway sent with it. It's built around a Hitachi tube and has a whopping 18-inch viewable area and a footprint smaller than some 17-inchers'. Driving this wonderful display is an AGP version of the STB Velocity 128.

The G6-300XL also sounds good. An Ensoniq ES1370 Audio PCI card and Boston Acoustics speaker/subwoofer combo delivers quality good enough to please even audiophiles. Only one caveat: The Ensoniq card steals from main memory to store its wavetable; the user may opt to use either 2MB, 4MB, or 8MB tables. This problem isn't major considering the machine's 64MB of RAM, but you may see a slight degradation in performance when a lot of apps are running.

Like all Gateway 2000 systems, the G6-300XL is well built. The full-size tower has plenty of elbowroom inside for repairs and upgrades; you'll find more available drive bays than you'll ever use. Not that you'll need to expand storage right away—

the fast 8.4GB Ultra DMA IBM drive and bus-master IDE controller should hold you for a while. The G6-300XL comes with the same software as the Gateway G6-233 in spot three: Microsoft Office 97 Small Business Edition, Microsoft Encarta 97, and a number of games. Rounding out the system are a Telepath 56-kbps x2 modem and a 12X-24X CD-ROM drive.

Gateway's support package includes a three-year warranty on parts and labor, plus round-the-clock tech support. Our readers rate Gateway's support quality as among the best but system reliability as only fair. The illustrated documentation is well written, and loads of help is also available on Gateway's Web site.

## New This Month

The following PCs made our Power Desktops chart for the first time this month. For brief reviews of previously tested PCs on the chart, visit our Web page ([www.pcworld.com/t20pcs](http://www.pcworld.com/t20pcs)).

## 8 GATEWAY 2000 E-3100 PII-266

**PRO:** Fast; SCSI CD-ROM drive and hard drive  
**CON:** Fair reliability rating, no sound card or modem at this price

The \$2889 Gateway 2000 E-3100 PII-266 is fast—and the combination of speed, excellent support policies, and top-notch support quality help it claim a position on our chart. The system doesn't come with a sound card or a modem; these omissions and the company's reliability rating of only fair prevent this machine from earning a higher spot.

Still, the E-3100 PII-266 has significant strengths. The stylish minitower comes standard with 64MB of RAM and a 4GB Ultra Wide SCSI hard drive. The small ATX motherboard includes an AGP slot, though the video card in our test system is a standard PCI board from ATI. The 17-inch monitor is sharper than most, and the on-screen controls are intelligently designed. The CD-ROM drive is a SCSI 12X Plex-

tor—one of the best drives in its class.

The documentation is well written, but the motherboard manual that came with our machine was for a different model than the one in the system. Gateway's three-year warranty covers parts and labor and includes free on-site service; phone support is available around the clock.

## 13 ACMA EXP PRO PII 266

**PRO:** Good documentation, Zip drive

**CON:** No software bundle, some internal clutter  
At \$2899, the latest minitower from Acma offers a few exemplary features, most specifically a Zip drive for extra storage and a 3Com/U.S. Robotics Sportster 56-kbps modem for speedier Internet connections. But the EXP Pro PII 266

Acma EXP Pro PII 266

is missing some key features that would place it higher on the chart: It doesn't come with extra software, the interior of the system is cluttered, and the company's support policies are subpar. And finally, although the system's performance is good, it's slightly below-average for the PII-266 processor class in our PC WorldBench tests.

The EXP Pro's design is a cut above your typical steel cube but not remarkable. We did like the thoughtfully designed hatch door on the front of the unit, covering the floppy drive, the 12X-16X Toshiba CD-ROM drive, and the Zip drive. The system case has a little more flex than we like to see. Large thumbscrews offer easy access to the interior, and with the Sportster modem and Sound Blaster AWE64 sound card installed, our system was left with two empty ISA slots. We had some difficulty locating the two free RAM slots; they're trapped behind the motherboard cables and the hard drive.

Acma provides well-organized, clear documentation for this desktop. System

and component information come in a handsome, sturdy box and are presented in file-folder fashion, with index tabs for quick reference. The company covers parts for three years and labor for ▶

Gateway E-3100 PII-266

**The most advanced technology  
is used to outperform the  
HP ScanJet 4c:**

- Faster scanning speed; full-color page in 74 seconds
- Bit Enhancement Technology (B.E.T.) that allows the scanner to capture more accurate colors and tones and provide smoother gradations
- Scans up to legal size
- Enclosed optical system for dust-free scanning; cold cathode lamp lasts ten times longer than a fluorescent lamp
- Bundled with Adobe® PhotoDeluxe™ or Adobe Photoshop® 4.0 image editing software and Presto!® PageManager® with OCR
- Advanced technology at an affordable price

**PRODUCTIVITY. CREATIVITY.  
THE ASTRA 1200S SCANNER  
GIVES YOU BOTH.**

The Astra 1200S does more than you ever thought a scanner could. It's the next generation of the award-winning S-12, and it uses Bit Enhancement Technology to provide crisp, clean images with amazing detail. The Astra 1200S not only helps you produce quality scans, but also send faxes and e-mail, OCR, make copies with UMAX Copy Utility, add text and images to your work, and create Web pages. There's no limit to how productive you can be with the Astra 1200S from UMAX.

Call us for more details at 1-800-331-8629,  
or visit us at [www.umax.com](http://www.umax.com)

**UMAX®**

one—standard for the industry. Acma's toll-free telephone support is a plus, but it's available just 10 hours a day, and only on weekdays. We don't have enough information from our reader fax-back survey to report on the reliability of Acma systems or the quality of its support.

## 14 NETIS STARBURST 266

**PRO:** Solid components, crisp monitor, good performance for its processor class

**CON:** Fair support policies, documentation isn't comprehensive

For a Pentium II-266 system with 32MB of RAM, the Netis Starburst 266 is a good deal: With a \$2390 price tag, it's almost \$750 cheaper than similarly configured systems. However, Netis's mediocre support policies keep this system relegated to

the lower half of our chart.

The Starburst is a basic unit. It probably comes with everything you need, but it

doesn't offer the last word in components. For example, the Matrox Millennium graphics card included with this machine pumps sharp graphics onto a clear 17-inch monitor—but the Millennium no longer holds a position on our Top 10 Graphics Boards chart. Similarly, the 3Com/U.S. Robotics Sportster 33.6-kbps modem used to rank on the Top 10 Modems chart, but it has been ousted by faster modems. The Starburst 266 comes with a 3.1GB hard drive—the smallest we've seen in a Pentium II-266 computer. The speakers that ship with the unit are generic, and the system does not come with any additional software.

The Starburst looks a little jazzier than your standard putty-colored box. The case is wide, shorter than your average minitower, and has decorative slats on the front. Inside, you'll find a relatively clutter-free environment: It's easy to access the open ISA and PCI slots, although the two available SIMM sockets are tucked behind a cable.

Support for the Starburst could be bet-

ter. The user guide that comes with the system is a slim, pamphlet-size booklet with illustrations but no index. The company offers only a one-year parts warranty, though labor is covered for three years. Toll-free phone support is available just 10 hours on weekdays and Saturdays. We don't have enough information in our reader fax-back survey to rate the quality of the support. Overall, this is a system to consider if you want a fast processor but don't want to spend a lot of money, and you're willing to live with the company's unknown support record and without cutting-edge components.

## 17 AMAX GFX PRO 266

**PRO:** Loaded, second processor socket

**CON:** Overpriced, minimal phone support

At \$3099, the Amax GFX Pro 266 isn't the cheapest or even one of the best values among Pentium II-266 systems. But with very good PC WorldBench performance and a substantial set of features, this machine earns a place on our chart.

The GFX Pro 266 system's finest asset is its bundled hardware. The sizable list of extras includes a 12X-24X CD-ROM drive, a 3Com/U.S. Robotics 56-kbps modem, and oversize speakers with good sound. The 100MB Zip drive is an exceptionally nice bonus for those users who often move images or other large data files from one PC to another. On the other hand, the GFX's 3.2GB EIDE hard drive is among the smallest provided by Pentium II-266 systems to date.

The motherboard has a slot for a second Pentium II processor and enough SIMM slots to hold a maximum 512MB of RAM, so this system could serve as a bare-bones workstation

if you want to upgrade later.

Amax's warranty covers parts for three years and labor for one. And at a time when many vendors are moving toward 24-hour, seven-day telephone technical support, Amax weighs in with a meager 9.5 hours on weekdays only. We have received insufficient reader responses to assess the company's support or its system reliability.

## 18 EVEREX STEPSTATION2

**PRO:** Very good speed, 24-hour tech support, 56-kbps modem

**CON:** Overpriced, mediocre speakers

This nondescript Pentium II-266 minitower is a one-size-fits-all power system. Top-notch speed, lots of room for expansion, and good-quality multimedia components are important for a chart-ranking PC, but the StepStation2's steep

\$3075 price pushes it down to the bottom half of the power ranks. It delivers multimedia with its 12X-

Everex StepStation2

24X Toshiba CD-ROM drive and Sound Blaster 32-bit audio, but these components are supported by mediocre, no-name speakers. Inside, there's plenty of room for expansion—four empty drive bays and four open PCI slots. Unfortunately, you'll have to remove the CPU in order use the free externally accessible 3.5-inch drive bay.

We encountered a couple of minor problems with the review system straight out of the box. First, the monitor's power cord is designed to plug into a socket on the back of the minitower instead of into the wall, but the necessary socket was absent from our machine. Also, when we first started up the system, Win 95 could not find the mouse even though it was plugged into the proper connector. Curiously, Win 95 then prompted us to install new hardware drivers for the PCI bus and the monitor (which we did). Once we restarted the system, everything was fine, but that kind of problem could be disconcerting to someone who just shelled out more than \$3000 for a new PC.

All in all, the StepStation2 is acceptable in most areas. It has good support policies and good speed, but it's a little pricey for what you get.

## Beyond the Top 20: Online

We evaluated these systems along with the others, but they didn't score high enough to reach the Top 20 Power Desktops chart. For write-ups, see PC World Online ([www.pcworld.com/t20pcs](http://www.pcworld.com/t20pcs)).

OUR TURBOCHIP 133 CAN  
**INCREASE**  
YOUR 486's  
PERFORMANCE BY

**250%.**

BUT WHY STOP THERE?

**DOES COMPUTING** on your 486 feel like you're driving in the slow lane? Sounds like it's time for the Kingston® TurboChip™ 133.

[www.kingston.com/ad](http://www.kingston.com/ad)

Benchmarks show that the TurboChip can increase system performance—of most 486-based SX and DX desktop systems—by up to 250 percent.\*

This is a performance boost equal to Pentium 75 processing power. But don't stop there. To further extend the life of your trusty

486, just add 16MB of Kingston memory. All this power for as low as \$200! More good news: TurboChip 133 is field tested and Windows NT® approved. To find out more about this ultimate upgrade solution, call (800) 588-5517. Or check out our Web site at [www.kingston.com/ad](http://www.kingston.com/ad).

In the future,  
monitors will be  
compact, powerful,  
and flexible — like the  
new Hyundai DeluxScan®  
reduced-depth monitor.

The 17% reduction in depth offered by the Hyundai DeluxScan HL7870S makes the promise of a small footprint monitor a reality. This revolutionary new display has the viewing area of a standard 17" monitor in a smaller, lighter package. Yet, its state-of-the-art technology gives you uncompromising performance and features, including 1280 x 1024 resolution, .27 dot pitch, and Advanced Digital On-Screen Controls — all at prices comparable with today's classic 17" monitors.

Experience the future with a new Hyundai DeluxScan reduced-depth monitor. *It's the shape of things to come.*

For more information on the DeluxScan reduced-depth monitor, or any of the products in the DeluxScan monitor family, visit the Hyundai Web site at [www.hen.com](http://www.hen.com) or call 1-800-568-0060

Dell Dimension M200a

while the M200a has only 16MB. If you regularly have more than a couple of programs open at once, spring for the extra \$99 or so that it will take to buy the M200a with 32MB of RAM.

With Microsoft Office 97 Small Business Edition included, this system is a good no-nonsense choice for the home or small office. However, we found that the 15-inch LS monitor included with our test unit lacked sharpness. Upgrading to the very good 800LS Trinitron monitor costs a mere \$49 extra, and the new 1000LS 17-inch costs only \$119 more.

The M200a's clean interior makes upgrading easy. Dell's documentation is well illustrated and indexed and has a handy glossary. But more than anything else, it's the company's top support and system reliability ratings (derived from our fax-back polls) that consistently keep Dell systems so high on our charts.

## 2 QUANTEX QP5/200 SM-1

PRO: Fast, affordable

CON: Some cable clutter

With a \$100 price drop to \$1699, the Quantex QP5/200 SM-1 earns a number two Best Buy. This machine delivers better-than-average Pentium MMX-200 performance, scoring a commendable 230 on our PC WorldBench test suite. If you have a few more dollars to spend, the Quantex QP5/166 SM-3 with a Pentium MMX-166 processor and a larger monitor is also a good buy; it costs \$200 more than the QP5/200. At \$2199, the QP5/233 SM-3 with a Pentium MMX-233 chip is worth considering too—it has good performance for its processor class and comes well equipped with features such as a 4GB hard drive, a 17-inch monitor, and the high-quality Matrox Millennium II graphics card with 4MB of WRAM.

The QP5/200 SM-1 offers many rich features. Inside, you'll find the impressive Matrox Mystique 220 video adapter with 4MB of fast SGRAM. You also get Matrox's Rainbow Runner video-capture

## This Month's Best Buys

### 1 DELL DIMENSION M200A

PRO: Inexpensive for a PMMX-200, excellent support, 56-kbps x2 modem

CON: Monitor could be sharper

The Dell Dimension M200a holds the number one spot for the third month in a row. This machine

offers all the essentials: solid performance, a 12X-24X CD-ROM drive, integrated sound and graphics, a 56-kbps x2 modem, and superb support and system reliability ratings. Other Pentium MMX-200 PCs deliver greater speed than the M200a. With a PC WorldBench score of 219, the M200a is about 5 percent slower than the average PMMX-200 system, but most PMMX-200's have 32MB of RAM,

	SYSTEMS	CPU	RAM (MB)	Secondary cache (K)	Hard drive (GB)	Graphics adapter	Video RAM (MB/type)	Monitor tube/viewable diagonal (inches)	Screen pitch (mm)	CD-ROM drive speed

software and TV Tuner module. The 15-inch MAG InnoVision monitor provides good image quality and easy-to-use controls. Audio is handled capably by a 16-bit Ensoniq sound card and a pair of Altec Lansing ACS 45 speakers. The 56-kbps fax-modem, which uses the K56flex standard from Rockwell-Lucent, offers the potential for swift Internet downloads. The software bundle includes Microsoft Office 97 Small Business Edition and a nice selection of games, among them Demolition Derby, a car-racing CD-ROM.

As with other Quantex systems that we've seen, the QP5/200's case is sturdy and the interior designed for expandability. Our test unit

had plenty of space for adding RAM, expansion cards, and drives. Our only complaint was with the few stray cables left hanging loose.

The system manual is serviceable but generic—it's the same manual that comes with most Quantex PCs. Toll-free technical support is available around the clock. Our anonymous calls got responses within 5 minutes and revealed a friendly, patient support staff. The warranty covers parts for three years and labor for one,

standard in the industry today. The current collection of responses from our ongoing fax-back survey gives Quantex a rating of good for both system reliability and support quality.

Quantex QP5/200 SM-1

### 3 QUANTEX QP5/233 M-3

**PRO:** Great software bundle, inexpensive for what you get, lots of open DIMM and SIMM sockets

**CON:** Keyboard feels spongy, weak documentation, generic monitor

You've heard the expression "Show me the money." With Quantex's QP5/233 M-3, you won't have to show too much. The QP5/233 M-3 is not only quick and feature rich, it's *cheap*: At \$1949, it costs a few hundred dollars less than some similarly configured systems, like the Gateway 2000 GP5-233 in spot ten. But you don't get just inexpensive silicon—Quantex configures this minitower with lots of power and industry-standard components.

With a PC WorldBench score of 236, the QP5/233 M-3 is a little faster than the aver-

<sup>1</sup> Five years on motherboard, memory, video, and CPU; three years on other parts.

age Pentium MMX-233 PC. And this QP5/233 has a number of features we'd expect with more expensive machines, including a 56-kbps modem and a 12X-24X CD-ROM drive. The QP5/233's graphics subsystem is decent: The STB Nitro 3D card is fast with 2D applications, but it's only fair when it comes to gaming. The monitor, a generic 17-inch, doesn't have a lot of bells and whistles. The Windows 95 keyboard is a bit spongy, but Quantex includes speakers and a microphone with this system, along with a quality Microsoft mouse.

Aesthetically, there isn't much to rave about. The QP5/233 M-3's standard minitower case is nearly identical to all the

Quantex QP5/233 M-3

other traditional taupe-colored boxes on the shelf. However, if you plan to upgrade down the road, this Quantex offers plenty of room inside. Our QP5/233 had two open DIMM sockets and two free SIMM sockets—ideal for changing EDO RAM to faster SDRAM. Four free slots for add-in boards plus three open drive bays round out your expansion options.

While Quantex doesn't skimp on features, it does fall short in the documentation it provides. The mediocre manual is the same generic book that's packaged with most Quantex systems. Its screen shots and diagrams help somewhat, but they don't provide much detail on this par-

ticular model or processor type. To the company's credit, the standard support policies include a three-year warranty for parts and one year for labor, plus 24-hour toll-free technical support. According to readers, system reliability and the quality of Quantex support are both good.

#### 4 MICRO EXPRESS MICROFLEX-K5/5166D

PRO: Quick, good features for the price

CON: Documentation could be better

If you need good performance, full multimedia, and a modem—and you have only a few bucks to spend—the \$1259 Micro Express MicroFlex-K5/5166D could be the PC for you. An example of how AMD's fast, inexpensive K5 and K6 CPUs are provid-

# Project Scheduling Made Easy.

New  
Version 5.0

## Trade Show Schedule

**It's easy to use.** FastTrack Schedule is intuitive and flexible, meeting all your project scheduling needs. It works how you do, letting you schedule projects quickly, easily, but with the control your projects require. You don't have to be an expert in project management to keep your projects organized; you just need the right tool to get it done. It's that simple.

**It's easy to learn.** Can you afford to waste time learning software over and over again? Now you don't have to. With online help systems, tool tips, and bubble help, you'll have quick solutions at your fingertips. And with FREE and UNLIMITED technical support, you'll always stay on track.

**It's easy to buy.** We give you a free demo to try the software. If you like it, call us and we'll activate your demo on the fly. Plus FastTrack Schedule is 1/3 of the cost of most project management software, so it will fit your budget as well. Call today for a free demo or download it from our web site!

Circle 107 on reader service card

ing much-needed competition for Intel's processors, this PC costs about \$450 less than its Pentium MMX counterparts yet performs on par with them. In fact, it scored 208 on our PC WorldBench test—only about 5 percent slower than the number one Dell Dimension M200a, a Pentium MMX-200 machine, and only 5 percent slower than the average Pentium MMX-166 system. It's also well equipped for the price, with 32MB of RAM, a

decent-size hard drive, a generic 33.6-kbps modem, a Superior Sound32 sound card and speakers, and a 15-inch Princeton monitor.

This minitower is nicely designed, with a clearly labeled on/off switch and an easily removable cover. The interior is one of the cleanest we've seen—no cable clutter to speak of, making it easy to access the three free

MicroFlex-K5/5166D

slots and the four available memory sockets.

You get separate booklets for Windows 95 and the peripherals but no system-specific guide. If you already know how to set up a PC, these manuals are sufficient; if not, they won't help much. Technical support is available toll-free 24 hours a day, and Micro Express's four-year parts and

Word 7.0 for Windows 95

Picture Publisher 6.0 for Windows 95

WordPerfect 6.1 for Windows

Excel 7.0 for Windows 95

Paradox 5.0 for Windows

1-2-3 release 5 for Windows

**HOW WE TEST** All systems are tested with PC WorldBench, PC World's application-based benchmark. A higher PC WorldBench score is better. All PCs have Windows 95, and video resolution is set to 800 by 600 in 256 colors. We run automated scripts on six popular business applications, performing common tasks such as spelling checks, scrolls, saves, sorts, and recalculations. The PC WorldBench score is a sum of the weighted result of each script: Word (25 percent), Excel (20 percent), Picture Publisher (15 percent), Paradox (15 percent), WordPerfect (15 percent), and 1-2-3 (10 percent). For more details on our benchmark and how we run it, see PC World Online ([www.pcworld.com/testing](http://www.pcworld.com/testing)).

labor warranty and free on-site service are very attractive. However, we don't have enough data to compile a reliability and support profile for Micro Express. So this PC is best bought by those who have PC savvy or a good MIS department.

## 5 CYBERMAX POWERMAX

**PRO:** Good performer, inexpensive, great sound, good support policies

**CON:** Loose cables

AMD's K6 chip strikes again, this time inside the multimedia-wise CyberMax PowerMax system.

Game players and multimedia enthusiasts will want to take a long look at this bargain-priced tower built around the 166-MHz version of AMD's MMX-comparable K6 processor. With a PC World-Bench score of 223, the PowerMax is a match for some Pentium MMX-200 PCs—in fact it's less than 3 percent slower than the average PMMX-200 machine we've tested. But its price is the real clincher: The PowerMax sells for just \$1349—almost \$400 cheaper than the average Pentium MMX-166 system.

For fast images, the PowerMax comes equipped with a Matrox Mystique 220 graphics card that has 4MB of SGRAM. And though we've often complained about Princeton's 17-inch monitors, the EO50 15-inch model that came with our test system provided a superior picture. CyberMax even throws in a couple of 3D game titles, as well as Corel WordPerfect Suite 7 for the business types among us.

The PowerMax includes Ensoniq's Audio PCI sound system, which uses system memory to play wavetable MIDI sounds. This arrangement can slow PC performance by forcing Windows 95 to use virtual memory. (Keep in mind, too, that games requiring a dedicated DOS session can't access the Audio PCI card's wavetable talents.) A pair of Altec Lansing ACS 45 speakers and a subwoofer supply your audio experience with punch.

The rugged chassis leaves lots of room for expansion—five slots and two internal bays are free. But we did find the audio

cables for the CD-ROM drive and modem hanging loose. This isn't a major concern, but the ends should have been tied off. For adding RAM, four SIMM sockets and one DIMM socket are available.

The user guide provides little information about the overall system, leaving you with just the component manuals. CyberMax's support policies are strong, however, with a three-year warranty on parts and one-year coverage on labor, round-the-clock toll-free technical support, Internet help pages, and one year of free on-site service. However, we lack enough data from our fax-back surveys to assess the quality of CyberMax's support and system reliability.

MicroFlex-F210A

## New This Month

The following PC made our Budget Desktops chart for the first time this month. For brief reviews of previously tested PCs on the chart, visit our Web page ([www.pcworld.com/t20pcs](http://www.pcworld.com/t20pcs)).

## 6 MICRO EXPRESS MICROFLEX-F210A

**PRO:** Inexpensive, fast, excellent support policies

**CON:** CPU is overclocked

With a \$1349 price tag, the Micro Express MicroFlex-F210A is one of the cheapest systems on our chart. But it wasn't the price that surprised us—it was the performance.

CyberMax PowerMax

This is the fastest AMD K6-200 system we have tested: The average PC WorldBench score for a system in this class is 238, but the MicroFlex-F210A

scores a whopping 247. That's easily as fast as some Pentium II-233 and AMD K6-233 systems we've reviewed.

What makes this PC so quick? The system is overclocked. Basically, that means Micro Express installed an AMD K6-200 CPU and pushed its clock speed up, so it performs more like an AMD K6-233. Although overclocking will make your PC run faster, it can also cause problems. Lockups, overheating, system crashes, and other glitches both small and large can occur when CPUs are run faster than

their rated speed. Micro Express says it has tested the MicroFlex-F210A extensively, and the overclocking doesn't damage the system—and we didn't run into any problems during our testing. Never-

theless, it's a case of buyer beware. (As insurance, Micro Express offers new four-year warranties on parts and labor.) Overclocking might also prevent legacy PCI cards from

running properly. If so, you can just change the jumpers and reset the PC so it's no longer overclocked—but, of course, you'll lose the speed boost.

In addition to extra speed and a low price, the F210A has some other notable features: An ATI 3D Pro Turbo PC2TV graphics card with 4MB of SGRAM—a Best Buy on our Top 10 Graphics Boards chart—pushes images to a clear 15-inch Princeton monitor. The system also comes with basics like a 33.6-kbps modem and a Toshiba CD-ROM drive that spins from 12X to 16X. There's nothing special about the look of the F210A on the outside, but the interior is very clean, with the cables tied off neatly. It's easy to access the two free DIMM sockets and the three free ISA slots.

Although we don't have enough information to evaluate the quality of its support, the company has some of the best support policies around. In addition to the new four-year warranties, Micro Express offers round-the-clock toll-free technical support. However, the limited number of readers who responded to our fax-back survey say the reliability of their Micro Express systems is only fair. ▶

## Beyond the Top 20: Online

 We evaluated these systems along with the others, but they didn't score high enough to reach the Top 20 Budget Desktops chart. For write-ups, see PC World Online ([www.pcworld.com/t20pcs](http://www.pcworld.com/t20pcs)).

Trying to get your head around

# AGP?

ATI has long been leading the way in 3D chip and board manufacturing - delivering break-through technology to top OEMs including IBM, DELL, SONY, Gateway, ACER and NEC. So, when Intel launched AGP, who else would you expect to be leading the way with fully-implemented AGP solutions except ATI?

**ATI delivers all the benefits of AGP right now.**

Offering performance up to 4 times faster than other AGP solutions, ATI is the only graphics vendor currently supporting AGP Texturing capability recommended in Intel's AGP specification. ATI's fully-implemented AGP solution achieves higher quality, state-of-the-art 3D graphics, with even richer (hi-res) textures for greater detail, more textures for richer scenes and enhanced performance.

And ATI's XPERT graphic board family, powered by 3D RAGE PRO, also supports the fastest AGP protocol, AGP 2X.

ATI can provide answers and solutions to all your AGP questions. Just as ATI is the leader in PCI, ATI is taking the lead in AGP technology. Being first is second nature

#### AGP 3D Performance Comparison

to ATI. The first graphics accelerator, the first DirectDraw, and Direct 3D drivers.

ATI can help you get your head around AGP painlessly and profitably. For more information on ATI's AGP solutions, check out our website at [www.atitech.com/pcwld](http://www.atitech.com/pcwld) or call us at 905-882-2600.

5	Gateway 2000 Solo 2300SE 800/846-2000 www.gateway.com	2	Nov 97	\$2549	Pentium-133	Speedy for standard Pentium, longest battery life on Budget chart, modem.
	 Best Buy	See features chart, page 326; test report, page 326.				

<sup>1</sup> Includes computer, adapter, power cord, and floppy drive or CD-ROM drive.

<sup>2</sup> Insufficient data to give a rating.

THE NEW GATEWAY 2000 Solo 2300XL is the second notebook we've tested with a Pentium MMX-233 processor, and it's the fastest portable we've seen. Because of its speed and very good features, it earns a number one Best Buy on our Power Notebooks chart. But speed isn't everything. The slowest notebook to claim a place on this month's charts is the Toshiba Satellite 225CDS, number four on the Budget Notebooks chart. This Pentium-133 machine is 33 percent slower than the speedy Solo 2300SE, but with a competitive price and good features, it still earns a slot on the chart.

## POWER NOTEBOOKS

## This Month's Best Buy

## 1 GATEWAY 2000 SOLO 2300XL

**PRO:** Fastest notebook to date, longest-lasting battery, good software bundle

**CON:** Expensive, below-average support quality

Gateway 2000's latest Pentium MMX-233 notebook has nearly all the qualities we like in a laptop:

knockout speed, long battery life, and a great selection of software. The Solo 2300XL uses the same CPU as its 9100XL sibling, which earned second-place Best Buy last month, but the 2300XL is even faster and \$850 cheaper. It delivered an exceptional PC WorldBench score of 244—the highest to appear in our notebook charts. Though the PMMX-233 chip runs fast, it also conserves power: The Solo 2300XL's lithium ion battery lasted

for almost 9 hours in our tests. If you can afford to shell out the \$4049 this Solo commands, you'll be the owner of one of the most

impressive notebooks we've ever seen.

The solidly built Solo 2300XL comes with a handsome collection of features, including a top-notch 3Com/U.S. Robotics 56-kbps PC Card modem, a 10X CD-ROM drive, a 2.1GB hard drive, and a large selection of software, ranging from business applications like Microsoft Office 97 to reference titles such as Bookshelf and Automap Streets Plus. The built-in speakers produce clear sound, unless you crank up the volume too high. Gateway also provides headphones, in case you want to listen to audio CDs or play CD-ROMs when your neighbors prefer quiet.

This notebook is also easy on the eyes and not too hard on the hands. Its 12.1-inch active-matrix screen runs at 800 by 600 resolution and produces bright, clear,

color-rich images. It has a good-size keyboard and a responsive touchpad. However, we found the keys too flat—they felt a little slippery when we typed.

Like all Gateway systems, this unit comes with a comprehensive manual. There's an index for quick reference and helpful, well-labeled photos. The company backs its notebooks with a one-year parts-and-labor warranty. If you need technical support, Gateway reps are available to answer your questions around the clock, but the quality of support isn't the best: Our readers rate it as below average. They rate the reliability of Gateway notebooks as average.

The Fujitsu LifeBook 435Dx, a no-frills corporate notebook, provides fast performance at a bargain \$1799 price—a potent combination. The secret: Intel's low-priced PMMX-133, with the lowest clock speed yet of any mobile Pentium MMX chip.

Despite this lower clock speed, the LifeBook posted an impressive PC WorldBench score of 192—about as fast as the average PMMX-150 notebook. Perhaps even more important, the LifeBook gives you cost-effective access to the growing selection of MMX-enhanced software—this is a real plus if you don't want to pay a lot for a new notebook but want it to have a long and useful life.

The LifeBook is not only quick, it's also enjoyable to operate. The Windows 95 keyboard is comfortable to type on, even if the keys click a little too loudly. We found the pointing device easy to use, too, and we especially liked being able to scroll through a document by sliding a finger up

and down the touchpad's inside right edge. The LifeBook is well built: It has a sturdy design, with little flex in either the case or the screen panel.

High performance, a good price, good ergonomics, and a solid case make the LifeBook a Best Buy, but it still has room to improve. The 12.1-inch dual-scan display is a little dark, and colors lack vibrancy.

Also, the stereo speakers sound a little tinny unless you keep the volume low.

At 8.4 pounds, the LifeBook weight is only average for a budget notebook, and the system can't run both the internal floppy drive and

the internal CD-ROM drive simultaneously. (However, you can run the floppy drive externally while the CD-ROM drive occupies the internal bay.) Battery life is good at almost 3 hours and 45 minutes, while the 1.3GB hard drive is standard these days. You'll have to pay extra for applications—the LifeBook doesn't come with a software bundle. ▶

\*Best Buy ● Yes ○ No <sup>1</sup> Includes computer, adapter, power cord, and floppy drive or CD-ROM drive.

<sup>2</sup> Downloads only, uploads at 33.6 kbps; uses 3Com/U.S. Robotics' x2 technology.

Fujitsu generally does a good job of supporting its notebooks. The LifeBook's user guide is a little out of date (for example, it states that the CPU is a Pentium-120), but it's compact, easy to read, and well supported with diagrams. Numerous caution notes help novices steer clear of time-consuming errors.

The company's warranty for parts and labor lasts one year. Although the four-day guaranteed turnaround on repairs is longer than we like, toll-free technical phone support is available around the clock. We don't have enough fax-back survey results to report on Fujitsu's support or system reliability.

## RUNNERS-UP

## Beyond the Top 10

Twelve of the 13 notebooks we tested this month did not earn a position on our charts. Several, though, came close.

The **Panasonic CF-35**, for example, is fast and nicely designed but missed the charts mostly because of its relatively high price—\$3860. It performed heroically in our battery-life tests, lasting for nearly 8 hours on one battery charge. Our unit was packaged with a 10X CD-ROM drive, a clear 12.1-inch active-matrix screen, and a good-size 2.1GB hard drive, yet it weighed

only 5.5 pounds. Unfortunately, it did not include a modem—surprising given the price. Its PC WorldBench score of 194 is above average for a Pentium MMX-150.

The **Dell Latitude LM M133ST** is also a near-hit. It's a slower, less-expensive sibling of the Latitude LM M166ST, which takes spot number two on our Power Notebooks chart this month. These two systems share the same case design, the same comfortable keyboard, and the same sharp 12.1-inch active-matrix display, but the M133ST has less RAM (16MB versus 40MB) and a smaller hard drive (1.6GB versus 2.2GB). At \$2599, the LM M133ST costs \$750 less than its power-ranking rel-

## BEST BUY NOTEBOOK PCs

## TEST REPORT

**HOW WE TEST** All systems are tested with PC WorldBench, PC World's application-based benchmark. A higher PC WorldBench score is better. All PCs have Windows 95, and video resolution is set to 800 by 600 in 256 colors. We run automated scripts on six popular business applications, performing common tasks such as spelling checks, scrolls, saves, sorts, and recalculations. The PC WorldBench score is a sum of the weighted result of each script: Word (25 percent), Excel (20 percent), Picture Publisher (15 percent), Paradox (15 percent), WordPerfect (15 percent), and 1-2-3 (10 percent). For more details on our benchmark and how we run it, see PC World Online ([www.pcworld.com/testing](http://www.pcworld.com/testing)).

<sup>2</sup> First year.

ative, but it's still too expensive for a place on the Budget chart. On the other hand, it's very quick—its PC WorldBench score of 193 is the highest of any Pentium MMX-133 portable we've tested.

The **Sceptre Soundx S5500** is another noteworthy system that didn't make the chart this month. As one of only three Pentium MMX-233 notebooks that we've tested, it's part of a pretty elite company. However, unlike the other two PMMX-233 notebooks—Gateway's Solo 2300XL and Solo 9100XL—the Soundx S5500 doesn't have the support policies needed to earn a spot on the Top 10. Granted, this notebook does produce excellent performance: With a PC WorldBench score of 237, it's fast. However, even with 80MB of RAM, it's slower than the other Pentium MMX-233 notebooks. Its list of features includes such bragging material as a large 13.3-inch screen and a speedy 12X-20X CD-ROM drive.

A couple of other notebooks fell way off the charts but still deserve mention. One is the **IBM ThinkPad 765D/9546-49H**. Historically, ThinkPads don't often claim chart positions. They're typically sturdy and well designed, but they don't come cheap. The 765D is no exception: With a price tag of \$5499, it's the most expensive notebook on our rolls.

The ThinkPad 765D surprised us on several counts, though. With a Pentium MMX-166 processor and a PC WorldBench score of 211, this system delivers plenty of processing power, but you won't get far on its battery. In our tests, the 765D wrung only about 2.5 hours from the lithium battery before we had to plug the computer in.

The 765D is also heavier than previous ThinkPads we've seen, most of which are designed to be the ultimate in portability: lightweight, slender systems without a great deal of built-in equipment. But the 765D's built-in CD-ROM drive pushes its weight up to 8 pounds. (As with most ThinkPads, you can attach the floppy drive externally.) While 8 pounds is an average weight for a notebook, a key attraction of most ThinkPads—and very probably the reason business travelers are willing to pay high prices for them—is their extra portability. The 765D, on the other hand, lacks this advantage and is like many another sturdy portable—except for its price.

Another notable notebook in our long list of runners-up is the **Toshiba Satellite Pro 440CDX**. Toshibas are generally good systems—this handsome gray model has a comfortable keyboard and a decent dual-scan screen. Like the ThinkPad, the

440CDX is designed so you won't have to continually keep swapping the CD-ROM drive and the floppy drive; instead, you can attach one drive externally. However, this system still doesn't have the star quality that's needed to claim a spot on our Budget Notebooks chart. With a Pentium MMX-133 processor, the 440CDX is the fastest Satellite Pro that we've tested, but it still manages to achieve only average speed for its processor class. In our tests, its 3-hour battery life was underwhelming, as was its minimum traveling weight of nearly 8 pounds. Most important, though, you just don't get enough machine for your money: We were disappointed that this \$2499 Toshiba didn't come with a modem. ■

## Beyond the Top 10: Online

 We evaluated these systems along with the others, but like the other runners-up, they did not score high enough to reach the Top 10 Notebook PCs chart. For write-ups, see PC World Online ([www.pcworld.com/t20pcs](http://www.pcworld.com/t20pcs)).

## Meet the Micron NetFRAME servers.

With the introduction of our new Micron NetFRAME servers, you'll get the latest server technology custom-built for thousands of dollars less than you might expect.

### Building on a solid reputation.

When Micron acquired NetFRAME Systems, Inc. this year, we were ready to build on their stellar reputation and proven experience. NetFRAME has designed enterprise-class servers since 1987 with one goal in mind: to deliver an unprecedented ability for businesses and corporations to use their networks for maximum business advantages.

### Features that serve you right.

The Micron NetFRAME MV5000 server gives you enterprise-level features at a mid-range price point. The MV5000 includes the latest features, and you'll appreciate the security and high availability of fault-tolerant components including hot-swappable and redundant power supplies. The entry-level Micron NetFRAME LV2000 server delivers integration and stability at a low price. And, we can even pre-install Oracle network software, the longtime leader in database management, so you can effortlessly get your network up and running. In addition we offer NetFRAME NF9008 and NF9016 series providing excellence in enterprise class servers.

Call us today for more on the new Micron NetFRAME servers!

## *another compatibility headache*

Microsoft Office 97 is packed with hot new features that make it number one. But those same features make Office 97 file formats completely incompatible with previous versions of Office. Or with just about anything else for that matter.  
*It's enough to make you want to cry!*

### ***Conversions Plus to the rescue.***

As always, DataViz, the file compatibility experts, are here to help. Introducing new **Conversions Plus® 4.0**, the answer to all your file conversion needs. Loaded with over 1,000 file translation combinations, **Conversions Plus** translates hundreds of word processing, spreadsheet, graphic and database file formats. Quickly and accurately. Between many different Windows programs or between Windows and Macintosh. So it's the ideal remedy for this incompatible world we live and work in. New **version 4.0** also includes **e-attachment Opener™**, an amazing program which converts garbled e-mail messages back into their original file formats. And **MacOpener®**, a nifty utility for reading and writing Macintosh disks on your PC.  
*How's that for a set of tools to solve any file access problem. Painlessly.*

**DATAVIZ**

For details, call 1.800.270.0030 ext. 118 or visit our web site at <http://www.dataviz.com/cpw7>

**And find out for yourself that with DataViz, there are no dead ends.**

**Runs on Windows 3.1, Windows 95 and Windows NT.**

# TOP 10 HOME PCs

	POWER SYSTEMS	Last month	Month tested	Street price (9/15/97)	Comments
1	 <b>Dell Dimension XPS M233s</b> 800/388-8542 www.dell.com	2 <sup>1</sup>	Sept 97	\$2299	<b>PRO:</b> Reasonably priced with recent \$80 reduction, loaded with hardware, very fast; great choice as a powerful home office machine. <b>CON:</b> Very limited software bundle.
2	<b>Micron Millennia Mme with Fusion 3D</b> 888/634-8799 www.micron.com	4 <sup>1</sup>	Oct 97	\$2689	<b>PRO:</b> Very fast machine with a meaty configuration and a bunch of games; suitable for demanding home office tasks and family fun. <b>CON:</b> Rather on the pricey side.
3	<b>HP Pavilion 8180</b> 800/724-6631 www.hp.com/info/pchome1	—	NEW	\$3298	<b>PRO:</b> Superfast, easy setup, very substantial hardware; great for home office duties and family entertainment. <b>CON:</b> Expensive (despite recent \$400 price drop), so-so support rating.
4	<b>HP Pavilion 8140</b> 800/724-6631 www.hp.com/info/pchome1	—	NEW	\$2098	<b>PRO:</b> Very reasonably priced (with recent \$200 price drop), easy setup; suitable for basic home office applications. <b>CON:</b> Slowest machine in power section, so-so support rating.
5	<b>HP Pavilion 8160</b> 800/724-6631 www.hp.com/info/pchome1	—	Oct 97	\$2598	<b>PRO:</b> Loaded with hardware features, easy setup; suitable for home office applications and family computing. <b>CON:</b> Second slowest machine on chart, a tad pricey, so-so support rating.
<b>BUDGET SYSTEMS</b>					
1	 <b>Gateway 2000 G5-166</b> 800/846-2000 www.gateway.com	1 <sup>1</sup>	Nov 97	\$1499	<b>PRO:</b> Very low price, with recent \$100 price decrease; includes color printer; suitable for home office tasks and family fun. <b>CON:</b> Lacks power for high-end multimedia titles, so-so reliability rating.
2	<b>Gateway 2000 G5-200M</b> 800/846-2000 www.gateway.com	3 <sup>1</sup>	Nov 97	\$1948	<b>PRO:</b> Very fast machine with meaty hardware features for a good price. <b>CON:</b> Most expensive budget system, so-so reliability rating.
3	<b>HP Pavilion 3100</b> 800/724-6631 www.hp.com/info/pchome1	—	NEW	\$1298	<b>PRO:</b> Very low price, supereasy setup, great for basic computing tasks. <b>CON:</b> Comes with small monitor; so-so support rating.
4	<b>CyberMax PowerMax A16 233</b> 800/437-4596 www.cybmex.com	—	NEW	\$1749	<b>PRO:</b> Great price for fastest budget machine on the chart. <b>CON:</b> Company is not as well known as others; comes with older version of Corel WordPerfect Suite.
5	<b>Monorail 7366e-PR166</b> 888/880-7245 www.monorail.com	—	NEW	\$1299	<b>PRO:</b> Tiny footprint, supereasy setup, good price. <b>CON:</b> Company is new to PC business, so we've no reliability or support data; no software bundle; not suitable for gamers; slowest PC on chart.
	 <b>Best Buy</b>				

<sup>1</sup> Ranking on Top 5 Home PCs.<sup>2</sup> Insufficient data to give a rating.

## WELCOME TO OUR BRAND-NEW Top 10 Home PCs.

You asked for it, and you got it: In response to the growing popularity of the former Top 5 Home PCs among our readers, we're doubling coverage of home PCs. Starting this month, we'll test and rate the top 5 power systems and the top 5 budget systems. When it comes to home computers these days, one size definitely does not fit all.

That \$3000 muscle machine with the huge hard disk, mountains of memory, and superfast CPU may be just the ticket for gaming fanatics or home office workaholics. But if you've got humbler needs, or if you're buying a second home computer, you could save some serious dollars by choosing a cheaper system. Read on.

In our new format, performance carries more weight for power systems (those costing more than \$2000), and price is weighted more heavily for budget PCs. Both categories place most emphasis on reliability and support.

Dell Dimension XPS M233s

## POWER SYSTEMS

THE TOP OF THE POWER chart this month belongs to Dell's Dimension XPS M233s. This blazingly fast Pentium MMX-233 packs a 4.2GB hard drive, a 17-inch monitor, and an Iomega Zip drive, all for a reasonable \$2299. But you get only Microsoft Office 97 Small Business Edition and either Encarta 97 or Bookshelf 97. It's an excellent machine if you're looking for a powerful foundation for your home office.

If you're worried about obsolescence and you want to conserve cash up front,

you may want to check out Dell's unique new 24-month consumer lease policy (800/753-9974).

In second place is Micron's Millennia Mme with Fusion 3D. It's very fast and comes with a Pentium MMX-233 CPU, a 17-inch monitor, and an Iomega Zip drive. It's slightly pricey at \$2689 but is a suitable system for home office tasks and family entertainment.

In third spot is HP's powerhouse: the Pentium II-266-based Pavilion 8180. At \$3298 it's not cheap, but it has super performance—its PC WorldBench score of 255 is the highest on this chart. The 8180 comes with a wireless mouse and HP's new multimedia keyboard. It's a great choice for home office duties, and it comes with a bunch of family software titles.

HP's \$2098 Pavilion 8140 is much more affordable than the 8180, but it's nowhere near as fast or as feature laden. The fourth-place 8140 sports a Pentium MMX-200 processor, 32MB of RAM, a 15-inch monitor, and HP's multimedia keyboard. This machine will serve you well

# SCORECARD

★ Overall rating	PC WorldBench score/rating	Price	Reliability/support	Setup	Features	Reader service number
94	242/outstanding	inexpensive	best/best	fair	Pentium MMX-233, 32MB of SDRAM, 4.3GB hard drive, 8X-16X CD-ROM drive, 17-inch monitor, 33.6-kbps fax-modem, Iomega Zip drive.	611

for basic home office applications and entertainment.

Rounding out the top five power machines is yet another HP Pavilion—the 8160. Despite the 8160's meaty configuration, its PC WorldBench score of 221 is 20 points behind that of the next fastest PMMX-233 machine, Micron's second-place Millennia. At \$2598, the 8160 is a little bit pricey, but it's a good option if you're looking for a system to handle home office and family computing needs.

## BUDGET HOME PCS

TOPPING THE BUDGET list this month is Gateway 2000's G5-166, which comes with Canon's BJC 250 color printer and a 15-inch monitor. The package is an all-around fabulous deal for \$1499. The system's Pentium MMX-166 CPU and 16MB of SDRAM may lack the power for super-demanding action games, but it's a great machine for home office duties, surfing the Internet, and tons of family fun.

Gateway 2000 G5-166

At number two is Gateway's Pentium MMX-200-based G5-200M. Faster and more expensive than its Best Buy cousin, the G5-200M comes with a larger 4GB hard drive, 32MB of RAM, and a 17-inch monitor. Its \$1948 price is very good for such a speedy PC—the second fastest on our Budget chart. It's a great low-cost choice for home office and family computing.

In third place is the first real budget offering we've seen from HP. The small-frame Pavilion 3100 comes with a Pentium MMX-166 processor, 16MB of SDRAM, a 2GB hard drive, and an 8X-16X CD-ROM drive. It's very easy to set up, and the \$1298 price includes a 14-inch monitor, but this is the second-slowest system on the Budget chart. The 3100 is ideal as a second family PC, as long as computing needs are on the light side.

In fourth place is CyberMax's PowerMax A16 233. It's the fastest PC on the Budget chart and loaded with features for

just \$1749. The K6-233-based PowerMax has 32MB of RAM, a 6GB hard drive, and a 17-inch monitor. Outfitted with Corel's WordPerfect Suite 7 and Compton's Encyclopedia, this system is a great choice for demanding home office duties if you don't want to shell out too much cash.

Monorail's Star Trek-like 7366e-PR166 all-in-one system is a snap to set up or move: Simply unpack, hook up the keyboard and mouse, and you're ready to roll. The CPU is mounted behind a notebook-style 10.4-inch flat panel display. The system costs a low \$1299, but it doesn't come with any software, and it's very slow. With an AMD K5-PR166 processor (it's equivalent to a P-166), the 7366e crawled through our PC WorldBench tests, posting a score of 164. But if you're tight on space and need a computer for simple tasks, this could be the one for you.

**NEW COATED INKJET PAPER FROM  
GREAT WHITE GIVES YOU GREAT REDS, GREAT  
BLUES, GREAT GREENS, GREAT PURPLES,  
GREAT...WELL YOU GET THE IDEA.**

If you're looking for coated inkjet paper that will give you bright, sharp, vibrant color reproductions, let us give you a fin... I mean, let us give you a hand.

To get brilliant blues, great greens, remarkable reds and outrageous oranges, you've got to start with a great white. Great White® Recycled Content Glossy or Matte Coated Inkjet Paper, that is. Or as we call it "Shark Paper." Great White performs as well as virgin paper. So you won't have to be concerned about it jamming. It's worry free. Which means Great White is as good for your needs as it is for the environment.

Remember, the quality of the color you get out of your printer depends on the quality of the paper you put in and nothing beats shark paper.

For information on where to purchase Great White paper products call toll-free 1-888-GR8-WHITE.

## TOP 10 PRINTERS

	MONOCHROME PERSONAL PRINTERS	Month tested	Street price (9/1/97)	Overall rating	Speed for plain text (ppm)	Speed for full-page graphics (ppm)	Comments	Reader service number
1	 <b>Minolta PageWorks 6L</b> 888/264-6658 www.minoltaprinters.com	NEW	\$299	81	5.2	3.2	<b>FEATURES:</b> 6-ppm laser. Standard 256K of RAM, 600-by-600-dpi maximum resolution, 150 sheets input, 100 output. <b>PRO:</b> Good text quality; easy to use; sturdy construction despite small size; good CD-ROM bundle; low price. <b>CON:</b> Gray scale is a little fuzzy; amount of RAM is fairly small.	723
2	 <b>NEC SuperScript 860</b> 800/632-4636 www.nec.com	retested this month	\$399	81	7	3.4	<b>FEATURES:</b> 8-ppm laser. Standard 1MB of RAM, 600-by-600-dpi maximum resolution, 200 sheets input, 50 output. <b>PRO:</b> Blistering text speed, easy controls for creating booklets and more, two-year warranty. <b>CON:</b> Gray-scale graphics are blotchy, pages collate in reverse order.	724
3	<b>HP LaserJet 6Lse</b> 800/752-0900 www.hp.com	retested this month	\$399	79	5.1	2	<b>FEATURES:</b> 6-ppm laser. Standard 1MB of RAM, 600-by-600-dpi maximum resolution, 100 sheets input, 100 output. <b>PRO:</b> Strong print quality and paper handling, convenient design, excellent manual. <b>CON:</b> Still the slowest on the monochrome chart, software bundle not very useful.	725
4	<b>NEC SuperScript 660plus</b> 800/632-4636 www.nec.com	retested this month	\$299	78	5.2	3.3	<b>FEATURES:</b> 6-ppm laser. Standard 256K of RAM, 600-by-600-dpi maximum resolution, 150 sheets input, 100 output. <b>PRO:</b> Includes CD-ROM full of fonts, clip art, and more; prints exit facedown so they're stacked correctly, unlike with 860 model; quiet. <b>CON:</b> Inadequate documentation, wrinkles envelopes.	726
5	<b>Panasonic KX-P6500</b> 800/742-8086 www.panasonic.com	retested this month	\$349	78	5.7	3.6	<b>FEATURES:</b> 6-ppm laser. Standard 512K of RAM, 2400-by-600-dpi maximum resolution, 100 sheets input, 50 output. <b>PRO:</b> Excellent text quality, especially with 2400-dpi resolution enhancement; lower design saves space. <b>CON:</b> Gray scale looks posterized; on-screen help lacks detail; awkward power switch.	727

5	<b>HP DeskJet 694C</b> 800/752-0900 www.hp.com	retested this month	\$299	77	2.2	0.3	<b>FEATURES:</b> 3-ppm monochrome/0.8-ppm color ink jet. 600-by-600-dpi maximum resolution, 100 sheets input, 50 output. <b>PRO:</b> Easy to use, prints well on plain paper, software includes home and small office applications. <b>CON:</b> Grainy colors, printing photos requires special ink and paper.	731
 <b>Best Buy</b>  For expanded reviews, visit <a href="http://www.pcworld.com/t10printers">www.pcworld.com/t10printers</a> .  <b>Windows 95-certified Plug and Play</b> All products: 908								

**HOW WE TEST** The overall rating for both monochrome and color personal printers is based on print quality (25 percent), price (25 percent), features (15 percent), speed (10 percent), service and support (10 percent), and ease of use (15 percent). For all ratings, higher is better. Data based on tests designed and conducted by the PC World Test Center. All rights reserved.

MINOLTA'S PAGEWORKS 6L is our new monochrome Best Buy this month. An inexpensive laser, it does a nice job overall with text and graphics. HP's new DeskJet 722C lands in fourth

place on the color chart. It's a good small-office printer that's fast and quiet and produces sharp text and graphics. We tested these printers and others in this month's personal printer roundup—see "Text, Graphics, and...Photos?" for details. ■

10	<b>Gateway 2000 CrystalScan 500</b> 800/846-2000 www.gateway.com	Oct 97	\$305	80	very good/ good	<b>FEATURES:</b> 13.8-inch viewable area, .28mm dot pitch tube, up to 75-Hz refresh rate, Plug and Play ready, <sup>2</sup> three-year warranty, 24-hour toll-free support. <b>PRO:</b> Crisp text, good price, liberal assortment of controls, door prevents accidental changes. <b>CON:</b> Hard to tell what control buttons do in different modes.	610

Best Buy

For expanded reviews, visit [www.pcworld.com/t10monitors](http://www.pcworld.com/t10monitors).

All products: 901

<sup>1</sup>Highest refresh rate at 1280 by 1024 resolution.<sup>2</sup>Plug and Play monitors and graphics cards can communicate bidirectionally. However, Windows 95 does not fully utilize monitor Plug and Play.**HOW WE TEST** Ten judges rate a monitor's text and graphics quality. We evaluate each unit on how well it displays typical business letters, a newsletter, spreadsheets, Web pages, and scanned images. The overall rating is based on text and graphics quality (25 percent each), features and ease of use (25 percent), price (20 percent), and service and support (5 percent). The best possible overall rating is 100. Data based on tests designed and conducted by the PC World Test Center. All rights reserved.

15-INCH MONITORS are getting cheaper and better. Half this month's models cost \$300 or less, and seven rate very good or better on both text and graphics. Five units make the chart for the first

time, led by the Goldstar, Samsung, and MAG models in third through fifth place. The number seven MaxTech has clumsy controls—but costs only \$249 and has a sharp image. Hurt by its high price, Dell's UltraScan 800HS dropped from third to eighth. ■

## DELL DIMENSION<sup>®</sup> DESKTOPS FOR BUSINESS

**DELL®**

What are you  
looking at?<sup>SM</sup>

When you buy a Visual Sensations<sup>TM</sup> monitor,  
it's backed by the best support in the business with the

## KDS Advanced Replacement Express Service.

KARES eliminates factory returns and dealer swaps by  
letting customers call KDS directly if a Visual Sensations ever needs service.  
KDS then rushes them a replacement by FedEx delivery,  
keeping their downtime to a minimum.

Resellers like it because it eliminates them from the post sales cycle.  
And customers love it because it gives them

**peace of mind** for the lifetime of their purchase.

Of course, there are plenty of other reasons for choosing  
Visual Sensations. Including the fact that with a complete line  
of 14-, 15-, 17-, 19- and 21-inch monitors – plus  
LCD flat-panel display and touch-screen models – there's one  
that's designed and priced right for every application.

Take a closer look at Visual Sensations by calling  
1-800-237-9988 or checking out the  
KDS Web Site at [www.kdsusa.com](http://www.kdsusa.com).

Because if you're looking for great  
service with a great monitor,

**no one supports  
you like KDS**  
does with KARES.

**HOW WE TEST** We tested PCI boards under Windows 95 with PC WorldBench 1.0 at 800 by 600 and 16.8 million colors, 1024 by 768 and 65,536 colors (reported here), and 1280 by 1024 and 65,536 colors. The 3D rating is based on frame rates in our VRML and 3D game tests and on subjective ratings in three games. The multimedia rating is based on frame rates in our Macromedia Director and AVI playback tests and on timed scores in our PowerPoint multimedia presentation tests. Boards were tested in a Dell Dimension XPS P133c with 32MB of EDO DRAM and 256K of pipeline-burst secondary cache. The overall rating is based on performance (40 percent), features (30 percent), price (20 percent), and support policies (10 percent). For all scores, higher is better. Data based on tests designed and conducted by the PC World Test Center. All rights reserved.

OF THE FOUR NEW BOARDS we tested this month, only the ATI Xpert@Work claims a position on our chart. In 3D tests, the Xpert@Work is only a shade behind the number eight STB Veloc-

ity 128, which has the chart's quickest 3D performance. And in 2D speed the ATI card equals Diamond's Stealth 3D 3000 and 3D 2000 Pro cards. The Xpert@Work's biggest drawback? Although 3D games play smoothly, images don't look great. ■

# What 22 years in the monitor business gets you.

**Premium Aperture Grille Monitor technology.**  
At a shadow mask monitor price.

**0.25mm Dot Pitch**  
for a brighter, clearer, tighter image.

**Full 16.0" viewing area**  
shows more of what's on your screen

**Sharp, crisp, flicker-free 77Hz resolution at 1280 x 1024**

**Three-Year Warranty** for CRT parts & labor, of course.

**One-touch On-Screen Display** with digital controls.

Used to be, there were two ways to get the sharper picture, richer colors and enhanced clarity of Aperture Grille technology. You could buy a high-end professional monitor from a company like NEC, Sony or Mitsubishi, with all the high-end features and a price to match. Or you could spend a lot less. And end up with a

stripped-down imitation. Fortunately, that was then.

Now, of course, there's TeleVideo, the company that's been pioneering high-end technology for ordinary folks and quietly selling high-performance monitors at very reasonable prices since 1975. We've got a complete line of large-screen Aperture Grille monitors, including the flagship SVP260 pictured above. All with features comparable to (or even superior to) the Big Names, but at prices you can live with.

So how do we do it? Call

**1-800-835-3228** to find out. Or visit us at [www.televideoinc.com](http://www.televideoinc.com). But for now, let's just say that when you've been in the monitor business since bell-bottoms were cool, you learn a few things.

**TeleVideo®**

 <b>Best Buy</b>  <b>For expanded reviews, visit <a href="http://www.pcworld.com/t10modems">www.pcworld.com/t10modems</a>.</b> <sup>1</sup> V.34 TAS transfers/56-kbps ISP downloads; see "How We Test." All products: 909							

**HOW WE TEST** We test 33.6-kbps modem-to-modem performance using a pair of identical modems on a Telecomm Analysis Systems simulated phone network. It sends a text file over 55 line conditions, and a mix of five files—graphics, text, program, and compressed files—over one line condition. For our 56-kbps tests, we call a local Internet service provider access number and transfer jpg, doc, and .zip files continuously over an 18-hour period. The times to transfer a megabyte of data are higher in the ISP test than in the TAS test because the files used in the former are less compressible. Results for the two tests are not comparable. Data based on tests designed and conducted by the PC World Test Center. All rights reserved.

A GLOBAL VILLAGE modem grabs our number one 56-kbps slot this month for its low price, swift 56-kbps download rate, and bang-up documentation. At \$119, it's one of the cheapest 56-kbps

units we've tested. For a more expanded feature set, check out Diamond's SupraExpress 56e Sp. It's the only 56-kbps unit on our chart with voice mail and speakerphone capabilities, making it a good candidate for small- and home-office users. ■

INTRODUCING **Drive Image™** THE FASTEST, EASIEST WAY  
TO IMAGE YOUR HARD DRIVE FOR **backups, upgrades**  
AND **complete system recovery.**

Buy Now!  
**\$15**  
Cash Back  
from PowerQuest

When you need an instant copy of your hard drive, Drive Image is the picture-perfect solution. You can easily create and store a compressed image file of your entire hard drive, or just selected partitions, on a JAZ,® Zip,™ network, or second hard drive. That makes backups a breeze, and even a dreaded hard-drive crash is no problem. To restore your system, simply download your drive's image file from its storage source and you're ready to go. Drive Image also makes upgrading to a larger hard drive a snap. Simply copy everything from your old drive to your new drive. You can even specify the size of the partitions on the new drive during copying so everything fits the first time. And Drive Image is fast. Its patent-pending SmartSector™ technology works up to two to three times faster than straight file-by-file or sector-by-sector methods of copying. That saves you time and a lot of aggravation. For more information about Drive Image, visit our Web site at [www.powerquest.com](http://www.powerquest.com). To clone multiple workstations, contact PowerQuest for information on additional licensing options. Call **1-800-379-2566** for details.

POWER  
**PQ**  
QUEST

## From Snapshots to Web Sites

OKAY, YOU'RE ON the cutting edge. You own a color scanner, a digital camera, or a video camera and capture board. Or maybe you're not that hip, but at least you've developed pictures to a photo CD, right? The point is, the photos are digital. And your hard drive has become the

world's most expensive (and bulky) photo album. Now what do you do? How can you disseminate those digital photos among family and friends without wasting a lot of time or looking like the dork you're afraid you're becoming?

First, put aside your fears of turning

into a computer geek. It's too late. Just use that powerful technology on your desk to make quick work of updating family on events in your life, sending sentimental cards, or just distributing photos of the new house (baby, dog, car, whatever). With the right tools, these social niceties won't even cut into your weekend barbecuing (or Web surfing).

### CARD SHARK

THE SIMPLEST WAY to put those photos to work is to turn them into fetching greeting cards. Several software packages do this with a minimum of effort on your part, and all of them are out in brand-new versions—Broderbund's The Print Shop Signature Greetings (reviewed in the

November column), Microsoft's Greetings Workshop Deluxe, and Micrografx's American Greetings CreaCard Gold. I prefer CreaCard, despite its sappy art, because it has tons of cards and projects and is simple to use. Just pick one of 4500 cards, insert a photo, tweak the sentiment and graphics, and you've got yourself one nice photo greeting card. Like most of these products, CreaCard will also build labels, gift tags, envelopes, stationery, even business cards using either your photos or its own art.

And no more guilt about forgetting your nephew's birthday or your parents' anniversary—CreaCard's calendar program will pop up and remind you. Or, if you want to devote an entire Sunday to creating cards for the rest of the year, CreaCard will remind you when it's time to send them.

Broderbund's Signature Greetings has much more elegant art than the other two packages. It is not as flexible when it comes to customizing your creations so that they reflect your personality, but if all you want is a point-and-click card program, go with Signature Greetings.

Okay, you've designed the perfect holiday card, and you could just print it out and mail it. There is an easier way, however, if you are ready to embrace that computer dork within. Just push a button and e-mail it to everyone on your list. Or—even better—post it to the Web. ►

Angela Freeman

## SHOW OFF ON THE WEB

IF YOU'VE CREATED only one holiday card, e-mail is a perfect way to send it. But what about those other familial obligations? The incessant: "When do we get a new photo of the kids?" Or "How big is the puppy?" Or "I can't wait to see the new house." Admit it, you've already thought about building a Web page, e-mailing your URL to everyone you know, and then just sitting back and letting the family marvel at your creativity and technical acumen. If you're like me, the only thing stopping you is time. Well, listen up: Some new tools can get your baby photos

**CREATIVE SPACE:** Find inspiration for customized photo albums, cards, and more in the Photo Creations Studio.

on the Internet faster than you can get off the telephone when that long-winded cousin of yours calls.

**PictraAlbum** from Pictra and **Photo Creations All-in-One Studio** from Creative Wonders let you compile photos into albums and publish them on the Web without any troublesome technical or design machinations. Say you just want to send some snapshots without a lot of cute extras. **PictraAlbum** is a bare-bones application with a single purpose: organizing your photos into albums. It assumes your pic-

tures are ready to go; just pick one of 14 background styles, drag and drop the digital photo into your album, enter captions, and hit the *Publish* button. Your vacation album is uploaded to **PictraNet**. Now you can answer all those eager questions with one URL ([www.pictranet.com](http://www.pictranet.com)). You can even password-protect the site if you're worried about those photos of the dog ending up on some bestiality site. You can add new albums or update old ones whenever you want, as long as you don't exceed your allotted storage space limit. 10MB (about 30 photos) costs \$49.95 for a year; 30MB bumps it up to \$99.95.

If you want something fancier, check out **Photo Creations**. It'll make cards, banners, and other stuff, but its focus is photo albums. It has ready-made templates for wedding albums, baby books, and the like (complete with themed graphics), but you can also build an album from scratch. Drag your photos into place, type in captions, paste in graphics and clip art, even add sounds (you can record your own or use the ones provided). Piece of cake. Then you can either e-mail your album (a play-

er is automatically attached) or upload it to the Creative Wonders Web site. Unlike with **PictraNet**, though, displaying your online album here doesn't cost you anything, and there's no limit to how many pictures you can upload.

## GO ALL THE WAY

BUT IF YOU really want to impress the gang with your computer savvy (that's right, *be proud of your inner dork*), build your own Web page. **Windows Draw 6** from Micrografx has a Web Publishing Wizard that makes it hugely easy to create a site that looks like you hired a professional (it also has an extensive array of image editing and drawing tools). Say you've got a snapshot of you, the family, and the new dog together on your summer camping trip. Start with that, type in a caption for the photo, add a forest background and some outdoorsy clip art, and create buttons that link to other family members'

# "I COULDN'T BELIEVE MY EYES!"

If it weren't for Family Tree Maker,<sup>™</sup> I would never have found my family

**#1  
Selling  
#1  
Rated**

Using Family Tree Maker, Diana found her great-great grandparents Hannah & William Hunt Wilson.

Dear Family Tree Maker,

I became interested in genealogy because I never knew my ethnic heritage. The only ancestor name and location I knew of was that of my great-great grandfather, William Hunt Wilson who lived in Oregon.

I then decided to purchase a genealogy program, and chose Family Tree Maker because of the FamilyFinder<sup>™</sup> Index. I went home, loaded the program, did a search in the FamilyFinder Index using my great-great grandfather's name, and it referenced a World Family Tree<sup>™</sup> CD.\* I couldn't believe my eyes!

I found the name "William Hunt Wilson" on the CD. The family tree was huge — hundreds of names! My name was not there, so I decided to contact the tree's contributor to let her know that I found the connection. I left a message, and that night, I received the long-awaited call. The contributor, who is also my cousin, was screaming on the phone because she could not believe she had found me. I was part of a "long lost leg" that the family had not heard of for over 50 years! We laughed, we cried, and talked all night. And now, we have contact every day — either by phone or by e-mail.

A family reunion is scheduled to take place this Fall, thanks to Family Tree Maker. I never would have found my family if it weren't for the program.

Thank you!

*Diana Yashar*

San Jose, CA

### NEW VERSION!

Awards won by Family Tree Maker<sup>™</sup>  
Deluxe Edition II, the previous version.

Circle 36 on reader service card

**Broderbund**

\*The World Family Tree CDs contain actual family trees. Submitter information is available free upon request. Family Tree Maker is available now for Windows 3.1, Windows 95, and Power Macintosh. Features vary according to platform and price. Additional accessory CDs sold separately. © 1997 Broderbund Software, Inc. All products are trademarks of their respective holders.

Call us at 1-800-474-8696 or visit [www.familytreemaker.com](http://www.familytreemaker.com)

seen on your Web page. But the Web can even help you there: Kodak recently launched its **Picture Network**, and **PhotoNet** from PictureVision has been around for a while. When you drop off a roll of film, simply check a box on the order envelope asking that your photos be uploaded to the Web. Within a week your newest photos are on the Web, in addition to being developed and printed. You can e-mail your in-laws a photo postcard from the Web, or simply send out the URL, and your family can see the latest picture of the baby and even order the reprints themselves.

**VIRTUOSO:**  
Xerox HomeCentre  
prints, scans, and copies in color.

Although PhotoNet's basic service (30-day storage) is free and enables you to print photos on things like mouse pads, mugs, and calendars, Kodak Picture Network has some significant features that make it more useful. You can upload your own photographs to your personal site (although you can't get reprints). It's also available through more than 30,000 developers who already use Kodak. PhotoNet, on the other hand, is available only through participating stores (such as Wolf Camera and The Camera Shop).

**MEN ARE BUYING** button-front shirts in record numbers from the Lands' End Web site. According to the company, during the first six months of 1997, the site sold enough button-down shirts to span San Francisco's Golden Gate Bridge six times.

## YESTERDAY'S TECHNOLOGY STILL WORKS

A TIME MAY come when even you will want to resort to the arcane tactic of actually printing your cards or photo albums. Of course, almost any new ink jet printer turns out crisp color photos, especially if you use glossy paper. But recently there's been a spate of those devices that claim to do everything from scan to fax to copy to print to wash windows. Xerox has just such a device: The **Document HomeCentre**. It combines a detachable color scanner, a color ink jet printer, and a color copier.

Whoever invented that detachable scanner is right up there with Einstein, as far as I'm concerned. It's great to be able to capture images from bound books and magazines—no need to rip out pages any longer. It captures both photos and text beautifully.

The \$499 HomeCentre also does an impressive, if slow, job of printing and copying in color, cranking out one vibrant color page per minute (black and white is four times as fast). Unfortunately, it doesn't do quite as well with printing photos. Even after adjusting all the controls—color intensity, contrast, and so forth—the photos that scanned in so nicely came out fuzzy and discolored. Now, you may be a computer dork, but I'll bet you still have some pride. So you probably don't want to mail distorted copies of your photos. If you really want to print your own photos, I'd recommend investing in a top-quality ink jet printer. (See our roundup of color and monochrome units, "Text, Graphics...and Photos?" in this issue).

Here's a warning: Your computer can save you the hours you once spent getting photos developed and mailed. But think twice before you tell everyone how easy it was to build your Web page. You could spend twice as much time handling the deluge of technical calls you'll get from everyone in your family trying to do the same thing. But, hey, at least you'll all have something to talk about at those holiday get-togethers. —Angela Freeman

Angela Freeman is a staff editor for PC World.

## KEEPING UP

### The Right Tool for Travel

EVERYONE KNOWS THAT MapQuest ([www.mapquest.com](http://www.mapquest.com)) is a great way to get directions to wherever you want to go. Now the service is even better with TravelPlan USA,

sort of like a concierge on your desk. It offers information about hotels and restaurants, weather reports, and even local events for some 2000 cities world-

wide, and it gives you the capability to create personalized itineraries. Are you planning to relocate? Check out MapQuest's MoveQuest service: It will help you find a place to rent or buy, give you an idea of what it will all cost, and help you track down the local furniture store, the cable company, and stuff like that.

### Last-Minute Gifts?

YOU PROBABLY KNOW people who have finished all their holiday shopping by June. You and I will be surfing the Net at the last minute because all the stores are closed. With us in mind, Virtual Vineyards ([www.virtualvin.com](http://www.virtualvin.com)) has opened a new gift shop. As usual, you can search for fine wines (or bargains) and get advice from the site's wine snobs. But now, you can also order gift baskets of wine or even chocolate, coffee, cookies, or other goodies in fancy baskets. These aren't your usual mystery baskets full of food you've never heard of. These downright classy packages feature California gourmet restaurant fare, from \$8 caramels to \$355 Baku beluga caviar, and just about everything in between.

### The Internet Diet

TRYING TO LOSE a few pounds before the holiday scarfing season begins? Remember, knowledge is power. And do you really *know* what impact that pastry you're contemplating will have on your waist? Get the facts. Check out Cyberdiet ([www.cyberdiet.com](http://www.cyberdiet.com)). It'll tell you the truth about calories, fat, sodium, and lots more for 16,000-plus foods. It'll even give you a customized personal nutritional profile based on your height, build, age, and activity level. —Christina Wood

# Business' Choice

## Editors' Choice

*"We needed top-of-the-line 17" (various viewables) monitors that deliver the performance and features critical to our business... at a price to fit our bottom line. The Optiquest V775 is all that. And more."*

### Extraordinary Performance

Whether your company needs a large screen monitor for desktop publishing, graphics design, spreadsheets or multiple Windows® applications, one choice stands out: the Optiquest V775. This powerful 17" (16.0" viewable) monitor offers the specs and features you'd expect from much higher priced monitors, including a super fine 0.26mm true dot pitch, Invar shadow mask, resolutions up to 1,600 x 1,280, intuitive OnView® controls, ARAG® screen treatment, SuperContrast™ screen and more. The payoff is luxuriously rich colors and sharp text for both PC and Mac® systems. You'll be impressed with the Optiquest V775 – the editors of PC Magazine certainly were.

### Extraordinary Price

Now, if your company is looking for a high performance 17" (16.0" viewable) monitor that's even more affordable, check out our award-winning Optiquest V773. In fact, both of these Optiquest® monitors boast a 0.26mm dot pitch, surpass environmental requirements and include a limited three year warranty. **Call (800) 843-6784 TODAY and ask for agent 7917 for additional product information.**

***All business decisions should be this easy!***

# Windows Improved, With No Help From Microsoft

MY MOTHER ALWAYS gave me good advice: Check your spelling, wear clean underwear, and don't pick on anyone bigger than you. Ummm, Mom? I think I'm in trouble. In the last few columns, I've pummeled Microsoft. So far I've survived, but I'm peering through my curtains now at what looks like an unmarked car with two big guys holding very big laptops.

Microsoft has loads of people beta testing the company's products, and plenty of usability labs. But I don't think they're paying attention to the people in the trenches—you know, the *real* end users. Us.

The evidence? Too many Microsoft products come up a dollar short and a day late. Windows 95's Dial-Up Networking is a perfect example. DUN is the applet used to create a connectoid (yes, that's what it's called) that lets you hook up to an Internet service provider. DUN is light-years ahead of Win 3.x's Trumpet-WinSock rigmarole, but it's still difficult to configure with its convoluted TCP/IP twists and Server Gateway turns.

Dial-Up Networking doesn't have to be so perplexing. The rescue—as is so often the case—comes from a third party. EarthLink, an ISP, took the bull by the horns and enhanced DUN. I played with a beta version of its TotalAccess 2.0, and I like it. The dialer is a treat, letting me choose from up to ten phone numbers, and the Internet Network Wizard is handy for diagnosing problems.

Microsoft left other touches out of DUN—simple things you'll treat as prized possessions once you have them. Let me introduce you to Dial-Up Networking Connection Enhancement, a freebie program known as DUNCE. When I'm ready to log on to the Internet, I click on the Connect To Shortcut on my desktop, and

**Too many Microsoft products come up a dollar short and a day late.**

DUNCE redials my Internet service provider when I'm disconnected or get a busy signal. Folks, that's cool.

## LET'S HEAD FOR THE OFFICE

I WON'T MINCE words: I think Microsoft Word 97 is the best product in town. Navigating docs with the Document Map is terrific, and I love the grammar checker that catches my *you're/your* and *it's/its* errors. But once you get a taste of Office Toys or WOPR, you'll see what Word is missing.

First, Office Toys: Writing this column, I have nine WinWord docs open. Office Toys lets me save them as a "project" called, say, HomeOffice (pretty original, no?). Next time I go to HomeOffice, all the files are open and ready. This feature

alone is worth the price of admission.

I dread the thought of losing files to a crash. So when I close a file, Office Toys automatically backs it up to another folder, to a floppy, or as a Zip file. There are dozens more cool things in Office Toys—and it's shareware, so try away.

WOPR 97 (yeah, it does sound like a hamburger) is a winner I've used for years. I recently explored a beta of the new version. WOPR's Two by Four is a delicious multipage-printing feature that lets me print documents in half a dozen ways, including double-sided, thumbnail, and as a flier or booklet. The program's Enveloper is by far the most sophisticated I've used. There's also a way to remove those pesky extra line breaks when I import ASCII text files.

Deciding which of these two programs to use is like choosing between a Volvo and a Saab—each is solid and reliable and comes with things I like. But Office Toys gets my hard drive space: Its Project Manager and AutoPilot features won me over. Download both and decide for yourself.

By the way, if you think I'm the only one trouncing Redmond's Attila the Hun, you're wrong. Zillions of Bill jokes are floating around the Internet. Read through my favorites at [www.pcworld.com/dec97/jokes](http://www.pcworld.com/dec97/jokes).

## HIGH-PERFORMANCE MONITORS

### IMPRESSION PRODUCTS, INCORPORATED

Every high-end computer system or video graphics accelerator deserves a high-performance monitor. Impression monitors offer superior performance, features, and value.

The 17" Impression 7VX (15.8 viewable) virtually eliminates eye-fatigue with its ultra-high horizontal refresh rate of 95KHz, 0.26mm dot pitch, and 1600 x 1200 resolution. The 21" Vienna P21S has a 0.28mm dot pitch, and 1600 x 1200 resolution, maximum horizontal refresh of 117KHz! Finally the MX series offers excellent picture quality and performance with space-saving multimedia speakers. All monitors come with a standard 3-year limited warranty.

Whether you're writing a business plan, designing a brochure, or surfing the web, Impression monitors gives you a sharp, flicker-free display for any application.

## OUCH! MY MOUSE BIT ME!

[www.goldtouch.com](http://www.goldtouch.com)

Goldtouch presents the world's best ergonomic mouse, now showing on our web site. It's designed to reduce the strain on muscles used during mouse operation. Continuous computer usage can contribute to severe problems in the hand and wrist, that's why scientists invented the Goldtouch Mouse.

The Goldtouch Mouse is designed to fit the natural 'repose' position of the hand. This makes it safer from an ergonomic viewpoint and much more comfortable to use. The Goldtouch Mouse has scrolling and panning capabilities and works with MS-DOS 3.1 or later, Windows 3.X and Windows 95.

Goldtouch Technologies Inc.

**NO YOU HAVEN'T LOST  
YOUR MIND. YOUR KEYBOARD  
IS RINGING.**

## **CompuPhone 2000®**

**The only keyboard with a built-in telephone.**

Although it has a familiar ring, CompuPhone is totally innovative, (if not downright ingenious).

Answer your calls and dial right from your long-life, high-performance PC keyboard. Talk hands-free with a comfortable, lightweight headset. And gain precious desk space because you no longer need a separate phone on your desk.

CompuPhone is backed by a 30-day money-back guarantee and a one-year limited warranty. Should you need it, there's free technical support.

Just to give you an idea of how much value you're getting, comparable headsets retail for \$100 or more. Which is almost exactly what you'll pay for this highly-efficient headset-keyboard-telephone. Because for a limited time, you can buy CompuPhone at a \$50 discount and get free shipping. Plus receive a bonus of up to \$100 in popular software titles.

So call us toll-free at 1-888-CHAT-ITI, (242-8484). With all the ways CompuPhone helps to make your life sane, you'd be crazy not to order right now.

On-line trading shouldn't feel like this.

# With the Waterhouse Investors PC Network<sup>™</sup>, you're never alone.

## On-line investing with 24 x 7 personal service

Unlike some other on-line services, the Waterhouse Investors PC Network supports you with 24 hour-a-day, 7 day-a-week personalized service and technical

support. Plus, when you open a Waterhouse Investors PC Network account, you can invest any way you want, whenever you want—on-line, by touch-tone

phone or through your personal Account Officer. You'll benefit from a new low \$12 flat-fee on-line rate for up to 5,000 shares on market and limit orders. And you'll have unlimited access to

a wide range of free on-line investment information.

## America's #1 discount broker

*SmartMoney* magazine called us America's

#1 discount broker—  
with the best combination

of price, products and service. Just compare our flat-fee commissions for up to 5,000 shares on equity trades to e.Schwab, Fidelity, Quick & Reilly and other on-line discount brokers.

Then compare products and services such as: A No-Fee Asset Management Account; Free Mutual Fund Investing; Free Investment Information; Free Dividend Reinvestment; Free IRAs; and *InstanEx*<sup>®</sup>—our high-speed order processing system, which usually confirms your market orders in seconds.

## Helping investors succeed for nearly 20 years

We've been helping our investors since 1979.

Today, we have 1,100

Account Officers at over 100 branches ready to serve our 800,000 customers

nationwide. Waterhouse Securities is a member of the New York Stock Exchange and the Securities Investor Protection Corporation.

## Get started today

Call 1-800-847-1234 for a free Information Kit or visit our web site, [www.waterhouse.com](http://www.waterhouse.com). Open your account with \$2,000 or more and start taking advantage of our new \$12 flat-fee on-line rate today.

### One of the reasons *SmartMoney* rates us #1.

# HERE'S HOW

## A N S W E R L I N E

### Tell Your Files to Get With the Program

EVERY TIME I double-click a .gif or .jpg file on my HP Pavilion 7330z, it launches a program called *Imgserve*, part of the *PowerAlbum* application that came with the system. I would prefer to open the files in *Microsoft Internet Explorer*. How can I make IE the default browser for these file types?

Ruth Brus, Sarasota, Florida

WITH WINDOWS 95 it's easy to change the program associated with a particular file type—if you know where to look. But no reasonable person would ever think to look where Microsoft hid this function.

To change a file type's association, open a standard folder window or *Windows Explorer*, and locate a file of the type you wish to change—.gif or .jpg in your case. Right-click the file and select *Properties*. In the resulting dialog box, make a note of the Type and click *OK*.

Now here's the tricky part. Select *View Options* and click the *File Types* tab. You'll see an alphabetical list of 'Registered file

types' currently on your system. Double-click the file type you noted earlier; the *Edit File Type* dialog box will appear. In the *Actions* list, double-click *open*.

You guessed it: Another dialog box appears (see **FIGURE 1**). In the 'Application used to perform action' field, enter the path and file name (enclosed in quotes) of the application you want the files to open in—for instance, "*C:\Program Files\Internet Explorer\IExplore.exe*". If you can't remember the full path and file name of the program, click the *Browse* button to make your way there. Click *OK* to return to the *Edit File Type* dialog box.

You can now either click *Close* a couple of times to apply your changes, or do another trick while you're here. Do you sometimes want to launch .gif and .jpg files in *Imgserve*, and other times in *Internet Explorer*? You can associate a file type with more than one application.

In the *Edit File Type* dialog box, click the *New* button. You'll get a small dialog box for adding another action to the file type. In the *Action* field, type an easily recognizable name of the new application—for instance, *Internet Explorer*. In the 'Application used to perform action' field, enter the program's path and file name. Click *OK* or *Close* until you return to the desktop. Now when you double-click a file of this type it will open in the original application, but when you right-click it the context menu will list both ways to launch the file, identifying the new one by what you typed in the *Action* field.

#### THE INTERNET MAIL SHORTCUT

IF I WANT TO read my e-mail in *Internet Mail*, I have to first launch *Internet Explorer*, then select *Read Mail* from the *Mail* button. Is there any way to cut out the middleman and just open *Internet Mail* directly?

Michael McCouch  
Turnersville, New Jersey

WHEN YOU FIRST installed *Internet Explorer 3.x*, the installation program should have created a Shortcut to *Internet Mail*. Look through your *Start* menu for an item called *Internet Mail*. (If you've upgraded to *IE 4.0*, look for *Outlook Express*.)

If the Shortcut isn't there, create one. To create a Shortcut directly on the desktop, simply right-click the desktop and select *New Shortcut*. To add a Shortcut to a specific folder, right-click the *Start* button and select *Explore*. In the resulting *Explorer*

By Lincoln Spector

FIGURE 1: CHANGING A FILE EXTENSION'S ASSOCIATION IS easy if you know where to look in Explorer.

window, go to the folder equivalent of the menu in which you want to create your Shortcut. For instance, to place the Shortcut in the Programs menu, go to Windows\Start Menu\Programs. Then right-click anywhere in the right pane and select **New•Shortcut**.

Either way, you'll end up on the first page of the Create Shortcut Wizard—and if you're using Internet Explorer 3.x, it will

## Organize Word Documents With an Outline

**YOUR FOURTH-GRADE** teacher probably forced you to outline a paper before writing it. In Microsoft Word, the outline *is* the finished product. Or, to be more exact, the outline is simply another view of the finished product.

To outline-enable a document, simply assign the styles Heading 1, Heading 2, and so on to appropriate paragraphs. Then when you want to work with the basic structure rather than your prose, select **View•Outline**. In the resulting view, you'll be able to collapse headings, examine your document's structure, and move sections around with the ease of a child manipulating a grandparent. The screen below is of Word 97, but the outlining feature hasn't changed significantly since Word 2.0.

prove once again that to Microsoft, ease of use is only skin-deep. Sure, there's only one simple field to fill in on this page, but you have to type in this intuitive command:

**c:\windows\explorer.exe /root,  
c:\windows\Internet Mail.  
{89292102-4755-11CF-9DC2-  
00AA006C2B84}**

Note that there are only two spaces and four hyphens. If you put in any extra spaces or characters, it won't work.

So why the gobbledygook?

Internet Mail isn't a stand-alone program, it's a component of Internet Explorer that can be opened only with this secret code.

To Microsoft's credit, things have improved considerably with IE 4.0. The new browser's mail module, Outlook Express, is a stand-alone program, so you can launch the mail module independently of IE by simply entering the command **C:\Program Files\Outlook Express\Msimn.exe**. (Your path may vary.)

Once you've typed in either command, click **Next**, give your Shortcut a name, and click **Finish**. Now you don't have to browse through programs to read your mail.

## SHARING A DESKTOP IN WINDOWS 95

**LAST YEAR I BOUGHT** a Packard Bell PC with Windows 95 installed. According to the setup instructions, a log-on and password screen was supposed to appear when I loaded Windows. It never has. I would like to have users log on when they load Windows 95, and I would like my own setup to be password-protected. How do I go about accomplishing this?

Heather Linnehan

South Hadley, Massachusetts

ALTHOUGH WINDOWS 95 isn't a truly secure operating system, it can give users sharing a single PC their own modestly protected environments. To set up Win 95 for multiple users—allowing each, for instance, to have their own Start menu and desktop—select **Start•Settings•Control Panel** and double-click the **Passwords** icon.

This brings up the Passwords Proper-

ties dialog box. If the box has multiple tabs (which it may if you've used passwords before), click the **User Profiles** tab. Select the option with the ungainly title *Users can customize their preferences and desktop settings. Windows switches to your personal settings whenever you log in*. You may also want to check both **User Profile Settings** in the bottom half of the dialog box (see **FIGURE 2**). Click **OK**, then click **Yes** when asked if you want to restart your PC.

When Windows comes up again—and every time you load Windows from now on—a log-on window will prompt users for a name and password. When you ►

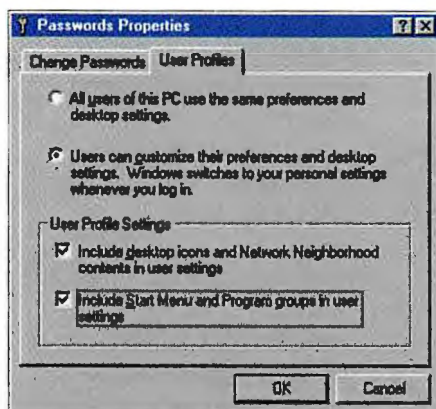

FIGURE 2: PASSWORD-PROTECT your Windows setup by selecting from this dialog box.

type in a new name and password, Windows records them and sets up a new work environment. (The password is optional; if a user leaves it blank the first time he or she types in a name, that name won't require a password.) If you try to log on under an existing name, you won't get through unless you also enter the password, if there is one.

If you get tired of entering names and passwords and decide that everyone can share the same environment, go back to the Control Panel's *Passwords* module, click the *User Profiles* tab, and select the first option, *All users of this PC use the same preferences and desktop settings*.

### HARD DRIVE NEEDS POWER

I BOUGHT AN UPGRADE KIT for my PC and installed the new hard drive that came with the kit, but the CMOS doesn't see it. If I unplug and replug the hard drive's power cable, the system boots properly. Can you solve this problem?

Terry Shanklin

Cleveland Heights, Ohio

I'M ASSUMING THAT by "power cable" you mean the thin cable that comes out of the PC's power supply and plugs into the hard drive. It sounds as if you have a bad connection.

The first thing you'll have to do is open up your machine and swap the power cable that goes to the hard drive with another one—say, the power line to the floppy drive. Then start using your system again and see what happens.

If the problem persists, the bad connec-

tion lies with your hard drive. Since it's new, you should contact the vendor and demand a replacement.

If your computer now sees the hard disk but can't find the floppy drive, the offending connector is attached to your power supply. If your PC doesn't have any available connectors, there's no easy way to replace just the connector or the cable; you'll have to buy a new power supply. Luckily, they don't cost much: You should be able to get a good one for about \$45.

If, when you switch cables, the problem simply disappears, cross your fingers and hope it stays away.

### THE LONG AND SHORT OF FILE NAMES

I HAVE A MAJOR PROBLEM that I can't solve. After I installed some freebies and shareware, several of my programs can't find their associated files. After some trial and error, I discovered that the DOS name for my Program Files folder had changed from 'progra~1' to 'programf'. I've tried to rename the folder in DOS, but that also renames the long Windows 95 file name, causing all sorts of additional trouble. How do I fix this problem?

Thomas Healy, Tigard, Oregon

SOMEWHERE ALONG the way, you or a program changed the way Windows 95 extrapolates a short file name from a long one, so a file that's called 'this name is long .doc' becomes 'thisname .doc' instead of 'thisname~1.doc'. (And if there's already a 'thisname.doc' in the folder, the new file becomes 'thisname~1.doc'.) Then something else—perhaps one of those new installations—forced the Program Files folder to rename itself, keeping the old long name but acquiring the DOS name 'programf'.

Here's the solution: First, rename the Program Files folder something that doesn't begin with the word *program*—say, **Something Else** (don't worry about the warnings you'll get). Then create a new folder whose first eight characters are

'programf'—say, **Program Flops**. Next, rename 'Something Else' back to **Program Files**. Your Program Files folder will again have the short file name 'progra~1'. Finally, delete 'Program Flops'.

### SAVE DISK SPACE WITH THE ULTIMATE CLUSTER TRICK

I'VE RECENTLY LEARNED that the Windows 95 OSR2 version of the format program contains an undocumented /z switch that allows the user to specify a cluster size smaller than the default 4K. This appears to solve the cluster waste problem once and for all!

I would like to reformat my 1.2GB drive using /z:1 to achieve the highest efficiency of 512-byte size allocation units. Is it possible that by using a cluster size that does not officially exist, I may introduce a potential for incompatibility that will cause problems with some programs? Is there any other potential danger that may arise with this approach?

Bill Liu, Baldwin Park, California

THE /Z PARAMETER isn't a fluke—Microsoft put it there on purpose. There are only three sizes you'd want or be able to choose: **format /z:1** creates 512-byte clusters; **format /z:2**, 1K clusters; and **format /z:4**, 2K clusters. The trick has worked fine for me. The only drawbacks are that

```
D:\>chkdsk
CHKDSK has NOT checked this drive for errors.
You must use SCANDISK to detect and fix errors on this drive.

Volume Serial Number is 3950-15F0

585,276,928 bytes total disk space
583,851,520 bytes available on disk

   512 bytes in each allocation unit
  1,143,119 total allocation units on disk
  1,140,335 available allocation units on disk

655,360 total bytes memory
615,152 bytes free

Instead of using CHKDSK, try using SCANDISK. SCANDISK can reliably detect
and fix a much wider range of disk problems.
```

FIGURE 3: SQUEEZE EVERY BYTE of space from your hard disk with the format command's /z switch. Confirm cluster size by using chkdsk.

512-byte clusters limit the size of your hard disk partition to 2GB, and that large files stored in smaller clusters can require more time to read from the disk. The performance difference may not be perceptible, however. To confirm that you're using a smaller cluster size, enter the command **chkdsk** at a DOS prompt or from the *Start...Run* dialog box (see **FIGURE 3**).

## ANSWER LINE

### FAT, FATTER, AND FATTEST FILE SYSTEMS

WHEN I VIEW the current partition information on my 8-year-old PC using DOS's fdisk utility, it says the file system is FAT12. When I do the same on my newer PC, it says FAT16. I know about the differences between FAT16 and FAT32, but I can't find much on FAT12. What are the differences between these file systems?

*Rick Channing*

*New London, Connecticut*

NOT TO WORRY—FAT12 is merely DOS's way of maximizing the available space on your no-doubt tiny partition. When you create a partition smaller than about 16MB with fdisk (in any DOS, Windows 95, or NT version) and then format it, you get 12-bit file allocation table, or FAT, entries—how the file system keeps track of file names, attributes, and locations—instead of the normal 16-bit version.

It works just the same as the standard FAT16 file system, and it's readable by DOS, Windows 95, Windows NT, and OS/2. Whether you can install anything on such a small partition in these days of 125MB office suites (or run it on such an old PC) is a separate issue.

### FREED UP MEMORY

LACK OF MEMORY is slowing down my applications. I recently downloaded a utility that shows memory usage, and with Windows 95 it usually tells me I have only about 1.5MB of RAM free! I have a total of 16MB and plan to upgrade to 32MB. How can I free more RAM in Win 95?

*Michael A Reinboth*

*Redondo Beach, California*

THIS IS A CONSTANT PROBLEM for all computer users—there's never enough memory or hard drive space. And unfortunately, there's no easy solution.

If your computer is slow and you suspect that a lack of memory is to blame, reduce the number of programs running at the same time. Also, try the following:

- Close one app before launching another.
- Turn off that fancy wallpaper.
- Reduce the number of utilities running in the background. (The one that shows RAM usage eats up memory itself.)

Don't be tempted by software packages

that promise to increase your effective memory by compressing data or juggling RAM. Every time the PC World Test Center has examined such programs, they've come up wanting.

In the end, the best approach is probably to do what you're already planning: Buy more RAM. It's easier in the long run to fix the problem than to work around it.

### HOW FAST IS MY MODEM, REALLY?

I RECENTLY INSTALLED a new .inf file for my modem to boost its speed from 28.8 kbps to 33.6 kbps. Before doing so, Dial-Up Networking's status box reported a connection speed of 115.2 kbps. Now that the new .inf file is installed, the maximum speed I can get is 33.6 kbps. Is there something I can tune somewhere to get the faster connections I had before?

*Dominique Lefevre, Kuwait*

DON'T WORRY, you're almost certainly making faster connections now than you were before loading the new .inf file (the driver installation file that tells Windows about your modem's capabilities). Even though Dial-Up Networking previously reported a connection speed of 115.2 kbps, common sense dictates that a 28.8-kbps modem can't really connect at such a high speed. What you saw was a quirk of your old .inf file, which for some reason decided to report the DTE speed—the rate of the connection between your modem and PC. The actual connection speed was probably 28.8 kbps or slower.

It's worth noting that .inf files aren't drivers and don't themselves upgrade your modem to a faster speed. The situation you're in occurs when you install a 33.6-kbps modem under the original August 1995 version of Windows 95 (version 4.00.950) or upgrade your 28.8-kbps modem's firmware to support 33.6-kbps transmissions. Windows 95 shipped with few .inf files for 33.6-kbps modems, so Plug and Play misidentifies your unit as a 28.8-kbps model. Installing an updated .inf file corrects this error.

## STATE OF THE ART

MAS 90 ACCOUNTING SOFTWARE

"As one of the South's largest distributors of fresh produce and eggs, speed is an important part of everything we do.

"That's why we chose MAS 90® Client/Server for our accounting software. Hard to believe, but it actually delivers the performance of UNIX® while interfacing perfectly with all our existing desktop applications.

"In fact, it only took us two weeks to be convinced. I switched off the UNIX box and never looked back.

"And talk about efficient — MAS 90es lets us see the profit for each delivery, and where to put our efforts. All in minutes, instead of hours.

Plus, now we do our daily closeouts from start to finish in under two minutes. And thanks to live links, MAS 90es automatically updates reports every time component data changes.

"It's fast, it's reliable, it's hands-off. And in a fast-moving business like ours, that lets me spend less time in the office.

"And more time in the field."

Since 1981, at State Of The Art we've been making award-winning accounting software for a wide range of platforms and businesses.

To learn more, you can call 1-800-854-3415, or access our web site at [www.sota.com/peworld](http://www.sota.com/peworld). Or just ask Dexter Odom.

# All-Time Top Ten Tips for Mouse and Keyboard

THERE ARE DOZENS of keyboard and mouse maneuvers that get you around Windows fast. Here are my faves. If I've missed any good ones, let me know. I'll publish the best in a future issue.

**1. The old switcheroo.** If you work with more than one application at a time, pressing **<Alt>-<Tab>** is a quick way to get back to the last application you used. To cycle through all running apps, hold down the **<Alt>** key and press **<Tab>** repeatedly until the icon for the application you want is selected. If you're still pressing **<Alt>** and change your mind midstream, press **<Esc>**, then let go of the keys. Finally, in most applications that display multiple windows within the main program window (except Microsoft Word), **<Ctrl>-<Tab>** and **<Ctrl>-<Shift>-<Tab>** cycle you through the open document windows.

**2. The max factor.** You can maximize any window (application or document) by double-clicking its title bar. Doing the same to a maximized application's title bar restores it to its previous state.

**3. Other hidden clickables.** When it comes to mousing around, the general rule is to single-click buttons and double-click icons. (The control menu icon in Windows 3.x applications is an exception—double-clicking it closes the window.) But sometimes the best approach is to click in a completely empty area. Click the empty area of a scroll bar to scroll one screen at a time. In Windows 3.x, press **<Alt>** as you double-click a blank area in a Program Manager group to create a new Program Item, and double-click the desktop to see the Task List, a tool for arranging windows and icons and closing programs. In Win 95 and NT 4.0, right-click the desktop or the empty area of a folder window to see a menu for arranging icons, creating new folders and files, or modifying properties.

Right-click a blank area of the Taskbar to arrange windows (or even *un*arrange them) or to set Taskbar preferences.

**4. Menu magic.** To access menus from the keyboard, hold down **<Alt>** as you press the underlined letter in the menu name. Then press the underlined letter of the command you want to execute (FIGURE 1). If a menu item has no underlined letters (such as in Windows 95's Start menu), press the first letter of the menu item. If multiple menu items share the same underlined or initial letter, press it repeat-

File

Set As Wallpaper (Tiled)	
Set As Wallpaper (Centered)	
1 Pie chart	
2 Janey's homework	
3 sketch	
4 house	
Exit	Alt+F4

FIGURE 1: EXECUTE MENU COMMANDS from the keyboard by pressing **<Alt>** plus the underlined letter, or by using the combinations on the right.

edly until the item you want is highlighted; then press **<Enter>**. In dialog boxes, pressing **<Alt>** plus an underlined letter moves you to the option or executes a command button (the kind with the 3D look). Don't forget that **<Ctrl>-<Esc>** displays the Start menu in Windows 95 and NT 4.0 and the Task List in Windows 3.x.

**5. Dialog dance.** In almost any dialog box, you can press **<Tab>** to move among available options. Each time you press it, the next option is highlighted. (Press **<Shift>-<Tab>** to reverse the direction.) If a dialog box has tabs along the top, press **<Ctrl>-<Tab>** to switch among them. If an option button (radio button) is highlighted, use the arrow keys to move to the next, or press the space bar to toggle a check box or execute a command button. Press **<Alt>** plus a down arrow to open a drop-down list, then press the first letter of the option you want. Pressing **<Enter>** activates the button with the heavy black outline. Press **<Esc>** to cancel the whole dialog box.

**6. Text tricks.** Keyboard shortcuts can also help you get around text screens, and a surprising number of e-mail packages, word processors, utilities, and other programs use these same shortcuts: Hold down **<Ctrl>** as you press the left or right arrow key to move the cursor one word at a time. Press **<Home>** or **<End>** to move to the beginning or end of a line. Press **<Page Up>** or **<Page Down>** to scroll one screenful. Press **<Ctrl>-<Home>** or **<Ctrl>-<End>** to move to the top or bottom of a document.

**7. Selection city.** In almost all Windows applications, **<Shift>** means *select*. Hold down **<Shift>** while pressing the arrow keys to select characters as you move the cursor. To add to the selection one word at a time, hold down **<Ctrl>-<Shift>** as you press the left or right arrow key. Click one spot in your text, then press **<Shift>** as you click another to select all the text in between. To select multiple, contiguous items in a list, click the first item, then hold down **<Shift>** as you click the last item. To select multiple, noncontiguous items, press **<Ctrl>** as you click each one.

**8. Edit tricks.** Once you've selected an object, you're ready to act on it. Although I still like the old Windows shortcuts for cutting (**<Shift>-<Delete>**), copying (**<Ctrl>-<Insert>**), pasting (**<Shift>-<Insert>**), and undoing (**<Alt>-<Backspace>**), these days more applications use the shortcuts that originated with the Macintosh: **<Ctrl>-x** for cut, **<Ctrl>-c** for copy, **<Ctrl>-v** for paste, and **<Ctrl>-z** for undo.

# STAMP OUT RETYPING WITH THE WORLD'S MOST ACCURATE OCR.

## New OmniPage Pro<sup>®</sup> 8.0. Over 99% accurate\*— guaranteed!

Don't retype another letter, report, fax or article into your computer ever again. New OmniPage Pro 8.0 for Windows 95 and NT easily converts scanned pages into editable text and graphics in just seconds. Which means you can quickly input text into your favorite applications like Word, WordPerfect, Excel and others.

OmniPage Pro's AutoOCR Toolbar<sup>™</sup> performs OCR with a single click.

"The program can turn a page of printed text into an editable computer file with almost uncanny accuracy."

*The New York Times*

OmniPage Pro 8.0 is a quantum leap forward in OCR accuracy, even when compared to version 7.0. What's more, it offers dramatic accuracy improvements when you OCR poor-quality documents — faxes, small and large text, skewed pages, reversed-out type, bad copies and more.

Don't settle for anything less than the most accurate OCR in the world. Call now to order, or visit your local reseller today. Who knows, they may even let you trade in your old keyboard.

- Easy-to-use, one-click OCR
- Maintains original page layout
- Improved performance with 32-bit multithreading
- Proofreads OCR results
- Seamlessly integrates with Microsoft Word
- OCR Wizard runs OmniPage based on your answers to its questions
- Outputs to HTML 3.0, and more!

Circle 91 on reader service card

**9. File fundamentals.** Many but not all applications—the shocking exceptions include Notepad, Cardfile, Write, and Help—follow these timeworn keyboard shortcuts: **<Ctrl>-n** creates a new file, **<Ctrl>-o** opens a file, **<Ctrl>-p** prints, and **<Ctrl>-s** saves a file. Though it's less common, many applications use **<Ctrl>-f** for displaying a Find or Search dialog box. Pressing **<Alt>-<F4>** closes (exits) nearly any application window. Many document windows can be closed with **<Ctrl>-<F4>**, although programs ported from the Macintosh sometimes use **<Ctrl>-w**.

**10. Cry for help.** When all else fails, press **<F1>** for online help.

## RUN LIKE THE WIND

**95** WINDOWS 95's Start menu gives you numerous opportunities to create menus and submenus for launching applications and files. But if your menus are getting cluttered, or if you'd rather type than hunt through layers of menus, consider revving up the Run command with this tip from Daniel Henry of Sioux Falls, South Dakota.

First, use Explorer to locate an application or file that you open a lot (but not so frequently that it should be on your Start menu). Select the application or document file and choose **Edit>Copy**. Now navigate to your Windows Command folder (probably **c:\windows\command**) and choose **Edit>Paste Shortcut**. Next, make sure the new Shortcut is selected, press **<F2>**, and enter a new, shorter name for your file—something that would be easy to type. For example, if you pasted a Shortcut to Microsoft Paint, you might type **pnt** or even just **pnt** (see **FIGURE 2**).

That's all there is to it. Now when you want to open this file, choose **Start>Run** (or press **<Ctrl>-<Esc>** and then **r**), type the name of your Shortcut, and press **<Enter>**.

**FIGURE 2:** ADD SHORTCUTS to Windows' Command folder to speed up your Run commands.

## PRINT EVEN MORE DIRECTORIES

**95** A NUMBER of readers were pleased to learn how to add a "print directory" feature to Windows 95 (see "Print Directory Lists," in July's *Windows Tips*). But a few people wanted to print a drive's root directory, which the tip as published couldn't do.

This fix will make it work: Simply associate the batch file with the Folder file type rather than with the File Folder type.

First, follow the directions in the July issue for making a directory-printing batch file. Then start Explorer and choose **View>Options**. Click the **File Types** tab. Select the **Folder** type (not File Folder) from the list of Registered file types and click the **Edit** button. In the Edit File Type dialog box, click **New**. In the Action box, type something like **Print directory**. In the 'Application used to perform action' box, type the path and name of your batch file. Then click **OK** and close each remaining dialog box.

Follow the rest of the instructions in the July issue. If you've already implemented the tip, you can easily delete the extra command from your pop-up menu: Choose **View>Options** in Explorer, click the **File Types** tab, select the **File Folder** type, and click **Edit**. Select your directory-printing command in the Actions list and click **Remove**. Click **Yes** to confirm, and close all dialog boxes.

A final tip: If this batch file system does not work with your printer (PostScript models can't handle it), check out ExpPrint, a shareware utility from JD Design that lets you print directories, with plenty of options for customization (**FIGURE 3**). Download an evaluation version from [ourworld.compuserve.com/homepages/jdd](http://ourworld.compuserve.com/homepages/jdd) or from PC World Online. The cost is \$25 for a bundle containing ExpPrint and four other utilities; the registration fee for ExpPrint alone is about \$8.

## WINDOWS TOOLBOX

### Quick Access to the Desktop

HOW OFTEN HAVE YOU wanted something on your desktop, but the screen was obscured by a bazillion windows? Here are two cheap solutions: If you just want a desktop object, try DeskMenu, part of the free Microsoft PowerToys (available from PC World Online or [www.microsoft.com/windows95/info/powertoys.htm](http://www.microsoft.com/windows95/info/powertoys.htm)). It also comes standard with Internet Explorer 4.0. Just click the **DeskMenu** icon in the tray area of the Taskbar to see a menu of the desktop.

But if you want to see the actual desktop in all its glory, here's a different approach: Tab2Desk lets you minimize

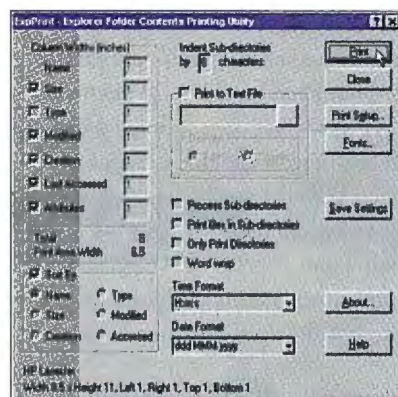

all applications using the **<Alt>-<Tab>** shortcut you use to switch between applications. The desktop appears as an item on your **<Alt>-<Tab>** list just like other applications.

Tab2Desk is part of a \$25 package of utilities from JD Design; see the tip "Print Even More Directories" for details, or look for the file on PC World Online.

### ROOT OUT PRINTING PROBLEMS

**3.8** IF YOUR ATTEMPTS at printing documents result in mysterious 'Cannot print' messages, the first place to look is the root directory of your hard disk. If the number of files there is close to 512 (the maximum allowed), Windows' Print Manager may not be able to create the temporary files it needs.

The obvious solution is to clean house, or at least your root directory. But how did it get so clogged in the first place? The ►

**FIGURE 3:** PRINT DIRECTORY LISTINGS using the ExpPrint shareware utility.

# 4X write, 12X read. Enough said.

Listen up. It's truly a first! It reads and writes CDs in half the time as the industry's 2x6 recorders. We're talking screaming fast performance for backing up files, distributing data, and creating audio CDs. Professionals will love the speed, beginners its ease-of-use. Both will enjoy its very affordable price. And remember, CD-R offers the lowest storage cost per MB, is very reliable, and universally compatible. But we don't want to shout about it, we'd rather you check it out for yourself. Visit us at [www.teac.com](http://www.teac.com).

**4X12 CD-Recorder**

Making your PC better.

## TEAC®

4X12 CD-Recorder 10X PortaCD™ 6 disc CD-Changer 3½ Floppy Drive 24X CD-ROM

Circle 124 on reader service card

answer may lie in your `autoexec.bat` file. Does it contain a line that begins `'set temp='`? If this line is not present, or if it points to the root (`'set temp=c:\'`) or a nonexistent directory, then all temporary files—which apps create for interim storage—end up in the root.

To solve this problem, first exit Windows and type `del c:\*.tmp` at the DOS prompt. While you're there, look for any other files that belong elsewhere, and move them to their proper directories. Finally, type `edit autoexec.bat`. Look for the `'set temp='` line and make sure it reads `set temp=c:\windows\temp` (or another directory designed to hold such files). Save the file and restart Windows. At least one of your printing problems has now been solved.

## DO DO THAT UNDO THAT YOU DO SO WELL

EVEN IF YOU never use Norton Navigator's File Manager, its Undo feature could one day save your bacon. When you screw up in Windows' Explorer, you can undo only your last action. But Norton File Manager lets you reverse any of your last 9999 actions. It can't remember everything or do the impossible—say, undelete a file destroyed years earlier. But it sure beats a single undo. More to the point, Norton Navigator keeps track of these events for you, even if you don't normally use its File Manager.

You can't turn on this feature in the Configure Undo dialog box, though. To get Navigator to remember file tasks that happened outside of File Manager, start the Norton Navigator Control Center. In the left pane, select *Norton Undo*. In the right pane, check *Track all Windows 95 file operations* and click OK (see FIGURE 4).

FIGURE 4: UNDO THOUSANDS of actions even if you don't normally use Norton File Manager.

From now on, Navigator will be keeping tabs on what you do. If you regret something you've done, start Norton File Manager and choose *Edit•Undo*. The list of actions shows you what Navigator has been watching and may include a number of events you don't normally think of as file management. When you're sure you have found the action you want to change, select it and click *Undo*. Then click *OK*.

## CUSTOMIZE NORTON NAVIGATOR'S UNDOINGS

IF YOU TURN ON Norton Navigator's undo feature (see the tip above), it will be constantly monitoring your file management behavior so you can change your mind later if need be. But some files are of such minimal importance that letting them take up space on Norton's ever-changing list of undoable actions makes little sense. If you notice that it's tracking files you'd rather forget about, you can add them to Norton's exception list—a listing of items that Norton ignores when it's undoing actions. Here's what to do:

First, make a backup copy of these files in the Windows folder: `user.dat`, `user.dao`, `system.dat`, and `system.dao`. (If you don't see them, choose *View•Options* in My Computer or Explorer, click the *View* tab, select *Show all files*, and click *OK*.)

Next, enter the Registry Editor: Select *Start•Run*, type `regedit`, and press *<Enter>*. Then navigate through the tree in the left pane until you come to the branch `HKEY_LOCAL_MACHINE\SOFTWARE\Symantec\Navigator\SYMFSV4\Undo\Exception`. With *Exception* selected in the left pane, make a note of the highest-numbered icon in the right pane. To add an exception (for instance, to make Norton ignore all `.bak` files), right-click in the right pane and choose *New•String Value*. Name the new icon by typing the next-highest number in the folder (for example, 7 if the folder has items numbered 0 through 6). Press *<Enter>* twice—once to complete the naming process and again to open the Edit String dialog box. Under Value Data, type the file extension you want ignored (for example, `*.bak`) and press *<Enter>*. Repeat these steps to add any number of new icons, numbering them in sequence.

## Tell Setup Where to Go

WHEN I PURCHASED my laptop PC, the compressed "cabinet" (.cab) files, in which Microsoft distributes Windows 95, were included on the hard drive. After I backed them up using Microsoft Create Disks, Windows 95 assumed that the .cab files were residing on my floppy drive. Now that I have Windows 95 on CD-ROM, I'd like to use that version whenever Windows needs a specific .cab file. But Windows won't let me specify the path. How can I make it recognize my CD-ROM drive?

Justin Kuo, Lexington, Kentucky

YOU'RE NOT THE only one with this problem; it can afflict anyone who installs a CD-ROM drive or makes other system changes that affect the drive letter of their original Windows 95 installation. Fortunately, you can fix it by editing the Windows Registry.

As a precaution, first make a backup copy of these important files in the Windows folder: `user.dat`, `user.dao`, `system.dat`, and `system.dao`. (If you don't see them, choose *View•Options* in My Computer or Explorer, click the *View* tab, select *Show all files*, and click *OK*.)

Now start the Registry Editor: Choose *Start•Run*, type `regedit`, and press *<Enter>*. Then navigate through its branches until you come to `HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Setup`. Now, select the *Setup* icon in the left pane, and double-click *Source Path* in the right pane. In the Value Data box, type the new drive letter and path to the Windows 95 source files—for example, `f:\win95\setup\` (your path may vary). Then click *OK* and exit the Registry Editor.

The next time you run Windows Setup, it should know where to look.

When you're through, double-click the *Count* icon and change its Value Data to the total number of string icons in the folder. Click *OK* and exit the Registry Editor, then exit and restart Windows.

As the industry leader,  
we have a firm belief about ultraportables.

They should be ultra portable.

Introducing the new 3.8 lb. Portégé. Do more than ever. See more than ever.

Years ago we coined the term ultraportable to characterize the small footprint and unprecedented power of Portégé.® Since then, ever-changing business needs have made advanced technology and increased productivity essential. Equipping you to go head to head in business today, we introduce the Toshiba Portégé 300CT. Compact and light, yet uncompromising in its performance. Outfitted with a unique new panoramic screen that gives you the ability to easily view two applications side by side. And designed with a lightweight, internal magnesium frame ensuring durability and a sleeker look and feel. This is truly the ultraportable for the mobile, and upwardly mobile executive. With the new Portégé, you'll be one step closer to turning our philosophy into yours. **Always Lead.™**

#### Portégé 300CT

- Panoramic 10.4" dia. active-matrix TFT color display, 1024 x 600 resolution
- 133MHz (2.5v) Pentium® processor with MMX™ technology, 256KB L2 cache
- 1.6 billion byte (= 1.5GB) HDD
- 32MB high-speed EDO DRAM (expandable to 64MB)
- PCI system-bus architecture
- HiQVide™ PCI graphics controller with 2MB video memory (4Mbit EDO RAM)
- MPEG playback through either software or optional ZV Card
- 16-bit MIDI, WAV and Sound Blaster® Pro compatible with speaker and microphone
- Universal Serial Bus (USB) port
- Supports two Type II or one Type III 16-bit PC Cards, ZV Cards or 32-bit CardBus Cards
- Port Expander
- Built-in 33.6Kbps, V.34 voice/data/fax modem
- Fast Infrared (FIR) IrDA compliant ports
- Lithium Ion battery
- Accupoint™ pointing device
- 3.8 lbs.
- Optional Multimedia Port Replicator
- Windows® 95
- 3-year limited warranty
- Toll-free technical support - 7 days a week, 24 hours a day

For more information, visit <http://computers.toshiba.com>, or call 1-800-457-7777.

In Touch with Tomorrow  
**TOSHIBA**

#### PANORAMIC SCREEN

Allows 20% more workspace area and by its very nature, increases your productivity. View two Web sites at once on the new panoramic screen with 1024 x 600 resolution

#### MMX™ TECHNOLOGY

Maximize your multimedia applications by 10-20% using the Pentium® processor with MMX™ technology.

#### EXPANDABILITY

The new Multimedia Port Replicator gives you 10X\* CD-ROM, two stereo speakers and instant connection to your desktop environment.

## DELL DIMENSION® DESKTOPS FOR BUSINESS

**Common features:** ♦ Mini-Tower Model ♦ 512KB Integrated L2 Cache ♦ Microsoft® Office 97 Small Business Edition plus Bookshelf ♦ McAfee VirusScan 3.1 ♦ Microsoft 4.0 ♦ MS IntelliMouse on XPS Systems/Microsoft Mouse on non-XPS System ♦ 2 Universal Serial Bus (USB) Ports ♦ 3 Year Limited Warranty\* with 1 Year On-site\* Service  
**Upgrades:** ♦ 3Com® 3C905 Fast EtherLink® XL 10/100 PCI Card, add \$79. ♦ 4/8GB EIDE TR4 TBU, add \$199. ♦ 3 years On-site\* Service, add \$99. ♦ APC Back-UPS Pro 650 PnP,

# Gantt Charts in Excel

I'VE HEARD you can create a Gantt chart using Excel, but Gantt charts are not listed as an option. Am I missing something?

Gail Buller, Dixon, California

NOPE. EXCEL doesn't offer Gantt as a chart type, but it's fairly easy to create such a chart by using a stacked bar chart. Follow these steps:

1. Start with a new workbook and enter your task data, as shown in **FIGURE 1**. Column A contains the task descriptions; column B, the start date for each task; and column C, the number of days to complete the task. Column D contains formulas that determine the completion date for each task. For example, the formula in cell D2 is `=B2+C2-1`. Column D isn't essential, but including it will tell you exactly when a particular task is scheduled to end.

	A	B	C	D
	Task	Start Date	Duration	End Date
2	Planning Meeting	12/29/97	1	12/29/97
3	Develop Questionnaire	12/30/97	11	1/9/98
4	Print and Mail Questionnaire	1/13/98	9	1/21/98
5	Receive Responses	1/16/98	15	1/30/98
6	Data Entry	1/16/98	18	2/2/98
7	Data Analysis	2/3/98	4	2/6/98
8	Write Report	2/9/98	12	2/20/98
9	Distribute Draft Report	2/23/98	1	2/23/98
10	Solicit Comments	2/24/98	4	2/27/98
11	Finalize Report	3/2/98	5	3/6/98
12	Distribute to Board	3/9/98	1	3/9/98
13	Board Meeting	3/17/98	1	3/17/98

**FIGURE 1:** THIS DATA can be plotted in a format that resembles a Gantt chart.

2. Create a stacked horizontal bar chart from the data in range A2:C13. The Chart Wizard will probably guess these series incorrectly, so you'll need to set the category axis labels and data series manually. The category (x-axis) labels should be range A2:A13; the Series 1 data, B2:B13; and the Series 2 data, C2:C13.

3. Remove the chart's legend, and adjust the chart's height (or change to a smaller font) so that all x-axis labels are visible.

4. In the Format Axis dialog box, select the following Scale options for the x-axis: Categories in reverse order and Value (y) axis crosses at maximum category. This displays

the tasks in order from top to bottom.

5. Access the Format Axis dialog box for the y-axis. Set the Minimum and Maximum values to correspond to the earliest

**FIGURE 2:** WHAT LOOKS LIKE a Gantt chart is actually a stacked bar chart.

and latest dates in your project. Note that you can enter actual dates into this dialog box. To display weekly intervals, set the Minimum to a Monday, the Maximum to a Sunday, and the Major Unit to 7.

6. Select the data series that corresponds to the data in Column B and go to the Format Data Series dialog box. Set Border to None and Area to None. This hides the first data series—the start dates—making the chart resemble a Gantt chart.

7. Apply other formatting as desired. For example, you can add grid lines and a title. **FIGURE 2** shows the completed chart after some touch-up work.

If you adjust your project schedule, the chart will be updated automatically. If you use dates outside the original date range, you'll need to change the scaling for the y-axis.

## COUNT WORDS IN A CELL

I USE EXCEL TO manipulate text and often need to count the words in a cell. I use the LEN function to return the number of characters, but I can't figure out how to count the words. I'd prefer to avoid using a macro if possible.

Peter Courtland, Boston

PERHAPS THE SIMPLEST solution is to write a custom VBA worksheet function. But since you prefer a nonmacro solution,

I developed a rather complex array formula. The number of words in a cell is equal to the number of space characters (character code 32), plus 1. Use the following array formula to return the number of words in a cell (in this case, cell F9):

`=sum(if(mid(trim(F9),row($A$1:offset($A$1,len(trim(F9))-1,0)),1)=char(32),1,0))+1`

To enter an array formula, press **<Ctrl>-<Shift>-<Enter>** rather than just **<Enter>**.

Excel identifies an array formula by placing brackets around the formula. Notice that this formula uses the ROW function, with a reference to cell \$A\$1. This is a trick that generates an array of consecutive integers beginning with 1 and ending with the number of characters in the cell. This integer array is then used as the second argument for the MID function. The formula also uses the TRIM function, which eliminates any excess spaces that would result in an incorrect word count.

## SHRINKING 1-2-3 RELEASE 97'S INFOBOX

I'VE UPGRADED TO 1-2-3 release 97, and I really like the new always-on-top InfoBox for formatting my worksheets. But sometimes it's annoying and gets in the way. Any suggestions?

Rita Ingress, Dallas

THE INFOBOX makes formatting any selected object a breeze, but it does tend to hide important information. You can move it by dragging its title bar or close it and then reopen it as needed. However, if you prefer to keep it on screen, but reduced in size, double-click its title bar. The tabs remain visible (see **FIGURE 3**), and when you click a tab, the InfoBox is restored to its full size.

**FIGURE 3:** DOUBLE-CLICK the title bar of 1-2-3 97's InfoBox to shrink the box to this array of tabs.

Spreadsheets welcomes your questions and tips and pays \$50 for published items. Contributing Editor John Walkenbach is the author of nearly two dozen spreadsheet books and maintains The Spreadsheet Page ([www.j-walk.com/ss/](http://www.j-walk.com/ss/)). See page 14 for contact information.

# New **Quicken** deluxe 98

*Cari Jacobs may be celebrating  
a \$450 tax deduction after all.*

*The Lamonds will save \$220 on  
their life insurance next year.*

*Lee and Tracy Story will refinance their home in '98  
and save \$2,400.*

## **Get more from your money. Get more from life.**

**Take charge now.** You're expecting more from life this coming year. So upgrade now to Quicken® Deluxe 98. With its rich new features, you'll be getting more from your money.

**Manage your investments.** Receive free news, quotes and analysis on the investments you follow, to stay informed with no effort. And get online statements from top brokerages and mutual fund companies downloaded easily into Quicken, for complete up-to-date records. No typing required!

**Uncover important tax deductions.** Locate tax breaks and play "what-ifs" with

our updated Tax Deduction Finder and Tax Planner.

**Find a great mortgage deal.** Make apples-to-apples comparisons of rates from leading national lenders, all in one place. Get a better deal in a fraction of the time it takes to shop around.

**Pay less for insurance.** Eliminate multiple agent meetings and paperwork, find the insurance you need online, and compare rates from Prudential, John Hancock and more – with no pressure to decide.

**Prepare for emergencies.** Protect your family's finances by keeping your

personal, legal, financial and medical records organized and ready with Emergency Records Organizer.

And if you use Quicken for business and personal finances, new **Quicken Home & Business** (for Windows) is now available – with important extras like customized invoicing.

Get new Quicken Deluxe 98 today!

Mac & Windows compatible. Year 2000 ready. Rebate applies to previous Quicken users who buy at retail or online.

# Announcing Two More Ways to Exceed Your Expectations

From One Name—Plextor.

## UltraPlex Ultra SCSI CD-ROM Drive and PlexWriter 4/12max CD-Recorder

**UltraPlex:** Meet the SST of CD-ROM drives. The first of its kind to support Ultra SCSI burst rates of 20MB/sec—max for a CD drive, max for an 8-bit bus, all for max throughput and efficiency.

We're talkin' wicked-fast 32X/14X max/min transfer rates with an 85ms access time. Translation: high-end desktop, workstation, server, even power gamer types can minimize CPU/CD drive interaction time, multitask and fire up system performance. Simultaneously. All of it benchmarked and factory certified.

Those in the know call Plextor the best upgrade to extend the life of your system.\* No surprise then that Plextor CD drives also max the needle on the repeat purchase meter.\*\*

Throw in the best introductory price ever and the UltraPlex shouts "more drive for the money" loud and clear. Caddy or tray. Get one today.

**PlexWriter:** Meet another high-performance first from Plextor. It writes discs at 4X—and speed reads 'em back at up to 12X, with 190ms access time. That's two drives in one. For the price of one. It's the 4X CD-R with Best-of-Class read performance.

To get it written right the first time, every time, PlexWriter supports synchronous data transfer, utilizes Fast SCSI burst rates for reading and writing and sports a 2MB buffer. Fool-proof media recognition automatically adjusts power and burn time—to ensure it writes without failure. All protected in a caddy. That's reliability to the max.

Retail kits include a tray/caddy adapter for tray comfort and caddy protection. And bundled software supports Sneakernet and hard drive disaster recovery from bootable CD. It all adds up to a top-rated price/performance ratio that makes PlexWriter the CD-R to buy.

Exceed your expectations today. Visit [www.plextor.com](http://www.plextor.com). Or call us at 1-888-412-7539.

## TV on your PC plus Internet

STB's TV PCI™ television tuner brings the world of video, television and the internet to your PC at an unbelievable 84kbps download rate\*.

- ✦ 125 Channel Cable-Ready TV Tuner
- ✦ Intel InterCast™ Technology
- ✦ Video Conferencing Ready
- ✦ Video Capture and Editing (.avi files)
- ✦ Image Capture (.bmp files)
- ✦ On-line Stock Quotes
- ✦ Plug-and-Play Ease of Installation

It's so easy to get an exciting new world of interactive information with TV PCI.

"For its high-quality display, easy installation and reasonable price, the TV PCI rates a place on our Recommended List."

—Windows Magazine, April 1997

"The VELOCITY 3D, STB TV PCI, and InterCast are the terrific trio of the television world, bringing you video, TV and information on the small screen."

—PC Magazine, March 4, 1997

"The fact remains that TV PCI provides all the features of both a TV tuner card and an inexpensive video-capture card, for about what you might pay for either one. Its high picture quality and versatility make it an excellent buy."

—Computer Shopper, April 1997

TV PCI is compatible with most Pentium P90 or faster systems with a PCI bus and video cards from STB, ATI, Creative Labs, and Diamond. Limited capabilities of Matrox products may reduce functionality. Visit our web site for additional information.

Find STB products at Best Buy, CompUSA, MicroCenter, Fry's, CDW, Computability, NECC, PC Connection, and in systems from Acer, Compaq, Dell, Gateway 2000, IBM and others.

# Make Long Documents Easier to Navigate

DO YOU WRITE long documents that will be distributed on a network rather than on paper? Make life easier for your readers by adding navigational aids. Word 97 and WordPerfect versions 7 and 8 offer simple tools for creating hypertext links that let readers jump quickly to any location in the document.

**In Word 97:** As you create your document, mark headings, subheadings, and other important locations as bookmarks. To do this, position the cursor at the location you

**In WordPerfect 7 and 8:** As you create your document, mark its headings, subheadings, and other important locations as bookmarks. To do this, place the cursor where you want the bookmark. Select *Tools•Bookmark* (if you're using version 8) or *Insert•Bookmark* (if you're using version 7). Then click *Create*, type a name for the bookmark, and click *OK*.

To create hypertext links to your bookmarks, highlight the text you want to use

as a hyperlink, and select *Tools•Hyperlink* (in version 8) or *Tools•Hypertext/Web Links* (in version 7). In WordPerfect 8, click the *Bookmark* drop-down list in the Hyperlink Properties dialog box, then select the appropriate bookmark and click *OK* to create the link. In WordPerfect 7, click *Create* on the Hypertext tool bar. Select *Bookmark* in the Create Hyper-

text Link dialog box, then choose a bookmark after pulling down the associated list. Click *OK* to mark the selected text as a Hypertext link.

## STOP AUTOMATIC WEB LINKS

IN THE LATEST WORD processors, it's a snap to add a different kind of hyperlink—one that points to another document anywhere on the Internet or on your intranet. In fact, Word 97 and WordPerfect 8 create hyperlinks automatically by default when you type an Internet address: Click on the link, and you go directly to that location on the Net. But sometimes this feature can be a pain. If you don't want it, here's how to turn it off.

**In Word 97:** Select *Tools•AutoCorrect*. Click the *Autoformat As You Type* tab in the AutoCorrect dialog box. Next, clear the

*Internet and network paths with hyperlinks* check box, and then click *OK*.

To deactivate a hyperlink in a Word 97 document—whether it was created manually or automatically—right-click the hyperlink, select *Hyperlink•Edit Hyperlink*, and click the *Remove Link* button in the Edit Hyperlink dialog box.

**In WordPerfect 8:** Select *Tools•QuickCorrect*. Click the *QuickLinks* tab in the QuickCorrect dialog box. Uncheck the *Format words as hyperlinks when you type them* check box, and click *OK*.

## LIGHTS! CAMERA! ACTION! IN WORD

YOU CAN DRAMATICALLY enhance a Word 97 document by adding a video or sound clip to it—viewers can just click an icon to hear your point or view the CEO's last luncheon speech. If you loaded the Clip Art Gallery when you installed Word, here's the easiest way to add such clips. (Word 95 users can still add these clips but must use the *Insert•Object* command.)

1. Select *Insert•Picture•Clip Art*. Word will display a dialog box reminding you that more clip art choices are available if you insert the CD-ROM. Click *OK*.

2. Select the *Sounds* or *Video* tab, then choose the appropriate sound or video clip from the dialog box.

3. Click *Insert* to place the object at the current cursor location.

**Tip:** When you insert a video clip, the first frame will appear in the document.

FIGURE 2: ENLIVEN YOUR WORD DOCUMENTS by adding video or sound clips.

To convert the clip to an icon, right-click the image and select *Video Clip Object•Convert*. Then in the Convert dialog box (shown in FIGURE 2), click the *Display as icon* check box and click *OK*.

Chapter 7: Loglinear Models for Rectangular and Other Simultaneous Effects

Robert D. Mare

FIGURE 1: INSERT HYPERLINKS for important sections to help your readers navigate a long document.

want to mark, then select *Insert•Bookmark*. In the Bookmark dialog box (see FIGURE 1), type a unique name for the bookmark, inserting an underscore character between each word, and click *Add*.

Once you've created your bookmarks, you can create hypertext links to them. First, highlight the text you want to use as a hyperlink; for example, you might use the words *Chapter 7* as the link to Chapter 7 itself. Select *Insert•Hyperlink* (or press *<Ctrl>+K*). In the Insert Hyperlink dialog box (see the left side of Figure 1), click *Browse* in the lower half of the dialog box, select the appropriate bookmark in the Bookmark dialog box, and click *OK* twice to finish the job. Your highlighted text will appear underlined and in a different color in the text. Repeat this step as needed to create links to all your bookmarks.

## GET GREAT CLIP ART FROM MICROSOFT'S WEB SITE

HAVING A HARD TIME finding just the right graphic, photograph, sound clip, or video clip to add to your Word 97 document? Microsoft stores hundreds on its Web site, but they're available only to Office 97 users.

If you have an Internet connection, just select **Insert•Picture•Clip Art** in Word 97. In the Clip Gallery dialog box, click the **Globe** icon, and then click **OK** to go to Microsoft's Clip Gallery Live site at [www.microsoft.com/clipgallerylive/](http://www.microsoft.com/clipgallerylive/) (shown in FIGURE 3). Select 1 of the 37 categories of images listed on the left side of Micro-

FIGURE 3: MICROSOFT'S Clip Gallery Live offers free graphics, sound clips, and videos.

soft's page, then browse through the available clips shown on the right side of the page. To retrieve the one you want and

add it to your local Clip Gallery archive, click the hyperlinked file name under its thumbnail image.

**Important:** If your browser asks you whether you want to open the clip art file or save it to disk, choose the **Open** option to import the file properly. If you choose to save the file to disk instead, the image will be unusable.

Word Processing welcomes your questions and tips and pays \$50 for published items. Contributing Editor George Campbell is a contributor to *The PC Bible* (Peachpit Press, 1995, 800/283-9444). See page 14 for contact information. ■

## Tracking Changes to Documents in Word 97

WORD 97'S FEATURES for handling revisions by one or more editors can streamline work-group projects, but the process can be confusing. Here are a few tips to make these tools work better for you and your cohorts:

**Password-protect a document.** To ensure that only selected people can change a document, you can password-protect the revision-marking process. After creating a document, select **Tools•Protect Document**. In the Protect Document dialog box, select **Tracked changes** to prevent unauthorized users from accepting or rejecting changes, select **Comments** to allow users to insert comments but

not change content, or select **Forms** to allow users to change only certain sections of a document. Type in a unique password.

**Save all versions.** To further ensure the safety of your document, you can tell Word to save a version each time the document is closed or whenever you exit Word. It's best to do this after completing the first draft.

To turn version saving on, select **File•Versions**. In the resulting dialog box, click **Automatically save a version on close**, and click **Save Now**. In the Save Version dialog box, add any comments and click **OK**. In the Save As dialog box, specify a file name and click **OK**. To view or delete a different version, open the current version, select **File•Versions**, and

click the version name. Click **Open** to view that version or **Delete** to remove it.

**Hide revision marks.** To turn off the display of deleted text (and make the document easier to read), select **Tools•Track Changes•Highlight Changes**. In the Highlight Changes

dialog box, clear the **Highlight changes on screen** check box and click **OK**.

**Select an easier toolbar or dialog box.** When reviewing a revision-marked document, you can use the Reviewing toolbar to find and manage changes. To display it, right-click any toolbar and select **Reviewing**.

Many users, however, find the toolbar's icons difficult to remember. To use a less cryptic dialog box instead, select **Tools•Track**

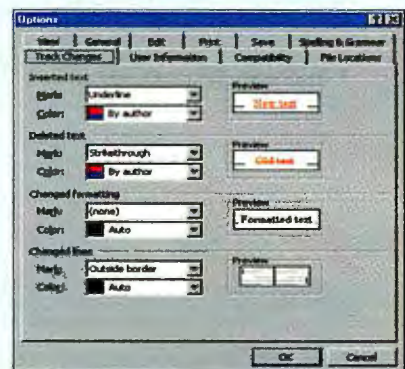

**Changes•Accept or Reject Changes**. The resulting dialog box floats on the screen and offers the same options as the toolbar, but in words rather than icons.

**Find out who did what—and when.** When you rest the mouse pointer briefly over a revision, the name of the editor, along with the

date and time of the change, should appear. If it doesn't, select **Tools•Options**, click the **View** tab, and check the **Screen Tips** box.

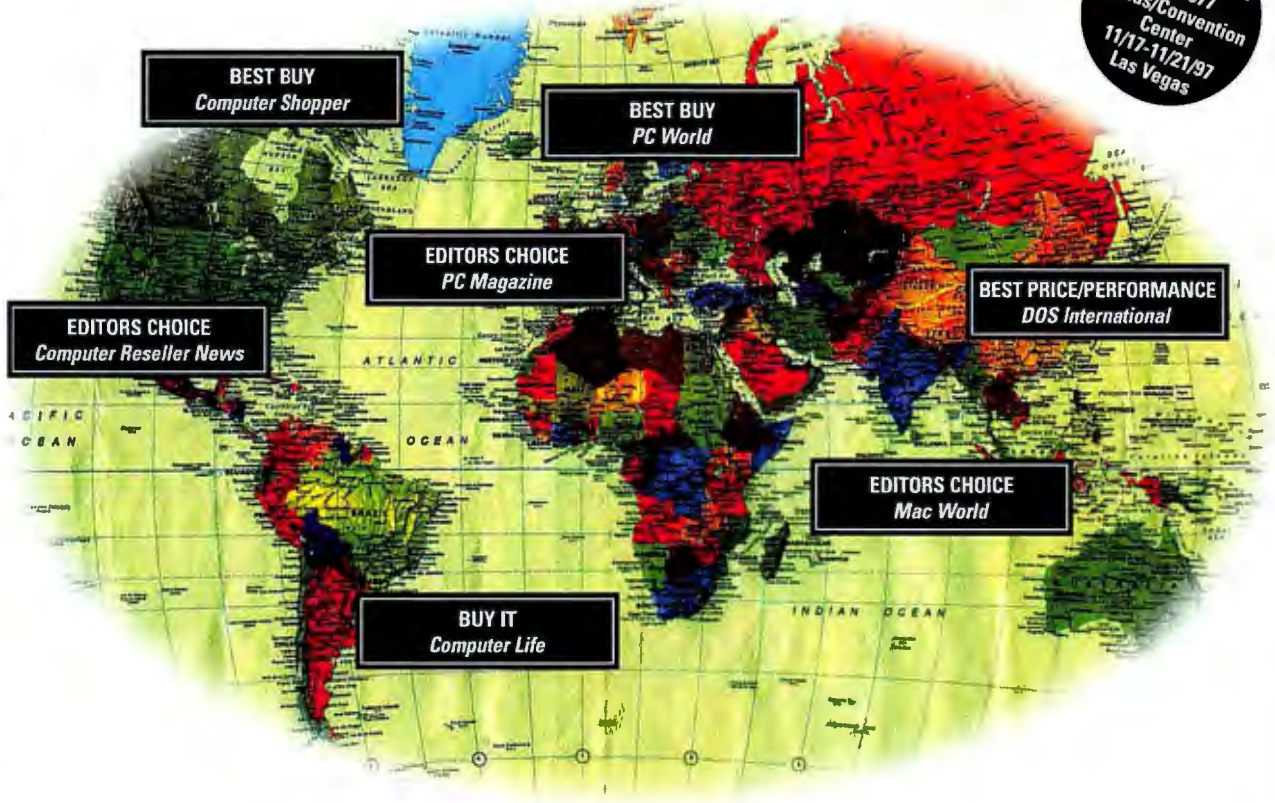

**Select a look.** To specify the look of revision marks, select **Tools•Options**, and click the **Track Changes** tab (or right-click the **Trk** button on the status bar at the bottom of the screen and select **Options**). In the Options dialog box, select a color, choose whether you want to strike through or hide deleted text, and indicate how changed lines should be tagged in the margins.

## See For Yourself Why The Experts Choose iiyama.

Leading editors, tech authorities, and independent labs around the world have one thing in common: they consistently award iiyama's line of VisionMaster monitors such prestigious titles as Editors Choice, Best Price/Performance, and Expert Pick. In fact, they've done it 96 times. They've noted the line's sleek, compact designs, leaving more room on the desktop. They've commented on their high resolution and blazing fast refresh rates that make it easier than ever to work. They've raved about their easy-to-use on-screen controls. And they've praised iiyama's full 3-year parts and labor warranty – the best in the business. You'd think such high caliber products would merit equally high price tags.

Filter out spam ♦ Hide Web visits on a shared PC ♦ Protect your 'cyberspace'

# Automate E-Mail Tasks

THE WORST THING ABOUT E-MAIL is that there's always too much of it. If you have only one e-mail account for your friends, family, and business associates, you probably find yourself spending too much time sifting through mountains of messages each day, prioritizing some, forwarding or filing others, and nuking what's left. And invariably you delete a message you should have saved, and save a lot of messages you could easily live without.

If your e-mail client is Netscape Communicator 4.01's Messenger or Microsoft Internet Explorer 4.0's Outlook Express, you can have your incoming mail sorted, forwarded, stored, and deleted automatically by subject, sender, and even content.

Mail filtering is especially helpful if you subscribe to one of those conversationally bloated mailing lists. You can set up your browser to funnel the list's daily deluge of chitchat into a special folder for later offline reading. You can also sort incoming mail by address and store messages from certain clients or associates in specified folders. You can even use your browser's mail-filtering functions to help stem the tide of spam.

Internet Explorer 4.0 also lets you set up rules to automatically send out standard replies to messages that meet certain criteria—mail that arrives while you're out of town, for example—and to refrain from downloading big file attachments.

**FILTERING RULES** in Netscape Communicator (left) and Microsoft Internet Explorer 4.0 (right) let you automatically forward, store, or delete e-mail messages that meet specified criteria.

## SORTING MAIL IN COMMUNICATOR 4.01

1. **CREATE A NEW FOLDER** for storing mail. To load Communicator's Messenger Mailbox, press **<Ctrl>-<Shift>-1** or click the mailbox icon on the components tray.

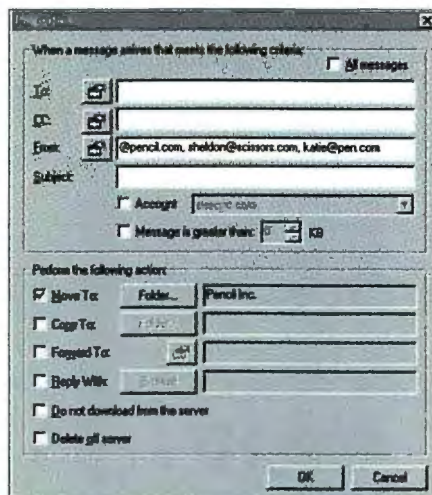

(You may need to enter a password.) Select **File•New Folder**, and in the dialog box enter a folder name (you can designate it as a subfolder of your Inbox or other mail folder). Click **OK**.

2. Select **Edit•Mail Filters** and click **New**.

3. In the Filter Rules dialog box, type a filter name.

4. Click the **If the** drop-down list and choose **sender** to select mail from a specified person, or choose **subject**, **body**, or **date**. If you want to move the mail from a group of clients to a specific folder, for example, your rules might look like the ones on the left side of the figure below. Click **More** to apply more rules or to specify multiple addresses.

5. In the 'then' field you can specify what you want done with the mail—move it to a folder, delete it, or reprioritize it. You can also choose to watch or ignore messages

related to certain threads. If you specify that messages be moved to a folder, you'll need to select the folder from the drop-down list. When you're done, make sure **Filter** is turned on, then click **OK**.

## SORTING MAIL IN INTERNET EXPLORER 4.0

1. **LOAD OUTLOOK EXPRESS MAIL** by clicking the **Mail** icon and selecting **Read Mail** in Internet Explorer. Create a new subfolder in which to store sorted mail by right-clicking the **Inbox** icon. Click **New Folder**, type a folder name, and click **OK**.

2. To create rules for how mail should be sorted into that folder, select **Tools•Inbox Assistant** from the menu, then click **Add**.

3. In the Properties dialog box (see the right side of the figure), type the address of the sender, words from the message's subject, or other properties of incoming mail you'd like filtered. In the **From** field you can type multiple addresses, separated by a comma, or parts of an address—for example, just the domain name.

4. In the bottom half of the Properties box, specify the action you'd like performed. To move the mail to your newly created folder, check the **Move To** box, click **Folder**, and click **Browse** to find the folder. You can have Outlook Express dispatch replies to certain messages by checking the **Reply With** box, then clicking **Browse** to select a word processing file. Just be sure the file is stored in text-only format, unless your recipient uses the same word processor as you do. Click **OK** when you're finished.

5. Back in the Inbox Assistant, make sure your rule is checked, then click **OK**.

## BLOCKING BIG FILE ATTACHMENTS

YOU CAN PREVENT Internet Explorer from downloading big file attachments by creating a rule that leaves e-mail attachments larger than a certain size on your Internet service provider's mail server. In Outlook Express, select **Tools•Inbox Assistant** and click **Add** to create a new rule.

In the Properties dialog box, check the **Message is greater than** box, and use the scroll bars to set a message size limit. ►

# COMING UP

IN JANUARY

## PC 2001: BACK TO THE FUTURE

400-MHz-plus Pentiums, rewritable DVD-RAM drives, 20-inch flat-panel displays—check out the latest dramatic advances in CPUs, storage, displays, and other technologies that could end up on your desktop.

## WHICH ISP IS BEST?

Between busy-signal meltdowns and e-mail travails, online consumers found lots of reasons to go ISP shopping. We checked out 12 providers, tested performance and reliability, surveyed 6000 users—and found some real winners.

## FINALLY DVD!

You've waited for DVD, and your patience is about to be rewarded. Second-generation DVD drives that can read CD-ROMs are hitting the marketplace, and *PC World* has the first of them.

## PHOTO EDITING MADE EASY

Jazzing up images in your presentation, newsletter, or Web page? We test eight packages, and what do you know—photo editing software is finally cheap, easy to use, and fun.

## ALSO NEXT MONTH

► **The Top 100:** The best power desktops, budget desktops, notebooks, and home PCs, plus our top printers, monitors, graphics boards, and modems.

► **The Right Web Servers:** Finding the perfect setup over the Internet or on company intranets requires the right front-line equipment. Here's how to choose your Web server.

► **Here's How:** Answer Line on locking people out of your computer, *Upgrade Guide* on installing a personal scanner, *Windows Tips* on the best routes to superfast file navigation.

# PC WORLD

The limit will depend on whether you receive a lot of graphics files or word processing documents, and whether your pen pals are especially verbose. Otherwise, 10K is a good limit. Check the *Do not download from the server* box, then click OK. In the Inbox Assistant dialog box, check your rule to activate it, and click OK.

When someone sends you e-mail with a big attachment, just the message will arrive in your in-box. To download the attachment, you'll need to dial up your ISP. First, though, you must deactivate the rule about leaving big e-mail attachments on the ISP's server: Select *Tools>Inbox Assistant*, uncheck the rule, and click OK. Once you've downloaded the file (by clicking *Send and Receive* to retrieve mail as you normally do), you can reactivate the rule.

Unfortunately, Communicator doesn't offer a similar feature.

## FILTERING SPAM

MAIL FILTERING IN Internet Explorer and Communicator lets you turn back the flood of spam. First you need to create filtering rules to delete messages whose subject and body contain words that are characteristic of spam. Here are some of them: *hot, live, one-on-one, porn, porno, calling card, ladies, babes, toll-free, toll free, cutie, girls, weight loss, lose weight, authorized, independent distributor, sugar, strippers, multi-level, dear friend, pennies, adults only, guaranteed, money, \$, congratulations, free.*

Next, create a rule that deletes mail coming from known spammer addresses and domains. You'll have to type the addresses yourself. You can find a list of them at Multimedia Marketing Group's spammer site: [www.mmgo.com/nospam/](http://www.mmgo.com/nospam/).

## PURGE URLS FROM NAVIGATOR'S LOCATION BOX

HOW CAN I delete the URLs in Netscape Navigator's drop-down Location box? I share a PC with other students and would prefer that they didn't know which sites I visit on the Web.

Richard L. Wiringa  
Madison, Wisconsin

HOW YOU DELETE URLs from the Location box depends on which versions of Navigator and Windows you run. ►

# Flexible!

## Total Flexibility in an Easy to Use Accounting Solution

## MYOB Accounting Plus...

If you use Microsoft® Office, your only choice for accounting is MYOB. Plus. Manage your business the smart way. With its general ledger, checkbooks, sales, purchases, inventory, payroll and contact card file, *M.Y.O.B. Plus* is perfect for your small business. And now with *M.Y.O.B. OfficeLink*, you can open any of M.Y.O.B.'s over 100 reports directly in Excel. And you'll love the single-click ease of merging letters with Word. With *OfficeLink*, you need only enter your data once - and know that you can easily share that information with the other programs you use every day.

This trial CD contains live, working copies of M.Y.O.B. and M.Y.O.B. Premier Accounting.

## Save Clippings With ClipMate

WHILE SURFING THE WEB or chatting in a mailing list, you've probably run across nuggets of useful information. ClipMate is a handy tool for storing these gems. Just copy the information from the screen and paste it into ClipMate. Unlike Windows' Clipboard, which allows you to copy and paste only one selection at a time, ClipMate saves everything you select and lets you organize it into folders. This utility, from Thornsoft Development, is available for Windows 3.x and 95.

• ClipMate \$25 list; Thornsoft Development; 716/227-6505; [www.thornsoft.com](http://www.thornsoft.com)

READER SERVICE NO. 628

**Navigator 3.x and Windows 3.x.** Find the `netscape.ini` file in the `\Windows` directory and open it in a text editor. In the URL History section, delete all the URLs. Save the file in text-only format.

**Navigator 3.x and Windows 95.** You'll have to edit Windows' Registry, but before you do, back up these files: `system.dat`, `system.dao`, `user.dat`, and `user.dao`. To open the Registry Editor, select **Start>Run**, type `regedit`, and click **OK**. To find a URL you'd like to hide, press **<Ctrl>+f**, type the URL into the *Find What* box, and click *Find Next*. You'll eventually arrive at a list of URLs at `HKEY_CURRENT_USER\Software\Netscape\Netscape Navigator\URL History`. Pick through the list on the right side of your screen (stay away from the left side!), and delete the revealing URLs.

**Communicator 4.x and Windows 95 or 3.x.** In Notepad, open the file `prefs.js` (look in `Program Files\Netscape\Users\YourName`, or `Netscape\Users\YourName`). The URL lines look something like this:  
`user_pref("browser.url_history.URL_1", "http://www.pcworld.com/")`

Delete the ones you want to keep private, then save `prefs.js` as a text-only file.

To prevent the Netscape software from writing any more URLs to that file, make it read-only: In Windows 95, find `prefs.js` in Explorer, right-click it, select *Properties*, and check *Read-only*. Click *Apply*, then *OK*. Of course, making `prefs.js` read-only means that your other preferences won't

be recorded. In Windows 3.x's File Manager, select `prefs.js`, choose *File>Properties*, select *Read Only*, and then click *OK*.

To keep your browser from writing URLs into its Location box, type them into the Open Location dialog box instead (see the figure below): In Navigator 3.x, select

*File>Open Location*; in Communicator 4.x, select *File>Open Page*. Sites you visit will remain in the `netscape.hst` file, though, so be sure to delete it after each Web session.

Internet Tips welcomes your questions and tips and pays \$50 for published items. Contributing Editor Judy Heim is the author of *The Needlecrafter's Computer Companion* (No Starch Press, 1995, 800/420-7240). See page 14 for contact information. ■

## Protect Yourself in Cyberspace

DID YOU KNOW that clicking innocuous-looking voting buttons on a Web page will shuttle your e-mail address to the Web site's owner? Or that by maintaining a user profile directory, your ISP may be putting your personal data into the hands of scam artists?

The book *Web Psychos, Stalkers, and Pranksters*, by Michael Banks (\$24.99, Coriolis Group Books, 1997, 800/410-0192), is full of tips on preserving your privacy in cyber-

space. Among them: Get a "throwaway ID" that you use exclusively in chat sessions and newsgroups. Consider using a proxy server, like Anonymizer ([www.anonymizer.com/open.html](http://www.anonymizer.com/open.html)), so Web sites don't know where you're coming from. Use your mail software to disguise your address in headers. For instance, change 'john@fishburg.org' to 'john at fishburg dot org' so people will know what it is but spam robots trolling for addresses won't.

# Powerful!

## The Power you Need in an Easy to Use Accounting Solution

## M.Y.O.B. Premier Accounting...

The Ultimate Productivity Solution for Networks. This truly affordable, real-time multi-user accounting system is the ideal solution for your growing business. *M.Y.O.B. Premier* combines the industry's easiest multi-user accounting software with the ultimate "bumper-to-bumper" maintenance membership, including product enhancements, version upgrades and unlimited Toll-Free technical support.

Optimized to run on a peer-to-peer network, *M.Y.O.B. Premier* gives you all the power you need to easily grow your business.

JULY 1997**

**SERVICE AND RELIABILITY SURVEY**

When it comes to service and reliability, who's the one notebook vendor you can truly count on? According to the nearly 8,500 people who responded to *PC Magazine's* 10th Annual Service and Reliability Survey, there is only one. (Impressive considering they rated some 3,800 notebooks from 15 vendors, isn't it?) How did we earn the only "A"? Over the last year, our users reported better than average scores on four key measures: satisfaction with reliability, repair experience, and technical support; and the need for recent repairs. They also said they'd buy one again. To say the same for your notebook, visit us on the Web or give us a call.

## Ride the Universal Serial Bus ♦ Customize your keyboard layout

# Keep That PC Clean!

IS YOUR IDEA of maintaining a PC simply to turn off its monitor before leaving for a long weekend? Is your keyboard starting to look like a checkerboard? Think that keeping your computer clean isn't really worth the time and trouble?

Think again.

Accumulations of dust, smoke, and grease on PC parts can lead to all kinds of problems, from poor performance to a complete system crash. Sometimes it's a slow, lingering death brought on by corroding circuits and punctuated by nagging intermittent errors that can drive you nuts. Other times it's a sudden loss of your whole system, thanks to an overheated CPU or other component. Either way, a small investment of time and money can save hours of frustration and unnecessary expense. Here's a quick guide to clean living with your PC.

### SOMETHING IN THE AIR

IT SEEMS JUST about everything in the air is bad for your computer. Dust and dirt can clog ventilation ports and form insulating layers on chips. That can lead to overheating, which can damage or destroy chips—especially the hot-running CPUs in many newer PCs. And airborne particles can corrode and even fry your computer's delicate circuitry. Even worse, the damage occurs slowly, leading to intermittent errors and problems that are hard to track down.

The biggest airborne threat to your computer is cigarette smoke, which leaves a sticky film that's hard to remove.

The easiest way to keep your PC clean is by making sure the air around it is also

clean. In a large office there's not much you can do. But if you work in a smaller office, you can buy a small High-Efficiency Particulate Air, or HEPA, filtration device that removes airborne particulates. Honeywell (800/554-4558) offers several models ranging from \$80 to \$200.

### THE BROOM CLOSET

BEFORE YOU CLEAN your PC, you need the right tools. Paper towels and rubbing alcohol may work in a pinch, but to do it right, visit your local computer or electronics store. Or get your cleaning supplies from Perfect Data (800/973-7332, [www.perfectdata.com](http://www.perfectdata.com)). For less than \$25, you can get everything you need.

**Lint-free wipes, swabs, and brushes.** Regular paper towels and cotton swabs can leave particulates behind. Special lint-free foam wipes and swabs are readily available and cost about \$7 for 60. Some even come premoistened with an antistatic cleaning solution. A small, high-quality brush is good for dusting plastic surfaces.

**Cleaning solutions.** For cleaning plastics, a lint-free cloth dampened with soap and water works fine. But for cleaning electronics you'll want an alcohol-based antistatic cleaner. Garden-variety rubbing alcohol can't be trusted because it may

contain impurities. Always spray or pour the cleaning solution onto the wipe or swab, never onto the object being cleaned.

**Compressed-gas duster.** A can of compressed gas costs around \$6 and is indispensable for removing dust and particulate matter from hard-to-reach nooks and crannies such as the space between keyboard keys. Get a

brand that's nonflammable and doesn't use Freon or other ozone-depleting gases, and make sure it's meant for electronic equipment. Some dusters, designed for other purposes, generate static charges.

### TIPS FOR GOOD HOUSEKEEPING

ROLL UP YOUR sleeves and clean up:

**Motherboard and I/O cards.** Clean out your system every three to six months, depending on the air quality in your location. Before digging into your PC, make sure that it's turned off and that you are grounded. Especially in dry, cold weather, your body can build up a strong electrostatic charge that can destroy delicate circuits. Always touch the PC's metal chassis before making contact with any electrical component. To be safe and make sure you're grounded, leave the computer's power supply plugged in and touch the power supply's casing.

Next, remove the PC's cover and check the ventilation ports for dust and other obstructions. Use a duster to blow loose debris off the case, power supply, and motherboard. If you have a vacuum cleaner, use it in conjunction with the duster. The goal is to *remove* the dust, not just move it around.

If your computer is in a very dusty environment, you may want to cut up an inexpensive air-conditioner filter and place it over the air intake vent on the PC's case. But remember: A smooth flow of air through the case is essential to dissipate your PC's heat, so clean the filter often.

After removing I/O cards, use the duster to blow away dust on the cards. Then clean the edge connectors with lint-free wipes and cleaning solution. Take care not to touch the edge connectors—oil from your skin can corrode their thin gold coating—or to apply a pencil eraser to them. Also take a swab to the I/O slot connectors on the motherboard.

**Mouse.** Cleaning your mouse regularly can extend its life significantly and often cure problems such as a sticky cursor.

Unplug the mouse and open its circular cover on the bottom by rotating it in the direction of the arrows (see FIGURE 1). Next,

**FIGURE 1: TO CLEAN YOUR MOUSE,** rotate the circular cover and lift out the ball.

## RISK FREE!

We thoroughly test each memory module and stand behind it 100%. That means a lifetime warranty (specific terms and limitations apply) and a 30-day, money-back guarantee on every order.

## HASSLE FREE!

Never installed memory before? No problem. Our "It's A Snap" installation guide will have you up and running in just a few minutes. Plus, our technical engineers are ready with FREE support if you need it.

## PRINTER POWER!

In addition to our computer upgrades, we have an extensive line of premium printer upgrades. Increasing the memory in your printer will allow it to more efficiently handle large documents for quicker throughput. In a networked printer, a simple upgrade can increase performance for an entire group of users!

# Why Not Buy Memory From The Same Place Your Computer's Manufacturer Did?

## Call Us Direct.

When your computer has a name like Compaq, Dell, Hewlett Packard, Micron Electronics, or Gateway you expect a certain level of quality. That's why the top PC manufacturers in the world have installed over 30 million megabytes of Micron RAM. They know they are installing memory they can trust. And now you can, too.

Crucial Technology is a division of Micron, one of the largest memory manufacturers in the world. When you buy Micron memory from Crucial, you are buying the highest quality memory from the most reliable source.

Remember, not all RAM is created equal. Don't trust your computer with anything less than the best.

Memory Is Crucial.™

take out the rubber ball and clean it with just soap and water—chemical cleaners can damage the ball and other mouse parts. And clean out the ball cavity with a lint-free wipe.

If your mouse jumps or won't move smoothly in one direction, there's a good chance that one of its rollers is dirty. Examine the three rollers in the ball cavity. (Two control the mouse's movement on screen—one for vertical motion and one for horizontal; the third roller just helps to hold the ball in place.) Use a swab and nonalcoholic cleaning solution to remove any dirt. If gunk is really caked on the roller, you may need to scrape it off with a toothpick. Don't let caked debris fall into the mouse. Let everything dry, then reassemble the mouse.

**Keyboard.** Like mice, keyboards collect oil and dirt from your hands as well as whatever might spill onto them. To do a quick cleaning, flip the keyboard upside down and use a duster with its straw attachment to clean under the keys. Wipe the keys and surfaces with a damp cloth.

For a more thorough semiannual cleaning, you can pop the keycaps off the board. On most keyboards, the caps are easily removed by gently prying up on opposite sides of the key. But before you try this, make sure you're clear about which key goes where. Also be wary of the springs under the keys; on some keyboards they pop right off when the key comes up.

Once you have all the keycaps removed, clean the board with a damp cloth or specialized cleaner. If you've got a real mess (say, from a soft-drink spill), you can be liberal with your application of cleaning solution—or even water. Just make sure the keyboard is *completely* dry before plugging it back in.

**Monitor.** Desktop PC displays are dust magnets, literally. They build up a strong static charge that pulls dust toward them. Wipe down the screen with a soft lint-free wipe dampened with an antistatic, alcohol-free cleaning solution.

**Notebook screen.** Gently use a clean, soft, lint-free cloth without cleaning solution.

**Floppy drive.** Cleaning kits for floppy drives come with a special cleaning-pad

disk that strips the oxidation off the drive's read/write head. Unfortunately, it can also wear down the head. Unless you are already getting frequent floppy errors, wait for the first sign of trouble before cleaning. A quick blast from the duster could do the trick, too.

**CD-ROM drive and discs.** Cleaning a CD-ROM drive means cleaning the small lens that focuses the drive's laser beam. Cleaning kits are available with a special CD that has brushes attached to its surface. As the disc rotates, the brushes clean the lens. But before you spend \$15 on a new gizmo, try directing a healthy blast of gas from your duster into the drive. Also, many drives are self-cleaning, so buying a special kit may be overkill. Check your drive's documentation.

Finally, keep your CDs free of dirt and oil. To clean the discs, moisten a clean, soft cotton cloth. Gently wipe the shiny side of the disc with strokes that start at the center and move radially outward.

## TAKE THE UNIVERSAL SERIAL BUS

THE RECENT TALK about Universal Serial Bus ports implies that they will be standard on most, if not all, PCs in the near future. However, I am unclear as to what kind of connection USB uses. Does it use some kind of Jack like a PS/2 device? I'm thinking of building a new computer with USB support on the motherboard. Will an old AT-style case suffice?

*Justin Kuo, Lexington, Kentucky*

USB IS A NEW serial port standard that will coexist with and eventually ▶

FIGURE 2: THE UNIVERSAL SERIAL BUS promises easier connections for peripherals.

### OFFICIAL RULES - NO PURCHASE OR ON-LINE USE NECESSARY OPEN TO RESIDENTS OF THE US

1. To enter the Sweepstakes via the Internet you must be an AT&T WorldNet Service member using AT&T WorldNet Service. To enter on-line visit the AT&T WorldNet Service page on the AT&T website at <http://www.att.com/worldnet> or at <http://www.att.com/worldnet/index.html> or the AT&T WorldNet Service home page at <http://www.att.com> from 5/1/97 through 12/31/97. Over the course of the Sweepstakes there will be several drawings of on-line entries which will be described on the "How to Play" page. Once you understand the directions outlined on the "How to Play" page, you may click on the "Registration Page" and complete the official entry form by filling in your name, address, telephone number and e-mail ID and a few survey questions. Once all the game requirements are completed (as described on the "How to Play" page) your name will be entered in a weekly drawing, a quarterly drawing and a Grand Prize drawing (at the end of the promotion). Weekly Drawings: On-line entries must be received by 11:59 p.m. EST each Wednesday following the week in which you wish to be entered in order to be eligible for that week's drawing. For example, entries must be received by 11:59 p.m. EST on Wednesday, May 7, 1997 to be eligible for the first week's drawing. On-line entries received by 11:59 p.m. EST on Wednesday, January 28, 1998 will be entered in the final weekly drawing the final quarterly drawing and the Grand Prize drawing. Quarterly Drawings: On-line entries must be received by 11:59 p.m. EST on Wednesday, July 30, 1997 to be eligible for the first quarterly drawing. On-line entries must be received by 11:59 p.m. EST on Thursday, July 31, 1997 and 11:59 p.m. EST on Wednesday, October 29, 1997 to be eligible for the second quarterly drawing. On-line entries must be received by 11:59 p.m. EST on Thursday, October 30, 1997 and 11:59 p.m. EST on Wednesday, January 28, 1998 to be eligible for the final quarterly drawing. Grand Prize Drawing: All on-line entries received between 12:00 a.m. EDT on Thursday, May 1, 1997 and 11:59 p.m. EST on Wednesday, January 28, 1998 will be eligible for the Grand Prize drawing.

Limit one on-line entry per person per day. Normal Internet access and usage charges imposed by AT&T WorldNet Service will apply. Local, long distance or B014 access charge to reach AT&T WorldNet Service and any additional access charges or taxes that may be imposed on members or on AT&T WorldNet Service may also apply to all users who are not an AT&T WorldNet Service member. Users who are not an AT&T WorldNet Service member or who do not wish to be entered in the sweepstakes may mail a separate envelope a plain piece of paper on which you have pre-printed your name, complete address, Zip Code, telephone number, e-mail address (if applicable) and the words "Travel the World Sweepstakes with AT&T WorldNet Service: TRAVEL THE WORLD SWEEPSTAKES, P.O. Box 7030, Melville, NY 11775-7030. There will be weekly drawings between 5/1/97 and 12/31/97 from among all on-line entries and one grand prize drawing at the end of the promotion from among all entries received. Enter as often as you wish by mail, but each paper entry must be mailed separately by postmarked by the Wednesday following the week in which you wish to be entered and received by the Wednesday following the week in which you wish to be entered. Entries received after the Wednesday following the week in which you wish to be entered will not be entered in the weekly and quarterly drawings that correspond to their postmarks. Paper entries postmarked by Wednesday, July 30, 1997 and received by August 6, 1997 will be eligible for the first quarterly drawing and the Grand Prize drawing. Paper entries postmarked between July 31, 1997 and October 29, 1997 and received by November 5, 1997 will be eligible for the second quarterly drawing and the Grand Prize drawing. Paper entries postmarked between October 30, 1997 and January 28, 1998 and received by February 4, 1998 will be eligible for the final quarterly drawing and the Grand Prize drawing. Mechanically reproduced paper entries will not be accepted. Sweepstakes ends 1/28/98.

2. Grand Prize (1): A trip for two around the world. Includes first-class air transportation on Singapore Airlines, Swissair and Delta Air Lines, departing from the Delta Air Lines gateway closest to the winner's home to Paris, France, Zurich, Switzerland, Istanbul, Turkey, Singapore and Denpasar, Bali, returning to U.S. city from which the winner departed; hotel accommodations (double occupancy), round-trip transfers between airport and hotel, private sightseeing tour, continental breakfast in Paris, buffet breakfast in Zurich, Zurich, one lunch and one dinner in Bali, a five-piece set of Hartmanns Beijing Leather Luggage, including two suitcases, two outing bags and one garment bag, \$20,000 spending allowance and travel insurance. (Est. Retail Value \$70,778). Quarterly Prizes (3 - 1 awarded every three months): First Quarter Prize: An 11-night Hawaiian Holiday for four with visits to Oahu, Maui and Kauai. Includes round-trip economy class air transportation for the major airport closest to the winner's home, transfers between airport and hotel, hotel accommodations (two rooms), inter-island air flights, car rental (not including tax, gas or optional insurance and damage coverage), \$4,400 meal allowance and travel insurance. (Est. Retail Value \$24,945). Second Quarter Prize: A one-week trip for two to Nagano, Japan, to attend the XVIII Olympic Winter Games. Includes round-trip coach class domestic air transportation to Los Angeles, CA, from a major airport nearest to winner's home, round-trip economy class international airfare between Los Angeles and Tokyo, airport transfers, round-trip surface transportation between Tokyo and Nagano, hotel accommodations (twin or double occupancy), full breakfast daily in Nagano, guaranteed Olympics tickets to selected events, including the Opening Ceremonies, transportation to the events. (Est. Retail Value \$11,589). Third Quarter Prize: A round-trip safari for two in Kenya. Includes round-trip economy class air transportation from a major airport closest to winner's home and New York, round-trip business class air transportation from New York to Nairobi, eight-night hotel accommodations (double occupancy), guided, chauffeured round-trip surface transportation between Nairobi and the Masai Mara, round-trip transfers between airport and hotel, all game park entrance fees and travel insurance. (Est. Retail Value \$23,780). Weekly Prizes (300 - 10 awarded each week): To see which prizes are being awarded for that week, go to the home page at <http://www.att.com/worldnet> or <http://www.att.com/worldnet/index.html> and follow the navigational link to the Sweepstakes home page where you will find the navigational link to the Prize Page. Or, to send for a list of prizes that will be awarded each week, write to: AT&T WorldNet Prizes, P.O. Box 7084, Melville, NY 11775-7084. Winners will be selected in a random drawing from among all eligible entries received. Drawings will be conducted by National Instantaneous Inc., an independent judging organization whose decisions are final on all matters relating to this sweepstakes. Odds of winning are dependent upon the number of entries received. Limit one weekly prize per person per week. All prizes will be awarded and winners will be notified by e-mail or regular mail. In the event the Grand Prize or any Quarterly Prize is won by a minor, it will be awarded in the name of a parent or legal guardian. Prizes are non-transferable and no substitutions are allowed except by sponsor who reserves the right to substitute a prize of equal or greater value if advertised prize is unavailable. By entering the sweepstakes, each participant releases the Sponsor and its agents from all responsibility or liability for damages, losses or injury resulting from acceptance or use of any prize. By entering the sweepstakes, entrant recognizes and agrees that the verification information provided by entrant may be made available to AT&T; use of such information will be governed by AT&T's privacy policy. Taxes, if any, related to the prizes are the responsibility of the individual winner. Grand Prize and Quarterly Prize winners may be required to verify address and execute and return an affidavit of eligibility and liability release within 14 days of notification attempt or the prize may be forfeited and alternate winners selected. Entry constitutes permission to use winners' names and likenesses for promotional purposes without further compensation except where prohibited by law. No responsibility is assumed for lost, damaged, incomplete, misdirected, illegible, postage-due or late entries or mail. Sponsor and its agencies are not responsible for technical, hardware, software or telephone malfunctions of any kind, lost or unavailable network connections, or failed, incorrect, incomplete, inaccurate, garbled or delayed electronic transmissions caused by the user or by any of the equipment or programming associated with or utilized in this sweepstakes or by any human error which may occur in the processing of the entries in this Sweepstakes. Sponsor reserves the right, at its sole discretion, to cancel, terminate or suspend the on-line portion of the promotion if it becomes technically corrupted. By playing the Sweepstakes, you may occasionally receive Sweepstakes announcements through e-mail. If you do not want to receive these announcements, follow the instructions on the FAQ page.

3. Sweepstakes open to residents of the U.S., except employees and their families of AT&T WorldNet Service, its affiliates, subsidiaries, contractors, advertising agencies, and Don Jago Associates, Inc. This offer is void wherever prohibited or restricted by national, state or any governmental laws subject to all federal, state and local laws and regulations.

4. For a list of winners, send a stamped, self-addressed envelope to: TRAVEL THE WORLD SWEEPSTAKES WINNERS, P.O. Box 7030, Melville, NY 11775-7030 or click on the home page at <http://www.att.com/worldnet> and follow the navigational link to the Winner's Page.

5. Sponsor: AT&T Corp., Basking Ridge, NJ 07920

# Software Product of the Year.

Windows Magazine  
Summer 1997

## The best remote access software you can buy for your PC, anywhere.

If you're already one of the millions of loyal LapLink® users, you don't need a magazine to tell you that it's the perfect link to the desktop or the network.

But if you're still undecided, you should know that LapLink has racked up more prestigious industry awards (twenty-nine of 'em, at last count) than every other remote access software package. Combined.

And now that LapLink is available for Windows® NT, you have every reason in the world to request one of our free, fully-functional trial packs.

Pick up the phone and dial 800-487-4396.

Or visit our website at [www.laplink.com/pcw](http://www.laplink.com/pcw).

It just might be the best move you'll make this year.

## HARDWARE TIPS

replace the old RS-232 serial port that connects your mouse and keyboard to your computer. Just about every new PC supports USB both in hardware, with chips on the motherboard, and in software, with OEM Service Release 2.1 of Windows 95 (and the upcoming Windows 98). USB peripherals can be daisy-chained (plugged into each other) for easy access.

A first wave of USB peripherals—including mice, keyboards, scanners, and monitors—should be available now, though vendors are still working out bugs.

The USB connector is a small, rectangular plug with no prongs to bend that slips into its own slot on the back of the PC (see **FIGURE 2**). If you want to build a new PC with USB support, you must either buy a motherboard that's already equipped with a USB chip set and connector, or buy a USB add-on card and plug it into an expansion slot on a non-USB motherboard. By the time you read this, CMD Technology (800/426-3832) should be offering a retail version of its PCI-based USB add-in board for \$59. It comes with drivers for all versions of Windows 95. If you buy a USB-equipped motherboard, it will probably have the new ATX form factor, so your old AT-style case may not fit.

### CUSTOMIZED KEYBOARDS

I JUST BOUGHT a new Windows 95 PC. My problem is that I'm accustomed to using the Dvorak keyboard layout. Will this work in Windows 95? And if so, how do I set it up?

Jeff Brine, Seattle

WINDOWS 95 supports a number of keyboard layouts, including the Dvorak design—an ergonomically less-demanding alternative to the standard Qwerty layout. To change the layout setting, launch the *Keyboard* applet in Windows' Control Panel, select the *Languages* tab (Windows 95 also supports several foreign languages), and click on *Properties*. You'll see a drop-down menu that lets you select the keyboard layout of your choice.

Kirk Steers is a PC World contributing editor. Hardware Tips welcomes your questions and pays \$50 for published items. See page 14 for contact information. ■

# Been There, Done That!

The FT15  
LCD multimedia monitor

1024 x 768 resolution  
14.5" diagonal view  
Amplified stereo speakers  
2.5" thin (without base)  
7.5 lb. light (without base)  
Easily detached base  
(FT15 also available in charcoal gray)

Our current model, the FT15, is Sceptre's 5th generation flat panel monitor. We definitely have been there and done that when it comes to providing LCD flat panel monitor solutions! Read what these people have to say about Sceptre:

"I was confronted with the problem of creating an easy to use, computer friendly workstation for our executives who demonstrate our Britannica Online®... I needed a monitor that was both technically and aesthetically appropriate ... Sceptre's LCD allows us to do everything we need to. The price was within our range as well. It's worked like a champ."

*Larry Merrick, Vice President, MIS  
Encyclopedia Britannica*

"I reviewed a few different flat panel monitors. Sceptre's was the best in terms of dimensions, features, and lack of interference. It was also the most realistically priced. It was a pretty easy choice."

*Richard Hinson, medical research scientist  
Wyeth-Ayerst Research*

To find out how a Sceptre LCD flat panel monitor can provide the solution to your challenge, visit our web site at:

# SCEPTRE®

The First, The Best, The Only

Circle 213 on reader service card

# Install a Second EIDE Hard Drive

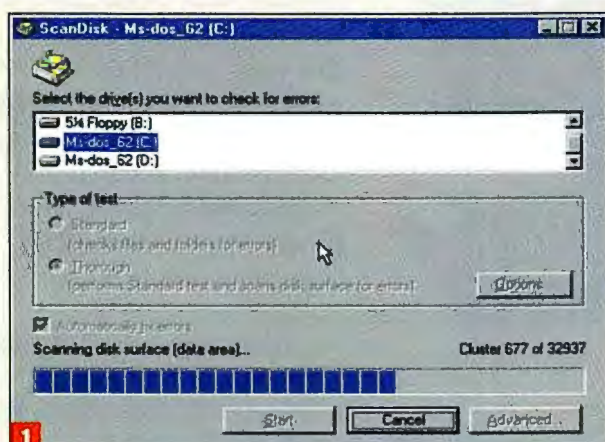

WORK EXPANDS to fill the time you give it, and your software and data expand to fill any hard drive you give yourself. So it's not surprising that installing a new hard drive is one of the most common upgrades—especially since prices continue to drop dramatically.

Today, the low end of the drive universe is a 1.6GB model, available for about \$180. But if you're going to increase your drive real estate, consider opting for the biggest drive you can afford. The current sweet spot of the drive market is 2.1GB at about \$210, while 3.1GB drives average \$230, 4.1GB models can be had for \$300, 5.1GB drives cost about \$385, and the current whopper, 6.4GB, runs some \$400.

These prices are for EIDE drives, the most common type in today's PCs. SCSI

drives offer better performance for some applications but are also much more expensive, starting at about \$250 for 2GB and \$370 for 4GB. Ultrahigh-performance SCSI drives that spin at higher speeds can be double the price. And you'll also need a SCSI add-in controller card, which is another \$150 to \$300.

If your PC is more than two years old and your existing hard drive smaller than 512MB, your BIOS may not be able to handle today's large drives. Check your

**Get prepared.** To make sure your existing drive contains no errors, run ScanDisk (Start•Programs•Accessories•System Tools•ScanDisk) and defragment your drive (Start•Programs•Accessories•System Tools•Disk Defragmenter). Then do a full backup of your existing hard drive.

Create a bootable DOS floppy disk—you'll need it to boot your system and access the new drive. To create it, put a blank floppy disk into your drive. Double-click on the My Computer icon; select the drive, and then File•Format. In the resulting dialog box, pick Full format and make sure to click the Copy system files box.

Before you start the drive installation, make sure you have the drive parameters (number of cylinders, sectors, and so on) for both the new and the old drives. If this information is not printed on the drives, you'll find it in the drive manual or on the manufacturer's Web site.

**Remove the old drive if necessary.** Turn off your PC, remove the cover, and disconnect the wide ribbon cable and power cable from your existing hard drive. Carefully note how the red wire on the ribbon cable meets the drive connector. Make sure there's a second connector on the ribbon cable and a free power connector; if not, you'll need to buy another ribbon cable and a Y-adaptor that makes two power connectors out of one.

If you plan to use your old drive as a second drive in your PC, you may not need to remove it. You will, however, need to have access to the drive's jumpers, and a place to mount your new drive so that both drives can be connected to the same ribbon cable.

If you need to remove the drive from the PC, this may be a simple matter of sliding it out, or you first may have to remove several screws. If the drive is on a slide-out bracket, remove the screws that hold the bracket.

Place the drive carefully on a flat surface. Unpack your new drive and place it next to the old drive.

**Set the drive jumpers.** EIDE drives are designated as master or slave. The old drive you just removed is a master, but if you plan to keep using it, you must change it to a slave using the jumpers on the drive. If you're lucky, a chart showing the correct jumper positions will be printed on the drive. If there's no such chart, you will need to pull out your original drive manual or go to the manufacturer's Web site.

Make sure your new drive is set as master. Note that some drives have a simple jumper setting for master, but others have different settings depending on whether the installation involves two drives.

system manual (which may or may not be of help). You can, however, still install a new drive by using software such as Disk Manager from Ontrack ([www.ontrack.com](http://www.ontrack.com)) or DrivePro from Micro House ([www.microhouse.com](http://www.microhouse.com)).

The Big Five makers of hard drives are IBM ([www.ibm.com](http://www.ibm.com)), Maxtor ([www.maxtor.com](http://www.maxtor.com)), Quantum ([www.quantum.com](http://www.quantum.com)), Seagate ([www.seagate.com](http://www.seagate.com)), and Western Digital ([www.wdc.com](http://www.wdc.com)). All hard drives today are vastly more reliable than they were a few years ago; the vendors say the average drive will outlast the average PC *World* reader. All major drive manufacturers offer multiyear warranties and no-questions-asked replacements.

Although the mechanics of installing a new hard drive aren't difficult, getting the operating system and then any applications and files from your original drive to the new one has been a thorny problem. (You'll probably want to keep your old drive, but for best performance, the new drive should be your primary resource.)

Sure, you do a full backup before you begin, but it's a hassle to restore—you need to reinstall Windows before you can reinstall the software to restore the backup. And although you can use the MS-DOS xcopy command, with an /h switch that copies system and hidden files, remember that xcopy doesn't handle Windows 95 long file names.

We've received a steady stream of complaints about problems in moving files manually between drives, and we now recommend you buy a utility that simplifies the final stages of installing your new hard drive, such as the \$30 DriveCopy from PowerQuest ([www.powerquest.com](http://www.powerquest.com), 800/379-2566). If, instead, you want to tackle this task on your own, check out last March's *Answer Line* for instructions.

Here's how to install your new hard drive. Before you start, read all the way through to make sure you've got everything you need.

Stan Miastkowski is a PC World contributing editor.

**Connect data and power cables.** Mount your new drive. You may need an adapter kit and a pair of drive rails to allow a 3.5-inch hard drive to fit into a 5.25-inch bay.

If you'll be using the second drive, but you need to remove it in Step 2, put it back now. Then connect the original ribbon cable and power connector to the new drive.

Even if you won't be using your old drive in your PC, you'll still need to connect it temporarily in order to copy files. Lay it carefully in a location where cables can reach it, but make sure that it doesn't contact the metal case.

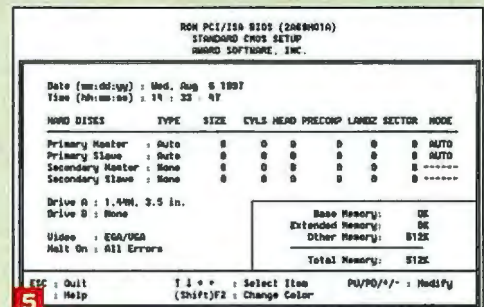

Whether it's back in the PC or outside, connect up the old drive: plug in a second connector on the ribbon cable, and then a power connector.

**Copy from the old drive to the new.** Start your PC using the bootable DOS floppy disk you created in Step 1. During the boot process, run your PC's setup program and set your BIOS for drives 1 and 2 to Auto, which should automatically detect the two drives. If your setup doesn't have an Auto option, you'll need to manually enter the parameters that you gathered in Step 1.

Save the setup settings and reboot using the floppy disk.

Insert the floppy disk with the disk copy program and run it. Follow the directions that appear on the screen.

Do an errand or make coffee—the copy process will take a while.

unless you want to save selected files as a backup. To format it, double-click on the *My Computer* icon, select the drive, and then select *File•Format*.

If you're ditching your old drive and your setup doesn't auto-detect drives, enter the setup and set Drive 2 to *None*. Otherwise, you'll get an error message when you start up. There's no need to change the BIOS if your PC auto-detects drives.

**Finish up.** When the disk copy software is finished, remove the floppy disk and restart your PC. It should boot up in the normal way. When you're sure everything's working correctly, turn off your PC, disconnect and remove your old drive if you won't be using it, and put the cover back on your PC.

If you're using your old drive as the second (D:) drive, it's a good idea to format it—cleaning it up to receive new data—instead of just erasing files,

**microsoft  
outlook 97**

**palm pilot**

# *out of synch?*

Just great! 3 days, 15 meetings and 9 new contacts later and you still haven't found time to copy all that new information from your PalmPilot into Outlook in your Office '97 suite. What's the point of a handy-dandy pocket-sized organizer if you can't get it to synch with any of the Microsoft programs on your PC?

## **DataViz knows the way.**

For one stop synching between your PalmPilot and Outlook 97 or Schedule Plus 7.0a, there's new **Desktop To Go™**, from DataViz, the file compatibility experts. **Desktop To Go** offers an easy way for your desktop contact management or scheduling software to synchronize with the PalmPilot's Address Book, Date Book, To Do List and Memo Pad. All recent additions, deletions or changes are automatically updated on the desktop and the PalmPilot. Only **Desktop To Go** offers you total control over how you synchronize your important data. Your choice, your way. And because we integrate fully with the PalmPilot's HotSync technology, your data updates are always just a push-button away.

For details, call 1.800.270.0030 ext.204 or visit our web site at <http://www.dataviz.com/pcw>  
And find out how to get your PalmPilot in synch with Microsoft.  
Runs on Windows 95 and Windows NT 4.0.

**Microsoft Office 97**  
Included with computer systems!

**COMPAQ**

**hp HEWLETT-PACKARD**

**TOSHIBA**

\*ViewSonic® 17" monitor included with desktop computers!

Appearance of awarded products may differ.

CDW is the #1 mail-order reseller of Compaq, Hewlett-Packard, IBM, Toshiba, ViewSonic and Microsoft.

## And to celebrate, we're giving away computer systems!

### Official rules

• Winners will receive a notebook or desktop computer from Compaq, Hewlett-Packard, IBM or Toshiba. Microsoft Office 97 Professional Edition with Bookshelf Basics included with awarded computer systems. ViewSonic monitors awarded with desktop computers only. No substitution of the prize is permitted. Due to changing market conditions, product awarded may differ from those featured in this advertisement. • The prize drawing will be conducted no later than February 28, 1998, from entries postmarked by January 9, 1998. Limit one entry per address. When you place an order, you are automatically entered to win. Or, enter via our site on the Internet World Wide Web: [www.cdw.com](http://www.cdw.com). Entries are also accepted via US Mail, with the convenient form on this page or a 3" x 5" piece of paper. All entries must include your name, company name (if any), address including zip code, and your daytime phone number. Entries must be mailed in a hand-addressed #10 (business size) envelope, with sufficient first class postage affixed. Mechanically reproduced entries or entries not meeting the above requirements will be disqualified. • CDW Computer Centers, Inc. will not be responsible for late, misdirected, lost, mutilated, destroyed or illegible entries. Winners will be selected in a random drawing. Prizes will be awarded and winners notified by mail. Potential winners must respond to the notification within 15 calendar days of mailing. Failure to respond within the 15 day period may result in disqualification and an alternate winner may be selected. Prize notifications returned as undeliverable will result in disqualification. Odds of winning will be determined by the number of eligible entries received. All prizes will be awarded. Winners must be U.S. residents and at least 21 years of age at the time of entry. • Employees of CDW and their immediate family members are not eligible. This contest is void where prohibited by law. Winner may not make any transfer or substitution of the awarded prize. Applicable federal, state and local taxes are the sole responsibility of the winner. All federal, state and local laws apply. Participants in this promotion agree to be bound by the official rules and decision of the judges. For a list of winners, after February 28, 1998 send a self-addressed, stamped envelope (SASE) to: CDW Computer Centers, Inc., CDW Winning IS Everything Giveaway, P.O. Box 8129, Vernon Hills IL 60061

A notebook or desktop computer system from Compaq, Hewlett-Packard, IBM or Toshiba could be yours, **FREE**, along with Microsoft Office 97 and a ViewSonic monitor\*! Just enter the winning **is** everything giveaway and win one of eight computer systems!

Three ways to enter!

One entry per address, please

- You're automatically entered when you order from CDW
- Enter on our web site at [www.cdw.com](http://www.cdw.com)
- or, use the entry form and mail to:

# Objective, easy, secure.

Shopping for hardware, even on the Internet, takes time and time is one thing you don't have. Now IDG, the publishers of *PCWorld*, *InfoWorld*, and *MacWorld*, bring you a one-stop web site that allows you to do it all. Use IDG's WebShopper to make objective purchase decisions in a completely secure and easy-to-use environment.

**Sign on to:**

- Compare world-class hardware products and prices
- Check product reviews
- Research manufacturers
- Take advantage of special discount offers
- And actually buy exactly what you need—all on one web site.

**With WebShopper, the entire world of products is at your fingertips. Try it now—it's the most objective, easy and secure way to get the job done.**

**THE NEW COMPUSA DIRECT**

## Advantage!

CompUSA Direct® offers the service, selection, and support necessary to satisfy all of your computing needs. We offer more than 130 store locations nationwide for: hassle-free drop-off technical service, product returns and exchanges.

- ✓ More than 50,000 products
- ✓ Knowledgeable, helpful service
- ✓ Guaranteed low pricing
- ✓ Same day shipping for second day delivery on in-stock items
- ✓ Professional on-site installation available at reasonable prices
- ✓ Custom configuration
- ✓ Free software installation with system purchase
- ✓ Toll-free technical support for hardware and software
- ✓ Hassle-free drop-off technical service at more than 130 CompUSA® Computer Superstore<sup>SM</sup> locations nationwide
- ✓ On-site technical service available
- ✓ Technology Assurance Program™ support/repair coverage
- ✓ Computer and software training at CompUSA training facilities (See store for details)
- ✓ Flexible payment plans
- ✓ Money-back satisfaction guaranteed (Call for details)

## NO PAYMENTS, NO INTEREST! FOR 6 MONTHS

Must be paid in full within 6 months from date of purchase. Minimum total purchase of \$299 is required. Offer valid until the next issue of this magazine or 60 days, whichever comes first. No Payments/No Interest Financing Details: Subject to credit approval. Applies to qualifying purchases made with the CompUSA consumer credit card. Accrued finance charges will be assessed from the original date of purchase if balance is not paid in full within six months. As of July 25, 1997, the CompUSA credit card annual percentage rate (APR) is 22.30%. APR's vary; minimum monthly finance charge of 1% may apply. Credit is provided by Beneficial National Bank USA.

We'll beat any legitimate price in the current issue of this magazine on every product we sell. CompUSA Direct® prices are available through mail order and the Internet and are valid until the next issue of this magazine, or 30 days from the issue date of this magazine, whichever comes first. Our low price guarantee pertains to new, factory sealed products of the same brand and model number that are available and in stock at any local authorized retail store. Our guarantee does not apply to competitors' one-of-a-kind or other limited-quantity offers, special financing, installation, manufacturer's rebate, or when a bonus or free offer is included in the purchase. Prices and specifications are subject to change without notice. We reserve the right to limit quantities. Any typographical, photographic, or production error in products, pricing or offers is subject to correction. Due to manufacturers' restrictions, certain products may not be eligible for international shipment, and certain products may not be available at retail stores. Monitor displays are simulated. Pentium and the Intel Inside and Pentium Processor logos are registered trademarks and MMX is a trademark of the Intel Corporation. Windows is a registered trademark of Microsoft in the U.S. and other countries. Packard Bell is a registered trademark of Packard Bell Electronics, Inc. IBM is a registered trademark and PowerPC, Aptiva and Total Image Video are trademarks of International Business Machines Corporation, used under license therefrom. All other trademarks are the property of their respective companies. Items other than software, returned within ten (10) days from the date of purchase with the original receipt or invoice, are eligible for refund or exchange. Unopened software may be returned within thirty (30) days for refund or exchange. Opened software may be returned for exchange only within ten (10) days from the date of purchase. A restocking fee will be charged on all returned items with missing boxes or packaging and returned printers with installed toner or inkjet cartridges. Refunds on purchases made with a credit card will only be credited to the same card. \*In Connecticut only, instant rather than mail-in rebate. Superstore Savings Direct To You, CompPrice, The Low Price Period and America's Largest Computer Superstore are service marks of CompUSA Management Company. ### Vectra VI Series PC

Hewlett-Packard's best-performing Pentium® processor PC.

CP5212: 166MHz Pentium® MMX processor, 16MB RAM, 1.6 GB HDD, 256KB cache, DT	\$1199
CP5225: 166MHz Pentium® MMX processor, 16MB RAM, 2.5 GB HDD, 512KB cache, MT	\$1299
CP5922: 200MHz Pentium® MMX processor, 32MB RAM, 2.5 GB HDD, 256KB cache, 24X CD, DT	\$1699
CP5923: 200MHz Pentium® MMX processor, 32MB RAM, 2.5 GB HDD, 512KB cache, 24X CD, MT	\$1749
CP5840: 233MHz Pentium® MMX processor, 32MB RAM, 4.0 GB HDD, 512KB cache, 24X CD, MT	\$1999

**New!**

### New HP Brio PCs

Designed for Businesses with Networking Needs. Business Models

BN4523: 166MHz Pentium® MMX processor, 16MB RAM, 2.1 GB HDD, 256K cache	\$999
BN4522: 200MHz Pentium® MMX processor, 16MB RAM, 2.1 GB HDD, 256K cache	\$1149
BN4518: 233MHz Pentium® MMX processor, 32MB RAM, 3.2 GB HDD, 256K cache	\$1469
<b>Advanced Business Models</b>	
BN4521: 166MHz Pentium® MMX processor, 16MB RAM, 2.1 GB HDD, 256KB cache, 16X CD-ROM	\$1169
BN4519: 200MHz Pentium® MMX processor, 32MB RAM, 2.1 GB HDD, 256K cache, 16X CD-ROM	\$1449
BN4516: 233MHz Pentium® MMX processor, 32MB RAM, 3.2 GB HDD, 256K cache, 24X	\$1689
<b>Communication Models</b>	
BN4520: 166MHz Pentium® MMX processor, 16MB RAM, 2.1 GB HDD, 256K cache, 16X CD-ROM, 56K Modem	\$1389
BN4517: 200MHz Pentium® MMX processor, 32MB RAM, 2.1 GB HDD, 256K cache, 24X CD-ROM 56K Modem	\$1649

### ACER EXTENSA 610CD

- 150MHz Pentium® Processor w/MMX
- 1.4GB HDD
- 16MB RAM
- 10X CD-ROM
- 11.3" SVGA DSTN Color Display

**ONLY \$1799!\***

CP4934

\*While supplies last

### NEW THINKPAD 380 ED

- 166MHz MMX Pentium® Processor
- 16MB RAM
- 2.1GB Hard Drive
- 20X CD-ROM
- 12.1" FRSTN

**ONLY \$2579!\***

CP5620

\*While supplies last

### COMPAQ ARMADA 1530DM

- 133MHz Pentium® Processor w/MMX
- 12X CD-ROM Drive
- 33.6Kbps Modem
- 16/80MB RAM
- 12.1" CSTN Display

**ONLY \$1999!\***

BN4466

\*While supplies last

**FREE 16MB Memory Upgrade!**

BN4525: 200MHz Pentium® MMX processor, 32MB RAM, 2.1 GB HDD, 256K cache, 24X CD-ROM, 56K Modem \$1769 || BN4524: 233MHz Pentium® MMX processor, 32MB RAM, 4.0GB HDD, 256K cache, 24X CD-ROM, 56K Modem | \$1889 |
| BN4515: 233MHz Pentium® MMX processor, 32MB RAM, 6.0GB HDD, 256K cache, 24X CD-ROM 56K Modem | \$2139 |

Monitor sold separately

### TOSHIBA

#### Equium Series

CP5392: MT, Equium 6260M, 266MHz Pentium® II MMX processor, 32MB RAM, 3.7GB HDD, 16X CD-ROM	\$2599
CP5631: DT, Equium 5230M, 233MHz Pentium® MMX processor, 32MB, 3.0GB HDD, 24X CD-ROM	\$1399
CP5747: DT, Equium 6230M, 233MHz Pentium® II MMX processor, 32MB, 3.0GB HDD, 24X CD-ROM	\$2249

Monitor sold separately

### Acer

#### NETWORK READY SYSTEMS

CP5702: 450MHz, 166MHz Pentium® MMX processor, 1.0GB HDD, 16MB RAM, 300M 3C509B	\$929
CP5698: 450MHz, 166MHz Pentium® MMX processor, 2.1GB HDD, 16MB RAM, 300M 3C905TX	\$999
CP5701: 450MHz, 200MHz Pentium® MMX processor, 2.1GB HDD, 32MB RAM, 300M 3C509TX	\$1299

Monitor sold separately

### MAXTOR 2.0GB HARD IDE HARD DRIVE KIT

For Only **\$159.95!\***

DR6843

\*Price reflects manufacturer's \$30 mail-in rebate. Ask for rebate certificate A06854

### IOMEGA JAZZ DRIVE INTERNAL DRIVE ONLY

**\$299.95!\***

DR4840

EXTERNAL SHOWN ONLY \$399.95 DR1119

### HEWLETT PACKARD DESKJET 672C

**ONLY \$199.95!\***

PR12302

\*4ppm • 600X600dpi black • 600X300dpi color

### LS-120 SuperDisk Drive External Parallel Port

**ONLY \$129.95\***

DR6756

\*Price reflects \$70 manufacturer's mail-in rebate. Ask for rebate certificate A06855. Rebate expires 12/31/97

### SPORTSTER 56K MODEM INTERNAL FOR ONLY

**\$147.99!\***

BN2130

Internal BN2130 EXTERNAL SHOWN BN2131 \$167.99

\*Price after \$50 manufacturer's mail-in rebate. Offer valid 7/1/97-1/1/98.

### CREATIVE PC-DVD ENCORE

**\$379.99!\***

DR6977

\*Stores 17GB of data, 25 times more than a standard CD! • Interfaces with Dolby® Digital Receiver for multi-channel audio • Reads DVD material at 24 speed and CD-ROM material at 20X speed

### DIGITAL MIVICA MVC-FD7

**ONLY \$699!\***

IN6403

\*640 x 480 Max. Resolution • 2.5 inch Color LCD • Stores images on 1.44MB floppy! • 10:1 Zoom

To order, call toll-free 24 hours a day, 7 days a week

**1-800-793-4958**

On the Internet:

[www.warehouse.com](http://www.warehouse.com)

Fax: 732-905-5245

Order until 12:00 midnight (E) weekdays for overnight delivery of "in stock" items — only \$9.95!\*

\*Shipping charge \$9.95 per order up to 7 lbs., \$1.25 per lb. over 7 lbs.

### Keep your PCs up & running with the 100% accurate fix...

**Micro-Scope** is a universal PC diagnostic that runs a proprietary O/S which eliminates DOS limitations and inaccuracies. Version 6.16 adds 25 enhancements and includes: IDE low-level format, accurate IRQ conflict display, cache memory test, 64 meg video memory test, data recovery capabilities, virus capabilities and super-fast hard drive testing.

**Post-Probe** is a universal P.O.S.T. (Power-On Self-Test) reader card for the "dead" PC. Post-Probe includes: MCA adapter, tri-state logic probe, 13 LED pre-POST test, 2-digit POST code display and a manual with a full explanation of the manufacturer POST codes down to the exact device or chip failure.

# Custom **ULTRA SCSI** Cables - Terminators - Cases

If you want Ultra SCSI Performance use our Teflon Cables & Active Terminators.

## SCSIVue™ Active Terminator

Four models available with optional Remote LED Pak. These are the finest terminators available, they fix SCSI problems and improve reliability.

- Benefits:**
- Improves SCSI Bus Performance
  - Less Errors, More Reliable Data Transfer
  - Diagnoses Problems • Analyzes Signal Quality
- Features:**
- Active Regulation • Fast 50 & Fast Wide 68
  - Status Indicators • Gold Contacts

## Active 2-1 SCSI Switch / Repeater

- Benefits:**
- Up to 14 Devices to 1 Computer
  - Share Devices Between 2 Computers
- Features:**
- 2-1 Active Digital Switch/Repeater
  - Regenerates SCSI Signal for Long Runs

## Gold Diagnostic Adapters

- Styles:** Gender Changers
- Both 50 pin and 68 pin (all combinations)

- Styles:** 68 pin Drive to 50 Bus
- 68 Pin Drive to 50 Pin IDC (runs wide drive as narrow)
  - 68 Pin Adapter Wide to 50 Pin Narrow
  - 68 Pin External Adapter to 50 Pin (converts Host Adapter)
  - 68 Pin to 50 Pin Centronics or 50 Pin MicroD Adapters

- Styles:** For Adapter Ultra Wide Cards
- Adapters with partial termination built in for 68 to 50 converters (converts Host Adapter)

Online Catalog at... [www.scsiopro.com](http://www.scsiopro.com)

## SCSIVue™ Gold Diagnostic Cables

- Benefits:**
- No Loss Of Important Data
  - Faster Performance
  - Test Cable Integrity
- Features:**
- Diagnostic Indicators • Large Ferrite Filters
  - Triple Shielding (Unique Design)
  - Double Gold 20u" Plated Connectors
  - Extra Heavy 26 Gauge Wire • 100 Styles in Stock

## Teflon 90 Ohm External Cables

- Benefits:**
- Ultra SCSI 40 MB/s operation
  - Fixes Ultra SCSI Cable Problems
- Features:**
- Perfect 90 Ohm Impedance Match
  - Triple Pronged Connector With Gold contacts

## Gold .8mm Ultra SCSI Cables

- Benefits:**
- Faster Performance
  - Test Cable Integrity
  - No Loss Of Important Data
- Features:**
- New .8mm Ultra SCSI Connector
  - Triple Shielding (Unique Design)
  - Double Gold 20u" Plated Connectors
  - Diagnostic Indicators • Large Ferrite Filters

## Granite Cables Are The Best Because They're Engineered Right.

Granite Cables were designed by SCSI Engineers to be the **Best Cables On The Market**. Everything about them means better performance and higher reliability. Our design incorporates an exclusive shield that protects the Acknowledge and Request lines from noise. Large Ferrite beads are installed on all cables to protect them from static and noise. Every cable incorporates a LED indicator that lets you know it is operating properly. We also use more **GOLD** on every cable. Add to this our impedance matching techniques and you have most of what makes us THE BEST!

Our knowledgeable SCSI Technicians will solve all your SCSI problems... guaranteed!

## Gold External Ultra SCSI Cases

- Styles:** SCSI Custom Teflon Cable Available
- Custom Enclosures in 1 Day for Raid & Arrays
- From: \$99**
- NEW! Temperature ALARM!** Automatic Monitor & Control

The Vertical 3.5" Case Kit offers a small transportable package. Ideally suited for moving around, this durable case can take a beating. Universal 35 Watt power supply.

The Horizontal 3.5" or 5.25" Case Kit Offers a stackable solution for any desktop need. Shown with Optional Bay Cooler installed.

- Open Face and Closed Face Models Available**
- Optional 50 or 68 Pin Teflon Cables Available
- NEW Accessories!**
- Bay Cooler Kit keeps those HOT Ultra SCSI Drives COLD as ICE!
  - Dual Fan & Bracket \$29
  - HOT SWAP Pull Out Bays
  - Compatible with all 50 pin & 68 pin SCSI Buses up to Fast SCSI 2. **From: \$79.00**

## Custom Teflon™ Internal Cables

- Benefits:**
- Less Errors, Ultimate Performance
  - Silver Wire Improves Signal Quality
- Features:**
- Perfect 90 Ohm Impedance • Custom in 1 Day
  - Triple Pronged Connector • Gold contacts Silver Wire

68 Pin Internal Cables, custom or stock, from 1 to 15 SCSI devices per cable. We can also make Custom 68 pin and 50 pin Combination Cables that allow you to use narrow drives on a wide cable.

## Active Digital SCSI Repeater

- From: \$139**
- Benefits:**
- Models for all SCSI types
  - Fixes SCSI Cable Problems
- Features:**
- Doubles Cable Length (up to 18')
  - Active Termination and Signal Purification
  - Ultra Fast Performance for Added Capabilities
  - Diagnostic Capabilities • 30u" Gold Contacts

## OEM SCSI Repeater

If you integrate SCSI Raid or Arrays and are having problems making it work, the Granite SCSI Repeater will make it work. Designed to fit inside any computer or external case.

## SCSI Cable Tester - LED Readout

This Digital SCSI Cable Tester can test all the popular cable styles for opens, shorts, and unreliable operation. Battery powered for easy use anywhere you need it.

Three models to choose from:

- 50 pin IDC
- 50 pin Centronics
- 68 pin MicroD

**From: \$49**

## Projectavision Digital Office Theater

Five-foot rear-screen projection housing with removable DLP projector.

- Stable, crystal clear, flicker free
- 2-chip DLP light engine
- 800x600 SVGA resolution
- Project up to 260 diag. inches
- Stereo speakers
- S-Video/cable TV capable

**\$10,000** complete system

Open tilt-out drawer and easily remove the DLP projector for portable desktop presentations.

# BOXLIGHT has big things in store for you.

(laptop not included, shown for scale)

## Plasmavision 42

Yesterday it was a dream. Today it's a reality. Imagine a 42 Inch (diag) plasma display, with 160° viewing angle, in a housing only 6 inches thick.

- VGA, SVGA and Macintosh
- 16:9 aspect ratio
- Ideal for tradeshow exhibits
- Only 6 inches thick
- Bright from any angle, up to 160°
- Built-in stereo speakers
- NTSC, PAL and SECAM
- Ideal for conference rooms

**\$Call** for today's low price

We know your customers are bombarded by information. We know it's hard to stand out in the crowd. You've always relied on BOXLIGHT to offer the widest variety of electronic presentation equipment at great prices. Now, we've added the "wow."

Our two NEW large screen display units create an impact that will grab and hold attention whether in a busy public place, the drabest of board rooms, or your employee training center. They are affordable, easily assembled, simple to use—and an extraordinary addition to your visual communication tool chest.

### Buy with confidence.

We select products that meet our demanding standards for image quality, ease-of-use and reliability. Through field trials and continuous quality inspections, we ensure that you get the best products the industry has to offer. Period.

## The Finest PC Circuit Boards!!!

the nation's largest full-line PC circuit board specific manufacturer and distributor caters to individuals and businesses interested in only the finest hardware and service at the best price, provided by a long term, financially stable company. For over a decade, we at HSB have earned our standing as the most reputable circuit board manufacturer and distributor in the industry. Don't make the mistake of buying 'Throw-Away' circuit boards from a company without any long term commitment to your satisfaction. If we sound like what you're looking for, please give us a call at...

**(800) 497-0401**

or

**www.HSB-Labs.com**

### HSB 64-Bit AT and ATX MainBoards

Our MainBoards are the finest on the market, designed from the ground up to compete head-to-head with the most expensive and sophisticated designs available. Whether you're thinking of upgrading your existing system, or building a new one from scratch, you can't go wrong with HSB...

## We Make Your Buying Decisions Easy!!!

With HSB you'll receive:

- ✓ The absolute best price. In over a decade, HSB has never been beaten on price. If you happen to come across a better price on a comparable product, we'll beat it. No questions asked...
- ✓ A full 2 to 5 year circuit board warranty paired with a limited lifetime warranty on all 'Turbo' SIMM's, DIMM's and CPU's. Furthermore, we've always provided our customers with a full 60 day 100% money-back guarantee and no restocking charges...
- ✓ Free technical support along with a non-commissioned sales staff. No one makes it easier to buy and install your componentry than HSB. Even our owner's manuals are the best you'll find anywhere...

Please call for up to the minute pricing or to receive our latest full color catalog...

## Workstation Setups Got You Down?

...Now even I can setup and load Windows 95 or NT to 16 systems in **ONE MINUTE!**

Used by hundreds of Fortune 1000 companies!

**Simple!**

Introducing the **NEW**

**Image MASSTER 2000**

Hard Drive Duplication and Diagnostic System

- Loads up to 16 hard drives simultaneously with optional IM2000x expansion units.
- Copies any OS including: Windows 95, NT, DOS, UNIX, OS/2, and Mac OS
- Data transfer rate up to 300 MB/min!
- Mix different drive sizes and models in the same load
- Single master drive can hold several different software loads
- Standalone, but can also be attached to a PC or notebook for added functionality
- Extensive read-after-write data verification and error reporting
- System Options include: Network, Partition Manager, Diagnostics, Multi-MASSTER, WipeOut, and Database
- Adapters available to fit many OEM notebook & PCMCIA drives
- Systems also available for IDE and SCSI drives in two and four drive models.

It's Portable Too!

The perfect MIS tool for system setup, upgrades, and OS rollouts

### Statement of Ownership, Management, and Circulation Required by 39 U.S.C. 3685

1. PC World Magazine
2. Pub. No. 07378939
3. Date of filing: October 16, 1997
4. Published monthly
5. No. of issues published annually: 12
6. Annual subscription price: \$29.90
7. Known office of publication: 501 Second St. #600, San Francisco, CA 94107
8. Complete mailing address of the headquarters or the general business office of the publisher: PC WORLD COMMUNICATIONS, INC., 501 Second St. #600, San Francisco, CA 94107
9. The names and addresses of the publisher, editorial director, editor in chief, and managing editor are Publisher: Jeff Edman, PC WORLD COMMUNICATIONS, INC., 501 Second St. #600, San Francisco, CA 94107; Editorial Director: Philip Lemmons, PC WORLD COMMUNICATIONS, INC., 501 Second St. #600, San Francisco, CA 94107; Editor in Chief: Cathryn Baskin, PC WORLD COMMUNICATIONS, INC., 501 Second St. #600, San Francisco, CA 94107; Managing Editor: Luis Camus, PC WORLD COMMUNICATIONS, INC., 501 Second St. #600, San Francisco, CA 94107
10. The owner is: International Data Group, Inc., Patrick McGovern, 5 Speen St., Framingham, MA 01701. The names and addresses of stockholders owning or holding 1% or more of the total amount of stock are listed below.
11. There are no known bondholders, mortgagees, or other security holders.
12. Extent and nature of circulation  
Average no. copies each issue during preceding 12 months: A. Total no. copies (net press run), 1,456,493; B. Paid and/or requested circulation 1. Sales through dealers and carriers, street vendors, and counter sales, 160,022; 2. Paid or requested mail subscriptions, 1,089,608; C. Total paid and/or requested circulation (sum of 12B1 and 12B2), 1,249,630; D. Free distribution by mail (samples, complimentary, and other free), 6,923; E. Free distribution outside the mail (carriers or other means), 2,500; F. Total free distribution (sum of D and E), 9,423; G. Total distribution (sum of C and F), 1,259,053; H. Copies not distributed 1. Office use, left over, spoiled, 7,593; 2. Return from news agents, 189,848; I. Total (Sum of G, H1, and H2), 1,456,493. Percent paid and/or requested circulation, 99.25 (C divided by G multiplied by 100).

Actual no. copies of single issue published nearest to filing date: A. Total no. copies (net press run), 1,357,348; B. Paid and/or requested circulation 1. Sales through dealers and carriers, street vendors, and counter sales, 160,000; 2. Paid or requested mail subscriptions, 992,121; C. Total paid and/or requested circulation (sum of 12B1 and 12B2), 1,152,121; D. Free distribution by mail (samples, complimentary, and other free), 7,489; E. Free distribution outside the mail (carriers or other means), none; F. Total free distribution (sum of D and E), 7,489; G. Total distribution (sum of C and F), 1,159,610; H. Copies not distributed 1. Office use, left over, spoiled, 6,000; 2. Return from News Agents, 191,738; I. Total (Sum of G, H1, and H2), 1,357,348. Percent paid and/or requested circulation, 99.35 (C divided by G multiplied by 100).

13. I certify that the statements made by me above are correct and complete.  
Jeff Edman, Publisher

**ALL RIGHT ALREADY,** so a U.S. Savings Bond isn't the most exciting thing in the world. **GOOD FOR YOU!** After all, this is your hard-earned money we're talking about. Do you really want your investments to be thrilling? Breathtaking? **NO WAY.** Wouldn't you rather have an investment that's guaranteed to grow, one that's backed by the full faith and credit of the United States government? **Sure you would. U.S. Savings Bonds. Yawn all the way to the bank!**

**U.S. SAVINGS BONDS**

A public service of this magazine

## Figures for Monday's presentation. They're right in your hand.

Whatever's important to you — appointments, contacts, e-mail, expense tracking — the pocket-sized PalmPilot™ connected organizer makes it easy to stay on top of things. It lets you enter, access, and update the information you need,

whenever you need it. You only have to enter data once —

HotSync™ technology lets you synchronize data with your PC with just the touch of a button. And when you're on the road, use Network HotSync™ software to synchronize with your PC over the company network. For a PalmPilot retailer near you, visit our web site at [www.palmpilot.com](http://www.palmpilot.com) or call 1-800-881-7256, ext. 12. Now that's a

number you'll want to keep on hand.

# PalmPilot™

The connected organizer.

#### PalmPilot Personal - \$249

- Instantly syncs with your PC
- Stores thousands of entries
- User upgradeable to Professional Edition

#### PalmPilot Professional - \$368

(Includes Personal features *plus*)

- E-mail connectivity
- Internet ready (TCP/IP support)
- Twice the memory

#### Optional links (sold separately) available for

- MS Schedule+/Outlook 97
- Lotus Organizer
- Ascend 97
- Symantec ACT!
- and many more

#### Compatible with:

- Eudora 3.0.1 or higher
- cc:Mail
- MS Mail/Exchange
- MS Outlook 97
- and many more

### 3Com®

All prices U.S. list prices. PalmPilot MacPac, required for Macintosh connectivity, sold separately for \$14.95. Expense and Mail applications and some links to desktop software not supported on Macintosh. Mail and Network HotSync supported on Professional Edition only. Network HotSync software optional and sold separately for \$89. Remote synchronization may require a modem, sold separately. © 1997 3Com Corporation. # 1997: A Pretty Good Year for Hardware

MAYBE IT'S THE HOLIDAY SPIRIT. Maybe it's one party toast too many. Maybe I've just watched *It's a Wonderful Life* once too often. But as I look back on the past year in computerdom, even the Scrooge in me has to admit it's been a pretty good one.

As usual, software innovations lagged far behind hardware advances. The happy exception was the long-awaited advent of dictation software that lets you use continuous speech and a broad vocabulary—first delivered by Dragon Systems' NaturallySpeaking software. But even that breakthrough—in my view, the year's most important—was made possible by today's faster PCs with lots of memory and big, fast hard drives.

## PRICES PLUMMET

BETTER YET, the cost of hardware has been in free fall. The cheapest PC you can buy today is much faster than the top-of-the-line model that cost me three times as much just three years ago. The big news isn't the rapid increase in performance—that's been happening for years—but PC makers' willingness to cut prices and offer decent machines for under \$1000.

The explosion of reasonably priced laptops has been another boon. Nowadays, \$2500 will get you a notebook computer that does everything you want it to. Even the way-below-\$2000 market offers lots of good values. The vast

majority of users simply never will need the power and features that are stuffed into the expensive top-of-the-line models, which I call "executive vanity appliances."

Other price cuts have been almost as important. Memory is so cheap you can stock up on it to squeeze another few months of useful life out of an old clunker. Monitor prices have not dropped anywhere near as fast, but excellent 17-inch units now cost hundreds of dollars less than they did not so long ago.

This was also the year that digital imaging came of age for the average user. Improvements in color ink jet printers over the past few years have been remarkable, but this year the best ones from

The big news isn't the rapid increase in performance, but PC makers' offering decent machines for under \$1000.

Hewlett-Packard and Epson became so good they can produce output that fools you into thinking you're looking at a photograph. They even do it at acceptable speeds.

Scanners that do a decent job with both color and monochrome images have become cheaper than ever. And \$500 will buy Hewlett-Packard's PhotoSmart scanner, which can produce stunning images from negatives and slides—if you can get past the tricky installation process and the glitches in the software.

## PICTURE IMPERFECT

LOW-COST DIGITAL CAMERAS have improved in the past year, but they remain the weak link in the imaging chain. Their output is no match for film, but they can be handy if you need a small, quick shot for a newsletter or Web site. Features like LCD preview screens, zoom lenses, removable memory, and higher-resolution images are becoming common, but the current situation reminds me of the ink jet printer market a few years ago. Digital cameras are still in their infancy and will likely get a lot better soon.

I'm more bullish on tiny devices. Franklin Electronic Publishers' REX, the personal-information-manager-on-a-PC-Card, set a new standard of teensiness by keeping you from entering data on it directly. At the other end of the gizmo scale, the new Psion Series 5 has a keyboard you can actually type on. But the PC-side apps for both devices leave much to be desired.

And how could we forget the ActiMates Interactive Barney? This plush stuffed dinosaur moves his head and arms, talks, and even plays peekaboo; a built-in radio transceiver lets His Purpleness communicate with CD-ROM based software for kids. And that's just the start. Spending \$100 on Barney gives you the chance

to spend hundreds more on software and transmitters for your TV and computer. But the critter is just so darned cute, I've seen it charm the socks off even crusty, hard-bitten Microsoft haters.

Which brings us to the year in software, about which the less said, the better. All in all it's been a pretty good year in the land of computing, but as Ebenezer Scrooge's descendants might put it: Bah, humbug. Software still sucks.

PC World contributing editor Stephen Manes is a columnist for the New York Times and one-half of the Digital Duo, airing on public television stations nationwide.

PC World® (ISSN 0737-8939) is published monthly at \$29.90 for one year (12 issues), \$59.80 for two years (24 issues), \$89.70 for three years (36 issues) by PC World Communications, Inc., 501 Second St., #600, San Francisco, CA 94107. ## THE DELL INSPIRON 3000 NOTEBOOK OFFERS A 233MHz PROCESSOR AND 13.3" XGA SCREEN FOR UNDER \$4000.

Finally. A notebook with a feature set that's really rich, but priced so you don't have to be. In the new Dell<sup>®</sup> Inspiron<sup>™</sup> 3000 M233XT, you'll find a 233MHz Pentium<sup>®</sup> processor with MMX<sup>™</sup> technology, the fastest mobile Pentium processor available. And a 13.3" XGA TFT screen, with up to 21% larger viewing area than a 12.1" screen. But we've pushed it beyond just a notebook with a fancy processor and a wide screen. Because now you can hit the road with

full multimedia capabilities. From the high-performance SDRAM memory and the NeoMagic video card to the awesome 3D Surround Sound and Yamaha Software Wavetable, we've taken this notebook to the highest tier of mobile performance. And yet it still comes in under seven pounds. So give us a call or visit our website. And pretty soon you'll be going places.

You'll be doing a double-take once you've seen the new Dell Dimension® XPS D266. Because it's more than just a 266 megahertz demon. We've armed this Intel Pentium® II processor-based system with the new STB nVidia 4MB AGP card, boosting 3D graphics performance a whopping 317% over the STB Nitro 4MB PCI video card. And faster graphics means more realistic and more lifelike graphics. On this Dell Dimension XPS D266, design,

CAD/CAM, virtual reality imaging, web content development, games and just about any other 3D application will blow you away. We've also included high-speed SDRAM memory that "bursts" data twice as fast as EDO memory, and a 6.4GB Ultra ATA hard drive (up to 8.4GB available) with two times the data transfer rate of a non-ATA hard drive. So give us a call or visit our website today.
